JAPAN HERALD, AND JOURNAL OF THE EASTERN ARCHIPELAGO.

PUBLISHED ON ARRIVAL OF THE MAILS, about the 4th, 14th, and 28th, in connection with the "LONDON AND CHINA EXPRESS,"
A SUMMARY OF NEWS FOR THE OUTWARD MAILS OF 10th, 17th, and 26th.

VOL. VI.—No. 124.] LONDON, SATURDAY, JAN. 9, 1864. [Sub. 30s. per ann., and 12s. to Supplement. Single copy of either 9d.

SUBSCRIPTIONS FOR 1864.

The present number commences Volume VI. for 1864, which will consist of two numbers per month, published on arrival of the P. and O. mails, and one per French mail. Subscriptions, payable in advance, £2. 2s. per annum, including Import and Export Supplement, and postage; without Supplement, 30s. Post-office orders to be made payable to the Publisher, JOHN ELLISON, at the Lombard-street Office.

Office, 12, George-yard, Lombard-street, E.C.

THE OVER-DUE MAILS.

We gave in our last the intelligence of the detention of the mails due here on the 27th December. We have now the pleasure to announce that the P. and O. Co.'s steamer *Rangoon*, which grounded in the Red Sea, arrived safely at Aden, and has proceeded to Calcutta to be docked.

The French mail steamer, with dates from Shanghai to the 20th Nov., Hong Kong 26th Nov., has also arrived. The following mails from China, due here on the 13th inst., with dates from Hong Kong to the 1st Dec., and Shanghai 24th Nov., has also been brought on by the French Mail steamer and delivered this day, 38 days from Hong Kong.

List of Passengers.

PASSENGERS INWARD.

By next mail, to Marseilles, per Valetta, arrived Jan. 7.—From Hong Kong: Mr. H. Lowcock.—From Kanagawa: Mr. Broadbent.—From Penang: Mrs. Stevenson, three children, and two servants. To Southampton, per Ripon, expected to arrive Jan. 13.—From Hong Kong: Mr. G. B. Swain, Mrs. Mitchell, Donald McAlister.—From Singapore: Mr. H. Waterworth. To Gibraltar.—From Hong Kong: Mr. Victor Bustillo.—From Singapore: D. C. Cabreira. To Suez, per Sultan, arrived Dec. 27.—From Singapore: Messrs. Kock and Floper.

Per Candia, arrived at Suez Dec. 30. For Marseilles, per Euxine, expected on 11th.—From Shanghai: Mr. Brockubank and native female servant, Commander Forbes.—From Hong Kong: Messrs. McDonall, Wheely, and Simpson. For Southampton, per Poonah.—From Shanghai: Mr. Carlile, Mrs. Gingell, Commander Forbes, European man servant, T. Yaxley.—From Hong Kong: Messrs. Mayer, Kratle, and Macdougall.

Per last Bombay mail. To Alexandria.—From Bombay and Singapore: Mr. E.

PASSENGERS OUTWARD.

By this mail, per Pera, Jan. 4, from Southampton.—To Shanghai: Mr. A. O. Vidal, Mr. Slie, Mr. J. R. Green, Mr. W. A. Hague.—To Hong Kong: Mr. D. L. Hunter, Mr. J. Roberts, Mr. J. Rogers, Messrs. T. Haywood, H. A. Palmer, M. Harris, E. L. Williams, Ringer and Glasspole, Mr. J. W. E. Bacon, R.N. Mr. W. H. Dalrymple, Mr. Anderson, Mrs. Wright, Mr. C. H. Hamann, Arthur Judd.—To Calcutta: L. H. Clark, Mr. J. H. Salt, Mr and Mrs. H. G. Poynter and servant, Mr. E. Vivian, Mrs. Kenny, two daughters, and servant, Capts. F. C. Trent and Lovett, Capt. and Mrs. Stainforth, infant, child, and servant, Mr. R. N. Farquharson, Mr. C. Simson and servant, Misses Dempster and Macintyre, Mr. F. Robertson, Lieut. and Mrs. Ommaney, Mr. Jno. Tate, armoury sergeants Rhodes and Rowe and wives, Messrs. H. G. Jervis and G. Hobson, Miss Divers, Mrs. Beatson, Miss H. B. Gillan, Rev. A. Norris, Mrs. Renny, two children, and ayah, Messrs. Cunningham and Peyton, Mrs. Scott, Messrs. J. Tripe, A. Forbes, W. H. L. Frith, and C. Lea, Dr. Summers, Messrs. Sadlier, F. H. M. Brown, A. I. M'Queen and W. H. Hinde, Mr. and Mrs. West and infant, Mrs. Vinton.—To Madras: Lieut. and Mrs. Laire, Major Briggs, armoury-sergeant Paramour, wife, and three children, Mrs. Smith, Major Smith, armoury-sergeant T. Collins, Mr. W. Hugo, Capt. and Mrs. Harrington, Mr. T. M. R. Jones, Mrs. Collins.—To Ceylon: Mr. C. E. and Miss Temple, Capt. J. H. Wilson, Mr. and Mrs. F. A. Carson and two infants, W. Scott, Mr. W. H. Hawkes, Capt. and Mrs. Woolsey, child, and servant, Messrs. H. T. Baird and J. E. Saul.—To Alexandria: Mr. J. A. and Mrs. Campbell, Miss Betts and two servants, Mr. T. Evans, Miss Ranken, Mr. G. Follett, Mr. D. Follett and servant, W. Warren, Ali Hassan.

From Marseilles, per Valetta, to leave Jan. 12.—To Hong Kong: Mr. E. Jenner Hogg, Mr. J. Anderson, Mr. H. Harris, Mr. and Mrs. T. D. Boyd, Mr. W. Marsh-Cooper, Mr. C. W. Orme, Mr. Blain.—To Shanghai: Sir Harry Parkes, Mr. J. E. D. Jameson, Mr. Leith.—To Singapore: Mr. Masfen.—To Calcutta: Major and Mrs. J. S. Davies, Miss Field, Mr. H. B. Lawford, Mr. and Mrs. A. Walker and servant, Mrs. Shakespeare, Miss Ward, Mr. M. Henderson, Capt. and Mrs. Davies, Mr. R. J. Richardson, Capt. and Mrs. Maister, Mr. Carpmael, C. Trevor and E. T. Fitzgerald, Mrs. Dickens, Mrs. and Miss Tickell. Mr. E. Tye, Mrs. Whittall and two infants, Mrs. T. & Green, C. Fleming and R. Gladstone. Lieut. F. H. Woodgate, Mr. and Mrs. Oakeley, Mr. P. F. Waite.—To Madras: Dr. Smith, Mr. W. D. Henderson, Capt. Ready.—From Malta, to Calcutta: Lieut.-Col. Johnson.—To Shanghai: Mr. P. Protchino.—From Suez, to Hong Kong: Mr. and Mrs. Nissen, Mr. L. Mendel.—To Calcutta: Capt. Slade.—To Ceylon: Dr. Anthonizs.

Per P. and O. steamer, Jan. 20, from Marseilles.—To Alexandria, en route to Shanghai, per mail 20th Jan., from Southampton: Mr. H. Blandford. To Singapore via Bombay: Messrs. N. P. and H. Y. P. Van den Berg.

Per P. and O. str. Ceylon, Jan. 20, from Southampton.—To Hong Kong: Mr Harton-Mr. H. Kilby, Mr. J. H. Wilson.—To Shanghai: Mr. Dixon, Mr. Gilmour. To Singapore: Mr. Wyon, Mr. Robert Campbell. From Marseilles, Jan. 28.—To Hong Kong: Mr. Houston, Mr. and Mrs. Odell.—To Shanghai: Mr. J. Palmer, jun., Mr. Arthur C. Oliphant, Mr. and Mrs. Rowley Miller, Mr. Barber. From Marseilles.—To Singapore: Capt. P. P. Stafford, Capt. W. Mansfield, Mr. J. S. Dick. From Gibraltar.—To Hong Kong: Don Domingo, A. Y. Urquido. From Suez.—To Hong Kong: Mr. Jas. Whittall.

Per P. and O. str., 12th Feb., from Marseilles.—To Penang: Mr. and Mrs. Friedrichs.—To Hong Kong: Mr. Borradaile.—To Shanghai: Mr. W. D. Gerard.

Per P. and O. steamer, Feb. 20, from Southampton.—To Hong Kong: Mr. G. E. Stokes, Mr. B. A. Clarke. From Marseilles, Feb. 28.—To Hong Kong: Messrs. E Howe, A. Howe, and Fearon.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Our advices confirm entirely the intelligence, already transmitted in brief by telegraph, that Satsuma has admitted his offences, and that the claims made on him by the British Government for reparation to the representatives of Mr. Richardson, and all other matters in dispute, will be satisfactorily arranged. Our letters do not give the details of the arrangement, but if, as we hope, the conference between Colonel Neale and Satsuma's envoys led to a definite conclusion, we may expect that Earl Russell will allow no delay in communicating the official despatches to the public at large.

The *Japan Herald* gives the following as the substance of so much as had transpired at Yokohama:—

"An interview having been sought by envoys from Satsuma with the British Chargé D'Affaires, and the request having been sent through the Governors, his Excellency consented, and appointed Monday, the 9th of November, for the conference. The appointment was duly kept by several of the Prince's high officers (accompanied by some of the Government officers), and an interview took place which lasted from about half-past one till nearly five o'clock.

"The envoys commenced by representing to Colonel Neale that Satsuma felt much that he had been harshly dealt with in

Digitized by Google

the seizure and destruction of his steamers at Kagosima without due notice of the intention of the Admiral to destroy them. This opened the matter, and Colonel Neale replied by passing in review the whole of the Kagosima affair; pointing out that the British squadron had proceeded there for the purpose of negotiating upon the matter of satisfaction required for the murder of Mr. Richardson and the attack upon his companions; that during the long delay that had elapsed before sending any reply, the squadron had had occasion to shift its anchorage; that the reply, when it did arrive, was of a character which rendered some pledge or hostage necessary to compel, and during further negotiations; that with this view and for this purpose the steamers had been taken possession of, and not with any intention of destroying them or of taking them away, but that the Prince's people had themselves commenced the hostilities by firing on the British ships, and that, therefore, the destruction of the steamers was a consequence of their own act at the time.

"It seems that the Prince's envoys quite appreciated, after the explanation given, the patience and moderation exercised by the British Minister and Admiral on the occasion. It was then seen that this could only be a preliminary interview, and the ground being thus partially cleared the envoys left, asking an appointment for another occasion, which was given for the following Saturday, the 14th. On that day Colonel Neale again gave audience to the envoys, but after several hours' patient sitting no definite conclusion was arrived at, and Col. Neale consenting to one more adjournment, it was resumed on the following day, when the conference lasted from shortly after mid-day to nearly six o'clock P.M.

"Our readers will be gratified to learn that terms of arrangement have been definitely agreed upon, of a nature which the British Chargé d'Affaires considers are all he could have anticipated, and which are of an entirely satisfactory character. These were made and distinctly understood in the presence of the Japanese high Government officials who accompanied the envoys. A vast amount of propositions had, however, to be first encountered, combated, and declined; propositions, some for delay, some for an acknowledgment of wrong-doing in the seizure of the steamers, and others of an equally inadmissible character; but they were, as we have said, ultimately reduced into an entirely satisfactory compass, and are to be finally carried out and completed in a few days. His Excellency has every belief that they will be so concluded.

"So far has this, our former antagonist, shown himself inclined to bear future friendly relations with us, that proposals were even made for arrangement for sending to England some of the young men of the nobility of his territory, for travel and education."

Our contemporary publishes the above statement, with Col. Neale's permission, from information communicated by himself. No possible doubt, therefore, can attach to its accuracy.

It will be recollected that at the time when the British Chargé d'Affaires was pressing for reparation for the outrage committed on British subjects upon the Tokardo, on the 24th of September of last year, just at the moment when difficulties appeared to be clearing away, and the Japanese Government had actually paid the money-indemnity demanded, by the publication of a document, known from the name of the official whose signature it bore as Ongassawara's "letter of expulsion." This announcement was simply to the effect that the Ministers at Yedo had been instructed by the Tycoon, then at Miako, with the carrying out of the instructions of the Emperor, that "Japan should be closed to foreign trade, and foreigners put away from the country, and that full powers had been given him to treat upon and negociate the terms." The exact words in which this document was replied to by the European representatives have never transpired, but it was at least treated as its very extraordinary character deserved, and the idea of not holding any conference or entering upon any negotiation on the subject has been consistently adhered to. During the course of the interview with Satsuma's officers, just related, Col. Neale took an opportunity to explain to the Government functionaries who accompanied them, that his Government had given the most unequivocal approval of the indignant manner in which this communication had been received. "This seems," observes the *Japan Herald*, "to have come in very opportunely immediately after a remarkably cool attempt made by the Government to commence the erection of forts and batteries under our very doors had been repulsed in a particularly firm and determined manner by the British and French Admirals, and was followed by a formal communication to the Ministers of those nations of the intelligence, conveyed in a very by-the-bye sort of fashion to the American and Dutch Ministers a fortnight ago. This very fact, that it did not seem to the Gorogio necessary to communicate the withdrawal of this letter in a formal manner to all the Foreign Ministers immediately after its recantation had been determined on, shows how little the Japanese Government had ever supposed that the slightest attention would be paid to it; and, as it seems to us, indicates at least a hope of change in their policy of attempting to pass off as serious any more such really extravagant notions upon so important a matter."

At the conference referred to with the American and Dutch Ministers the business, we learn, was not commenced by the Gorogio stating that Ongassawara's letter of expulsion would be withdrawn, but it was on the Japanese officials introducing, or attempting to introduce, the novel idea of the closing of Yokohama, and the transfer of all foreign commerce to Nagasaki and Hokodadi, and General Pruyn and Mr. Polsbrock assuring them that no communication even upon such a subject could be received until Ongassawara's letter was withdrawn, that they then said it should be withdrawn.

There are other little facts which show clearly that the Japanese Government feels that the people at large are anxious for foreign commerce, and entertain a feeling totally opposite to repugnance at their presence. At Yedo the report has spread amongst the populace that matters in respect to the foreigners have been settled with the Government, and that further attempts are not to be made at present for their expulsion, and there is great rejoicing thereat. Notices, too, have been posted in all quarters of Yedo, signed by the street governors "by order," to the effect that hitherto the Government had seen it necessary to inspect and keep control over the amount of supplies sent into the foreign market, but that, in future, this would be left to regulate itself by the feeling of the people, each one in his own mind.

A notice has been issued from the French Legation provisionally sequestrating lots 60 and 61 of the French concession. It appears that Frenchmen are forbid to sell or let lots conceded to them to persons not Frenchmen.

We learn from the Hong Kong *Daily Press* that Messrs. Russell and Co.'s steamer *Scotland* has been seized by the Chinese Custom-house authorities on the charge of taking in cargo at a port not opened by treaty. H.M.'s *Scout* effected the capture on the 30th ult., and on boarding four junks which were lying alongside the *Scotland*, found some seventy or eighty pieces of cannon, from 19 to 68-pounders. It is asserted that these munitions were intended for the Tycoon's Government, but the suspicion which rests over the *Scotland's* last trip renders it likely that Kagosima and not Yokohama was her destination. It is said that the house of Russell and Co. is not in the least implicated in the affair, and that, if at all compromised by it, they will owe a debt to the junior members of their hong.

It will be remembered that there was much jubilation in the American press some time back over the conception that, if matters came to an open rupture between Great Britain and Japan, it would be a delightful and profitable adventure to take out letters of marque from Japan, and gratify the desire for vengeance, and the lust of speedy enrichment, by plundering British commerce under that license. Can it be possible that this shipment of heavy ordnance was intended to be employed in carrying out the notion? Perhaps some hint or fear of the *Alabama* proceeding to the Far East had already been current. In that case, we can well understand this movement of munitions of war. The Americans will scarcely think of meddling in foreign quarrels till the disgrace that bold rover has brought on their naval efficiency has been wiped out by her capture.

The fortification of Yedo is proceeding very rapidly, and all around its sea-front bristles with heavily armed forts. The moats have now on them many boats, somewhat after the fashion of our ships' launches, all heavily armed.

NAGASAKI.

Affairs at this port are beginning to assume a more tranquil aspect. The Loonins or Ronins who caused so much anxiety have almost disappeared, native merchants are beginning to breathe more freely, and the Governor is said to share the general satisfaction. Our correspondent says:—"When these Loonins first arrived his Excellency the Governor communicated their programme to the consuls, which embraced amongst

Digitized by Google

other items the capture and destruction of foreign vessels and massacre of foreigners. That *Louins* did arrive and for no good purpose, is true enough; but there were never more than forty or fifty altogether in the town. H.E. increased their numbers almost as rapidly as Falstaff did his "men in Kendal green." There is no particular news about Satsuma. He appears to bear his losses philosophically, but is by no means anxiout for another visit from the fleet. He has made a first step towards replacing the steamers destroyed by the English, by purchasing the *Sarah* from Messrs. Glover and Co. for $75,000. She leaves at once for Kagosima. The men-of-war in harbour are H.M.S. *Leopard, Rattler,* and *Racehorse.*

HAKODADI.

Our correspondent informs us that affairs are perfectly tranquil at this port, and trade goes on as usual. The disturbed state of affairs at Nagasaki and Yokohama has not in the least affected the intercourse with the Japanese at Hakodadi. The *Cormorant,* however, has been sent up by the Admiral, it is believed, at the urgent request of the British Consul, who considered the position of foreigners at this port very precarious in the event of any serious misunderstanding with the Imperial Government. It is reported that she will remain for some time.

CHINA.

PEKING.

Advices from Peking are to the 10th Nov. All was quiet in and around the capital. The coal districts in the Hsi-shan have just been explored by M. Pompelly, who reports an abundant quantity of the best description of coals in seams from 20 to 25 feet thick. It is stated positively that Prince Kung has refused to accede to Captain Osborn's demands, and that in consequence nothing is left for the Anglo-Chinese fleet but to be paid off and sent home as quickly as possible.

A stop has been suddenly put to the issue of the debased cash with which for some time Peking has been flooded. A number of small bankers have thus come to ruin. The weather is intensely cold, and game of all kinds is rapidly becoming plentiful.

TIEN-TSIN.

Regulations for this port have been issued by Mr. Gibson, Acting-Consul, and published in the *North China Herald* of Nov. 21st.

CHEFOO.

Affairs at Chefoo are in a bad state. There are perpetual fights amongst the Junkmen, which the authorities seem afraid to interfere with. In fact the Taoutai solicited and obtained a guard of two marines from H.M. gunboat *Insolent* for the purpose of protecting his Yamun.

SHANGHAI.

The dates are to the 25th November. The English mail of 26th September arrived out on the 24th November, being seven days over time, owing to the accident to the steamer *Poonah* on this side, and *Columbian* on Galle side.

The results exhibited in the recently published Customs' Return of the import and export trade of Shanghai for 1862, show a most gratifying increase in the commerce of the port, and fully justify the remark made by Sir Frederick Bruce, in a recent despatch to Earl Russell, that Shanghai bids fair to become the most important city in the East. The total export of silk from Shanghai during the year 1862, was 84,983 bales, against 70,459 during the preceding year; but of this increase 8,330 bales were Japanese silk re-exported, so that the increase on Chinese produce was only 6,194. A portion of this, too, may fairly be assumed to have been diverted from Ningpoo, where the falling off during the last six months of 1862, was 6,620 bales, so that unless an increase be assumed at the latter port during the six months of Taiping occupation, the export of silk from the two ports has actually decreased. The same argument, however, is not applicable to tea, the export of which has swollen from 32,500,000 lbs. in 1861, to 59,700,000lbs. in 1862—an increase of 27,000,000lbs, or more than 80 per cent., of which more than 10,000,000lbs. were green. The export of black tea from Ningpo is insignificant; but in green, of which, when the country is tranquil, this port is the principal outlet, there was a decrease during the last six months of 1862 of nearly 6,000,000lbs. over the corresponding half of 1862. So that, allowing for the divergence of the whole of this to Shanghai, a very improbable supposition, there is still a surplus in the legitimate export from the latter port of 4,000,000lbs., in addition to some 13,000,000lbs. of black. Cotton rose from 127,580 to 328,607 piculs—an increase o about 160 per cent.; and as this was the only notable article of produce which showed an increase in Ningpo, the whole is fairly referable to larger production in districts of which Shanghai is the legitimate outlet.

Although there is a general increase of about 45 per cent. on the total value of imports, one of the principle articles of merchandize.—Grey Shirting—shows a decrease of 1,829,050 pieces, namely 1,495,527 in 1862 against 3,394,577 in 1861. T.-Cloths are nearly stationary, showing an increase of only 8,855 pieces on the 468,345 imported in 1861. This is, however, of course to a great extent explicable by the reduced production and enhanced value of piece goods at home, owing to the short supply of cotton. The import of opium has grown from 20,864 chests in 1861 to 32,790; an increase which is likely to be maintained, as it is, no doubt, in great part referable to a larger demand for the drug at the Northern and and Riverine ports. Rice shows an increase of more than half a million piculs; and foreign coal of 127,110 tons, or 160,756 tons in 1862 against 33,646 in 1861. To sum up, the return shows an increase of £6,860,891 ont he imports and £4,708,449 on exports, as compared with that of the present year.

IMPORTS.

1862	£22,863,953
1861	16,003,062
	£6,860,896

EXPORTS.

1862	£14,667,406
1861	9,958,957
	£4,708,449

The increase in the quantity of shipping that entered and left the port during 1862 was more than proportionate to the increase in imports and imports. The inward tonnage amounted in round numbers to 724,000, of which 353,000 was British and 206,000 American—against 419,000 in 1861, of which 208,000 was British and 87,000 American. The total tonnage of outward bound vessels was 723,300, of which, again, about 353,000 were British and 205,000 American—against 408,000 in the previous year, of which 208,000 were British and 87,000 American.

The *Moniteur de l'Armée* publishes a letter from its own correspondent at Shanghai. It states that Ly-Tchong-Wang, the commander-in-chief of the rebel troops, after a brilliant campaign of three years, undertaken to relieve Kiang-si, the Hou-nan, and the Hou-pe, had returned precipitately to Nankin, which is attacked by the Imperialists and their allies. He has increased the garrison of the town to 30,000 men, and has supplied it with provisions and ammunition for three years. He has added to the guns on the twenty-eight advanced works which form the exterior defences of the place, and he has established an intrenched camp at Mo-ling, of which he has given the command to Heon-Tien-Hia, his adopted son. Tchong-Wang has learnt that the greater number of the towns which he captured during the campaign have been retaken by the allies; that, moreover, the Franco-Chinese contingent is at present laying siege to Hang-chow, and that the Anglo-Chinese forces are attacking Soo-chow. Should these two places fall, the strategic line which the rebel general had formed round Nankin will be destroyed, and in that case the Imperialists and the allies will unite their forces round the capital, which must be defended to the last extremity. Such are the last orders given by the rebel commander-in chief.

The funeral of the late Mons. Mauboussin took place on the morning of the 7th Nov. There were assembled in front of the French Consulate, a company of Chasseurs d' Afrique, a detachment of the 67th Regiment, about forty Infantry S.V.C., and a small number of Mounted Rangers, to render the last honours to the deceased. Minute guns were fired from the men-of-war in port, and salutes on shore by the military. The chief mourners, M. P. Chevrey Rameau, at present Acting-Consul for France, and the members of the French Consulate, together with all the other Consuls representing foreign Powers here, H.E. the Taotai, the several officers of the French and British military and naval forces, as well as officials of other nations, and many private residents, proceeded to the church of the Jesuits, where the coffin was placed on a catafalque. In accordance with the rites of the Catholic Church, a solemn mass was performed for the repose of the soul of the deceased. The Rev. Père Gondet, Superior of the Jesuits, officiated at the head of a numerous staff of priests and other assistants. A French military band was also in attendance.

THE SHERARD OSBORN FLEET.

The following account of the repudiation of this fleet is from the *North China Herald*:—We are informed that the Lay-Osborn flotilla is under peremptory orders to sail from China during the present week. The *China*, *Pekin*, *Tien-tsin*, and *Ballarat* go home direct *via* the Cape, while the *Amoy*, *Thule*, *Kuang-tung* and *Kiangsu* proceed to Bombay, where, we understand, they are to be incorporated with Royal Navy, while the non-naval officers are sent home overland. An end is thus put to the sanguine hopes at one time entertained relative to the extermination or emigration of the Taiping rebels. We must now confess that the expedition, from beginning to end, has been a failure, and that the theories broached must have had at best but a shadowy and unsubstantial foundation. The scheme of an Anglo-Chinese fleet founded on the principles laid down by Mr. Lay and Capt. Osborn, carried within itself the elements of decay and dissolution.

The following is the telegram published in *The Times* on the 4th inst.:—

"Prince Kung having refused to ratify the agreement made by Mr. Lay with Captain Osborn, Captain Osborn proceeded to disband his force. The European Ministers protested against Prince Kung having the ships on his own terms, and Prince Kung then requested Mr. Bruce to sell the ships for him. Mr. Bruce having requested Captain Osborn to undertake their disposal, a part of the squadron were to sail for England, and Captain Osborn, with the *Keang-soo*, *Quantung*, and *Amoy*, had sailed for Bombay. Captain Osborn may be shortly expected in England."

BURGEVINE.

The Futai has indulged in a most unwarrantable stretch of authority. Burgevine, it appears, intended to go up to Pa-ta-chiao to meet Gordon, and accordingly secured a passage on board the *Firefly*. On the previous day he went up the river to go on board, not having heard that she had been seized during the previous night. Not being able to find, and seeing the *Feiloong* getting up steam for the trip to Soochow, he went on board the latter vessel and asked for a passage. He stayed on board until the middle of the night, when a large body of mandarin soldiers were sent by the Futai, and Burgevine was hustled on board the hulk *Bopeep*. Here he was subjected to every indignity—his hands and feet tied, his hair pulled, and one miscreant, taking advantage of his helpless state, kicked him repeatedly on his old wound. A relation of the Futai, who holds some high office, was present during the whole time, but made no attempt to restrain the soldiers. In the afternoon of Monday, feeling afraid probably to keep up the performance any longer, the officers decided on giving him up to the American Consul, and put him into a boat, sending with him three large men-of-war junks. On his arrival at the U.S. Consulate jetty, his friends, who were in readiness to receive him, immediately took charge of him, and no attempt was made by the mandarins to interfere with his peaceable departure. This in itself shows that they must themselves be convinced of the illegality of their pro eedings. We trust that the American Consul will assert his exclusive right to jurisdiction over American citizens, and w l not allow the Futai to boast of having made the exterritoriality clause in the treaties a mere delusion and snare. A great international question is involved, and it will be patent to all, that whereas now it can be settled without difficulty, a few more acts of this kind will establish a precedent difficult, if not impossible, to overthrow.

Burgevine was arrested afterwards by a warrant from the U.S.A. Consul. As to what the specific charge is upon which the warrant was granted we are in ignorance, but we presume the Chinese authorities have insisted on Burgevine's deportation as one of the conditions upon which he was allowed to leave Soochow peaceably. We are, however, informed that at the time of his secession from the rebels he was unaware of this clause in the pardon granted to him. He has therefore made several attempts to communicate with Major Gordon on the subject, hitherto, we believe, without success. It would seem to be impossible to send him from Shanghai in his present state of health. This arrest is, therefore, considered merely casting "a sop to Cerberus."

CASE OF CRIM. CON.

A crim. con. case at the British Consulate has absorbed much of the interest of the foreign community. This case (Andrews *v.* Bellwood and Andrews) arose out of some circumstances which took place on board the *Marquis of Argyle* on her passage from London to Shanghai. Captain Bellwood, the master of the ship, allowed himself, it would appear, to become more intimately acquainted with Mrs. Andrews than is consistent with our ordinary ideas of propriety. The evidence adduced by the pursuer was of the grossest description, and rendered the captain's guilt indubitable. Indeed, at an early stage of the proceedings, he pleaded guilty, and his solicitor addressed himself solely to palliating the offence committed. The Court has reserved its judgment, a question, we believe, having arisen as to the amount of damages claimed. Mr. Andrews lays his claim at £3,000. We refrain from commenting in any way on the evidence. It will eventually be submitted to the Court of Divorce, and our readers will then be able to judge for themselves as to the nature of the circumstances which led to the trial.

SEIZURE OF THE "FIREFLY."

The steamer *Firefly*, which had been chartered by the Chinese Government for service on the Tai-hu, was seized by rowdies in rebel pay, in the middle of Saturday night, the 14th instant. The circumstances of the case are briefly these. On Friday night Macartney arrived in Shanghai in the *Firefly*, and directed that it should be in readiness to convey him back to the Great Lake at midnight of Saturday. On Saturday afternoon he received a letter from Captain Ludlam, stating that Major-General Brown had ordered the steamer to wait until the following day, when he (the General) intended to proceed in her to meet Major Gordon. As Macartney was anxious to call at Sung-kiang he started at midnight in a chop, intending as he passed the *Firefly* to direct her to wait outside the creek for him. On Sunday, when the General was about to go on board, the quartermaster of the steamer came to the Artillery Barracks, and reported that at 11 p.m. on the previous night she had been boarded by about 25 foreigners, who immediately took possession of her. He, it would seem, escaped by jumping overboard and swimming ashore. Capt. Murray, R.A., instantly despatched Lieutenant Wood with two mounted troopers to warn the Quinsan garrison, and a mounted lascar to Sungkiang to warn Macartney lest he should go down to meet the steamer, and so fall into a trap. A private letter was also sent to Macartney by a courier, giving an outline of the circumstances It was feared that on her way up the *Firefly* might have passed Macartney's boat, and have been hailed by him, in which case. his seizure would have been inevitable. The *Firefly* had on board, besides her own armament, a full inventory of guns, small arms, ammunition and stores for the *Tsetlee*. The fears entertained for Macartney were, however, groundless. He fortunately escaped, and arrived safely at Gordon's head quarters, where he was awaiting the steamer when the news of her seizure arrived.

A murder of a most revolting character, was committed on the Hongque side. Two Americans named White and Webster had formerly been in partnership in Shanghai. On the dissolution of this partnership, White asserted that Webster owed him a sum of money, to claim which he went on the evening of the 17th of November, to Webster's quarters. Both men seem to have been intoxicated. Webster, who was in bed, replied in an insulting way to White, and the latter immediately fired three shots at him. Webster died almost instantly, and White was arrested by the bystanders His trial came off, and he now lies under sentence of death, subject to the sanction of the American Minister.

A very successful rifle meeting was got up by the volunteers on the 18th Nov. The weather, although exceedingly fine, was rather unfavourable for shooting. The wind was high and gusty, and the bright sun shining directly in the eyes of the competitors must have completely dazzled them. Notwithstanding these drawbacks, however, the shooting was very fair, especially that for the Garrison Cup, in which at the shorter distance only two or three of the competitors made a single miss. The shooting was still very good at the 500 yards, though the increased distance evidently told. Private Cann, the winner, made two centres at this range. "The Farewell Cup," given by Captain Panmure Gordon, to be shot for by the Rangers, was won by the donor; but has been given by him to Private Lloyd, the second on the list.

MAJOR GORDON'S FORCES.

Gordon has seized two stockades north-east of Soo-chow, and about four miles from the city. These were situated opposite Li-ku, which he had made his head-quarters temporarily. The rebels were strongly entrenched, and a stout resistance was experienced. The storming party consisted of the first, third,

Digitized by Google

and fifth regiments (in all about thirteen hundred men), under the command respectively of Majors Tumblety, Williams, and Brennan. The rebel loss was very heavy, and Gordon's men were also severely handled. We regret to learn the death of Captain Gibb of the 5th Regiment, who was shot through the heart while leading on the second company. Lieutenant Parker of the same regiment was also slightly wounded in the hand. The health of the troops remains good, and the utmost confidence prevails amongst them. Ching with about five thousand men garrisons Wu-lung-chiao. Macartney's position, up to the time of the seizure of the *Firefly*, was on the west side of the Great Lake. There he had the *Firefly* and a force of about two thousand men, while, still further to the westward, Major Rhode held a post with a large force of Mandarin soldiers. Gordon is now on the west of Soochow, having succeeded in capturing the stockades on that side. The communication with Nanking is cut off, and preparations are being rapidly made for the immediate bombardment of the city.

The ball given by the Shanghai Volunteers was a decided success. One of Messrs. Fletcher and Co.'s new godowns was transformed as if by magic into a ball room. The ceiling and walls were most tastefully decorated with flags, and nothing was visible to remind us of such prosaic articles as chests of tea or bales of cotton. At one extremity of the room was erected a throne, evidently intended for the reception of the "fairest fair."

An increase of rowdyism is complained of on the Yang-tse. A large fire occurred on the 24th ult., on the premises of Messrs. Davies, Townend, and Co., when a number of loafers availed themselves of the opportunity to plunder large quantities of merchandise. The Yang-tse rowdies are fast becoming a perfect pest. Several very suspicious looking craft with white men on board have lately been noticed on the river. One in particular had no less than sixteen foreigners on board, and showed twenty guns.

The English troops who have lately been stationed at Taitsan and Quinsan, have returned to Shanghai. It is said that General Brown has not received sufficient encouragement from Sir F. Bruce to warrant him in keeping a force at Quinsan. If this be the case, the recall of the troops will not be a mere temporary measure.

Li-hung-chang, the Futai, has negotiated a loan of twenty thousand taels from a foreign house in the settlement. The money is to be repaid in two monthly instalments of ten thousand taels each. This same mandarin, about a year ago, denounced the late Taotai for acting in a similar manner; but has found that the necessities of the Government do not allow him to act up to his theories.

The weather remains cold in and around Shanghai, the thermometer running down to 35 at night. The health of the community is much improved.

We are very glad to record a meeting of the consuls and merchants to consider what means could be adopted for exterminating the foreign pirates located at Shanghai, and on the Yang-tse. These people are now more formidable than the Chinese pirates, against whom our peaceful merchants have quite enough to contend with. The following resolutions were passed after an amicable discussion:—

That a committee be named by the Consuls to draw up such regulations as may be thought necessary for the peace and order of the Settlement; and that those Consuls who are not invested by their Governments with the power to deal summarily with dangerous characters, shall apply for such authority as is needed; pending the receipt of which they shall take upon themselves the responsibility of action. That the Consuls of the Treaty Powers form the committee referred to in the foregoing resolution. Mr. Dent next suggested that the opportunity of this assembly might be taken for the purpose of discussing the dangerous condition of the American Settlement. Mr. Moore stated that he was aware that between two and three hundred Manilamen infest the purlieus of Honque, and that he has reason to hope a Spanish vessel of war will eventually be sent here for the purpose of removing these men.

Proposed by Mr. Markham, and seconded by Mr. Keswick:—That a joint communication to the Chinese authorities be adopted, urging upon them the necessity of apprehending any foreigners found in the interior unprovided with passports, and handing them over to their respective consuls.

Proposed by Mr. Seward, and seconded by Mr. Markham:—That a meeting of the consuls be held monthly, for the purpose of discussion and action upon such important subjects as may from time to time arise; and that such meeting shall be held on the second day after the departure of the first English mail in the month.

The decision of arbitrators in the case of the *Cadiz* and *Hylaspe*, which came into collision some time ago, was reported. The arbitrators found that both vessels were to blame, and the loss has been summed up and equally divided.

At the Consular Court, Shanghai, Captain Bellwood, of the barque *Marquis of Argyle*, was fined $260 for assaulting and using threatening language to Miss Jane Davies, a cabin passenger from London. The owners of the vessel were also decreed against for $150 in consideration of their not having furnished Miss Davies with proper provisions during the voyage.

NINGPO.

The correspondent of the *Friend of China* writes:—"The French are doing nothing before Hangchow; and the battalion called Finley's, in which all the officers were English, has been broken up. D'Aguibelle's reason, or alleged reason, for this is, that his white subordinates were always drunk, and of no use whatever—perfect rowdies.

"The gunboat has returned *without any prizes.*

"A subscription is getting up to send the widow of Fish, who kept an hotel here, home to her family in the *Merrie England*, and already some $300 are collected. This poor lady, you know, but a little over twenty years of age, is the daughter of Wahab, erstwhile Superintendent of the Singapore Police Force (son of Gen. Wahab of the old E I.C.'s army), and must have made a great mistake when she became one of the Fish family. Her father has a nice little property at home and all we want is to raise enough to send her there. The sale of his effects will not more than pay his debts. Schofield is treasurer."

MALACCA STRAITS.

SINGAPORE.

Sir Hercules Robinson had arrived, for the purpose, as was announced some months back in *The London and China Telegraph*, of holding a commission, reporting upon the condition of the Settlement, for the information of the Colonial Office. The commission would consist of Sir H. Robinson, Colonel Cavanagh and the Governor, the Resident Councillor, the Brigadier, and the Chief Engineer, should he return from Calcutta in time. Regret is expressed that the commission did not include some members of the mercantile community; for, should the report made have the effect of postponing the transfer of the Settlement into the hands of the Crown, considerable dissatisfaction would be felt. Colonel Cavanagh has already expressed the opinion that the revenues at present more than equal to the expenditure. An action for damages, tried in the Supreme Court, brought by the master of the French barque *Salazes* against the owners of the steamers *John Bright*, had resulted in a verdict against the steamer for damages to the amount of $8,333, being the extent of the interest of the pursuer in the ship, which was valued at $25,000. The case occupied the Court four days.

The Dutch mail had brought the intelligence of the destruction of another Federal vessel, the *Contest*, by the *Alabama*, in the Java Sea, off the "Northwatcher," not far from Batavia. It is also rumoured, but it was believed without foundation, that a fourth ship, the *Belvidere*, from Manilla, has likewise been destroyed. The *Contest* was bound from Japan to New York, but her cargo was of little value, chiefly consisting of cotton rags. The United States steamer *Wyoming*, which is in pursuit of the *Alabama*, came in on the 1st December, having on the way from Batavia seen nothing of her chase. She stayed in the harbour only 29 hours, but remained in the Straits five miles to eastward, and in sight of town for several days, until the Dutch mail brought the news of the *Alabama's* whereabouts when she started off. The *Wyoming* is a fine steamer, heavily armed; and though she has been represented as having very dilapidated boilers unable to carry steam to drive her six knots an hour, she made a late display of speed which indicates a very different condition. The *Indore*, a new steamer belonging to a Bombay Company, and bearing, it is said, some slight resemblance to the *Alabama*, after entering the Straits was steering for the anchorage, when the *Wyoming* came rapidly down on her, overhauling her though she was steaming at over ten knots, and sent a boat on board. The crew of the *Contest* were at Batavia.

Mr. Gisborne having failed to carry out the arrangement with the Dutch authorities in Batavia, Mr. Siethof has undertaken the matter, and will run a line from Anjer to Palembang and Siak, from thence to Malacca and Singapore.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ASHTON—On the 6th Nov., at Foo-chow, the wife of Thomas K. Ashton, of a son.
BARTON—On the 23rd Nov., at Hong Kong, the wife of Captain L. Barton, of a daughter.
BRAND—On the 31st Dec., at Bedford-hill House, Balham, Surrey, the wife of James Brand, Esq., of a daughter.
CHAPMAN—On the 15th Nov., 1863, at Amoy, China, the wife of T. H. Chapman, Esq., of a son.
GABRIEL—On the 21st Nov., at Singapore, the wife of Johannes Cabriel, of a son.
CAREY—On the 9th November, at Foo-chow-Foo, the wife of Henry W. Carey, Esq., of a daughter.
IRWIN—On the 9th Nov., at Hong Kong, the wife of the Rev. I. J. Irwin, of a daughter, who survived only a short time.
JOHNSON—On the 14th Nov., at Shanghai, the wife of Francis Bulkeley Johnson, of a son.
MACHADO—On the 5th Nov., at Hong Kong, the wife of F. Machado, of a son.
MATHESON—On the 25th Dec., at Hampstead, the wife of Hugh M. Matheson, Esq., of a daughter.
PADDAY—On the 1st Dec., at Singapore, the wife of Reginald Padday, of a son.
RICHARDSON—On the 14th Nov., at Swatow, the wife of T. W. Richardson, of a son.
SANDILANDS.—On the 16th Nov., at Penang, Mrs. George M. Sandilands, of a son.
VAUGHAN—On the 14th Nov., at Singapore, the wife of J. D. Vaughan, Police Magistrate, of a daughter.

MARRIAGES.

BARNICOT—SMITH.—On the 30th Nov., at St. John's Cathedral, Hong Kong, by the Rev. I. J. Irwin, Colonial Chaplain, William Barnicot, clerk to Mr. Smale, to Anne Smith.
FRASE.—BISHOP.—On the 6th Nov., at Trinity Church, Shanghai, by the Rev. Robert Hamilton, John Rhodes Fraser, to Jane Katherine, youngest daughter of the Rev. John Bishop, late of Exminster, England.
GYE—BONNETT—On the 14th Nov., by the Rev. I. J. Irwin, James Gye, of Shanghai, to Elizabeth Bonnett, of Suffolk.
HOGG—DARVALL—On the 1st Jan., at Barrow-on-Soar, Leicestershire, by the Rev. W. L. Newham vicar, Alfred Graham Hogg, Esq., of Canton, to Eleanor Ann, second surviving daughter of the late Joseph Darvall, Esq., solicitor, of Reading. No cards.
SCOTT—DARE.—On the 27th Nov., at St. Andrew's Church, Singapore, by the Rev. Chas. J. Waterhouse, A.M., Chaplain, William Ramsay Scott, to Blanche Emily, eldest daughter of the late George Julius Dare.

DEATHS.

BENHAM—On the 10th Nov., at Hong Kong, Caroline, wife of Staff-Armourer Sergeant Wm. Benham, aged 23 years.
CONNOLLY—On the 21st Nov., at the Civil Hospital, Hong Kong, William Connolly fireman ex steamer Yong-tsze.
FRASER—On the 3rd Nov., at Malacca, J. T. Fraser, Esq., M.D., of the Madras Medical Service.
GREEN—On the 22nd Nov., at Hong Kong, John Green, turnkey, Victoria Gaol.
HARRAS—On the 4th Nov., at Hong Kong, Maximilian Harras, a native of Hamburgh, aged 21 years.
HUNTER—On the 25th Nov., at Singapore, Capt. Hunter, of the British barque Bonaventure, of Liverpool.
MATHESON—On the 6th Nov., at Hong Kong, Colin S. Matheson, of the firm of Jardine, Matheson, and Co., aged 42 years.
MURRAY—On the 24th Nov., at Hong Kong, A. Dundas Murray, late master of Messrs. D. Sassoon, Son, and Co.'s receiving ship John Adams.
MAIR—On the 25th Oct., at Shanghai, Capt. Mair, ship Lodianah, aged 35, of Falkirk, Scotland.
PERRY—On the 1st Nov., at Lee-kow, before Soo-chow, killed in action, Captain Perry, 4th Regt. Disciplined Chinese forces.
STOREY—On the 9th Nov., at Hong Kong, Elizabeth Storey, wife of C. H. Storey, Surveyor-General's Department, aged 63 years.
VALENTIA—On the 30th Dec., at Bletchington-park, Oxfordshire, the Right Hon. Arthur Annesley, Viscount Valentia, aged 78.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON: The business of the fortnight has been very limited. Congous are still so firmly held that settlements have been restricted to one full chop, and a parcel equal to about one quarter of a chop, at rates which exhibit no margin on the latest London quotations. As might have been anticipated from the nature of the last home advices, Scented Teas have been cautiously dealt in; prices as yet, however, show no alteration. In Canton Teas little has been done. Of Country Greens, about three to four thousand half chests are looked for within the coming fortnight.

FOO-CHOW-FOO.—The settlements are thus reported:—Congous: 14,700 chests 23,200 half chests and 2,000 boxes at 6¼ taels to 14½ taels for siftings to good common, 15½ to 20 taels for coarse flavoury kinds, and 21 to 23¼ taels for flavoury. Souchongs: 300 chests and 100 half chests at 19 to 36 taels. Flowery Pekoe: 600 chests at 21½ to 40 taels. Oolong: 8,500 half chests at 16 to 36 taels. Scented Teas: 2,200 boxes at 9 to 28 taels.

SHANGHAI.—Black: There has again been a very dull market during the past fortnight, and only 13 chops have been settled at prices showing a decline of fully one tael on last quotations. The recent arrivals from Hangkow have been almost entirely composed of very common descriptions, and it is now evident that the season's supply has nearly come to an end. The remaining stock in this market, which consists of 32 chops, is generally firmly held. Settlements on the market, 13 chops or 5,978 chests Oopacks, Oonahms, Ningchows and Hohows. Re-shipped on owners' account, 8 chops, or 4,447 chests Oopacks, Oonahms, Ningchows, and Hohows—together 21 chops or 10,424 chests, making total Settlements to date 336,509 chests. Stock, waiting shipment, 12 chops and for re-sale 20 chops, together 32 chops. The quotations are for second and third crop Oopacks and Ningchows, Tls. 27½ to Tls. 31; for second and third crop Oonahms, Tls. 22 to 27; for second and third crop Hohows, Tls. 18 to 22. Green.—Considerable shipments have come forward from Kewkiang during the fortnight, but the excessive prices asked by the holders to cover costs have checked business, and very few settlements are reported: amongst these is a parcel of Fychow at Tls. 33½ and a parcel of common Moyune at Tls. 37. In Pingsueys and Shanghai packed a small business has been done at previous rates.

HANKOW.—Supplies from the interior come in sparingly, which circumstance has enabled the teamen to maintain the same degree of firmness as was previous advised. The advices from London, however, are of such an unfavourable complexion, that foreigners have in a measure retired from the market, which has yielded 5 mace.

RAW SILK.—SHANGHAI.—The settlements have not exceeded 1,000 bales, purchased at similar prices to those last quoted. Dealers are very firm, and are by no means anxious to make sales. The receipts from up country have been very moderate, so that the stock is again reduced. The parcels now offered are very inferior, in every respect, and it is most difficult to select any desirable run. The settlements of the fortnight are reported at 1,000 bales, against 3,800 bales at corresponding fortnight of last season and 5,000 ditto the season before. The total comparative settlements to date stand thus:—Present season 26,000 bales; last season, 45,300 bales; the previous season, 37,600 bales. The comparative stocks at date stand thus:—Present season, 9,000 bales; last season, 20,000 bales; season before 9,000 bales. The following are the latest quotations:—Tsatlees, No. 2 chops, 450 to 460 taels per picul; No. 3, 430 to 440.

YOKOHAMA.—Supplies have been moderate since our last, but all arrivals settled immediately at previous quotations, or nearly so. The last day or two arrivals have been larger, and there are 300 bales in the market to-day.

NAGASAKI.—Settlements of 60 piculs Hitchoxen at $430. Stocks 50 piculs Hitchozen $480 asked; none else on offer.

DRUGS, &c.—CANTON.—Cassia Lignea, settlements of the fortnight 100 piculs only at $17.50. Stock 500 piculs. Cassia Oil, the market still continues bare. Cassia Buds: a lot of 20 at 30 pls. has arrived down which is held at $57. Star Aniseed and Aniseed Oil, no supplies have come forward. Rhubarb, a small lot arrived and was picked up at $60, there is no stock. Gamboge, still without supplies. China Root, no settlements reported, stock 400 piculs. Vermillion, little doing at $42.50 per box. China Galls, stock 100 piculs, held at $12.75.

RAW COTTON.—SHANGHAI.—The first contracts were made at about 14 taels for early delivery. But the market hardened daily, until the fact became manifest that the yield was very deficient. The result was that the natives had to enter the market to complete their contracts with foreigners, against rash shippers and wild speculators whom the peculiar turn of events had called forth and the rate has consequently advanced to 22 taels, about equal to 16½d. laid down in Liverpool! About half of the native contractors have failed and have closed their establishments. Even at this unheard of quotation, little can be had for immediate delivery, and a system of adulteration is being largely practised which tends to shake confidence in transactions in the article. There seems to be little doubt that although the culture has been extended, yet that the yield is very defective—probably not more than one half per acre of what it was last season. Although all hopes of extensive shipments from China to Great Britain must for the present be abandoned, still the excessive rate now ruling will undoubtedly so stimulate culture, as to cause a very large yield next season, should the crops not fail again. During the fortnight seven ships have been despatched to Great Britain, carrying over 23,000 pls. A vast number of ships are on the berth, but under present circumstances they may have difficulty in loading. It should be observed that the Southern ports, which usually draw their supplies from India, must now derive them from the North.

CHINA IMPORTS.

COTTON YARN is nominally quoted higher, both in this market and in Canton, but the article does not at present meet with any inquiry, and the sales reported are limited in Hong Kong to 35 bales, while from Canton there are not any transactions to notice.

GREY SHIRTINGS.—Although there is no demand amongst the native dealers, who affirm that the prices demanded are much higher than they can afford to pay, have met with very active inquiry at the hands of foreigners for the purpose of re-shipment to the Straits and India, and the business of the fortnight has been almost unprecedentedly large, amounting to fully 40,000 pieces at an established advance upon the quotations given in last circular of at least 15 cents per piece.

WHITE SHIRTINGS are also quoted higher, although the business done in them has been restricted to 2,500 pieces purchased by the Chinese, and 500 pieces taken by a foreign firm.

T-CLOTHS, which have also advanced materially in value, have been entirely neglected by the native dealers, but have been largely dealt in on foreign account, and the settlements of the past fortnight are estimated at 32,000 pieces.

AMERICAN DRILLS.—The market is quite bare of these goods, and the quotations must be regarded as quite nominal; they would, however, be readily paid were the goods procurable.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—There are not any transactions to report during the past fortnight in the above goods, although the quotations are slightly in advance of previous rates. The Canton market has been entirely without animation in regard to all imports of cotton manufacture, and there is not a single sale reported from thence since the date of last circular.

CHINTZES AND HANDKERCHIEFS.—3,000 dozens of the latter have been purchased by one dealer, and this transaction constitutes all the business of the fortnight.

DAMASKS have not met with any sales.

RAW COTTON.—The market for this staple has been in a very excited state in this colony during the fortnight, and the intelligence from Shanghai and Ningpo of advancing prices at these ports, combined with the great eagerness to purchase manifested here has led to a considerable advance in the values of every description. The amount of business done has been upon a large scale, estimated at fully 21,000 bales, of which some 5,000 have been purchased by the Chinese, and the remainder by foreign merchants, for reshipment. In Canton, where the value of the staple has also advanced, although it is still far below the prices obtainable in this colony, the settlements are put at 400 bales.

WOOLLENS.—SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—The above goods have not met with any great amount of inquiry during the past fortnight, and the sales of Spanish Stripes to which alone transactions have been confined are estimated at 700 pieces. Sales from Foo-chow of 870 pieces of Spanish Stripes are also reported.

LONG ELLS show a slight advance in value as regards assorted colours, when compared with the rates current on the departure of the last mail

Digitized by Google

steamer, but the business reported has not been very large, amounting as it does to only 250 pieces. In Canton 400 pieces have changed hands, but without alteration in value. The settlements of these goods in Foochow have been confined to scarlet, of which 1,440 pieces have changed hands during the fortnight.

CAMLETS have met with slightly more inquiry in this colony during the fortnight, sales of 500 pieces having been reported. Quotations remain unaltered.

LASTINGS—240 pieces sold here, and 120 pieces disposed of in Canton constitute the transactions of the past fortnight.

BLANKETS have recently met with good inquiry at the recent quotations, and exclusive of 450 pairs (damaged and sold by public auction), the private sales of the past fortnight amount to 1,584 pairs.

METALS.—Iron Flat, &c.: Nail Rod (to which description and Bar the business of the fortnight has been limited) shows a slight advance in value, and the sales reported amount to 1,680 piculs of the former, and 800 of the latter description. In Canton where the price of Nail Rod has also advanced about 5 cents, sales of 1,700 piculs have been effected.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 2¼d. to 6s. 3d.	6s. 3d. to 6s. 4d.

The Exchange on India at Shanghai was 303 to 304 rupees per 100 taels, and at Hong Kong 231 to 232 per 100. Bar silver at Shanghai 111.25 per 100 tls., and Hong Kong 3½ per cent. prem. The current quotations at Shanghai for Mexican dollars was 78 tls. per $100, and the rate of exchange on Hong Kong was 28 to 23½ per cent. discount.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: Oct. 30, Marquis of Argyle; 31, Cissy, Panama; Nov. 16, Kate Kearney; 17, Lung Mow; 22, Ralston. From Liverpool: 12, Ann Wood. From Newcastle: Oct. 27, Thomas Royden; Nov. 19, Montmorency. From Sunderland: Oct. 29, Island Queen; Nov. 23, Fair Leader. From Cardiff: Nov. 16, Collingwood; 21, Eudora. From Hamburg: Oct. 31, Aldebaren. From New York: Oct. 25, Endeavour; Nov. 16, Antelope.

At FOO-CHOW.—None.

At AMOY.—Oct. 27, Eudora, from Cardiff; Nov. 13, from London, Vibilia.

At SWATOW.—None.

At HONG KONG.—From London: Nov. 12, Troas. From Glasgow: Madras. From Sunderland: Nov. 4, Herald; 10, Sea Bird; 26, John L. Dimmock; From Cardiff: Nov. 19, Paul. From New York: Nov. 9, Marmion; 26, Surprise.

At MANILA.—No report.

At SINGAPORE.—From Liverpool: Nov. 12, Benaventure. From Plymouth: 6, Mona (-teamer). From Sunderland: 10, Walvisch; Dec. 3, Ottone. From Newcastle: 17, Prospero. From Glasgow: 7, Spanker. From Bordeaux; Nov. 10, Ville de Granada (French). From Hamburg: Dec. 1, Ida Maria.

DEPARTURES.

From JAPAN.—For New York, Oct. 27, Maggie Atkinson.

From SHANGHAI.—For London: Oct. 24, King Arthur, Palmerston; 27, James Vinnicombe, Mirage; 30, Ospray; Nov. 2, Spirit of the Deep; 6, J. H. Ransom; 14, Hawthorne; 16, Spirit of Trade; 18, Sophie; 19, Philip I.; 31, Daisy. For Liverpool. Oct. 26, Niphon; 28, James Gibson; 29, Spirit of the Sea: Nov. 7, Our Queen, Sarah and Emma; 11, Ranee; 14, Victoria; 18, Star of the North, Macduff. For New York: Nov. 12, Wilhelmine; 13, Sarah.

From FOO-CHOW.—For London: Oct. 24, Mimosa, Bosworth; Nov. 10, Maiden Queen; 11, Portland.

From AMOY and SWATOW.—None.

From HONG KONG.—For London: Nov. 6, Reindeer. For Liverpool: 2, Nile; 4, Nielbreck.

From MACAO.—For London: Oct. 25, Bellissimas; Nov. 33, Magnus. For Hamburg: Nov. 3, Selina Jane; 4, Ophelia.

From WHAMPOA.—For London: Nov. 19, Laurel. For New York: Nov. 9, Graf Eulenburg; 15, Creole.

From MANILA.—For Falmouth: Maggie Lauder. For New York: Helvetia.

From SINGAPORE.—For London: Nov. 16, Avalanche. For Liverpool: 21, Oasis. For New York: 11, Caroline.

From BATAVIA.—No report.

From PENANG—For London: Dec. 8, Nipisiquit.

LOADING.

At JAPAN.—For London: Dolphyn, Scawfeel, Confiance, Governor V. Swiston, L'Europe.

At SHANGHAI.—For London: Anglo-Saxon, Heroes of Alma, Lammermuir, Nelly, Star Queen, Bulmacarra, Island Queen, Princess of Wales, Egmont, Sir H. Parkes. For Liverpool: Fow Tsum, General Putnam, Princess Royal, Sappho, Rhine, Young England, Royal George, Childe Harold, Glenhuntly, Loodianah, Solway, Zingara, Thos. Royden. For New York: Apollo and Elizabeth.

At FOO-CHOW.—For London: Renown, Standard, Isabella Ridley, Chalmers, Albrecht Oswald, Bankside, Glaramara, Stuart Wortley, Peep o'Day, H. Nicholson, Florence Nightingale.

At AMOY.—For New York: Confucius.

At HONG KONG and CANTON.—For London: Laurel, Tamerlane Mary Ann Wilson, Agra. For Liverpool: Light of the Age, Gemini Lord Lyndhurst, Itsamboul, Jounpore.

At MANILA.—None.

At SINGAPORE.—For London: The Brodre, Pilgrim. For Liverpool: Crusader. For Bordeaux: Orixa (Fr.). For Hamburg: Helene. For Boston: Pearl.

At BANGKOK.—None.

At BATAVIA.—For Channel for orders: Lamina Elizabeth. For Rotterdam: Jacob Helena, Oscar I., Tollens, M. L. Antoinette, Haamstede, Rudolf, China, Zeemanschoop, Jan van Galen, Bilderdijk. For Amsterdam: Nyverheid, Norden, Henri Maria, Herman de Ruyter, Prins Carl, Prinses Amalia.

At PENANG.—For London: Rockcliff.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Oct. 21, Thons, from London to Hong Kong; Ida Willemena, Rotterdam to Batavia, Adriana Petronella; 26, Johann Lange, for orders; 31, Sparrow, from London to Shanghai; Mercator, Sunderland to Shanghai; Queen's Own, England to Hong Kong; Nov. 18, Elizer, Hamburg to Singapore, 22, Ferris, Cardiff to Singapore.

From UNITED STATES to CHINA, &c.—Oct. 22, from Boston to Shanghai.

FROM CHINA, &c., to ENGLAND and CONTINENT.—October 13, Esther from Macao to Hamburg; Ida Elizabeth, from Batavia to Holland; President Plate, from Batavia to Rotterdam; Johannes Christian, from Batavia to Amsterdam; 15, John Nicholson, from Hong Kong to Liverpool; Maria, from Batavia to Middelburg; 17, Tuisco, from Batavia to Channel; Janetje, from Batavia to Rotterdam; Queen of the Ocean, from Whampon to London; Anna, from Batavia to Amsterdam; 18, Mexicana, from Amoy to London; Sunbeam, from Shanghai to London; 19, Solent, from Shanghai to London; John Lidgett, from Hong Kong to London; 20, Hanover, from Shanghai to London; 21, Grenadier, from Shanghai to London; 22, Humphrey Nelson, from Shanghai to London; 25, Beautiful Star, from Hong Kong to Liverpool; Sovereign of India, from Shanghai to London; 26, Jubilee, from Shanghai to London; Halton Castle, from Singapore to Liverpool; 25, Tamana, Canton to London; 27, Tinzil, Shanghai to London; Gauntlet, Shanghai to London; Zambeze, to Cork; Canadian, Hong Kong to London; 29, Jane Leech, Shanghai to Liverpool; 26, Juno, Foo chow to Middelburg; Maha Ranee, Foo-chow to London; Moneta, Shanghai to London; Edith, Shanghai to London; Allendale, Shanghai to Liverpool; 28, Genanoque, Foo-chow to London; Emelie, Batavia to Rotterdam; 29, Janet Mitchell, Foo-chow to London; Runnymede, Shanghai to London; Queen of the Age, Shanghai to London; Bucton, Castle, Foo-chow to London; Beemah, Foo-chow to London; Nov. 5, Rubicon, from Amoy to London; 6, Julia, Shanghai to London; 7 Lorton, Shanghai to Liverpool; 13, Iron Crown, Hong Kong to Liverpool; 14, Broadwater, Japan to London; 15, Palmyra, Shanghai to Liverpool; 16, Ravensbourne, Japan to London; 16, India, Shanghai to London, Cordova, Shanghai for Liverpool; 17, Siam, Shanghai to London, Carn Tual, Japan for London; 18, J. J. Grandville, Batavia to Nantes, Mimosa, Foo-chow to London; 19, Langdale, Foo-chow to London; 20, Mirage, Shanghai to London, Bosworth, Foo-chow for London; 21, Der Preusse, Manila to London, Jas. Vinnicombe, Shanghai to London, Melrose, Amoy to London; 22, Spirit of the Sea, Shanghai to Liverpool, Forfarshire, Hong Kong for Liverpool, Selina Jane, from Macao, for Hamburg.

FREIGHTS AND CHARTERS.

JAPAN to ENGLAND.—Cotton £4; Tea, £5; Silk, £6. 10s.

SHANGHAI.—Rates continue firm for home, but little offering for the coast. The following are the rates to London and Liverpool:—Teas, £5; Cotton, £3. 15s. To New York: £3. 15s. for Tea; Silk, £4. 10s. per ton of 40 cubic feet.

FOO-CHOW.—To London: £4 per ton of 40 cubic feet. To America: £4. 5s.

HONG KONG.—A good demand for tonnage exists principally for cotton to Liverpool, and for small vessels to the Northern ports. The following are some of the settlements:—Amazone [(Hamb. 166), to Liverpool with cotton, £3. 7s. 6d. per ton; Esmeralda (Hamb. 380), to Liverpool, £3. 7s. 6d.; Santon (510), to New York, via Foo-chow, £4. 7s. 6d.; Virginia (839), to Liverpool, £3. 10s.; Citadelle, to London, via Cape, £850 in full.

SINGAPORE.—The rates to England are as follows:—Tin, £3; sago, in boxes, £3. 10s.; sago flour, £2. 15s.; gambier, in bales, £2. 15s.; sugar, £3; black pepper, £3. 10s. per 16 cwt.; coffee, £3. 10s. per 18 cwt.; hides and horns, £3. 10s. per 16 cwt.; gutta percha, £3. 10s. per 20 cwt.; measurement goods, £3. 10s.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Jan. 7: Off the Lizard, from Shanghai, Southern Belle.

DEPARTURES.—Jan. 9, from London for Shanghai, Tun Sing (str.); 5, from Lawlash, for Singapore, Lochleven Castle; from New York, for Shanghai, Nov. 23, Gondola.

SPOKEN.—Emperor, of and from Sunderland, for Hong Kong, Dec. 26, 37 N., 13 W.

LAID-ON.—At London, for Shanghai, Yaratilda.

Advices from Mauritius to Nov. 6th received at Boston, state that the ship Thomas W. Sears, of Boston, Wilson Master, from Padang for New York, which put into Mauritius Sept. 28, leaky, &c., had been condemned at that port.

The P. and O. Company have accepted tenders for the supply of 6,000 tons coal at Hong Kong, the shipments to extend over three months.

The statistics of Tea up to the 31st Dec. last show an increase in our imports of no less than 29,855,500 lbs., being 136,123,500 lbs. in 1863, against 106,268,000 lbs. in 1862. The deliveries have been 112,299,000 in 1863, against 106,535,000 in 1862, being an increase of 5,764,000 of the past year.

LONDON, SATURDAY, JAN. 9, 1864.

DECISION FOR PEACE IN JAPAN.

THE change in the policy of the Japanese Government, from threats of expulsion, and preparation for hostilities, to a cordial arrangement of all differences, and liberal settlement of all claims, appears not to have been finally resolved on till just before the departure of the present mail. There have evidently been so many influences at work, the exact value of each of which Europeans find it for the present impossible to estimate, that this sudden revulsion of feeling is bewildering, even to those most deeply interested in comprehending its source and possible duration. And yet a connected narrative of the course of events may enable us to reckon up the pieces on the board, even if we are still unable to follow the complication of the moves. At the GOROGIO'S conference, on the 24th October with MYNHEER VON POLESBROEK, the Minister of the Netherlands, and General PRUYN, the United States Minister, after announcing that "the order of expulsion issued by and through ONGASSAWARA was retracted," the GOROGIO went on to say that "if trade continued on in Yokohama, a rebellion would ensue "in the country, and that therefore the trade must be transferred to Nagasaki and Hakodadi." To put the climax to the whole, and to evince the determination, once for all, to have done with the detested foreigners by destroying the main attraction to their commerce, the rumour became current in Yokohama—a piece of intelligence, it was said, indeed, the accuracy of which it was impossible to doubt —that "*the authorities had peremptory orders for the destruction "of three-fourths of all the silk-cocoons in the country!*" That there was no foundation for such a report, we will not undertake to say. Suffice it that though our dates are three or four weeks later than this rumour, nothing more is heard of it.

Now, the entire spirit of the scene undergoes a change. The next thing we learn is that the TYCOON has made his peace with the MIKADO, and would shortly return to Miako. SATSUMA, with the concurrence and through the intervention of the TYCOON'S officials, entreats a conference with Colonel NEALE. This conference is continued from the 9th November through various adjournments, and ends in the complete and satisfactory arrangement of all difficulties with that potent, and, we expect it will turn out, noble-hearted Prince. To show his real feelings towards foreigners, and Englishmen in particular, he announces his determination to send some of his young men to England for education. The people of Yedo are in raptures at the certainty that there is to be no further talk of expelling the foreigners; and their Governors notify to them that in future no restrictions are to be placed in the way of them trafficking with foreigners, and that they are to be left to take what supplies they please into the market, every man being at liberty to follow his own judgment, and to be checked solely by his own portal Distrust, defiance, and menace have disappeared with the rapidity of the transformation scene in a pantomime, and their place is supplied by confidence, shaking of hands, and cordiality. Such is the new year's offering brought us from Japan.

NEW POWERS GRANTED TO SIR R. ALCOCK.

The *London Gazette* contains the following notice:—

Her Majesty has granted authority to the Consul-General in Japan that whenever it shall appear to him, or persons authorised to act for him, that the unrestricted entrance of British ships or vessels into, or through, waters within the dominions of the Tycoon may lead to acts of disturbance, it shall be lawful for him to enforce, by fine or imprisonment, any regulation he may consider expedient on the subject; the penalty to be attached to any breach of such regulations to be made by virtue of this order not in any case to exceed $500, or three months' imprisonment.

SHERARD OSBORN AND PRINCE KUNG.

CAPTAIN SHERARD OSBORN is singularly favoured of gods and men, and luckily he is equal to his good fortune. A meaner spirit might have clung to the letter of his agreement—the penalty of the bond—and have lost caste and reputation by insisting on his pound of flesh, even when fate itself had appealed to him. There have not been wanting those who regarded him as a gentlemanly, well-informed buccaneer, content to accept suit and service with even a barbarian Power, which would purchase his sword. Our latest advices absolve him from this reproach. Like the chivalrous, if somewhat impulsive gentleman that he is, so soon as he found that (as we anticipated but four short weeks ago) the desertion of the rebels by their European leaders would bring into relief all that Tartar cunning from which we have already suffered so much, he at once withdrew from his self-imposed task. The news now is that he is on his way back to England, where, it is no secret, this last phase of his eccentric career will bring him far more credit than the most successful efforts to maintain the Mandarin *prestige*. We must now consider what is likely to be the upshot of this *fiasco*. We never doubted that the very first gleam of success would develop that innate treachery which is the bane of Chinese diplomacy. Prince KUNG, for all his appreciation of English enterprise, cannot be unfaithful to the traditions in which he has been brought up.

Well! and what of the crews? Are they to take suit and service with the Chinese? If so, we distinctly see another Chinese war at no very great distance off. What a post-captain in H.M.'s navy may do by no means governs what lesser offenders may do, and as soon as the war commences there will be instances of maltreatment of British subjects, which Mr. TOWNSEND was right in asserting will inevitably lead to a severe lesson in humanity being taught to the Chinese. The Tartar Court can see the ends of their noses as well as the average of Englishmen; the difficulty is that, though statesmen, they cannot see further, and the tortures that laid low BOWLBY and his fellow sufferers, and had nearly sacrificed the valuable life of such a man as Sir HARRY PARKES, are surely destined for the less prominent victims of the Chinese Court, which, judging by its own experiences, deems that a great country cares nothing for the blood or suffering of its humblest children. Captain OSBORN has come home; so did General ASHBURNHAM at the time of the Indian mutiny; so did NAPOLEON from Moscow. We have yet to learn what arrangements have been made for the British subjects who will be seduced into entering that service from which their leader has retired, thus swelling the ranks of the rowdies now in the employ of the Mandarins and rebels. We look with great solicitude on this point, although we fear that nothing will put a stop to the foreign blackguardism now mixed up with the unhappy rebellion. We have, however, a right to look to Mr. LAY and Captain OSBORN to see that the officers and men of the defunct fleet are removed from the scene, and we believe that their best efforts will be used to effect this, otherwise the pains bestowed on the expedition will indeed be one of the greatest curses of the rebellion.

The result of this most ill-advised expedition is precisely what we should have expected, though we had not expected the mask to be thrown off with such precipitation. It must henceforth be definitely understood that whatever arrangements are to be made with the Council at Peking must be supposed to be made in some moment of dire peril, and that the at best rather casuistical doctrine of compulsory oaths in engagements being valueless, is to be held in their case to be binding on third parties. It is not an encouraging prospect. Half the wars waged by Great Britain have been entered on to avenge the faithlessness of parties to some treaty. Until the great moral, as well as legal doctrine, *qui facit per alios facit per se*—the basis of all agency—is thoroughly understood in China, we must expect such consequences as have now overtaken the Anglo-Chinese flotilla. As we have now had most convincing proof that the ruling Powers at Peking will not be advised or at least bound by Western ideas in quelling the rebellion, let us own our defeat and return to the *statu quoante*. We trust that Earl RUSSELL will not lose a moment in rescinding the QUEEN'S order in Council which enabled SHERARD OSBORN, his officers and men to enter the Chinese service, and that his lordship has armed Sir HARRY PARKES (whom we are glad to see returns by the mail of the 11th inst.) to forbid all British subjects serving either Imperials or rebels. Let us not any longer be reproached with taking part in the atrocities

Digitized by Google

which daily occur in this warfare. Let us, we again repeat, confine ourselves to what we first started with, viz., "Protection "with our own naval and military forces the to Treaty ports" against the incursions of pirates, whether Imperialists or rebels, for of the two there is simply a distinction without a difference. There are very few Mandarins who will b sitate to profit by smuggling and piracy, and that is the real occupation of the so-called rebels; and it is quite certain that this party have gained the influence at Peking.

COLONEL SYKES ON JAPAN.

So few members of the House of Commons evince a disposition to pay that attention to the affairs of the Far East which their commercial importance and political interest demand, that we are glad to see the gallant representative for Aberdeen extending to Japan that spirit of supervision and protest which we have so often had to signalise as being ever on the *qui vive*, on his part, in reference to China. We are pleased, therefore, to have a letter from his pen devoted to Japan, and are sure, from the Colonel's inflexible habit of following up a subject he has once assailed, that we shall have the gratification of inserting others from him on a topic of which Englishmen are so much in need of information. We wish we could admit that the writer has done anything to dispel the general ignorance by the outpouring before us. Perhaps he has himself but just commenced his researches into the history of Japan, which may account for the mistiness of the story the letter purposes to trace out, and, as the half-informed are generally the most positive, for the very decided tone of the conclusions arrived at in the close of the epistle. Never mind; further investigation will, we hope, enable the Colonel to be more certain as to his facts, and, we sincerely trust, alter his judgment. His letter clearly shows, what he perhaps did not intend, that nothing whatever is accurately known of Japanese history. The main fact on which the Colonel builds his theory is stated by one authority to have occurred in the *twelfth* century, and by another in the *fifteenth*. What is meant, may we ask, too, by the *immutability* of the Japanese laws? An *immutability*, that dates from the year 1598, at the earliest! So applied, the word has no meaning. Every mail we receive from Japan brings home to us more strikingly the singular similarity that exists between the feudal constitutions of that distant country and those that prevailed in Europe in the thirteenth and two following centuries. "There is nothing new under the sun." A very cursory search into the records of those times will show that an outrage committed by a great feudatory did not pass unpunished by a foreign prince, because it was committed by a *feudatory*. It is true, it often produced, and was held to justify, war with the superior who could not or would not restrain his vassal. Possibly, the Tycoon may have exceeded his power in making the treaty. We will not pretend to say whether he did so or not; we confess our utter incompetency to answer the doubt; but our incompetency is shared by Colonel Sykes, the Professor of Chinese at King's College, and every other European. Our right is to enforce the treaty: the right of the Mikado may be to punish the Tycoon for making it. That is his business. At present, as far as is known in England, the Mikado has disowned neither the treaty nor the Tycoon. Whenever he does that, we shall have means of learning, no doubt, what custom, or law, or immutable institution gives him such paramount sway.

SIR,—I read with great interest the letter in the *Aberdeen Herald*, dated Saturday the 28th Nov., and headed "Kagosima." It is written in a candid spirit, and puts the antagonistic views of the English and Japanese fairly before the public; and I beg to express my concurrence in the opinion you record, that we owe our present difficulties with Japan, and the late lamented bloodshed, very much to our "*Anglicus sum*" arrogance. By international law we are entitled to insist upon the fulfilment of the terms of a treaty made with the potential ruler of any State or country; and had we ratified a treaty with the acknowledged Emperor of Japan, we should be justified in exacting full reparation for injuries from all the subjects of that Emperor. But as far as my reading extends, it does not seem to me that we have a treaty at all with the Emperor of Japan, whose proper title is the "Mikado," and who resides at the capital city of Miako, and not at Yedo. We have indeed a treaty dated Yedo, July 11, 1859, with a potentate, the first article of which runs as follows:—"There shall be perpetual peace and friendship between Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, her heirs and successors, and His Majesty the Tycoon of Japan, and between their respective dominions and subjects;" and elsewhere in the treaty he is always spoken of as "His Majesty the Tycoon." But more than this, Her Majesty was advised in her reply dated Balmoral, 31st May, 1862, to a letter from the Tycoon, announcing the despatch of his envoys to England, to address him "Your Imperial Majesty." We necessarily ask, in what relation this "Imperial Majesty" stands to the admitted Emperor of Japan at Miako? Has he co-ordinate authority, or has he independent secular authority, while the authority of the Emperor at Miako is limited to spiritual matters? If we turn over the scanty leaves of the few European authors who have endeavoured to teach us something about Japan, its government, and people, we shall gather conflicting information.

From fabulous times, 660 B.C., Japan has had an Emperor at its head. That Empire now comprises an archipelago of 3,850 islands, great and small, inhabited and uninhabited. Like the neighbouring Emperor of China, the Emperor united in his own person secular and spiritual powers, which is not only customary with Buddhist rulers, as exemplified in the case of the Llama of Thibet, but has characterised other rulers, ancient and modern; for a Roman Emperor was Pontifex Maximus, and a modern ruler is Emperor and Pope in Russia, and the Pope is secular and spiritual Sovereign in Rome. Japan, the etymology of which is said to be Jih-pun, Chinese words meaning "land of the rising sun," has had its civil wars and changes of dynasties; and about the middle of the fifteenth century the sceptre fell to a boy and the regency to his grandfather, who confined his grandson and usurped his throne. This produced a civil war. Yoritimo, one of the most distinguished characters in Japanese history, espoused the cause of the imprisoned Emperor, and finally succeeded in restoring him, and was created Sio-i-dai Siogoun, or "generalissimo fighting against the barbarians."* The executive power remained in Yoritimo's hands for twenty years, and on his death his titles and office descended to his son, and became hereditary; but the investiture of successors was always given by the Emperor at Miako, and there was no open claim to equal rights of sovereignty. Such is the origin of the "officia" whom we have designated "Imperial Majesty," and whose title of Siogoun foreigners would seem to have converted into "Tycoon"—the latter word not occurring in Kempfer, nor in "Commodore Perry's Expedition to Japan." But the office of Siogoun became an object of rival ambition; and about the middle of the sixteenth century two brothers, descended from Yoritimo, aspired to the office. The princes of the Empire took part with one or the other, and it ended in the death of both brothers. The Prince of Owari seized the office, and his success was assured by the ability of a man of humble origin of the name of Hide-yosi, or Fide-yosi; and the reigning Mikado confirmed Prince Owari. Shortly afterwards he was murdered, and the office usurped; and the usurper, meeting with a like fate, in the midst of the confusion, Fide-yosi seized the office himself, and the frightened Emperor confirmed him, and he took the name of Tayko-sama, or the Lord Tayko. He exercised great power, and was about to invade China, when he died in the year 1598, aged sixty-three. But Tayko-sama left an only son, six years old, and he had married him to the granddaughter of the Prince of Micava, who, however usurped the office himself, and to this day his descendants exercise the functions of Siogoun. The fate of the son of Tayko is involved in mystery. Since that period, the office and power of the Siogoun has continued in the same family, notwithstanding contests, assassinations, and suicides; and it now remains to be considered whether the present Siogoun has the power to bind the Emperor, and the princes and population of the empire, by treaty and stipulations made in his own name.

It is stated there are 604 Jurisdictions; that is to say, 604 nobles, with "Courts Baron" like our own, I suppose, in feudal times; and those nobles exercised more or less of independent authority, according to the number of troops each could bring into the field; but all parties, Emperor, Siogoun, and Princes, are all equally subject to the immutable laws of Japan, one of which Lord Russell admits, in his despatch dated 6th June, 1862, to be the *Outlawry of all foreigners*. With this admission of an immutable law, a treaty, whether granted by Emperor or Siogoun, would seem to be waste paper. But, putting aside this view, we find from "the logic of facts," that the Siogoun is still amenable to the will of the Emperor at Miako; for the Gorogio or Council of the Siogoun at Yedo, told Colonel Neale on the 18th of August, 1862, that the Siogoun had gone to Miako to see the Emperor; and the local English newspapers said he was kept a prisoner at Miako for some time Moreover, Colonel Neale reports to Lord Russell on the 30th September, 1862, that on inquiring how far the Prince of Satsuma, whose followers had murdered Mr. Richardson on the Tocaido, was amenable to the authority of the Tycoon and Government of Japan, the Minister for Foreign Affairs "explicitly avowed that they could not exercise any act directed against the person of the Prince or any of his adherents, when within his own domains, even should it become necessary that any arrests should be effected by the agents of the Supreme Government in connection with the recent outrage;" and with respect to some customs duties matters, the Ministers tell Colonel Neale—"It requires time to make analagous arrangements with *other Governments*. We cannot explicitly reply now." Here is at once an omission on the part of "his Imperial Majesty the Tycoon" that he cannot order even petty custom-house regulations beyond his own domains. It would seem many of the Japan princes are as powerful and as independent as the Tycoon, and exercise similar rule in their own domains, and this, with occasional exceptional periods, would seem to have been the case from early times. Kempfer, although he calls the Siogoun "Imperial Majesty," says—"The Princes of the Empire assumed an absolute power in the government of their dominions and principalities—entered into alliances for their own defence, and carried on war one against another."

At the present moment, we gather from the letter of the Minister of the Prince Satsuma to Colonel Neale, published in the *North China Herald* of the 19th September, 1863, while admitting that the Provincial Governments of Japan are subordinate to the Yedo Government, that the journey to Yedo of Prince Satsuma's uncle (whose retainers killed Mr. Richardson) was for the purpose of conciliating the two *Courts* of Yedo and Keoto. That Satsuma had sufficient claim to the dignity and power of a "Court," the reception our fleet met with at Kagosima testifies. But, independently of the quasi-royal state of the Daimios, we find that even the subjects of the Yedo Government (his Imperial Majesty the Tycoon) consider that the Mikado or Emperor at Miako still possesses executive powers; for in a Nagasaki paper, dated 5th September, 1863, it is stated that the Prince of Honmora was appointed by the Tycoon of Yedo Governor of Nagasaki, in supersession of Oo-Koo-Boo Bung-no Kami, the existing governor, who was popular with both Japanese and foreigners; and, in consequence, "the native people sent a sort of petition to the

* Kempfer, in his "Japan," edition of 1723, refers this event to the 12th century, and says Yoritimo was made Sergoun or Crown-General, and died in 1199, A.D.

Digitized by Google

Mikado Emperor, at Miako, requesting the Government to allow the superseded governor to remain as governor of this place; and lately each of the streets appointed one man, and about forty men went to Miako to beg of the Mikado to allow the old governor to come back, but he has not returned up to the present time."

Of course, the people of Nagasaki would not have petitioned the Emperor unless in the belief that he had secular power to set aside the Tycoon's (Siogoun) appointment. On the whole, there is sufficient grounds for believing, although the provincial Governments may be nominally subordinate to the "Crown-General," as Kempfer calls him, at Yedo, he is himself subordinate to the Mikado or Emperor at Miako; consequently he had no power to bind the Emperor by the stipulations of a treaty which he personally entered into with foreign Governments; and he had no power to bind the other Princes of the Empire; in short, we have no claim to speak of treaty rights with the Emperor of Japan; we have, indeed, a treaty with the chief feudal Prince, but that treaty has not been ratified by his Suzerain!

Finally, in testimony that I am not alone in the conclusion at which I have arrived, I annex the opinion of the Professor of Chinese at King's College, London, the Rev. J. Summers, who says, in reference to our not having secured for Englishmen freedom of travel in Japan, page 245, "Chinese and Japanese Repository":—"Because the agent of the Japanese Government had not power to grant it. The truth was, the Tycoon's dominion and authority could not extend beyond a certain point. The great Daimios, the rulers of the provinces, could forbid it. The Mikado or Emperor would not sanction such a diversion from Japanese rule, and here we are actually at war with Japan because our agents out there did not *know with whom they had to deal.* The great officer at Yedo, the Tycoon, was dealt with as with an Emperor when he ought to have been known that he is, as his name implies, 'Generalissimo,' whose office is hereditary, and whose power extends no further than that of a Governor-General abroad, whose acts may or may not be sanctioned and confirmed by the central Government."—Your obedient servant, W. H. SYKES.

47, Albion-street, Hyde-park, 12th Dec., 1863.

STEAMERS &c., FOR THE CHINA TRADE.

One of the vessels building on the Clyde under the superintendence of Captain Blow and Messrs. Robinows and Majoribanks, the agents for Messrs. Trautman and Co., Shanghai, has been launched from the yard of Messrs. Blackwood and Gordon, Port Glasgow, and named the *Yuen Tze Fee* (signifying good and quick profits). This vessel is a screw of 627 tons and 100 H.P., her dimensions being—length, 190 ft., beam 26, depth 12 ft. 6 in. Capt. Stocks, late of the *Island Queen*, is engaged to take command, and proceed to Shanghai in about a month. The second vessel, now building, will be also ready to launch shortly.

Another clipper has been launched by Messrs. Robert Steele and Co., on Clyde, called the *Taiping*, for Alexander Rodger, Esq. The *Taiping* is 720 tons register, length 185 ft., beam 31, and depth 20. She has been built on the new composite principle of iron frame and wooden planking, the latter being of greenheart and teak, and secured to the frames by metal screw bolts made of Elliot's phosphorated metal. She will be classed 14 years A 1 at Lloyd's, and will be commanded by Captain M'Kinnon, late of the *Ellen Rodger*.

Capt. Bowers, late of the *White Adder*, has, we hear, been appointed to the command of the steamer *Busheer*, noticed in a late issue for the Rangoon, Calcutta, and Singapore line.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.

Mr. Spiro Mavrojani, of the firm of Ralli and Mavrojani, of London and Calcutta, and Mr. E. Rodocanachi, of the firm of Rodocanachi, Sons, and Co., have joined the board of the Bank of Hindustan. The capital of this bank is about to be increased from £1,000,000 to £2,000,000 by an issue of 10,000 new shares at £2 prem. The minutes of the Board announcing this will be found in our advertising columns.

THE HONG KONG BLUE-BOOK.

The annual Blue-Book, containing the reports of the Governors of the British colonies, called for "With a View to exhibit generally the Past and Present State of Her Majesty's Colonial Possessions," has just been issued. The present volume contains the reports for 1861. Sir Hercules Robinson accompanies his various returns with the following excellent summary of their contents, which bears date the 5th of June, 1862. The result is shown to be satisfactory under each head embraced in the returns. Hong Kong is entitled to take a brilliant rank among our colonies, as one that has no public debt whatever, and, better still, had at the close of the year under consideration, assets of revenue exceeding the liabilities by nearly £83,000.

REVENUE AND EXPENDITURE.—The financial condition of the colony is most satisfactory. The revenue of 1861 exceeds that of 1860 by £39,058. 7s., and is nearly double that of 1859, being respectively—1859, £65,225. 6s. 2d.; 1860, £94,182. 16s. 3d.; 1861, £127,241. 3s. 3d. The expenditure for the same period has also increased, being for—1859, £66,109. 3s. 9d.; 1860, £72,390. 12s. 10d.; 1861, £109,632. 0s. 9d. The increase in the revenue will be seen to be mainly under the heads of "Rents" and "Licences." The premiums on the leases sold during last year, in consequence of the increase in the population and the consequent enormous rise in the value of land, realised £36,374, against £18,182 in 1860, being an increase under this head alone of £18,192. The permanent increase in the rent roll of the colony during the same period was £2,747. The monopoly for preparing and selling opium realised last year £12,412, against £10,393 in the previous year. In short, the returns show an increase under almost every head of revenue, and they are all to be explained by the increase of the population, which was found at the close of each of the last three years to be—1859, 86,941; 1860, 94,917; 1861, 119,321. The increase in the expenditure is attributable partly to the augmentation of the establishments, rendered necessary by the growth of the colony, but chiefly to the large outlay upon public works. The expenditure of last year may be classed as follows:—Ordinary expenditure, £64,143. 15s. 11d.; public works, £45,488. 4s. 10d.; total, £109,632. 0s. 9d.; being less than the revenue of the year by £17,609. 2s. 6d., thus—Revenue of 1861, £127,241. 3s. 3d.; expenditure, £109,632. 0s. 9d.; excess of revenue over expenditure, £17,609. 2s. 6d. A statement of the actual financial condition of the colony at the close of the last year shows that at that date the assets exceeded the liabilities by £82,781. 17s. 4d. Of this balance £61,550 was deposited in the chartered banks, bearing interest at from 5 to 6 per cent. per annum.

The prospect for the current year is equally satisfactory, I subjoin a financial estimate for 1862, from which it will be seen that, notwithstanding a proposed expenditure during the present year on public works of £50,000, it is calculated that at the close of the year there will still be a balance to the credit of the colony of £82,000.

FINANCIAL ESTIMATE FOR 1862, CORRECTED UP TO 1ST JUNE, 1862.

RECEIPTS.—Excess of assets on liabilities on 1st January, 1862, £82,000; estimated revenue for 1862, £120,000; total, £202,000.

EXPENDITURE.—Estimated ordinary expenditure, £70,000; estimated expenditure on public works, £50,000; total, £120,000; probable balance on 31st December, 1862, £82,000; grand total, £202,000.

PUBLIC WORKS.—The expenditure under this head during the year 1861 has been as follows:—1. Works and buildings, £28,746. 15s. 4d.; 2. Roads, streets, and bridges, £12,470. 12s. 10d.; 3. Land and house purchased, £4,270. 16s. 8d.; total outlay on public works in 1861, £45,488. 4s. 10d.

WORKS AND BUILDINGS.—The services upon which the greater part of this expenditure was incurred was the new gaol, the Victoria Waterworks, the Lock Hospital, and a new school-house and police-station at Showkewan, the rest being the various usual and miscellaneous works not requiring any special report. The greater portion of the gaol as now contemplated on the present site is finished, and but one section now remains to complete what may be designated the Bridewell; this will be finished at the end of the present year. The waterworks are progressing; the reservoirs and tanks are approaching completion; and as the whole of the pipes and other materials have arrived, and the main already laid, there is no doubt that this service also will be satisfactorily finished by the end of the year. The Lock Hospital appears to answer its purpose, and the school-house and police-station referred to were for the village of Showkewan, which is increasing, and likely to be a place of some importance for the Chinese employed in the export of salt fish.

ROADS, STREETS, AND BRIDGES.—The principal work under this head was the Praya opposite the public streets, abutting upon it, and for portions of Government land adjacent also. The work has been carried on in conjunction with the Crown tenants under special arrangements as regards the land reclaimed. A very considerable portion is finished, and both sections, east and west of the parade ground and Military Hospital, will be completed by the end of the year, forming a continuous sea-road of one and a-quarter miles east, and one and a-half miles west. The inland roads and streets were principally at the west extension of the city, and intended for the opening up of that area to render it accessible and available for building purposes. A large and expensive undertaking in connection with the streets was the drainage, not only for the general wants of the houses, but for the discharge of the enormous quantity and rapid flow of rain during floods—a difficult and expensive undertaking on so steep a site, with a rocky, loose, and treacherous soil to deal with. Landing piers for cargo boats and public steps were also provided under this head in suitable localities as the Praya work was in execution.

LAND AND HOUSE PURCHASED.—The system of education approved of for Chinese requiring the establishment of a central school, a house with a sufficiency of land attached for additional erections, was purchased in the most convenient locality. The school has been opened since the commencement of the present year, and is giving satisfaction. The proposals for supplying gas to this city, referred to in my report of last year, and since then approved by your Grace, I fear, will not be carried into effect, as there appears to be an entire misunderstanding between the proposer of the scheme and the company forming in London, who were to furnish the requisite funds. Should the proposer fail to satisfy the Surveyor-General, in accordance with his agreement, of his intention to proceed with the works on the terms agreed to, the concessions made by me will be cancelled, when I shall be at liberty to make other arrangements with other persons who have stated their willingness to undertake such a service.

LEGISLATION.—Five ordinances were passed during the last year, but none of them of sufficient importance to call for any special remark here.

POPULATION.—The Registrar-General's returns continue to show improvement under almost every head. On the night of the 31st December last the population was found to consist of—Males, 87,945; females, 31,376; total, 119,321, being an increase of 20,404 on the census of the previous year, a portion of which is attributable to the acquisition of Kowloon Peninsula, the population of which is estimated for the first time in the accompanying returns. Of the population of 119,321, 30,909 were found to be living on the water in 4,284 boats, and 88,412 on shore in 6,183 houses, making a total of 10,467 tenements. The population consists of Chinese and foreigners in the following proportion:—Chinese, 116,380; other than Chinese, 2,941; total, 119,321. The other than

Digitized by Google

Chinese are composed of—European and American, males, 1,146; females, 411; total, 1,557. Goa Manila Indians, and others of mixed blood—males, 1,206; females, 78; total, 1,284. Aliens, chiefly seamen and temporary residents—males, 100. Total.—Males, 2,452; females, 489; total, 2,941. In these returns the military stationed in the colony, and the crews of the men-of-war and the merchant ships in the harbour, are not included. The houses show an increase over the previous year of 1.322, and are classified as—Chinese, 4,939; European, 1,244; total, 6,183. The European houses consist of 177 public buildings, and 1,067 private dwellings, shops, and offices. The 4,284 boats in which over 30,000 Chinese were found to be living in the harbours and bays of the colony when the census was taken, are variously described according to the kind of traffic in which they are employed. I annex to this despatch a summary of the Registrar-General's statistical return for the last eleven years, which will show at a glance the steady progress which the colony has made during that period in each of the particulars to which I have just referred.

SHIPPING.—The Harbour-Master's returns show that, exclusive of men-of-war, river steamers from Canton and Macao, and Chinese craft of all descriptions, 1,259 vessels, aggregating 658,196 tons, and belonging to 24 different nations, entered the harbour of Hong Kong during the past year. Of these 1,014 vessels of 520,500 tons entered with cargoes, and 245 vessels of 137,696 tons in ballast. The return of tonnage of vessels arriving last year shows a decrease of 217,003 as compared with the previous year, but an increase of 31,660 tons on the year 1859, which last offers the fairest comparison. as the large number of transports taken up for the expedition to the north in 1860 made that year altogether an exceptional case. American tonnage has, it will be observed, decreased, while British shipping has increased proportionately. This may be in some measure due to the disturbed state of America, but doubtless the late treaty is showing itself in the extended commerce of Great Britain in these seas.

EMIGRATION.—During the past year 37 vessels, aggregating 38,852 tons, and carrying 12,840 emigrants, of whom 993 were females, left this port for the following places:—23 for San Francisco, with males, 7,101; females, 633; total, 7,734. 8 for Sydney, with males, 2,809; 6 for Demerara, with males, 1,937; females, 360; total, 2,297. Total emigration:—Males, 11,847; females, 993; being a decrease of 11 ships and 2,343 emigrants on the numbers of 1860. But this is explained by 2,038 emigrants having gone in 1860 to the newly-discovered gold fields of British Columbia, while there are none to that colony for the last year; and there is also a decrease of emigrants to the Australian colonies. The California returns show an increase of 494; and to the British West Indies there has been an increase of 984 emigrants during the year 1861. During the same period 2,167 Chinese have returned to the colony *en route* for their homes in China from the following places:—From San Francisco, males, 1,158; females, 23. From Sydney and Melbourne, males, 958; from Singapore, males, 28; total, 2,167. As an instance of the wealth which these enterprising and industrious people acquire at the gold fields, I may instance the ship *Minerva*, which arrived here from Melbourne in September last with 350 Chinese passengers in possession of gold to the value of about £43,000.

SANITARY.—The Colonial Surgeon's report, with the tables attached to it, show that the past year has been marked by the absence of violent extremes of temperature, and that the inhabitants of the colony have experienced even a greater share of health than in the two immediately preceding years, which were themselves so remarkable for their healthfulness. —I have &c., (Signed) HERCULES G. R. ROBINSON.

His Grace the Duke of Newcastle, K.G., &c.

POPULATION.—The summary of the Registrar-General's statistics shows that in the year 1861 the number of European houses was 1,244, and of Chinese, 4,939; to which must be added 4,284 boats, making the total number of tenements 10,467. The population consisted of 87,945 males and 31,376 females, making a total of 119,321, of whom 116,380 were Chinese. The population has gone on increasing from the year 1851, when it was but 32,983. The greatest spring was in 1855, when the number takes a jump from 55,715 in the preceding year to 71,790. The increase from 1860 to 1861 was also large, the population for the former year being 94,917, and for the latter, 119,321.

LABUAN.

The Colonial-office Blue-Book gives us no information, we regret to say, respecting our interesting possession of Labuan. Governor Callaghan states, in his letter to the Duke of Newcastle, that there "was no time before the departure of the mail to prepare a report. The consequence is that as the various papers making up the particular "Blue-Book" of each colony are not published in the general volume issued by the Colonial-office, the public are deprived of learning anything whatever about the condition of Labuan during 1861.

THE TELEGRAPH ROUTE THROUGH SIBERIA TO PEKING.

THE telegraph wires in Siberia have been extended from Omsk to Irkutsk. As we have before informed our readers, it is expected that the lines will be completed to Kiachta in all this year. The remaining part of the distance from Kiachta to Peking, across Mongolia, will then engage consideration. It is announced that the Russian Government has agreed with the Chinese on its adoption.

RETURN TROOPS FROM COCHIN-CHINA.

The steam transport *Garonne* arrived at Cherbourg the 25th Dec. from Cochin-China. She left Saigon with passengers on the 20th of August, St. Denis in the island of the Reunion on the 27th of October, where she took passengers. She subsequently touched at the Cape of Good Hope, where she likewise took in passengers.

The steam frigate *Cacique* arrived at Toulon from Alexandria on the 24th ult., having on board 400 military passengers from China and Cochin-China, who arrived at Suez by the steam transport *Japon*. The greater number are invalids, and for that reason the commander of the *Cacique* found it necessary to proceed with great caution, to touch at Messina, and to remain at anchor for twenty-four hours behind Cape Corse to avoid the heavy sea then running, which began to incommode the sick. The *Japon* lost forty-three of her passengers between Saigon and Suez, but owing to the precautions on board the *Cacique* four deaths only occurred between Alexandria and Toulon. As none of the sick were afflicted with contagious diseases, the *Cacique* obtained pratique immediately on entering the port. They were then removed to the military and naval hospitals. Some officers in excellent health arrived in the *Cacique;* they had many years' service in the unhealthy climate of Cochin-China, and are now retired.

THE MURDERS ON BOARD THE "FLOWERY LAND" FROM LONDON TO SINGAPORE.—The five men who were brought home from Monte Video in the Brazil mail steamer *Parana*, and landed at Southampton, charged with the murder of the captain and some of the crew of the ship *Flowery Land*, and scuttling the vessel, were taken before the Southampton magistrates for examination. There are in all ten of the crew implicated in the crimes, five of whom, with two witnesses, were sent away from Monte Video in the steamer *Uruguay* for Liverpool, and the other five, also accompanied by two witnesses, came home in the *Parana*. The British Consul was afraid to send them all in one batch, they being such a desperate set of characters, and offered to send a file of soldiers to keep guard over them, but the above arrangement was ultimately adopted. The men brought by the *Parana* were heavily manacled. Their names are Marco Varto, a native of the Ionian Islands; Marciliano De Laeroix, a Greek; Miguel Lopez, a Malay; George Carlos, and John Williams, three of them being men of colour. The magistrates on the bench were Messrs. J. R. Stebbing, F. Perkins, J. H. Cooksey, and R. Coles. The facts of the case will be found detailed in the evidence of James Early, whose examination was taken. This witness stated that he was a sailor on board the *Flowery Land*, which sailed from the West India Docks on the 28th of July last, and the five prisoners, four of whom could speak a little English, also formed part of the crew. The captain's name was George or John Smith, and the vessel was bound to Singapore. All went on well for five or six weeks, but on the 10th of September one of the crew, a Brazilian, not among those who arrived in the *Parana*, struck the mate. Witness was on the look-out house, and spoke to the mate, when they struck him again, and told Early to go into the deck-house. He did so, and called the carpenter, who was asleep in his berth, and he went out. The mate was then lying on the deck. Some of the men struck the carpenter, who went back to the deckhouse and stayed with witness all night. During the night he heard a noise on deck, but was afraid to leave the deckhouse. Between 5 and 6 o'clock in the morning witness went on deck, and thence into the captain's cabin, where he found the second mate and some of the men. They were around the dead body of the captain, which was covered with canvas, and the prisoner Lopez put a rope round it and pulled it up, and then they threw it overboard. There was a good deal of blood about the decks, and the men washed it away. Witness also missed from the vessel the chief mate and the captain's brother. The sailors then got the money and the clothes that were in the cabin. One of them took command of the ship, and the second mate navigated it. They sailed the ship for twenty-two days, until they arrived at the entrance to the River Plate, where they determined on scuttling her. Witness got into a boat with the steward, cook, and second mate. The sailors ordered them to return, and they all did so, excepting the steward, at whom they threw bottles of wine, which struck him several times. He remained in the boat till he was very much cut about, and then he got out into the water and was drowned. The sailors threatened what they would have done with the steward if they had had him on deck, and said it was too easy a death for him to die. After the steward was dead the men ordered Early to go down and clear the bottles out of the boat. The ship sank in about two and a-half hours from that time, and witness thought that the cook and the lamp-trimmer went down in her, for he never saw them again. Some of the men stopped on board till within a quarter of an hour of her sinking. They placed in the boats some clothes, bread, ham, and bottles of wine, and proceeded to the shore, landing on the open beach, and went into the country. The second mate managed to escape from them and made his way to Monte Video, from which place a man-of-war was immediately despatched in search of them, and after a few days they were all taken prisoners. At the termination of the witness Early's evidence, the magistrates remanded the five prisoners for a week, to afford time for communication with the Board of Trade.

DEATH OF VISCOUNT VALENTIA, THE FATHER OF LADY ROBINSON, OF HONG KONG.—We have to announce the death of the Right Hon. Arthur Annesley, ninth Viscount Valentia, of Valentia, in the county of Kerry, Baron Mountnorris, of Mountnorris Castle, in the county of Armagh, Baron Altham, of Altham, in the county of Cork, in the peerage of Ireland, and premier baronet of Ireland; which event took place on the 30th Dec., at Bletchington-park, Oxfordshire. His lordship was born on Nov. 30, 1785, and was the eldest son of Mr. Arthur Annesley, of Bletchington-park, Oxfordshire, by Catherine, daughter and heir of Admiral Sir Charles Hardy. He married, Aug. 12, 1808, Eleanor, youngest daughter of Mr. Henry Stafford O'Brien, of Blatherwycke-park, Northampton, and by her (who died June 10, 1843) has had issue four sons and seven daughters; the eldest son Arthur, born Sept. 14, 1809, married, in 1836, Flora Mary, daughter of Lieutenant-Colonel James Macdonald, of Clarronald, and died Oct. 27, 1844, leaving issue a son and two daughters, One of the late viscount's daughters, the Hon. Nea-Arthur-Ada-Rose

Digitized by Google

d'Amour Annesley, married, in 1846, Sir Hercules Robinson, Governor of Hong Kong. The deceased lord is succeeded in his title as tenth viscount by his grandson Arthur, born at Inveresk, Edinburgh, Aug. 23, 1843. Lord Valentia succeeded his distant kinsman, George, second Earl of Mountnorris, F.R.S., F.S.A., in the viscounty only on July 23, 1844. The founder of the titles of Mountnorris and Valentia was Sir Francis Annesley, Knight, who filled for forty years high offices in Ireland, and who, having received the honour of a baronetcy, in 1620, was created Lord Mountnorris in 1628, with a reversion to the viscounty of Valentia. It is a singular fact that, for family reasons, all the children, male and female, of the late lord were christened Arthur.

SIR HARRY PARKES AT THE ROYAL ASIATIC SOCIETY.—At a meeting of this society, Viscount Strangford, President, in the chair, a description was given by Sir H. Parkes of an inscribed and ornamented slab of granite, which he had presented to the society, and which was taken from one of six portals erected in Canton a few years before our late capture of that city, and bearing an Imperial edict in approval of the measures adopted by the local authorities for excluding the barbarians from the city. These six portals were demolished after the capture of Canton. The stone presented formed the centre of a kind of pediment to the portal, and contains the two words "Imperial will;" under it was inscribed the edict, a translation of which may be found at page 280, vol. xviii., of the "Chinese Repository" for 1849. A paper, by E. Rawdon Power, Esq., was read—"On the Agricultural, Commercial, Financial, and Military Statistics of Ceylon," showing the important increase which has taken place during the last thirty years, in the production of coffee and cocoa-nut oil, the progress made in roads and railways, and the generally prosperous condition of the colony's finances.

M'GREGOR V. SMITH.—The plaintiff was the master of a ship, bound from Shanghai to Liverpool, on board which the defendant was a steerage passenger, and the action was brought to recover £20, the difference between the steerage and cabin fare. It appeared that plaintiff, after he went on board, being dissatisfied with the accommodation provided, offered to pay the difference and sail as a cabin passenger. For the defence it was contended that the steerage berth was so filthy and infested with vermin that defendant was allowed to occupy the chief mate's berth, upon paying £5 for the privilege of joining the captain's mess; and £5 had been paid into Court in support of the plea of payment. The jury found for the plaintiff for the amount claimed.

BOARD OF TRADE RETURNS.

The official Returns of the Trade and Navigation of the United Kingdom for the month and for the eleven months ending the 30th of November have made their appearance. The exports to the Far East exhibit the following results:—

TO CHINA.—Cotton Yarn: The quantity exported to China and Hong Kong is entered at 379,474 lbs. for the month, against "none" for 1862, and 144,450 lbs. in November, 1861. For the eleven months we have 2,004,184 lbs., against 3,214,059 lbs. in 1862, and 6,107,714 lbs. in 1861. The declared value of the export is £45,009 for November of 1863, against "nil" in 1862, and £6,303 in 1861; for the eleven months £215,084 in 1863, against £183,963 in 1862, and £275,945 in 1861. Cotton Goods: The returns are 3,158,419 yards to China and Hong Kong in November, 1863, against 1,598,183 yards in the same month of 1862, and 6,688,266 yards in 1861. For the eleven months we have 43,007,461 yards in 1863, against 78,285,627 yards in 1862, and 232,961,077 yards in 1861; the value being £94,141 for November, 1863, against £37,015 in 1862, and £87,776 in 1861; and for the eleven months of the years 1863, 1862, and 1861 respectively, £1,063,212, £1,219,777, and £3,022,501. Woollen and Worsted Manufactures: To China and Hong Kong in November, 1863, 89,867 yards, against 249,448 yards in the same month of 1862, and 67,864 yards in November, 1861; for the eleven months of 1863, 1,518,192 yards, against 1,918,496 yards in 1862, and 2,775,040 yards in 1861; the value being for the month, £11,289 in 1863, £31,181 in 1862, and £8,483 in 1861; and for the eleven months of the years 1863, 1862, and 1861 respectively, £279,639, £239,812, and £346,880. Worsted Stuffs: The export has been 874,883 yards in the month of November, 1863, against 943,239 in 1862, and 356,804 in 1861; for the eleven months in 1863, 8,276,044 yards, against 7,559,083 yards in 1862, and 4,436,912 in 1861, the value being £57,404 for November, 1863, against £46,695 in the same month of 1862, and £25,786 for November, 1861; for the eleven months of the years 1863, 1862, and 1861 respectively, £581,017, £374,212, and £330,275. Lead: To China and Hong Kong, in November, 1863, 1,450 tons, against 808 and 210 tons in the same month of the years 1862 and 1861; for the eleven months ending November 30, 1863, 13,457 tons, against 8,249 tons in 1862, and 5,032 tons in 1861. The value of this article of export for the month of November has been, in 1863, £30,179, against £17,186 in 1862, and £4,300 in 1861; for the eleven months of the years 1863, 1862, and 1861 respectively, £287,112, £176,351, and £109,461. The declared value of British produce exported to China (exclusive of Hong Kong) for the month ended the 31st October, 1863 and 1862 respectively, is £265,053 and £93,392; and for the ten months of the same years, £2,036,926 and £1,687,691. To Hong Kong the declared value of the exports of British produce for the month of October, 1863, was £124,843, against £53,841 in October, 1862; and for the ten months of the two years respectively, £1,165,889 and £979,109.

TO SINGAPORE.—Cotton Yarn: 194,390 lbs. in November, 1863, against 20,000 in the same month of 1862, and 90,170 in 1861. For the eleven months of the three years 1863, 1862, and 1861, the export has been respectively 1,934,636 lbs., 1,574,171 lbs., and 1,560,387 lbs. In value we have £19,771 for November, 1863, and for the eleven months of the years 1863, 1862, and 1861 respectively, £203,045, £96,949, and £96,798. Cotton Manufactures: For the month of November, 1863, the return gives 3,596,694 yards, against 176,500 yards in November, 1862, and 4,549,651 yards in 1861. For the eleven months the export has been 24,967,935 yards in 1863, 31,615,973 yards in 1862, and 44,154,361 yards in 1861. The declared value for November, 1863, is £[illegible],314, and for the eleven months of the years 1863, 1862, and 1861 respectively, £595,829, £541,941, and £611,007. The declared value of British produce exported to Singapore and the Eastern Straits for Oct., 1863, was £100,313, against £62,436 for the same month of 1862, and for the ten months of the years 1863 and 1862 respectively, £1,134,692 and £970,342.

TO THE PHILIPPINE ISLANDS.—Cotton Manufactures: The export in November, 1863, was 180,019 yards, against "nil" in the same month of the two preceding years. For the eleven months of 1863 the export has been 13,250,473 yards, against 12,625,882 yards in 1862, and 34,421,490 yards in 1861. The declared value is £7,187 for the month of November, 1863, and for the eleven months of the years 1863, 1862, and 1861 respectively, £324,391, £252,329, and £596,219. The declared value of British produce exported to these islands was £64,253 for October, 1863, against £947 for the same month in the year preceding. For the ten months ended October 31, 1863, the value was £500,835, against £379,209 in 1862.

TO JAVA.—Cotton Manufactures: The export for November, 1863, was 1,742,706 yards, against 1,345,660 in the same month of 1862, and 2,062,753 in 1861. For the eleven months the export was 13,989,714 yards in 1863, against 26,074,820 yards in 1862, and 44,726,270 yards in 1861. The value for November, 1863, was £47,544, and for the eleven months of the years 1863, 1862, and 1861 respectively, £347,334, £489,925, and £697,252. To the Dutch Possessions in India, the declared value of British produce exported in October, 1863, was £77,154, against £40,770 in the same month of October, 1862. For the ten months ending October, 1863, the value was £489,695, against £687,147 in 1862.

SIAM.—The value of the British produce exported for the first ten months of 1863 is, £11,958, against £17,068 in 1862.

COCHIN CHINA, CAMBOJA, AND TONQUIN.—The value of British produce exported is, £36,597 for the first ten months of 1863, against £247 in 1862. The export for November, 1863, is declared at £1,597.

FREIGHTS AND CHARTERS.

Outward freights remain unaltered. All the berths are well supplied with tonnage, and no improvement in rates can be reported.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 to £40 and £2. For Shanghai: £48 to £50 and 45s. to 47s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

The Gabalva, Frazer, which arrived at London Dec. 30 from Shanghai, reports that in a typhoon, on the 14th August, when east of Formosa, she sprung her fore and mizen masts, lost jibboom, &c., and sustained other damage, but afterwards succeeded in fishing the masts.

The Carausius, Baird, from Hartlepool for Hong Kong, put into Plymouth January 2, with part of crew sick.

The Fanny, Hinsbock, from Hamburg for Singapore, put into Rio Janeiro Dec. 6 for water.

The Parana, steamer, arrived at Southampton from the West Indies, &c., brought home five prisoners, part of the crew of the Flowery Land, from Liverpool to Singapore, lost off the Brazil coast; they are accused of murder and piracy. She has also brought home two others as witnesses. The remaining seven prisoners and witnesses are said to have left Monte Video in the Uruguay, steamer, which sailed thence Nov. 26 for Liverpool.

The King Arthur, ship, of Greenock, Bramwell, from Shanghai for London, was wrecked in Gaspar Straits previous to the 30th November. Master was landed at Anjer.

The Contest (American ship), from Kanagawa for New York, with a cargo of tea and rags, had been burnt by the Alabama (Confederate steamer) in the Straits of Sunda, previous to the 30th Nov.

Off ASCENSION.—Nov. 26, from Shanghai, Carpentaria.

At MADEIRA.—H. M. S. Conqueror arrived from Plymouth and proceeded for Japan.

HOLLOWAY'S PILLS.—SOURCE OF STRENGTH.—No deep philosophy is wanted to prove that health and vigour depend upon the purity of the blood; yet how few act upon this truth compared with the many who neglect themselves and lay the foundations of the most formidable complaints, when a few doses of these purifying Pills would give them instant comfort and future health. Holloway's is no palliative treatment, but the most searching and fundamental means of redressing all wrongs in the stomach, liver, kidneys, and throughout the circulatory and nervous systems. Holloway's Pills are most admirably adapted for a family medicine, since the most youthful, delicate, and susceptible may fearlessly take them when more violent measures would be highly dangerous.

TERMS OF BUSINESS AT THE HEAD OFFICE IN LONDON.

The Bank receives deposits at ten days' notice of withdrawal, on which interest is allowed at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not exceeding 5 per cent. The rates of interest allowed on deposits for fixed periods vary according to amount and the length of time for which they are made.

By special agreement quarterly or half-yearly payment of interest is allowed on deposits for six, nine, or twelve months.

The Bank issues drafts on its branches in India and China, and circular notes and letters of credit, payable throughout Europe, for the convenience of travellers per Overland route.

The Bank purchases approved bills on India and China, and also receives the same for collection on private account.

The Bank undertakes the purchase and sale of Indian and other securities, and receives the same for safe custody.

The Bank realises interest, pay, dividends, pensions, or other moneys for remittance through the Bank or otherwise. On remittances through the Bank no commission will be charged.

The Bank effects the registry of Indian Government loan notes, so that the interest may be paid in England.

The Bank grants credits in favour of parties abroad. Applications for such credits must be sent in at least three days before despatch of the mails, otherwise they will be deferred until the following mail.

Applications for drafts, bills for collection, and all matters involving correspondence by the mail, must be sent in one clear day before its despatch.

Every other description of Indian banking and money-agency business conducted, and the utmost possible facilities given to parties in their transactions with India, China, &c.

Forms and powers of attorney furnished at this office.

Office hours, 10 A.M. to 3 P.M.; Saturdays, from 10 to 2.

THE BANK OF HINDUSTAN, CHINA and JAPAN (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY GENERAL MEETING of this Company will be held at the London Tavern, Bishopsgate-street, in the City of London, on MONDAY, the 18th day of January next, at Twelve of the clock at noon, for the purpose of passing a resolution (if the shareholders so think fit) pursuant to the 7th clause of the articles of association of the Company, to ratify and confirm a resolution of the Board of Directors, of which the following is a copy:—

Extract from resolutions of a Board of Directors, held on Monday, the 28th day of December, 1863.

Resolved—That the existing capital of the company be increased from one million sterling to the amount of two millions sterling, by the creation of ten thousand new shares of £100 each upon the terms following:—

1. The new shares shall be issued at £2 per share premium.

2. Of the ten thousand shares eight thousand shall be offered in the proportion of four new shares for every five present shares to the shareholders appearing upon the register on the 16th day of January next, and the remaining two thousand shares shall be reserved for special allotment by the Directors at the same premium to any persons they think fit.

3. A deposit of £3 per share, together with the premium of £2 per share, making a total of £5 per share, shall be paid upon application, and no application from shareholders resident in the United Kingdom shall be received subsequent to the 28th day of January next, nor from shareholders resident in India subsequent to the 30th day of March next, after which day the shareholders not applying shall be considered to have renounced their right to an allotment.

4. Any shares not so applied for shall be dealt with in the discretion of the Directors.

5. No preference or priority as regards dividends or otherwise over the shares in the now existing capital shall exist in favour of the new shares, and in the declaration of dividends the same shall be computed and paid rateably upon the capital from time to time paid up.

6. That an Extraordinary Meeting of the Shareholders be called to ratify and confirm the preceding resolutions, and that notice thereof be given to the shareholders by advertisement, and by circular letters.

And notice is also given, that the Transfer Books of the Company will be closed preparatory to the Meeting from the 15th to the 18th of January next, both days inclusive.

By order of the Board,
R. SWIRE TOMLIN, Secretary.

16, Cornhill, London, E.C., Dec. 31, 1863.

THE AGRA AND UNITED SERVICE BANK (Limited).

ESTABLISHED IN INDIA, 1833. PAID-UP CAPITAL £1,000,000 (One Million Sterling). SUBSCRIBED CAPITAL £2,000,000 (Two Millions Sterling), in 20,000 Shares of £100 each. RESERVE FUND, £192,658 17s. 8d.

HEAD OFFICE, 27, Cannon-street, London, E.C.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong, and Sydney.

CURRENT Accounts of Firms and individuals are kept at the Head Office, on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received at ten days' notice of withdrawal, at rates fluctuating with those of the Bank of England; and for longer periods at fixed rates, particulars of which may be obtained upon application.

Every other description of banking business and money agency, British and Indian, transacted.

Letters of Credit and Circular Notes issued, payable at the chief cities of Europe and Asia, and also at Cairo and Alexandria.

MACKINTOSH BALFOUR, General Manager.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.

STEAM to HONG KONG and SHANGHAI (taking goods for Hangkow and Japan), the splendid new, river-built, twin screw steam clipper ship, FAR EAST, A 1 twelve years, 1,200 tons register, 180 nominal horse power, working up to 600-horse power, HENRY JONES (late of the Ballarat), Commander; loading in the East India Docks. This magnificent new steamship (built by J. and W. Dudgeon, of Millwall), affords the best opportunity to shippers requiring despatch. Her cabin accommodation cannot be surpassed. Vacancies for Midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

PASSENGERS by Steamer for HONG KONG and SHANGHAI.—The new twin screw steamer FAR EAST, A 1 12 years, 1,200 tons register, HENRY JONES (late of the Ballarat), Commander, to load in the East India Docks, and to leave early in January. This beautiful steamer has a full poop, with capacious cabin accommodation, and will carry an experienced surgeon. It is confidently expected, from the build of this steamship, and her powerful engines, that she will make a very fast passage. Vacancies for midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

MANILLA direct (sailing under the Spanish flag), the splendid new Spanish clipper bark ELISA, A 1 at Lloyd's for 10 years, 431 tons register, FRANCISCO RIVERO, Commander. This fine vessel has just been built at Sunderland expressly for the Manilla trade.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helens, E.C.

FOR NAGASAKI (Japan) direct, the splendid British-built, clipper ship ALICE, A 1, 473 tons register, will be immediately despatched from the East India Docks, and having nearly the whole of her cargo engaged and shipping, will be found the most desirable opportunity for shippers desirous of despatch.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill.

FOR SHANGHAI direct, the well-known clipper ship ASSYRIAN, A 1 ten years, 555 tons register, ANDREW MEARNS, Commander; lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper ship COREA, A 1 fourteen years, 581 tons register, J. GARRY, Commander, lying in the West India Docks. This ship has good accommodation for passengers, and has just made the passage from Foo-chow-Foo in 111 days.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Our issue of the 9th inst. contained a precis of the items of news from China, Japan, Singapore, &c., brought by the mails due on 27th ult., 6th and 13th inst. The present Number completes this intelligence, together with the movements in this country in reference to the Far East. Our next will be published, as usual, on the arrival of the mail due on the 27th inst., a telegram of which is now due, but delayed on account of the cable between Malta and Alexandria being deranged.

Summary of News from the Far East.

JAPAN.

The telegraphic summary of the news brought from the United States by the *Asia*, which vessel arrived at Queenstown at 4 P.M. on the 17th, gives the following:—

"NEW YORK, Jan. 5 (Evening).—Advices received here from Kanagawa to the 1st December state that the city was still guarded by Europeans. A peaceful solution between the Tycoon and Europeans was expected. The Tycoon was at war with the Daimios. Business was improved. The Japanese had paid an indemnity of $10,000 for firing on the American vessel *Pembroke*."

This adds nothing to the intelligence already published in the *London and China Telegraph* of the 9th inst. but the fact of the indemnity paid for intercepting the American vessels. That little circumstance is a further proof of the determination taken by the Tycoon to remove every cause of complaint from foreign residents.

KANAGAWA.

The rebellion of the Prince of Nagato is evidently nothing less than an attempt to upset the entire frame of Government at present existing in Japan. He attempts to seize the Mikado, for the sake of deposing the Tycoon, for this latter is the Siogoun, or (as explained in the letter of Colonel Sykes, given in the *London and China Telegraph* of the 9th inst.) the Sio-i-dai Siogoun, "generalissimo fighting against the barbarians," another mode of spelling which title we have in the following extract from the *North China Herald*:—

"We have received a slight modification of the rumours current as to the insurrection in Kioto. It appears that Nagato had formed the design of seizing the Mikado, when the latter was on his way to a temple called Isedairo-jin-gu, about seventy miles from the capital. The object he hoped to attain by thus seizing the Mikado was to extort from him the office of Sei-i-tai-sho-ngun (the great general who subdues barbarians). This design leaked out, however, and Nagato was ordered to leave the city. He thereupon assembled his men, and attacked the palace in force. Fearing that such would occur, preparations had been made beforehand, and the Daimios of the guard instantly collected and succeeded in driving back Nagato's men. The report of the bombardment of Osaca is utterly false, and must have arisen from a perversion of the fact that Nagato having failed in an attempt to obtain some arms which were stored in an arsenal in the province of Yamato, attacked the palace, and utterly destroyed it, killing every man, woman, and child in the place. The Tycoon has engaged the assistance of Satsuma and eighteen other powerful Daimios, and proclaims his intention of subjugating Nagato, and bringing him back to his allegiance."

The Prince of Nagato, therefore, apparently the head of the party opposed to commerce with the foreigners, is in direct rebellion against both the Spiritual and Temporal Emperors, and naturally, *per contra*, the cause of trade and amicable foreign relations takes the ascendant in the opinion of both heads of the Japanese polity.

The new church has been opened, and is named Christ Church. The *Japan Commercial News* contains the following account of the opening:—

The designs of the church were made three years ago by the Reverend S. R. Brown, of the American Mission at this port, and the building constructed from those designs has turned out to be a very handsome, commodious edifice. The church has been found, we hear, to be well adapted for sound. One prominent feature in the building, and one which reflects great credit upon the skill and foresight of the designer, is its strength and its capability to withstand the frequent shocks of earthquake to which such buildings are exposed in this country. There is a good deal of architectural beauty aimed at, and secured also; and, in our opinion, the generous souls who were the chief means of giving to the community this handsome church have reason to feel a good deal of honest, laudable pride in the result of their charitable exertions on behalf of Christianity in this pagan land. They can now appreciate the beautiful lines of Wilcox:—

"Rouse to some work of high and holy love,
And thou an angel's happiness shall know—
Shall bless the earth, while in the world above,
The good begun by thee shall onward flow."

The building in the clear is sixty feet by forty feet; the original estimate for it was $2,200; but it will cost upwards of $3,000, not including the cost of a very fine harmonium.

The incumbent—the Rev. M. B. Bailey—preached a sermon appropriate to the opening of the church, in the morning, from II. Samuel vii. 18-20; and in the evening from Psalm cxxii. 7-9.

The congregation, or attendance at the opening, consisted of upwards 300 persons—almost the whole of the foreign community—including the foreign ministers and consuls, with members of the various legations and consulates, and several officers from the ships of war in harbour.

There is no doubt that any further aid which may be required to secure a thorough completion of the church will be cordially given. It being a British Episcopal Church, the British Government bears one-half of all the expenses.

EXPORTS.

Per J. C. Munro, for London, despatched by Geo. Barnet and Co., 606 bales silk, 5,629 lbs. tea, 23 bales waste silk, 1,978 bales cotton, 5 bales flax, 11 pkgs. curios, 213 pkgs. tobacco, 173 boxes wax, 38 cases m o'pearl shells.

Per A. A. Eldridge, for San Francisco, despatched by Walsh, Hall, and Co., 37,780 lbs. tea, 400 tubs oil, 55 pkgs. merchandise, 13 cases paper, 5 pkgs. sundries.

Per Maggie Atkinson, for New York, despatched by R. B. Smith, 425,651 lbs. tea, 27 pkgs. sundries.

TIEN-TSIN.

A correspondent of the *Daily Press* writing from this port says:—"The Chinese who were trained to the platoon and manual at so much pains by Captain Coney, of the British army, disbanded about two months since in consequence of their being unable to obtain any pay. They muster three thousand strong, and the worst of it is, they have taken the Russian rifles with which they were provided with them. There will be a deal of trouble with these men; they have doubtless acquired a pretty fair knowledge of the use of a deadly weapon, but their pretensions are most expansive, and they fancy themselves as good as European troops. They will doubtless pursue a system of guerilla warfare among the hills of Shantung and Shangsi, forming themselves into a most dangerous bands of highway robbers."

Here is a pretty result of the pet scheme of the British Minister in arming and training Chinese troops. Not only has the idea furnished three thousand drilled insurgents armed with rifles, at open warfare with the authorities, but it has inflicted a permanent injury upon British interests. For whereas, although the roads in Shantung and Shansi have been infested with robbers for many years, still these would never think of attacking Europeans. Now, however, these drilled troops with their Russian rifles will be more inclined to attack Europeans than any others, because they will expect more booty. At present the roads are so infested with mounted highwaymen that the last courier from Newchwang was robbed no less than four times *en route* to Tient-sin.

NEWCHWANG.

THE RACES.—The little community resident at the port of Ying-tze have been amusing themselves with some smart races, in which the animals contending were all China ponies. There were no less than seven presentation cups, and the performances of the ponies are spoken of very highly, their achievements in the hurdle races being something wonderful.

SHANGHAI.

The case of Manning *v.* Ellissen and Co. came off in the Consular Court on the 4th November, and resulted in a verdict for the defendants. This verdict was fully warranted by the evidence. The following is an outline of the case:—

The plaintiff in this came claimed 30,000 taels for damages sustained through the defendants disobeying his instructions to send the *Nora Creina* to Japan. The damages were estimated at $30,000 loss of sale, $1,800 loss of time by plaintiff through detention in China, and $1,080 for expenses, during detention, making with other items $33,265.

The defendants pleaded
1st—Denial of claim alleged.
2nd—Denial of loss alleged.
3rd—Denial of any liability whatever.

Mr. Lawrence, in opening for the plaintiff, stated briefly the grounds of the action. The Illawarra S.N. Co. had sent Mr. Manning to Shanghai with authority to sell the *Nora Creina*. He had come up from Australia in the *William IV.*, and on his way had arranged with his agents in Hong Kong to run the *Nora Creina* to Foo-chow, and if she were not sold there to lay her on for Nagasaki and Kanagawa. The plaintiff left for Japan in November, after an interview with Mr. Tootal, in which he gave that gentleman instructions to lay her on, as stated, if she were not bought at Foo-chow. While in Japan, he received a letter from defendants which astonished him very much, as it said that the *Nora Creina* had not been sold at Foo-chow, but had arrived at Shanghai and had been advertised for charter. He wrote expressing his astonishment; the defendants replied denying their instructions, and the result was the present claim by the plaintiff for loss sustained through the non-sale. While the plaintiff was in Japan there was a great demand for vessels; only three had been sold at the time of his arrival, but a large number since. It was contended, therefore, that, had the *Nora Creina* gone, she must have been sold. The questions for the Court to decide would be—whether the instructions alleged were given; whether, if they were given, there was any negligence on the part of the plaintiff in carrying them out; and whether the plaintiff had sustained damage in consequence.

The *North China Herald*, in reference to Admiral Kuper, says:—"Hitherto we have not had to record any act of unmistakeable pluck and dash on the part of Admiral Kuper. He has up to the present acted with the utmost prudence, and with an evident desire to avoid embroiling our relations with the Japanese. We have now, however, arrived at a crisis in these relations, and it will require a strong demonstration of some kind to put an end for ever to displays of arrogance on the part of the natives, and of submission on our own. There have been not a few who attributed the troubles of the Indian mutiny to the consideration shown for Oriental prejudices, and to the absurd concessions made to native exclusiveness. They (the natives of India) had come to despise authority, and felt themselves to be objects of dread. Had successive governments been as firm with the Bengal Sepoy as necessity obliged us to be with our domestics, we should have heard nothing of greased cartridges or of the thousand insolent requirements of caste." Such was the verdict of an Indian journalist. We may apply his remarks to our policy in China and Japan. We have in too many cases pampered the prejudices of the races towards whom we might have assumed a lofty stand, and shown ourselves willing to make almost any sacrifice rather than forego the advantagss of communication with them.

THE RACES.—The Autumn meeting took place on the 11th, 12th, and 13th November, winding up on the last day with a couple of steeple-chases and a hurdle-race. Mr. FitzJames's Exeter appears to be the "Eclipse" of this part of the world, carrying off everything for which he was entered, "hard-held." Mr. Barlow's Arab horse, Hadji, was the only competitor thought to have any chance with him, but the stride of the English horse landed him an easy winner. There were several races for China ponies, Mr. Fungus's Honi Soit taking the Hankow Plate of 100 guineas, but being defeated for the Champion Plate of 200 guineas by Mr. Williams's Cure.

THE REGATTA.—The aquatic sports were fixed for the day before the races, and embraced a prize for men-of-war cutters, a long race, and prizes for merchant ships' boats, men-of-war gigs, and outrigger four-oared gigs. The latter was won by Mr. Stout's crew, and in the ships' boat race the *Agincourt's* was first, and the *Childe Harold's* second.

Land in Shanghai still maintains a good price, a piece in Nankin Road, measuring 1 *mow*, 3 *fun*. 6 *le*, say under a 1,000 square feet, being knocked down, on Thursday last, with some old coal Godowns on it, to Dr. Dickson for the extraordinary sum of 17,600 taels. This is after the rate of, say, half a guinea per square foot.

HONG KONG.

An ordnance had been introduced for the suppression of fraudulent trade marks, &c. Wilberforce Wilson had assumed his duties as Assistant Surveyor-General, and Henry G. Thomsett as Harbour Master, Marine Magistrate, and Emigration Officer.

The Hong Kong *Government Gazette* of Oct. 31 publishes the Votes and Proceedings of the Legislative Council at their sitting of the 8th of July, 1863. The Appropriation Bill was passed, under the title of "An Ordinance to apply a sum not exceeding Four Hundred and Seventy-seven Thousand Dollars to the Public Service of the year 1864." The several votes making up this sum were as follows:—

Civil establishments:—The governor, $240; colonial secretary, 6,288; colonial treasurer, 4,616; auditor-general, 6,722; clerk of councils, 72; surveyor-general, 8,762; postmaster-general, 15,768; registrar-general, 1,290; harbour master and emigration officer, 7,792; judicial establishment, 6,310; ecclesiastical establishment, 702; educational establishment, 9,334; medical establishment, 13,792; police magistrates, 4,282; police, 126,879; gaols, 39,698; charitable allowances, 480; transport, 1,500; works and buildings, 107,140; roads, streets, and bridges, 102,950; miscellaneous services, 250; land and houses purchased, 10,000; special expenses, &c., 1,500—total, $476,367.

At the sitting of the Council on the 28th of October a Bankruptcy Act was read a first time, bearing the title of "An Ordinance to amend the Law of Debtor and Creditor in the Colony of Hong Kong." By it "Ordinance No. 3 of 1846, for the Relief of Insolvent Debtors within the colony," is repealed, and the Supreme Court of Hong Kong is constituted a Court of Bankruptcy. The Provisional Assignee under the Ordinance of 1846 is to be the Official Assignee under the present Ordinance, which is to apply to all adults, whether traders or non-traders.

The export of cotton from all ports in China to England from 1st June to the latest return—24th November—amounted to about 150,000 piculs, or 20,000,000 lbs. The number of vessels under despatch by last accounts was over thirty. In consequence of this demand prices at Shanghai, the chief port of shipment, had advanced from 13 to 22 taels per picul, which, with freight and charges, would give its cost laid down in England at about 17*d*. per lb.

The *D. Maria Gloria* (Portuguese) left Macao for Havana, having on board 292 Chinese coolies. The *Luisita* (Portuguese) also left Macao with 343 Chinese coolies on board for Havana.

Digitized by Google

After the experience we have had of the manner in which these unfortunate coolies are treated in the slave-holding country of Cuba, and the numerous atrocities which have in consequence been enacted after their embarkation at Macao, we thought this vile traffic had ceased. We can, at least, take comfort that the ships conveying them, and the various agents and brokers engaged in this traffic, are not under British colours.

The P. and O. steamer *Nubia* (not the *Simla*, as noted in the Hong Kong papers) passed Singapore on the 30th Nov., from Calcutta with troops intended for service in Japan. These troops consist of the 2nd battalion 20th Regiment, lately despatched from this country, and intended for service in India.

We noticed in our last the seizure of the steamer *Scotland;* we now subjoin a list of the guns on board:—English gun—bore, 8 in.; breech, 25 in.; muzzle, 17 in.; length, 9 ft. 11 in. American gun—bore, 10 in.; breech, 27; muzzle, 14 in.; length, 7 ft. 11 in. English gun (supposed)—bore, 6 in.; breech, 18 in.; muzzle, 12 in.; length, 7 ft. 6 in. About 150 shell, one case of 10 second fuzes, and about 50 8-in. shot. American gun—bore, 10 in.; breech, 27 in.; muzzle, 14 in.; length, 7 ft. 11 in. American gun (supposed)—bore, 8 in.; breech, 27 in.; muzzle, 16 in.; length 9 feet 8 in. American gun—bore 9 in.; breech, 27 in.; muzzle, 14 in.; length 9 ft. 11 in. English gun—bore, 5 in.; breech 17 in.; muzzle, 12 in.; length, 7 ft. 5 in.

The *China Mail* thus notices the port of Chinkiang and the Consular appointments.

"The following Consular changes take place in consequence of Mr. Gingell's death. Mr. P. J. Hughes, Vice-Consul in charge at Kiukiang, goes to Hankow. Mr. Adkins, now in Chinkiang, goes to Kiukiang, and is succeeded by Mr. G. P. Braune, formerly senior assistant at Taiwan.

"Chinkiang is looked upon at present as an obscure port, but it cannot long continue so. It is, in the opinion of many, the most desirable place between the sea and Hankow for the loading of tea ships. It is only out of the influence of the tide for half the year, there being regular tides during the other half; and the flood is never very strong. The only obstacles in the way of getting ships to Chinkiang are the Langshan shoals; but they, like the Goodwin Sands of old, are losing their terrors, and there is no reason why a few buoys, properly placed, should not mark the channels there as well as in any other river; in fact, we hear that the authorities intend to lay on a few buoys at the ends of the shoal, and moor a light-ship at a suitable place."

The demand for tonnage has been principally for ships to load cotton for Liverpool, and several vessels have been placed for that port at £3. 7s. 6d., the demand for small vessels to load for northern ports has been good and rates are higher. It is said that there are not enough small vessels at present in port to supply the demand. An American ship is loading for New York, but there is no employment for American vessels, and until the *Alabama* and other Confederate privateers are reported as on the other side of the Cape this want of confidence must prevail.

The following casualties, &c., are from the *Daily Press*:—The British barque *Pruth*, Captain Reay, from Bangkok bound to Shanghai, although upwards of sixty days out, has not arrived. This vessel is said to have been seen to windward of the Prata Shoals by a passing ship (the name of which we have not yet ascertained) with both anchors down in a gale of wind. She is supposed to have drifted on the shoal and been lost.

The *Virginia*, from Sydney, brings a cargo of coal, beche, le-mer, &c., two celebrated racehorses—one named Traveller—one hundred and sixty Chinese, and 3,368 oz. gold. She has had nothing but light winds during the passage, until she reached the Bashees. Passed Wellington, *alias* Duprey, Islands on the passage, a very small spot, but which, however, has eighty-two inhabitants, two of which are Americans; poultry and fruit to be procured there in abundance. Appearance of the residents anything but satisfactory.

The Danish brig *Comet* was seized by the Customs' authorities at Foo-chow for discharging cargo at Quantow, near Sharp Peak, outside the limits of the port.

The Hamburg brig *Ellen*, from this bound to Ningpo, is now seventy days out, and nothing has been heard of her.

The steamer *Fi-wan* has been raised, and now lies on the bank close in to Messrs. McGregor and Co.'s wharf.

The *Grosswater*, from Hong Kong to Ningpo, returned to port very leaky, having struck near the Nine-pin.

The *Elizabeth* reports the following:—On 25th Oct., in lat. 7 N., a little to the southward of Prince of Wales Bank, picked up four shipwrecked Malays, belonging to the Danish brig *Gazelle*, from Batavia to some port in the China Sea. According to their report the brig had struck and foundered some twenty days before, when the crew had taken to the boats. Six men had gone in their boat, two of whom died from exhaustion. The *Elizabeth* remained on the same place, or nearly so, for twenty-four hours, without seeing anything of the other boat which the four Malays had lost sight of three days previously.

CANTON.

The Canton Regatta Club had their annual races on Wednesday and Thursday the 18th and 19th November. The course selected was about a quarter of a mile down the Macao passage, in a slanting direction. For a grand stand two flower boats were utilised, and, on board of them, Tiffin was served at all hours of the day. These boats were very well placed, and spectators had a good view of the winning boat as they came in. The muster of people in attendance was good. The office-bearers were as follows—Umpires: D. B. Robertson, Esq., H.M.'s Consul, and Captain Corbett, of H.M.S. *Scout*. Stewards: Messrs. Fittock, Gray, Moul, Gifford, Carlowitz, Perry, Heaton, and Pugh.

THE PHILLIPPINES.

MANILA.

Mr. Boonar, the First Officer of the *William Sturges*, which was lost while entering the harbour of Ilo, in the Phillippine Islands, on the 20th September last, has written to the *North China Herald* complaining of the Spanish authorities on the occasion. She struck within sight of the town, and application was made for the Government steamer to be despatched to her aid; but this was refused, on the plea that the weather was too bad. During the night the *William Sturges* beat over the bank on which she stuck, and was trying to reach the Guimaras shore under canvas at daylight, being evidently in a sinking state. The authorities were again urged to send assistance, but to no purpose. The boat of the English ship *Planet* succeeded in reaching the ship a few minutes before she sank, and took off her officers and crew. The day following (Mr. Boonar continues) she was visited by the officials of the place, who commenced plundering the ship of whatever they could lay their hands on. The mate complained to the collector who was present, and showed him the stolen property in the boat, but he refused to notice it, and the boat was shoved off when the mate attempted to obtain possession of them. No redress whatever could be obtained for all these outrages.

SIAM.

BANGKOK.

The *Straits Times* has the following:—The American barque *Marion* has been sold here for $10,000. The American three-masted schooner *Fairy* is in the market, and will shortly be purchased by our respected townsman, Poh Jim, the owner of the *Chow Phia* and several other sailing vessels.

H. M. the King has lately been paying his usual yearly visits to all the temples of note, and has just left for his country palace at Pitchakaree, attended by all the ministers and nobles.

The fireworks opposite H.M.'s Palace in the river, and the far famed Pakham Races here, passed off with the usual demonstrations.

MALACCA STRAITS.

SINGAPORE.

The following petition has been forwarded by the Chamber of Commerce, Singapore:—

To the Right Honourable W. E. GLADSTONE, M.P., Chancellor of the Exchequer. The Memorial of the Singapore Chamber of Commerce

Showeth—That your Memorialists respectfully beg to direct your attention to the high duty levied on Pepper imported into Great Britain for consumption; the price in bond being 3½d. per lb., and the duty, 6d., amounting to 160 per cent. on its market value.

From the annexed Table A it will be seen that while the importation of pepper into Great Britain has increased very largely within the last ten years, the quantity taken out of bond for home consumption has not undergone anything like the same augmentation, but, on the contrary, has remained almost stationary.

That the heavy duty leads to pepper being much adulterated in preparing it for sale by retail, and a fraud is thus perpetrated injurious alike to the revenue, the importer, and the consumer of the article.

The annexed table B shows the quantity of pepper exported from the Straits Settlement to Europe and America. A large proportion of this is imported from Native States in the Indian Archipelago, and is principally procured in barter for British manufactured goods and the productions of British India.

Digitized by Google

That the revenue arising from pepper has never much exceeded £100,000 per annum, so that while the abolition of the duty would not involve a very great sacrifice to the State, it would lead to a largely increased consumption and thus prove a valuable boon to the population of Great Britain, and at the same time supply a wider outlet for the manufactures and produce of the mother country and British India.

Your Memorialists, therefore, pray that you will be pleased to take what they have above stated into your favourable consideration, and allow the importation of Pepper into the United Kingdom free from duty.

And your Memorialists will ever pray, &c.

Singapore, 1st December, 1863.

CHINESE EMIGRATION TO DEMERARA.

ARRANGEMENTS have been made for the immigration of Chinese on the plantations of Demerara for a period of three years. Mr. SAMPSON, who was attached to the working staff of Sir HARRY PARKES while Commissioner at Canton, has been appointed the agent at Canton in the place of Mr. AUSTIN, who conducted the last exodus of Chinese for Demerara. The responsibility now entrusted to Mr. SAMPSON will no doubt be as faithfully and cleverly discharged as his first duties in Whampoa. His appointment is chiefly owing to the very high opinion expressed by Sir HARRY of his services, and is another testimony to the many instances of men rising from the ranks to situations of great trust and emolument by their own efforts.

THE ANGLO-CHINESE FORCE.

The following is the correspondence relating to the disbanding of the European Chinese naval force under Captain Sherard Osborn :—

No. 1.

'PRINCE KUNG'S LETTER OF INSTRUCTIONS TO INSPECTOR-GENERAL H. N. LAY.

"Peking, Oct. 24, 1862.

"The Prince of Kung, charged by Imperial authority with the superintendence of foreign affairs, addresses a communication to the Inspector-General, Mr. H. N. Lay.

"The official records show that at the interview which the Acting Inspector-General had with me in the autumn of 1861, he represented that, in order to render our navy efficient, it was absolutely necessary that foreign vessels and foreign guns should be procured. He subsequently addressed me in writing, begging that orders might be issued to the custom-houses to contribute towards the purchase of foreign vessels and guns. The Foreign-office thereupon memorialised the Emperor on the subject, and His Majesty's assent having been obtained, orders were issued to the custom-houses to pay into the hands of the Acting Inspector-General the amount sanctioned for the above purpose, and the Acting Inspector-General was desired to act without delay.

"The Acting Inspector-General has now come to the capital, and apprised us that all the arrangements connected with the purchase of vessels and guns he has officially handed over to the Inspector-General, Mr. Lay, to carry out on his behalf in England, and that he has remitted the moneys paid by the custom-houses to the Inspector-General Lay, who is proceeding in the matter with the utmost despatch.

"Mr. Hart has stated further that the ability of the Inspector-General Lay is great, and that he possesses a mind which embraces the minutest details; that he is, therefore, fully competent to make the requisite arrangements with more than a satisfactory result, and he has accordingly requested us to address a despatch to the Inspector-General Lay to serve as his authority.

"In any arrangements which the Acting Inspector-General might have made with respect to the purchase of vessels and guns, there is no doubt that he would have taken the greatest pains and would have left no point unconsidered; but as he has now requested that the management of the whole affair would be intrusted to the Inspector-General, this will be, of course, still more satisfactory.

"I therefore address this despatch to the Inspector-General, and transfer the management of the affair into his hands.

"There are three important points:—

"1. The purchase of the vessels, guns, gunpowder, coal, and the miscellaneous articles for the use of the vessels.

"2. The engagement of officers, gunners, and seamen, and others for services in the vessels; and the arranging the terms and conditions of every description of agreement.

"3. The retention, as proposed, of a sum of money to meet the salaries and wages that may be settled by the agreements, and also to provide for the payment of compensations and other items in time to come.

"The above three points we leave the Inspector-General to dispose of as, in his discretion, he may see fit.

"The money already collected from the custom-houses has been transmitted through Mr. Hart to Mr. Lay, and that still due should be, as collected, handed through Mr. Hart to Mr. Lay, who is alone charged with the responsibility of its disbursement; and we leave it to Mr. Lay to appoint, if he think fit, a person to help him, and also to make whatever arrangements may in his judgment seem desirable, with a view to the successful carrying out of the objects in view.

"China is in urgent need of the vessels and guns; effort should therefore be made to effect with the least possible delay their completion and despatched to Shanghai, there to await orders. The work (put into the vessels) should be strong, the materials genuine, both of super-excellent quality, that so the high trust we have confided (to Mr. Lay) may be fulfilled.

"In the event of the Inspector-General's returning to his post before these ships and guns are ready and despatched to China, and if any other circumstances, which we cannot here foresee, should arise, let the Inspector-General report thereupon to us himself, and recommend a person trustworthy in all respects to act in his room—so that, in respect of the arrangements subsequently made, the responsibility may be definitely fixed."

No. 2.

"AGREEMENT ENTERED INTO BETWEEN INSPECTOR-GENERAL H. N. LAY AND CAPTAIN SHERARD OSBORN, R.N., C.B.

"London, Jan. 16, 1863.

"The following conditions embody our mutual understanding:—

"'1. Osborn agrees to take the command of the European Chinese navy for a period of four years, and stipulates that there shall be no other European naval Commander-in-Chief.

"'2. Osborn, as Commander-in-Chief, is to have entire control over all vessels of European construction, as well as native vessels manned with Europeans that may be in the employ of the Emperor of China, or, under his authority, of the native guilds.

"'3. Lay will procure from the Emperor such an authority as may be necessary to cover Osborn's acts as the Commander-in-Chief of the European Chinese Navy.

"'4. Osborn undertakes to act upon all orders of the Emperor which may be conveyed direct to Lay, and Osborn engages not to attend to any orders conveyed through any other channel.

"'5. Lay, upon his part, engages to refuse to be the medium of any orders of the reasonableness of which he is not satisfied.

"'6. Osborn will appoint all officers and men on board the vessels of the force, subject, however, to the approval of Lay, as the representative of the Emperor.

"'7. Osborn's subordinates will not be at liberty to act without his permission, and Lay will not authorise his subordinates to call upon them to act without having first consulted Osborn and obtained the necessary order.

"'8. Lay and Osborn agree to carefully inquire into any complaints that may be preferred against the officers and men employed in the force by Chinese officials.

"'9. The force being European, it is indispensable that the flag under which it acts should have an European character.

"'First, to secure its own efficiency; secondly, to insure for it due respect in the eyes of the foreign communities.

"'Lay, therefore, agrees that the flag shall be green with two yellow diagonal bands bearing in the centre a blue imperial dragon.

"'Green is chosen because it is rarely used by European powers, and therefore not likely to be confounded with any other national colours.

"'10. Lay undertakes to procure from the Emperor, as soon as possible, a sum of money as a guarantee fund, to cover the pay and maintenance of the force for four years, and in the meantime it is understood that the vessels with their equipment will constitute the security for the just claims of the force.

"'11. In the event of the death of either Lay or Osborn, these conditions which are entered into with the authority of the Emperor of China are not, it is understood, in either case to be departed from.

"'12. The conditions of this understanding, the terms of the formal agreement, and the printed instructions, shall be formally ratified by the Emperor at Pekin, before Osborn shall be called upon to act with the force under his command.

"'13. In the event of Osborn's death from disease, while in command of the force, Lay will recommend the Emperor of China to make some grant to his widow and children.

(Signed) "'H. N. LAY.

"'SHERARD OSBORN.'

"Our motive for drawing up the above memorandum is that there may be hereafter no deviation from a plan of action, long deliberated and decided upon by mutual consent.

"We have to deal with Asiatics prone to deceit and falsehood, ready to evade any engagement, directly it interferes with their views or momentary interests. We are about to afford them material military aid, and it behoves us to guard against its being misapplied, and thereby bring scandal

Digitized by Google

upon ourselves and those who in Great Britain have promoted our views; above all we are to take care that the great power and proportionate responsibilities conferred upon us by Her Majesty's Order in Council be not abused by us, by our successors, or by the Chinese authorities.

"Clause 1.—This condition needs no explanation. It is made a *sine qua non* by Captain Osborn.

"Clause 2.—This we agree is most necessary. We are aware that for some time local Mandarins have been, without Imperial authority, purchasing vessels of European construction, arming them, placing crews of all nations in them, and giving over the command to British or American subjects selected by themselves. Lorchas or junks commanded by Europeans, half pirates, half privateers, are swarming in the Yang-tse.

"They claim in many cases to be men-of-war belonging to particular Mandarins, Guilds, or Hongs. It is the object of this force to extinguish all these dangerous freebooters. They should come under Imperial authority, without which no European has a shadow of right to levy war in China.

"Clause 3.—This is inserted to meet any objection that might be raised on the ground that Europeans are serving without commissions or direct authority from the Emperor.

"Clauses 4 and 5.—These are to meet the following difficult questions:—Is this squadron to carry on war in China upon a Chinese method? Through what channel is Captain Osborn, unacquainted as he is with the language, to communicate with the Emperor or Regent? How shall he be protected against the charge of disobedience of orders? How are cruel or unjust orders from Peking to be prevented? How shall European officers and seamen levy war for a barbarous Sovereign without being made to participate in acts which our country would repudiate? How shall the officers be protected from orders, the execution of which would involve breaches of international law or treaty rights?

"There is in our opinion no other way of meeting these difficulties than by arranging that, as Mr. Lay is to live in Peking, and as the revenue which he collects is to be the guarantee for the maintenance of the force, he, as one well competent from a knowledge of the language and people, should be the channel of inter-communication between the ruler of China and Captain Osborn, and that in the event of any order being at variance with law or justice, he should submit it to the European representatives, and, supported by them, decline to communicate it to Captain Osborn. The remaining clauses do not seem to us to need explanation."

No. 3.

"INSPECTOR-GENERAL H. N. LAY, C.B., TO CAPTAIN SHERARD OSBORN, R.N., C.B.

"Peking, Sept. 25. 1863.

"Sir,—I beg to inclose for your information the translation of a letter to your address from the Prince of Kung, which was sent to me in July last, and to invite your attention to the marginal notes I have appended to it. From my remarks you will see that the Prince has not been quite accurate in making it appear that I had requested the appointment of a Chinese officer to command the steam fleet, or that I had consented that the fleet should be placed under the irresponsible authority of the local officials, as my letters to his Highness, which are upon record, show.

"I never gave more than a qualified assent to the rules with which he has furnished you. I accepted the money clauses, but those having reference to yourself and the fleet generally I told the Ministers plainly would have to be considered upon your arrival. The Prince doubtless thought that by declaring positively that these rules had been agreed to by me the chances of your offering any opposition to them would be diminished.

"I have, &c., "H. N. LAY."

No. 4.

"PRINCE KUNG'S LETTER OF INSTRUCTIONS TO CAPTAIN SHERARD OSBORN, R.N., C.B. (WITH MR. LAY'S MARGINAL NOTES).

"Peking, July 8, 1863.

"His Imperial Highness the Prince of Kung issues these instructions to Osborn, the Assistant Commander-in-Chief of the Chinese steam navy.

"Whereas China, in view of the then unfinished military operations, did last year direct the Inspector-General of Customs, Lay, to purchase foreign steamers and guns for use in the fight and for the subjugation of the foe, and whereas the said Inspector-General has arrived at Peking, and reports that the seven steamers and the storeship purchased will shortly arrive at Shanghai, and requesting the appointment of an officer to take the command, highly recommends the said Osborn, as having hitherto in England been zealous in the performance of his duties, of high military capacity, and being thoroughly versed in navy affairs, able to assist a high Chinese officer* in the management of such vessels, so that there may therefrom be expected a speedy sweeping away of the appearance of rebellion; and whereas I, the Prince, memorialized the Throne, requesting that the officer already nominated by the Governor-General of the Two Keang and the Governor of Keang-soo might be appointed Chinese Commander-in-Chief of the Fleet, and that the said Osborn might be appointed Assistant Commander-in-Chief, and that the expenditure of the fleet should be controlled for a period of four years by the Inspector-General Lay; and whereas on the 23rd of the 5th Moon (July 8) the Imperial edict was received, 'Let it be as proposed. Respect this.'

"Now, therefore, in addition to the hurrying despatches of the Governor-General of the Two Keang and the Governor of Keang-soo, that they may at once order the Chinese Commander-in-Chief to repair to Shanghai with his officers and men, and take up his commission on board ship, it is further extremely proper to furnish the said Osborn with a copy of the agreement, in five articles†, entered into between the Inspector-General Lay and the Foreign-office, and to appoint the said Osborn to be Assistant Commander-in-Chief, and to direct him, in accordance with the articles of the agreement, to co-operate with the Chinese Commander-in-Chief in the command of the fleet now commissioned.

"It is to be expected that the fleet will act with vigour against the enemy. The crews are to be kept under strict discipline, and not suffered to annoy the people. If trading vessels, whether Chinese or foreign, illegally engage in the carriage of munitions of war, they are to be seized and detained until receipt of orders from the Foreign-office. If there are pirates on the Chinese seas or rivers from time to time, no matter where the place may be, they are to be captured and destroyed, in order to the complete restoration of tranquillity.

"As regards smuggling and smuggling guilds at the ports on the coast and up the rivers, the fleet is authorised to take measures for the due repression of the same. The said Assistant Commander-in-Chief will, moreover, consider himself under the orders of the Governor-General of the Two Keang and the Governor of Keang-soo, and will take their instructions as to the disposal from time to time of his force.

"(Enclosure.)

"Five rules agreed upon respecting the steam fleet:—‡

"1. It has been settled that the post of Chinese Commander-in-Chief of the steam fleet now purchased shall be filled by the high officer selected by the Chinese Government, and that Captain Osborn, C.B., a British subject, shall be Assistant Commander-in-Chief for a period of four years. The affairs of the fleet are to be managed by the said Commanders-in-Chief in a friendly spirit of co-operation. While Captain Osborn assists the Chinese Government in the command of the fleet, he will take the instructions of the Governors-General and Governors as to the employment or distribution of the force. In all operations he is always to confer personally with those officers before either undertaking or staying these, and is to accept the Chinese decision as final.§

"2. Captain Osborn, in the capacity of Assistant Commander-in-Chief to the Chinese Government, will receive a commission from the Foreign-office giving him the requisite powers. The foreign crews will be duly controlled by him; and in the event of any individual injuring the people or acting in a lawless manner, Captain Osborn will exercise due severity in the punishment of the same, in order to the sustaining of proper discipline.

"3. In order to the insuring of beneficial results from the fleet now purchased by the Chinese Government, Chinese sailors, as time and circumstances will permit, ought to be chosen for service on board the steamers, in order that they may become experienced, and that long-continued practice may prevent them from forgetting their duties and thereby rendering the fleet useless. The working of the ships and the management of the guns and other arms Captain Osborn and the other commanders will exert themselves to teach to such sailors, in order that they may attain a real acquaintance with the same.

"4. It is agreed that for the support of the fleet, consisting of seven steamers and one storeship, there shall be appropriated the monthly sum of 75,000 taels. This amount is to cover the expense of salaries, wages, rations, ammunition, coals, rewards, compensations, as well as every other possible and, at the present time, impossible-to-be-indicated expenditure. The control of the expenditure is confided to the Inspector-General Lay. The office of Customs at Shanghai will provide 10,000 taels monthly, the Kiukiang Customs will provide 10,000 taels monthly, the Foochow Customs will provide 34,000 taels monthly, the Amoy Customs will provide 6,000 taels monthly, the Canton Customs will provide 10,000 taels monthly, and the Swatow Customs will provide 5,000 taels monthly. In all will be provided monthly the sum of 75,000 taels, which in the proportions above mentioned will be received from each office of Customs by Mr. Lay monthly. Every three months Mr. Lay will send in an account of the expenditure to the Foreign-office, which in turn will communicate the same to the board of Revenue. Should there be any surplus money, Mr. Lay will retain it for future use.

"5. From the 17th day of the 6th moon—that is, from the 1st day of August, it will be the duty of each of the said officers of Customs to hand over in full, before making any other appropriations from the duties received, the monthly sum fixed on to the person appointed by the Inspector-General Lay to attend at the bank to receive the same. In the event of the money not being forthcoming, the Inspector-General Lay will at once proceed to deduct the same from the duties. For a period of four years, and for each month during that period, this rule is to be in force."

No. 5.

"CAPTAIN OSBORN'S REMARKS UPON PRINCE KUNG'S LETTER OF INSTRUCTIONS.

"Peking, Sept. 28, 1863.

"In the first place, these instructions are in direct contravention of my formal agreement with Mr. Lay, which runs to the following effect:—

"That I was to be Commander-in-Chief of the European Chinese navy, with entire control over all vessels of European construction as well as native craft manned with Europeans in the employ of the Emperor of China, or under his authority, in the employ of natives; and I was to have an authority from the Emperor to cover my acts as the Commander-in-Chief of the European Chinese navy. On the other hand, I bound myself to act upon all orders from the Emperor conveyed through Mr. Lay, and not to attend to those delivered through any other source.

"A copy of this agreement was furnished to the Prince, yet, in spite of it, and, indeed, ignoring it entirely (for I am told he has not even acknowledged the document), the Prince sends me orders to place myself and my people under the authority of the Foutai Le, as well as that of no less than three other provincial authorities.

* This is not correct. So far from requesting that a Chinese should be appointed, I told the Ministers when they brought forward the proposition that it was altogether out of the question.

† The Prince chooses to assume that the rules were agreed to by me, while the fact is that I declared over and over again that assent to them was impossible, my most decided opinion being that to accept the terms proposed would be to court certain failure and discredit.

‡ I forwarded a translation of our agreement officially to the Prince, and in my covering letter called his special attention to the point embodied in that agreement—viz., that you would be under the orders of the Imperial Government at Peking, and the Imperial Government alone. His Highness "ignored" my letter, and up to this time has not acknowledged its receipt. Neither has he, I may add, approved the general agreement and book of instructions, which shows where other proof was wanting that he could not have been under the impression that the questions relative to the steam fleet were disposed of.

§ These conditions would practically place you under the orders of the lowest officer on the staff of either of the officials named. Prince Kung has seen that our military officers will act under Tsou-tais and Foutais, and hence it has occurred to him that if you could be persuaded to occupy a similar position the Imperial Government would be relieved of all trouble and responsibility. I have told the Ministers that I would rather see the force disbanded and the ships sold than consent to such a proposition; there can be but one naval Commander-in-Chief, yourself, and but one master, the Imperial Government. H.N.L.

Digitized by Google

"Prince Kung acknowledges that the appointment of Commander-in-Chief of my force was filled up by the Governor-General of Keang-soo, and merely confirmed by the Emperor; and, further, he (Prince Kung) directs the said Chinese Commander-in-Chief to repair on board a ship at Shanghai. This would virtually suspend me from the post I at present hold, by virtue of a temporary commission granted me by the Inspector-General, Mr. Lay, upon the authority of Prince Kung's instructions and promises of last year.

"Apart from the conclusions which Mr. Lay has arrived at as to the want of good faith displayed in the document before me, my own suspicions are aroused by the crafty wording of its contents. In one paragraph I am superseded, and have, apart from the Emperor, Prince Kung, and the Board called the Chinese Foreign-office, all provincial high officers placed over me; in another I am enjoined to act in a friendly spirit of co-operation with my superiors, and this is immediately followed by a carefully-worded sentence, in which I am distinctly warned that the distribution of the force will be dependent upon the whim of the Governors and Governors-General of the provinces, that I am to follow their instructions in all things, and, as the original document runs, I am 'not to act, advance, retire, or remain stationary without conferring with those dignitaries, and to consider their decision as final.'

"Mr. Lay says very justly in his marginal notes that these conditions would practically place me under the orders of the lowest officer on the staff of either of the officials named.

"I have no intention of submitting to such terms, and for the following reasons:—

"1. Naval operations for the suppression of all the disorders enumerated in the Prince's orders could not be successful, fettered as I should be under such a system. It may be the Chinese system; if so, it explains their unfitness for war or naval operations.

"2. I came here to serve the Emperor, and under him the Regent, not to be the servant of mere provincial authorities. On that point I stand distinctly upon the terms of my agreement.

"3. The officers and men of the force were entered under a specific agreement to serve me as Commander-in-Chief. Directly a Chinese officer steps in as my superior in that force the agreement is null and o id and without it all law and order would cease and my power be at an end.

"4. By submitting to such instructions and violation of my origina agreement I should at once deprive myself of the power to assist in carrying out in China the policy of Western civilisation. My force, powerful as it will be for good or evil, might be directed against the interests of commerce or of common humanity. Brutal butchery might be perpetrated, and I should be powerless to prevent it. My men and officers, the pick of many from the Royal Navy of England, would be associated upon equal terms with the rowdies and pirates the Foutai might be pleased to employ.

"My power to restrain my own men within the bounds of ordinary discipline would be *nil*, and the European-Chinese force, instead of being a blessing, would become a curse to the Chinese people and to the best interests of Europe in this empire.

"5. If I was weak enough to forget what is due to my own position, and attempted to act upon such instructions, I am certain that I should come to a dead-lock with the provincial authorities within a month, exactly as is at present the case with Major Gordon, R.E. He is insulted by his Chinese superior, the pay of his men suddenly stopped at the will of the Foutai, he is called upon to attempt impossibilities and deprived of adequate forces, and he has again, for the second time, virtually resigned office as the military coadjutor of the Foutai. Yet they wish me to be 'the naval assistant of such a Mandarin.'

"6. To the argument advanced by the Chinese Foreign-office 'that the course proposed by Prince Kung is a usual one in China,' I reply I did not come here, or my followers either, to accustom ourselves to the treatment usual with Chinese sailors or soldiers, or to assist them in a retrogressive policy in the treatment of European *employés*, or Europeans in general. The employment of ships of war and war steamers of European construction is an innovation, that of European officers and gentlemen still more so. I and my force are part and parcel of a new order of things indicating 'progress in China.' I will be not pary to her lapsing back into her ancient system and treating Europeans as if they were Chinamen.

"European commerce in China, and consequent intercourse, is a departure from all foregone customs.

"The presence of Europeans at the open ports is the same.

"The residence of European Legations in Peking strikes at the root of China's most ancient prejudices.

"The entire responsibility of the conduct of the provincial authorities towards our merchants and missionaries being forced upon the Ministers at Peking is another departure from the most cherished institutions of these people.

"I merely claim for the European force under my command another stride in the same wise direction, and I will not, on all the foregone grounds, depart from a line of policy decided upon by Mr. Lay and myself after long and careful discussion—a line of conduct approved, I am sure, by my countrymen and profession, and which I see more and more reason not to swerve from since I have noted the present bearing of the Pekinese authorities towards foreigners.

"I may add in general terms that if I required any confirmation of my opinion of the utter impossibility of serving the Chinese Government upon the terms the Prince suggests, I should find ample grounds in my own experiences while at Shanghai, as well as in the information General Brown gives me of Major Gordon's present position. I found on my arrival at Shanghai that the Foutai's agents had tampered with the crews of the vessels under my orders. They were told that the Foutai would give them higher wages than those I engaged them at, that they would all be made officers, and that the discipline existing among the Europeans in his steamers was far pleasanter than the order I enforced. Puzzled to find such a different system existing in what was called the Imperial service, the men became naturally disaffected and anxious to leave me to join the Europeans employed by the Foutai; and to enable them to do so without prejudice to their pockets I found they were actually offered £12 a head bounty, the money to be lodged in the names of the deserters in an English bank. I had to discharge fourteen men, and was detained several days at Shanghai in consequence. It was no fault of the Foutai' that I was not detained there altogether.

"Foutai Le is an able Chinaman, and as unprincipled as all Chinese officials. His plan would be to render me powerless, and then to use or toss me aside, just as he does all European leaders in his force. He is a civilian by education, ruling over military and naval affairs without the slightest knowledge of either. He is squandering the revenue of the province as well as that derived from European trade, and is in league with unprincipled traders in Shanghai. Although he can procure from the British stores all such military supplies as he can require, he is encouraging the import of munitions of war by private firms, and granting permits to land the same in spite of all our proclamations against the importation by foreigners of goods contraband of war. Having secured the services of an excellent officer in Major Gordon, who appears to have entered his service, not that of the Emperor of China (for he holds no authority from the latter), Foutai Le proceeds to render him powerless, and to hamper his action in two ways—first, by depriving him of the means to carry out any decisive measures; and next, by placing in exactly similar positions a number of other Europeans, and playing one off against the other. Major Gordon wishes to attack Souchow-foo, and asks for 100 Europeans. The Foutai agrees, but says the 100 men must only be entered for one month. Gordon declines to enter into any such arrangement, seeing its injustice and folly. The Foutai insults him by questioning his desire to fight the rebels, and proposes that the assaulting column shall be formed of all the European officers in his employ, and that over their bodies the Chinese would advance to victory.

"Again, what faith can I have in any mandarin's listening to my advice as a subordinate, when I am told by General Brown, Commander-in-Chief of our military forces in China, and the superior of the Foutai, that he will listen to no advice or suggestion the General offers; that he purposely avoids all conference with him; and when an interview is sought by General Brown, insolently replies that he is too busy to see him! and be it remembered that Foutai Le is not a bit more unreasonable than other mandarins, and that he is an average specimen of his class.

"SHERARD OSBORN."

"INSPECTOR-GENERAL H. N. LAY, C.B., TO CAPTAIN SHERARD OSBORN, R.N., C.B.

"Peking, Oct. 13, 1863.

"Sir,—I regret to say that at an interview which I had to-day by appointment with the President of the Foreign-office, Wansiang, he requested me to intimate to you that the Prince of Kung would decline to ratify the agreements entered into by us under his letter of instructions of October, 1862.

"I have, &c.,

"H. N. LAY."

No. 7.

"CAPTAIN SHERARD OSBORN, R.N., C.B., TO THE PRINCE OF KUNG.

"Peking, Oct. 15, 1863.

"Your Royal Highness,—I have the honour to request that you will be pleased to furnish me officially, and in writing, with your decision relative to the agreements entered into between your agent, Mr. Horatio N. Lay, C.B., Inspector-General, and myself.

"The Inspector-General informs me that after a delay of four months and a half, during which time your Royal Highness has neither acknowledged a single letter nor referred to the agreements, Wansiang informed him formally that you intended to adhere to your manifest intention of ignoring all such agreements, as evinced in your instructions already addressed to me.

"I may remind you that I have now been three weeks in Peking fruitlessly endeavouring to point out to the members of your Foreign office, through Mr. Lay, that your instructions to me are entirely contrary to the understanding under which Her British Majesty's Government permitted myself and others to agree to serve the Emperor of China, and that I declined to act except upon the terms explicitly laid down in our agreements.

"To all these representations no attention has been paid.

"I therefore avail myself of this opportunity to remind you of the circumstances under which the force I command has been placed at your disposal. Last year (1862) you applied in an unofficial form to the British Minister of Legation in Peking for assistance to procure men-of-war of an European construction; you were recommended to employ your own official, the Inspector-General, as the best agent. You set aside a large sum of money; you ordered the vessels, and you gave instructions to both Mr. Hart and Mr. Lay to procure not only ships, but proper officers and men to fight and manage them; and, lastly, you furnished your Inspector-General with a formal authority to enter into all such agreements as he might think necessary to carry out the object you had in view. Upon the strength of that authority to your agent, and supported as your wishes were by the official representations of his Excellency Sir F. Bruce, Her Majesty's Government were pleased to suspend in favour of China the Neutrality Act, and the Admiralty of Great Britain granted me and other officers permission to serve the Emperor of China for a stated period, and every assistance was given by all departments to aid the Emperor to carry out the wishes expressed in your instructions to Mr. Lay.

"The Inspector-General having satisfied me that the powers you had given him were ample, I entered into certain agreements with him, subject to your ratification as Regent of China. It only remains for me to say that my power to maintain order and discipline in the force is now at an end, and that if I do not receive a favourable reply within forty-eight hours it will be necessary to immediately disband the force.

"I have, &c., "SHERARD OSBORN."

No. 8.

"CAPTAIN SHERARD OSBORN, R.N., C.B., TO HIS EXCELLENCY SIR F. BRUCE, K.C.B., &c.

"Peking, Oct. 19, 1863.

"Your Excellency,—Prince Kung having failed to ratify the agreements entered into between Inspector-General H. N. Lay, C.B., and

Digitized by Google

myself, it becomes necessary for me to disband the European Chinese naval force.

"I have the honour to enclose you copies of the agreements in question, as well as all correspondence, and to request you will inform me whether you see any objection to my surrendering to Prince Kung the eight ships which I have brought out to this country. They are Imperial property, and I have no right to detain them; but I would submit that there might be some danger if vessels of so formidable a character were trusted to the rowdies and pirates now so numerous in Shanghai, and who, I dare say, are quite ready to serve the provincial authorities without agreements or guarantees.

"Directly I receive your Excellency's official instructions upon that point I shall, in conjunction with Mr. Lay, proceed to dissolve the force, sending the officers and men to England in detachments, and reporting all the circumstances to the Lords Commissioners of the Admiralty, and sending them an exact description of the ships, if you decide upon not surrendering them. "I have, &c.,

"SHERARD OSBORN."

No. 9.

"HIS EXCELLENCY SIR F. BRUCE, K.C.B., TO CAPTAIN SHERARD OSBORN, R.N., C.B.

"British Legation, Peking, Oct. 20, 1863.

Sir,—I have received your letter with its enclosures, informing me of the refusal of the Prince of Kung to ratify the agreements entered into by his agent, Mr. Lay, and yourself, and of your consequent resolution to disband the force.

"I have informed his Imperial Highness of my conviction that Her Majesty's Government would not have consented to the organisation of this powerful squadron had it not been on the understanding that it was to be placed under the orders of an officer in whose prudence and high character they had full confidence; and that I will not consent to the ships and stores being handed over to the Chinese Government without instructions to that effect from Her Majesty's Government.

"I therefore request you to take measures for keeping them in deposit until the pleasure of Her Majesty's Government be known.

"I am, &c., "FREDERICK W. A. BRUCE."

No. 10.

"CAPTAIN SHERARD OSBORN, R.N., C.B., TO HIS EXCELLENCY SIR F. BRUCE, K.C.B.

"Peking, Oct. 27, 1863.

"Sir,—Consequent upon the receipt of your Excellency's letter of the 20th inst., in which you acquaint me you will not consent to the surrender of the ships and stores to the Emperor of China, and desire me to take measures for keeping them in deposit until the pleasure of Her Majesty's Government shall be known, the following questions have arisen in my mind, upon which I solicit your early instructions:—

"1. If the Emperor of China should repudiate the arrangements recently sanctioned for the regular payment of this force, what steps am I to take to avoid selling the ships and stores according to the 10th article of my agreement? As Prince Kung has already repudiated his former instructions to Mr. Lay, I am compelled to anticipate the probability of his treating all his engagements in the same fashion.

"2. Where shall I procure funds for the maintenance of the force, pending the orders of Her Majesty's Government?

"I have, &c., "SHERARD OSBORN."

No. 11.

"HIS EXCELLENCY SIR F. BRUCE, K.C.B., TO CAPTAIN SHERARD OSBORN, R.N., C.B.

"Peking, Nov. 6, 1863.

"Sir,—As you are aware, the scheme of keeping the ships of the flotilla in deposit, awaiting instructions from Her Majesty's Government, has been abandoned, and the Chinese Government has requested me to send the vessels to England to be disposed of. His Imperial Highness expresses his thanks to yourself for the trouble to which you have been put in procuring the fleet and in bringing it out to China, and requests you to accept 10,000 taels in addition to your pay for the labour entailed upon you by it.

"He further requests that the ships may be put under another flag. That, however, is a point which must be left to your discretion. I have, therefore, to request that you will take charge of the vessels and men, with a view to the disposal of the former in England or in India, as you think best. The officers and men to be sent home, and to be paid up to their arrival in England.

"But as the contract may be construed to give them a claim for pay for three months after their arrival, or up to the 30th August, it will be advisable to obtain the opinion of counsel as to the liability of the Chinese Government, they having declined to accept the flotilla, on the ground of their agent having exceeded his authority in the conditions attached to the scheme, you will feel with me that our honour is involved in winding up this affair on terms as little onerous as possible to the Chinese Government. I will give instructions to the Consuls to contribute what may be required, out of the moneys received by them on the indemnity account, to meet such part of the expenses of sending the vessels home as the Chinese Government is unable to provide for. The sum so advanced will form a lien on the ships, and to be deducted from the expenses of sale, or set off against the ships and stores, should Her Majesty's Government decide on taking any of them back.

"I think it but just to you to express my entire approbation of the honourable and dignified course you have pursued during the discussion of the question at Peking. An officer more alive to pecuniary advantages, less scrupulous as to the interests of Great Britain, and less careful of his own honour, might have admitted some unsatisfactory compromise as to his position, and might have trusted to an arbitrary exercise of the power wielded by him to have extricated himself from future embarrassments. By your firmness you have saved Great Britain from complications, and you have vindicated the honour of the British uniform in the eyes of the Chinese by refusing to accept an unbecoming position. However disappointing the result of your honourable wish to advance the course of progress in China, you have the consolation of knowing that you have gained the respect and approval of persons of every nation who are acquainted with the course you have pursued.

"I am, Sir, your obedient, humble servant,

"FREDERICK W. A. BRUCE."

(GENERAL MEMORANDUM.)

"Tien-tsin, Nov. 9, 1863.

"I have, with great regret, to inform the officers, seamen, and marines under my command that it has become necessary to send them to England in consequence of the Emperor of China having refused to ratify the agreement entered into between myself and his agent, Inspector-General H. N. Lay, C.B., upon the faith of the Prince Regent's instructions.

"The Emperor wished to place the entire control and disposition of the squadron under the irresponsible authority of the provincial mandarins, and to supersede me as Commander-in-Chief, leaving it to the local mandarins to form as many squadrons of European vessels as they might see fit, under different officers and under different systems of pay and discipline.

"Were I to accept such a position for this force and thus take service under provincial and subordinate Chinese officials, instead of under the Emperor of China, I should violate the spirit and word of Her Most Gracious Majesty's Order in Council, and act in disregard of the wishes of Her Majesty's Government, forgetful of every pledge I gave before I undertook the organisation of the squadron.

"To surrender ourselves to the irresponsible orders of local mandarins would certainly make us participators in acts of plunder and cruelty, which would bring disgrace upon us as British officers and seamen.

"I have, therefore, had no hesitation in refusing to depart from the terms laid down long before we left England.

"Provided the crews continue to conform to the rules and regulations of their agreement, they will be kept upon full pay until their arrival in England, and receive whatever further sum they may be justly entitled to under its conditions.

"It only remains for me to cordially thank the captains, commanders, officers, seamen, and marines of the squadron for their hearty support and excellent conduct during the time the vessels have been in commission, and to wish them a pleasant and speedy passage to their homes.

"SHERARD OSBORN, Captain, Royal Navy."

"Cheefoo, Nov. 14, 1863.

"Sir,—We, the captains and commanders of the European Chinese navy, consider it but just to you to state formally that the course you have deemed right to pursue, in disbanding the said force, has only served to strengthen those feelings of reliance and respect which induced us to take service under you.

"And further, that by your firmness with the Chinese Government in refusing to act under any other authority than that of the Emperor himself, you have saved us from an essentially false position, one which could only have been as repugnant to our own feelings as it would have been to yours.

"We are, Sir, your most obedient servants,

"HUGH T. BURGOYNE, V.C., Peking.
"C. S. FORBES, Keangsoo.
"S. MORIARTY, Ballarat.
"NOEL OSBORN, China.
"ALLEN YOUNG, Quantung.
"G. B. NICHOLAS, Tien-tsin.
"D. CRUIKSHANK, Thule.

"To Captain Sherard Osborn, C.B., Commander-in-Chief European Chinese Navy."

Naval and Military.

Since the despatch of the *Conqueror*, with marines for service in Japan, there have been no movements for China or Japan. The report of the *Lyra* being commissioned for the China station is still believed.

Of the British Army, two regiments are in China—the 67th and 99th; and the 2nd battalion of the 20th Foot is on its passage thither by latest advices from India. The 8th and 22nd companies of the Royal Engineers are in China also.

PIRATES IN THE CHINESE SEAS.—Dr. Swabey, on behalf of Commander Moresby and of the officers and crew of Her Majesty's ship *Snake*, applied for a decree pronouncing the crews of certain junks destroyed in the China Seas to have been pirates, and their total number to have been 246, of whom 30 were killed and 16 captured. In the month of May, 1862, the *Snake* was sent from Hong Kong in search of some piratical junks which had attacked and captured the English merchant vessel *Centaur*. One of the junks was taken and destroyed in a creek in Sandy Bay, but her crew escaped. In July of the same year an American merchant vessel, the *Phantom*, was wrecked on Patras Shoal. Her crew started for the neighbouring coast in their boats, but were intercepted and plundered by pirates before they reached the shore. The *Snake* having been sent in pursuit, discovered five heavily-armed junks off the island of St. John. After some sharp fighting three junks were destroyed. Some thirty men of the crews were killed or wounded, but were carried off by their companions, who escaped. The Court decreed for 196 pirates engaged, 11 of whom were captured. These will, therefore, be the numbers on which the amount of the recompense to the officers and men engaged will have to be determined by the Lords of the Admiralty.

THE LATE LORD ELGIN.—The result of the *post-mortem* examination of the late Lord Elgin has proved what had been suspected from the first—that his death was not attributable to any disease of Indian origin. It was found that the heart was in a state of what is called professionally "fatty degeneration"—that is, that it had lost its muscular character, and become weak and dilated. The right ventricle was fatally affected. There was also advanced disease of the kidneys. The changes in the structure of these vital organs had been long in progress. It is strange that they had not earlier given marked evidence of their existence, for they would have soon proved fatal under any circumstances and in any climate.

LONDON, TUESDAY, JAN. 19, 1864.

THE POSITION OF PRINCE SATSUMA AND THE TYCOON.

THE view we took of the altered position of matters in Japan, as presented to the reader in our issue of the 11th inst., has been singularly confirmed by a statement from a semi-official quarter of the highest authority, as well as by facts that have come to our own knowledge. As will be seen elsewhere in our columns, the Paris *Moniteur de la Flotte*, the naval organ of the French Government, states that "peace may be considered "as certain for the present; that Prince SATSUMA has become "less savage, and has announced his intention to send thirty "young men of good family to be educated in England." The truth is, as we before hinted, the character and policy of Prince SATSUMA are, in reality, only now beginning to develop themselves. His differences with the TYCOON, and even with the MIKADO, appear to be arranged. It is in that way we interpret the fact that the TYCOON's officials were parties to, and present at, the conference with Colonel NEALE; and also the statement that, after having engaged in a conspiracy against the MIKADO, he suddenly withdraws during the night preceding the intended attack on his Sovereign. The enmity of a numerous party of Daimios towards the TYCOON and the treaty arises, there is reason to believe, not from aversion to the great principle of putting an end to the isolation of Japan from the rest of the world, but from its turning out that, as organised by that personage, the trade with foreigners results, in a very large degree, to his sole personal benefit. His rapidly-increasing wealth, and the power thence arising, have therefore rendered him an object of envy and dread to the rest of the territorial grandees. So far from SATSUMA and his family holding aloof from intercourse with Europeans, his chief merchant is known to have urged traders to come to Kagosima, asserting that they had abundance of commodities there to offer in exchange; and when the representation was met by the objection that it would be against the treaty, and that the TYCOON would interfere, the answer is reported to have been —"Who cares for the TYCOON? No TYCOON's man dare show "his face in SATSUMA's territory."

Another noticeable fact, affording a strong presumption that SATSUMA is earnestly bent on peace, is the circumstance that he has again purchased a steamer at the price of $75,000. And yet he must have been taught by bitter experience that such an investment would be a very precarious one in case of war with the foreigner. According to our information, SATSUMA was, at one time at least, much more open to an accusation of Anglomania than of Anglophobia. We have reason to believe that he is altogether disposed to adopt the customs of his new acquaintances; and that, in particular, he recognises the advantages and comforts of steam navigation—a mode of traversing great distances specially adapted to an island-realm like Japan. The ill-feeling lately existing between him and the TYCOON was embittered by an incident that may serve to mark the disposition and bias of these formidable rivals. SATSUMA, or a near relative, wanted to take passage in one of his own steamers to Kagosima; but the TYCOON insisted that the intending voyager should proceed by land, according to the immemorial custom of all Daimios. SATSUMA, who, like a sensible man, preferred a sail by steam for two or three days to an inconvenient land journey of nearly as many weeks, in the venerable fashion of his brother nobles, was, from policy or the force of law, compelled to give way. The proposition to send some of his young retainers to be educated in England still more strikingly attests the advanced spirit of the man. Foreseeing the changes soon inevitable in Japan, SATSUMA may have gained the conviction that the most powerful of her contending Princes will be the one who is closely allied with and supported by that European Power, the thunder of whose ships it has been his mishap to witness and suffer from.

The difficulty of following readily what is now going forward in Japan, and of unravelling the complicated story of the feuds of these petty but wealthy princelings, arises from the fact that each of them appears to be known by two, or three, or more appellations. Each has his family name; then a territorial designation—often more than one; and lastly, another, springing from some official, and probably hereditary, position. Among the statements brought us by the last mail in connexion with this new alliance between SATSUMA and the TYCOON, one is "that the former is now fighting for the latter against the "rebel Prince of NAGATO." The last-named personage, who figures also in the accounts as the Prince CHEW-SEU or TSIOSIU, appears to be the head, or at least the most active, of those Daimios who detest and would exterminate foreigners. He it is who has fortified the Straits of Simonosaki, so as to prevent produce from going forward to Nagasaki. So rigorous was he bent on making this blockade, that the steamer fired on by the forts of Awajee, and afterwards seized at Simonosaki, belonged to the TYCOON himself; and TSIOSIU is actually now detaining one of the Commissioners who was on board her, while the other has managed to make his escape and get back to Yedo. That SATSUMA is ranging himself on the side of the TYCOON in putting down this headstrong rebel is certainly no trifling addition to the vast number of circumstances which tell so favourably for the removal of every stumbling-block in the path of peace and commerce. But SATSUMA's determination to send to England a chosen few of his young nobility for education and improvement is, our readers will be surprised to learn, no experiment on his part, but simply the following out of a resolution long ago formed, and already in process of execution. We have reason to believe that there were at least two of his retainers among the suite of the late Japanese Embassy to this country, and that they did not return home with the rest, but have been here ever since, obtaining valuable knowledge of all kinds; and more especially addicting themselves to a branch of scientific industry that will render them of the highest service to their master hereafter, whether his aim be peace with foreigners or strife with his turbulent compeers.

Neither is SATSUMA the only Japanese noble who has comprehended the advantage of having men about him instructed in all the theoretical and practical proficiency of our workshops. There are other Japanese in England at this moment, whom, we shall still further startle our readers by saying, we have some suspicion to be actually the dependents of one of SATSUMA's principal rivals—possibly of the Prince of NAGATO himself. The strongest possible pledge for the duration of peace will be the presence of such visitors amongst us. The report they will take back of the extent of our commerce, of the number of our merchant ships, of the discipline of our army and navy, and of the perfection of our instruments of destruction, will be a most powerful auxiliary towards the maintenance of the present good understanding. So wonderfully have the sights they witness here worked on the convictions of these last-named emissaries, that two of their number are about to wend their way back again to the Far East, amazed and stupified, and more than half terror-struck, at the unlimited extent of the resources of our country, either for showering down benefits in friendship, or annihilating the foe that may call forth our anger. Such ambassadors will preach peace with a force and eloquence no foreigner could ever attain.

THE SHERARD OSBORN FLEET REJECTED.

IN our last issue, before the publication in *The Times* of the correspondence—which, by the way, was supplied by *some one* exclusively to that journal, and, we may add a query, was it by the Foreign Office?—we expressed our belief that it would not suit some of the members of the Cabinet at Peking to crush the rebellion root and branch. We now have the most ample confirmation of this by the publication of the correspondence alluded to. The "Foreign Board," which has swallowed up the exclusive power held by Prince KUNG to deal with foreign affairs, wished to retain the services of SHERARD OSBORN for distinct acts as might be directed by the local authorities; in fact, after their own fashion, to inflict extermination and capture on those who had caused their displeasure,

Digitized by Google

and in this category we can assure our readers that those in absolute rebellion would not be the only victims; it would include peaceful, harmless, but powerful traders from whom a squeeze might be required. It is, indeed, a mercy that Captain OSBORN could see through this, and indignantly refused to become the tool of their rapacity. Seeing, however, that Mr. LAY was near him, we must give him credit for assisting Captain OSBORN to this decision, however much we dislike the unjust and rude manner in which he has treated our merchants.

(THE TIMES.)

It is undoubtedly a most lamentable fact that the perverse cunning of a few barbarians should have rendered abortive the sincerely well-intentioned efforts of England to make China safe for commerce; but every recent mail from China has served to make it a fact less and less unexpected. With a very questionable policy, and, as some think, with rather clumsy diplomacy, the European Representatives at Peking allowed or contrived that the foreign affairs should pass from the hands of Prince Kung, who was accessible to impulses, into the hands of a "foreign board" of fanatical Chinamen of the old Yeh school. When, therefore, Mr. Lay and Captain Osborn appeared at Peking some months ago, the former with his instructions all executed, and the latter with his squadron assembled at a convenient distance ready for work, and when the first requested to have his acts ratified, and the second to have his conditions of service confirmed, they found that everything had been changed at Peking during Mr. Lay's absence. The "foreign board" were all orthodox haters of "red devils," and belonged to the school that existed before our advance to Peking. They had, perhaps, learnt that European tactics are superior to Chinese tactics; but they had also found that European and American officers were to be hired by the different provincial governors at so many dollars per month. They had heard that these new instruments, however necesary, were dangerous, and they, not very unnaturally, thought that it was better that these auxiliaries should be hired in small independent bands by the local Chinese officers, who could look after them closely, than that they should form an important force, imposing its own conditions, and capable, perhaps, of an independent coercive policy. This was the narrow view of the subject taken by the "foreign board," and in this, we believe, they were not very earnestly combated by the European Ministers at Peking, for an impression had expanded itself among the diplomatic body that it might not be wise to add to the present jubilant exultations of the Peking Mandarins occasioned by the small successes of Major Gordon. The French Minister had, moreover, just received intelligence of the massacre of more missionaries in the province of Sz'chuen, and made no secret of his conviction that France was more likely to have to fight the Imperial ships and to conquer Chinese territory than to help to man the one or to protect the other. There was no question about money. The Chinese were quite ready to pay, and the ample revenues of the customs were placed at the disposal of the force. But the Chinese statesmen wanted small separate bodies of mercenaries to execute their orders of extermination, and not a single powerful force to put down the rebellion.

Captain Osborn, of course, at once saw that this was not what his Government or his countrymen expected from him. He had been sent out to enforce orders and to spread peace among these Mongol populations, and not to be the blind instrument of barbarian vengeance. There were, however, two courses open to him. The first and the more tempting was to leave Mr. Lay and the Mandarins to discuss questions in difference, and to put his fleet at once in action, to proceed up the Yang-tse, drive the Taipings from Nanking, and clear the river up to Hankow. Nothing would have been easier to that powerful squadron. In fact, several of the Taiping chiefs had already made overtures of submission. The prestige of the commander, and the evident power at his disposal, had done half the work. Here was fame for the leader and booty for the followers, certain and at hand. As to stores and pay, these were all secured by the credit already given upon those immense customs' revenues which were daily coming in at the treaty ports. Many men would have chosen this course and trusted to success to carry them through with it; Captain Osborn deliberately rejected it, and preferred to sacrifice the position he held and the fortune within reach of his hand rather than deviate a point from the punctilio of professional honour, or do one act of war without formal warranty from the sovereign Power whose commission he held. We believe that he will find the reward of his self-sacrificing choice in the approbation of his countrymen. The alternative was to insist upon the ratification of the engagement concluded in England under the clearly defined and written instructions of Prince Kung, and, failing to obtain this, to resign his command. This latter course Captain Osborn adopted. We are not about to track the sinuous course of the negotiations which took place. We believe that the public will feel sufficient interest in the matter to read the correspondence we publish this morning, and we are sure that they will be rewarded for the labour by the pleasure they must derive from seeing how well an English sailor has sustained the honour of his country under circumstances of no ordinary difficulty. Captain Osborn had to make sacrifices, not only for himself, but also for his followers, whose fortunes were in his keeping, and who had already heard of the mountains of bales of silk, the plunder of the silk provinces, stacked together in Nanking. Under these circumstances the steady and faithful conduct of the officers and men, the cheerfulness with which they all stood by their commander, and the tenor of that address to him which appears among the papers we publish are alike honourable to both parties; and they increase our regret at the failure of the expedition, for they show how strong it was in purpose and discipline, and what great things it might have done. However, it is vain to speculate now upon opportunities that are gone by. The Osborn expedition has been refused by the Imperial Government of China. China has adopted a retrograde policy. She is going back as far and as fast as she may to the old system of fighting bandits by bandits, and perhaps collecting her revenues by filtration through a great system of corruption. *It does not seem very probable that the European Customs' controllers will long be able to retain place with honour under the returning system.** Every friend of humanity and every honourable merchant will be grievously disappointed; every speculator upon fraudulent advantages to be derived from a state of confusion and a free market for smuggling will chuckle in secret, if, indeed, this class have not the impudence to sing a chorus of triumph.

In other days the consequence of this change in the Imperial counsels might have been more proclamations against trade and more China wars. That danger is, we believe, past. Commerce has now struck firm root in the Empire. The Russians may continue their daily advances from the North, and the French may, as their agents in China do not hesitate to avow to be their policy, conquer a province or two in order to be present to defend the rights of the Catholic Church. We, however, certainly have no business as conquerors in China. The future of China, if we may judge of what will happen from what has invariably happened under similar circumstances, will be determined by the necessities of commerce. When the Roman Empire broke up, and the fifty cities of Upper Italy were plundered by successive inroads of Huns and Goths, trade fled for peace to a stronghold, and the Republic of Venice arose powerful and secure, even under the Gothic kingdom of Italy. The contests that followed the fall of the Carlovingian dynasty made Genoa a city of refuge and a Power in the world. The robbers upon the Elbe and the pirates on the German Ocean, in the thirteenth century, produced the Confederacy of the Hanse Towns, with their quaint rules of trade and their strict discipline in their factories. May we not learn a lesson from these conspicuous precedents? Shanghai, as a European settlement, is but of yesterday, but it is already second only to Calcutta among the modern cities of the East. It is a city of refuge, it is a safe storehouse, and it has a *quasi* territory of thirty miles radius. Shanghai and its dependent territory and its trade are at this moment practically independent of all that Chinese factions can do against it. The Chinese who live under its protection, and many of whom give fabulous prices for a spot of ground within its precincts, are even now estimated at three millions. Its trade is increasing at so rapid a rate that against sixteen millions of imports in 1862 we have to put twenty-three millions in 1863, and against ten millions of exports in 1862 we have to put fifteen millions in 1863. These are facts which speak to those who can understand them. Free cities will, in all probability, be the future of China. The time may yet be when the men of commerce located in China shall, without distinction of race or nation, fortify themselves against aggression from any robber, and take measures to secure that the duties paid by commerce shall be applied to maintain the security of commerce. We are very far from this yet, and many obstacles are to be overcome before it can happen. Our difficulties in China, however, are evidently recommencing. The Empire has gone back into its old barbarism; the Taipings are miscreants and plunderers, in whom we can have no hope; the soldiers of fortune are *condottieri* now, and will be brigands a short time hence. Conquest is too costly and immoral to be thought of, and continual wars for the redress of commercial grievances are too expensive and vexatious to be endured. It remains to be seen whether some policy cannot be adopted which may tend to create a Chinese commerce which shall be able to protect itself.

(DAILY NEWS.)

The correspondence relative to the disbanding of the Anglo-Chinese naval force, published in the organ of the expedition, confirms in the most striking and conclusive manner the views of those who have from the first condemned the adventure as an unwise and impracticable interference with the internal affairs of that vast and distracted empire. Whatever name it might bear, such an enterprise, if carried out, must have been in reality a direct intervention on the part of this country in an aimless but gigantic civil conflict between rival races, religions, and interests, equally barbarous, and marked on either side by atrocities equally revolting and inhuman. And having been undertaken in the interest of the Imperialists, the expedition, if successful, would eventually have saddled us with the tremendous task of extending our rule over some three hundred and fifty millions more of the human race. It was foreseen from the outset that the imposing British contingent organised by Mr. Lay must either sink into a mercenary force, or imposing its own conditions of action on the Chinese Government, become virtually the rulers of the Empire. There was absolutely no escape from one or other of these alternatives, nor could there be any doubt as to which would prevail. It was not to be supposed for a moment that a British officer of the high character and standing of Captain Sherard Osborn would under any circumstances consent to become the instrument of a purely Chinese policy, and it is clear from the correspondence that he intended from the first to impose on the Imperial Government what he considered to be a British policy, and that with this end in view he had taken very decisive precautions for controlling its action. The second paper of the correspondence is "The agreement entered into between Inspector-General H. N. Lay and Captain Sherard Osborn, R.N., C.B.," and the sweeping nature of the conditions under which alone the Commander of the Anglo-Chinese fleet was to act will be seen by glancing at a few of the clauses contained in this memorandum:—

2. Osborn, as commander-in-chief, is to have entire control over all vessels of European construction, as well as native vessels manned with Europeans that may be in the employ of the Emperor of China, or, under his authority, of the native guilds.

3. Lay will procure from the Emperor such an authority as may be necessary to cover Osborn's acts as the commander-in-chief of the European Chinese navy.

4. Osborn undertakes to act upon all orders of the Emperor which may be conveyed direct to Lay, and Osborn engages not to attend to any orders conveyed through any other channel.

5. Lay, upon his part, engages to refuse to be the medium of any orders of the reasonableness of which he is not satisfied.

The two last of these provisions clearly destroy the independent action of the Chinese Government, and deprive it of all means of carrying out its own policy. Instead of being any longer supreme, it becomes in effect the servant of Messrs. Lay and Osborn. Captain Osborn will obey no orders except those conveyed to him directly from the Emperor through

* The italics are our own.

Digitized by Google

Lay, and Lay is to exercise his own discretion as to what orders he will forward. If he is not satisfied with the orders issued by the Imperial Government, he simply refuses to convey them, and they become at once a dead letter. Under such an arrangement Mr. Lay and Captain Osborn would have exercised the supreme authority, and thus have become for the time being the rulers of China. Prince Kung had quite sufficient discernment to perceive this obvious bearing of the agreement between the Inspector-General and the Captain of the Fleet, and on its being communicated to him, he very naturally refused to ratify it. In his own instructions to Captain Osborn the Prince makes effective provision for carrying out the orders of the Imperial Government, by stipulating for the appointment of a Chinese Commander-in-Chief of the united navy, under whom Capt. Osborn is to serve. The British Captain repudiates this proposal, not only with characteristic firmness, but in a tone of conscious superiority that would no doubt help to convince Prince Kung of its wisdom and necessity. Captain Osborn can, indeed, hardly restrain his indignation at the bare thought of acting under the Imperial Government in any inferior capacity. The very notion of a British officer having to serve under a wretched, unprincipled, lying Mandarin, and being dictated to by barbarians, makes him turn away from the expedition in disgust. And truly we should have been ashamed of him if he had acted otherwise. He tells Prince Kung in plain terms that he came out to command, not to obey; to revolutionise, not to carry out the established policy of the Imperial Government:—"By submitting to such instructions and violation of my original agreement I should at once deprive myself of the power to assist in carrying out in China the policy of Western civilisation. My force, powerful as it will be for good or evil, might be directed against the interests of commerce or of common humanity. Brutal butchery might be perpetrated, and I should be powerless to prevent it. My men and officers, the pick of many from the Royal Navy of Engiand, would be associated upon equal terms with the rowdies and pirates the Foutai might be pleased to employ." He insists on this point again, and if possible in still loftier terms, in reply to the justification of its conduct attempted by the Chinese Foreign-office:—"To the argument advanced by the Chinese Foreign-office 'that the course proposed by Prince Kung is a usual one in China,' I reply I did not come here, or my followers either, to accustom ourselves to the treatment usual with Chinese sailors or soldiers, or to assist them in a retrogressive policy in the treatment of European *employés* or Europeans in in general. The employment of ships of war and war steamers of European construction is an innovation, that of European officers and gentlemen still more so. I and my force are part and parcel of a new order of things indicating 'progress in China.' I will be no party to her lapsing back into her ancient system and treating Europeans as if they were Chinamen."

The moral of all this is plain enough. As a "European officer and gentleman" Captain Osborn went to China to impress Western ideas and Western policy on the Imperial Government, and assist it in carrying out the new order of things. In this, as well as in his language and conduct at Peking, he showed a perfect sense of what was due to his character and position as an English officer. The passages we have quoted from his spirited remarks on Prince Kung's letter of instructions indicate plainly enough that he was determined to maintain this position. But they prove still more clearly that he had no business at all in China as the servant of the Emperor. Captain Osborn was at once a British officer, a subject of the Queen, and an *employé* of the Chinese Government. The position was a false one from the first, and, unless the Imperial Government were utterly imbecile, must in the nature of things have ended, as it has done, in failure and disappointment. The attempt to carry Western civilisation to China and diffuse Western ideas amongst the Chinese is a very laudable undertaking; but it cannot be made by anyone in the position of an officer of the native Government, which has always consistently opposed those ideas as fatal to its own existence. That Government, like all the governments of the East, will indubitably maintain its character to the end. And before Englishmen and English officers again engage in such a service it would be well for them to weigh more seriously than the leaders of the Anglo-Chinese expedition appear to have done the questions which it appears from the correspondence they proposed to themselves:—"How are cruel or unjust orders from Peking to be prevented? How shall European officers and seamen levy war for a barbarous sovereign without being made to participate in acts which our country would repudiate?"

The following letter on this subject has been addressed to the *Daily News*:—

SIR,—All who contemplate the relations between Europe and China with a judgment unbiassed by mercantile cupidity or the narrow prejudices of so-called civilisation, will agree with you that the failure of the Lay and Osborn scheme is a matter for congratulation. Regarding it merely as affecting British interests, we cannot be too thankful that this attempt to involve the nation in a disastrous policy has for the present proved abortive. But the question has another and not less important aspect. No thoughtful man can read this correspondence, or the equally suggestive comments of *The Times*, and not be painfully struck with the lax morality that governs our behaviour towards nations of a different type of civilisation from our own. You have pointed out that the terms proposed by Mr. Lay and Captain Osborn, according to which Captain Osborn was to obey no orders which were not transmitted through Mr. Lay, and Mr. Lay was to "refuse to be the medium of any orders of the reasonableness of which he is not satisfied," would have placed the whole naval power of China at the absolute disposal of a couple of Englishmen. Surely the wonder is, not that Prince Kung should have refused to ratify such an agreement, but that the two Englishmen should have had the assurance to propose it. *The Times* considers that upon this refusal two courses were open to Captain Osborn; the one, to retire from the transaction; the other, "and more tempting, to leave Mr. Lay and the Mandarins to discuss questions in difference, and to put his fleet at once in action, to proceed up the Yang-tse, &c.;" in other words, to commit a flagrant act of piracy, for all hostilities carried on by ships not commissioned by any Government are piracy. The temptation, as is afterwards explained, consists in the "mountains of bales of silk, the plunder of the silk provinces stacked together in Nanking;" and although there are compliments for the stoical rectitude of the commander who "would not deviate a point from the punctilio of professional honour" (would not, that is, be guilty of piracy) even for this splendid prize, it is clear, from the almost plaintive tone of the writer, that this was a sublime strain of virtue to which, under the circumstances, he would not have pretended to aspire. I suspect there has been tearing of hair and rending of garments among certain London speculators who knew all about this mountain of silks, and would rather be reading a promising invoice than the despatches, however lofty in tone, of their too squeamish emissary.

But let us see how far Captain Osborn's ideas of rectitude and honour carry him. The eight vessels under his orders were bought in England by the Chinese Government, and were confessedly its property. In fact, they were to be a security to Captain Osborn for the pay of his men. He might decline to serve on the terms proposed by his employers, but by his own admission he had no right to detain the ships unless his pay should be refused. Under these circumstances, what does he do? He writes to Sir F. Bruce as follows:—"I request you will inform me whether you see any objection to my surrendering to Prince Kung the eight ships which I have brought out to this country. They are Imperial property, and I have no right to detain them; but I would submit that there might be some danger if vessels of so formidable a character were trusted to the rowdies and pirates now so numerous at Shanghai," &c. The British Minister thus prompted, and evidently penetrated with the conviction that the obligations of morality vary with the latitude and longitude, replies:—"I will not consent to the ships and stores being handed over to the Chinese Government without instructions to that effect from Her Majesty's Government."

We have heard loud complaints because Her Majesty's Government have interfered with the purchase of vessels of war by one of two belligerent Powers between whom we have resolved to observe a strict neutrality. The law, according to the Lord Chief Baron, will not authorise even this measure, though so evidently necessary for the due performance of international duties. What must be his opinion of this outrageous act of our Minister at Peking, who, like his brother envoy at Kagosima, appears to think that the possession of a steam fleet by an Oriental Power is a thing which, *per fas et nefas*, must be prevented?

I know that to most people it has quite a ludicrous appearance on the face of it, to measure our dealings with "barbarous nations" by the ordinary rules of morality. This is only one among many symptoms of the deplorable anarchy of thought and sentiment which these latter times present. To whom are we to look for some teaching which shall either correct these generally received maxims, or reconcile them with such principles of morality as yet remain unshaken? Will the Bishop of Oxford tell us what religion has to say to it? Or the Bishop of London? They find much time for perorating on topics of less immediate interest. Will Cardinal Wiseman or Mr. Spurgeon enlighten us? If they are unable to deal with practical questions like these, they must excuse us if we spend our Sunday mornings in trying to think them out for ourselves.

—I am, &c.,

E. S. BEESLY.

FRENCH CORRESPONDENCE FROM JAPAN AND COCHIN-CHINA.

The *Moniteur de la Flotte* publishes very favourable news from its own correspondent in Japan, dated Yokohama, November 17. The letter states that on the preceding day the difficulty with Prince Satsuma was arranged. The Prince is to pay the English representative the sum of £25,000 demanded previous to the attack on Kagosima for the murder of Mr. Richardson. The Government of Jeddo have, moreover, withdrawn the decree for the expulsion of foreigners from Japan, and have discontinued the building of forts round Yokohama, which remains in possession of the European forces. The Prince of Satsuma had become much less savage, and had announced his intention to send thirty young men of good family to be educated in England. Peace may consequently be considered as certain for the present, and commercial transactions have resumed their activity. There were fourteen English ships of war in the port of Yokohama on the 17th of November, and in addition two corvettes at Nagasaki. The English admiral is said to be expecting two more vessels from the Pacific.

The *Moniteur de la Flotte* further publishes a letter from its correspondent at Saigon, in Cochin-China, dated the 29th November. It states that the French colony enjoys the most perfect tranquillity. The rice crop in the mountains was being gathered, and the harvest in the low grounds would next be attended to. The Admiral-Governor is neglecting nothing that tends to the maintenance of peace. He had sent several articles treating of morality and religion to the Chinese official journal published at Saigon. The last article, which demonstrates the absurdity of superstitious ceremonies, was written on the occasion of a demand addressed to the Governor by some Annamite peasants to make use of certain invocations to procure rain. Another article was written against the worship of deceased parents, to which the Annamites are much attached. These articles had produced the best effects, and the missionaries have accomplished numerous conversions among the most influential classes.

Admiral de la Grandiere had likewise been very successful in other measures he had adopted. He had permitted the natives to enter the naval service, and the number of volunteers is greater than he anticipated. He has even found skilful workmen in metals, whom he has engaged for the Meurthe at 32 f. the month. He has likewise engaged native boys as apprentices, and he expects that the school he has formed will supply the French navy with skilful engineers. The accounts from Camboge are likewise excellent. The excursion Admiral de la Grandiere made there last summer produced the best effects.

The town of Saigon is making great progress. New buildings are every day rising. There are thirty private carriages in the town, hitherto a rare sight in Cochin-China, besides several hackney coaches purchased at Singapore. The Governor has decided that every Chinese coming into the French colony must pay a tax of two piastres a year for permission to reside. Licences of three classes are to be granted to Chinese merchants who may desire to establish themselves in the colony. Fifty piastres a-year is to be paid for a licence of the first-class, twenty-five piastres for the second-class, and ten for the third. A decree had been issued for equalising the native coin with the French currency, by which much confusion will be avoided in commercial dealings.

THE NEW PACIFIC MAIL ROUTE.—The Pacific mail steamship route about to be established between Sydney and Panama will not only give us an additional mail communication with Australia, but will more intimately connect that portion of the globe with the American continent; and also this country with the fertile islands of the Pacific, now growing into great importance through the French settlements there. The Pacific mail route has been chiefly desired by Eastern Australia and New Zealand. All other parts of Australia prefer the Indian route. The Peninsular and Oriental Company have offered to convey an additional mail to Australia from Ceylon at a comparatively small sum, and most probably Victoria and South and West Australia will accept that offer, which would make the mail communication with our antipodean colonies tri-monthly. Steam communications with the most distant parts of the world are increasing in number by means of our own and foreign ocean mail lines, and our own are diminishing in expense to the nation. The English and French lines give us a mail communication with India five times a month; with China, Brazil, the River Plate, and some parts of the West Indies, three times a month; and with Mexico twice a month. And we have by English and German lines a communication with the United States ten times monthly. Owing to the increase of traffic with the West Indies and the Cape of Good Hope the new contracts for conveying mails to those places have been entered into at reduced subsidies. Notwithstanding the French Oriental Mail line, the Peninsular and Oriental Company have as much traffic as they can manage, and as the Government have determined on sending troops to and from India and China by the Red Sea, it is probable that private steamers will be hired to do the work, and this will cause the establishment of another Oriental mail steam line. In a few years the large sum of nearly a million sterling a year now paid by this country for the conveyance of ocean mails will probably be reduced one half. The commerce of the East, through the advancing prosperity of India and the opening up of the trade with China and Japan, is enriching the Oriental steam packet companies both French and English. The development of the resources of Central America, South-Western America, California, and British Columbia, is rapidly increasing the profits of the Royal Mail Company, and the traffic between New Zealand and Australia with Panama will still further increase it.

CHINESE EMIGRATION TO THE WEST INDIES.—The Demerara Court of Policy met on the 17th Dec., at which a letter from the Governor of Trinidad reported the co-operation of the Government of that land with British Guiana in respect to the promotion of Chinese immigration for the next three seasons. His Excellency the Governor laid over a correspondence between the Secretary of State and the Immigration Commissioners and himself respecting the extension of the period of indenture of African immigrants to five years instead of three, and intimating the approval of the Secretary of State of the alteration on certain conditions. A Bill to effect the change proposed was introduced and read a first time. The Court adjourned to the 1st of January, but a meeting was subsequently called for Thursday, December 24. The ship *Sevilla*, Captain Kerr, arrived at Georgetown on the 15th ult. from Calcutta, after a passage of 90 days, with rice and 292 immigrants, of whom 206 were men, 56 women, 8 boys, 10 girls, and 12 infants. The percentage of mortality was lower than usual, only nine deaths having taken place during the voyage.

TRIAL OF THE "FAR EAST."—This double-screw vessel had her trial trip on the 15th inst., the result being highly satisfactory. The distance between the Nore and Mouse, nine statute miles, was run in 54.30, and in 50.25, or an average speed of 10.3 miles per hour. From this we may conclude that her passage to Hong Kong will be made within seventy days. Her consumption of coal being very small, she will carry sufficient from London for the voyage. Mr. John Dudgeon, of J. and W. Dudgeon, the builders, superintended the trial, and Captain Jones on behalf of the owners.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 15.

The Second Chamber of the States-General is convened to meet to-morrow for the purpose of voting temporary supplies for carrying on the service of the Foreign Department, as the First Chamber threw over the Budget for that department, and a new one cannot be prepared till definite arrangements are made, the current duties of the Foreign-office being for the present carried on by Mr. Huyssen van Kattendyke, the Naval Minister.

The Council of State have been engaged for some time past in drawing up a Bill for the better regulation of public education in the languages, geography, and ethnology of the Dutch possessions in the East Indies. I hear that the work is so far advanced that it will be shortly in a state to lay before the Chambers.

At the end of next June the annual meeting of the Congress for Rural Economy will be held at Haarlem. Among other subjects to be brought under discussion is the application of steam-ploughing to colonial agriculture; the influence to be expected from the railways in Java; the importance of cotton cultivation under the present high prices; the necessity for manuring the sugar plantations; the superior properties of the black variety of sugar cane; the importance of the cultivation of indigo; and an investigation of the reasons why the export of the produce of the *Klapperboom* is not made more available and productive in Java and Ceylon.

According to the "Delft Students' Almanack" for 1864, which has just been published, it appears that the total number of students at the Royal Academy in that town is 253, of whom 7 are studying for the rank of first class officers of the East India Civil Service, 83 for the second-class, 100 for general studies, 61 for civil engineers, and 2 for naval architecture.

Mr. Stieltjes, who has lately been rather suddenly dismissed from his appointment in Java, and has arrived in this country, as mentioned in a former letter, has announced his intention to come forward at Almeno at the approaching general elections as candidate for the representation of that town in the Second Chamber of the States-General.

The Netherlands Trading Company have advertised for tenders of ships for the usual return cargoes of produce from Java, and their surveyors are now examining the vessels already offered. The vessels must have been previously under charter to the company, or newly-built ships launched before the end of last September. They will be required to be ready to sail from a port in this country on or about the 10th of February next, and those that have already sailed must be placed at the disposal of the factory at Batavia by the 10th of June next. To-day is the last day for receiving tenders, so that I shall probably be able to give you in my next letter a list of the vessels chartered.

The Dutch Steamboat Company at Rotterdam has taken a contract to make the engines for a paddle-wheel steamship building by Government for service in the East Indies. The contract price is 45,800 fl.

Ever since the beginning of this month the frost has been very severe and the navigation of the rivers and canals is entirely suspended. The thermometer indicates from fifteen to twenty-one degrees of cold by the centigrade scale. In consequence of this the last arrivals from Java lie where they were caught in the ice. The *Stad Middelburg*, Captain Auwehand, and the *Noordster*, Capt. Luteyn, have found shelter at Vlissingen; the *Staatsraad van Ewyck*, Capt. de Winter, is frozen in at Willemsluys, and the *Patriarch Samkiri*, Capt. Lion, has put into Harwich, where she will remain till the thaw sets in. Of the outward bound vessels, the *Elizabeth and Jacoba*, Capt. Zwaneveld, hence to Macassar, is frozen up at Purmerende, but the *Jan van Brakel*, Capt. de Roever, from this port to Japan, has managed to get to sea, and sailed from the Texel on the 10th inst.

During the year 1863 the number of ships that arrived at Zierikzee was 105, whilst 46 sailed. Three ships sailed to Java from the port of Veere. At Vlissingen five vessels arrived from Java, and amongst those that sailed were two to Batavia, one to Ceylon, and one to Simon's Bay, Cape of Good Hope. At Nieuwe Deep the number of vessels that arrived from all parts during the year 1863 was 1,971, whilst 1,704 sailed from that port.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

GALTON—On the 11th Jan., at Laurel-grove, Brixton-hill, S., the wife of Edmund H. Galton, Esq., of a daughter.

HALL—On the 10th Jan., at Sheerness, the wife of Captain W. King Hall, C.B., H.M.S. Cumberland, of a daughter.

LITTLE—On the 17th Jan., at Vanbrugh-fields, Blackheath, the wife of J. M. Little, Esq., of a daughter.

MARRIAGES.

CHAMBERLAINE—LEVICK.—On the 31st Dec., 1863, at Cairo, in the Consulate Chapel, by the Rev. George Washington, M.A., Charles Tankerville Chamberlaine, Esq., son of the late Richard Tankerville Chamberlaine, Esq., M.D., M.R.C.S., to Louisa, eldest daughter of Henry Levick, Esq., Her Britannic Majesty's Packet Agent at Suez, Egypt. No cards.

ELLES—PYE.—On the 14th Jan., at St. Mary's, Wimbledon, by the Rev. H. W. Haygarth, M.A., Jamieson Elles, Esq., to Mary Chesney, eldest daughter of Kellow J. Pye, Esq., Wimbledon. No cards.

LUDLOW—MACPHERSON.—On the 4th Dec., at St. George's Church, Penang, by the Rev. James Mackay, B.D., Lieut. Edwin S. Ludlow, Adjutant 28th Regt. Madras Infantry, to Jane Emily, daughter of Lieut.-Col. R. Macpherson, R.A., and Resident Councillor at Singapore.

POWNALL—SWAYNE.—On the 9th Jan., at St. John's, Hackney, by the Rev. W. H. Pownall, late of Shanghai, to Sarah Sophia, daughter of the late Robt. Swayne, Esq., of Liverpool.

RICHARDSON—COPPIN.—On the 14th Jan., at St. George's, Hanover-square, William Henry, son of the late James Richardson, Esq., of Clifton, York, to Louisa Henrietta, youngest daughter of Commander Charles Coppin, R.N., and niece of the late Viscountess Kilcoursie.

DEATHS.

BATHURST—On the 15th Jan., at her residence, 7, Southwick-crescent, Hyde-park Lady Caroline Bathurst, widow of the late Lieut.-General Sir James Bathurst K.C.B., in her 81st year.

RANDOLPH—On the 29th Dec., at Madiera, Gower William Randolph, Esq., Fellow of All Soul's College, Oxford, late an Examiner in the Privy Council-office, and Private Secretary to Earl Granville, aged 36.

RYDER—On the 10th Nov., 1863, at Manila, Mr. John Northcote Ryder, late of the Royal Navy, and Superintending Engineer at Royal Spanish Arsenal, Cavite, Manila.

SWAN—On the 15th Jan., at Denmark-hill, Camberwell, Robert Dalgleish Swan, Esq., late of Ceylon, and formerly of the Indian Navy, aged 61.

WILKINSON—On the 21st Nov. last, at Shanghai, in the 28th year of his age, Henry Wilkinson, of the North China Insurance Company, the fourth son of Josiah Wilkinson, of Widmore-hill, Bromley, Kent, and of Nicholas-lane, London.

Monetary and Commercial.

The cargo of the *Contest*, from Kanagawa to New York, which vessel was burnt in the Straits of Sunda by the *Alabama*, consisted of 93 half-chests tea, 342 bales cotton, 3,490 bales rags, and 15 of sundries. She left Kanagawa on the 14th October.

We are informed that Mr. Elias D. Sassoon, of the firm of David Sassoon and Co., and Mr. Haju Esmail Haju Habib have consented to join the Bank of Hindustan, China, and Japan, as members of a committee of directors in Bombay, the former as chairman.

At the half-yearly meeting of the Union Bank of London, Mr. P. N. Lauri in the chair, the profits were stated at £114,323, making, with a previous balance of £669, an available total of £114,992. A dividend of 18s. per share, or at the rate of 15 per cent. per annum was declared, leaving a balance of £60,992.

The preliminary announcement of a bank, called the "Imperial Bank of China," has been made by Mr. Montgomery Martin. It is proposed to procure privileges from the Imperial Government at Peking, and to employ capital under those concessions in loans, mortgages, &c. It is stated that Exchange operations will be excluded from the business of the bank.

Another project is also progressing for establishing a bank on similar principles to those already established in China.

The demand for bar silver for the East was again extremely strong, and an important advance has taken place, the last price being 5s. 2⅜d. to 5s. 2½d. A heavy amount has been bought for transmission by the Bombay and Calcutta steamers from Marseilles on the 18th and 19th inst. respectively, as well as by the Calcutta packet from Southampton on the 20th. As the supply here is very inadequate, a large sum will have to be imported from the continent, and gold will probably be sent from this side to pay for it.

The amount of Government Bills on India, for which tenders will be received at the Bank of England on the 20th inst., is 40 lacs (£400,000).

A circular has been forwarded to us from Sydney by Mr. C. Cecil, who, in conjunction with Mr. George Holmes, of Hong Kong, made various shipments to Messrs. Molison and Black, of Sydney. The circular complains of the charges made by this firm, and the general neglect of their interests. As the matter has been investigated in the law courts of Sydney, and we are not in receipt of a report of the case, we cannot give any opinion on its merits.

Frederick Huth, the founder of the well-known house, died on the 14th, aged 87.

ARTICLES OF IMPORT.

SUGAR.—There has been less activity in the market during the past week, and prices have been more in favour of the buyer. By private sale on Thursday, 2,000 bags Mauritius went at 37s. to 45s.

COFFEE.—Firm, and maintains previous rates. At auction on Wednesday 43 cases Coorg Mercara went at 82s., and part of 800 bags Mysore, at 72s. to 73s. On Thursday, at auction 500 casks, 70 barrels, and 400 bags of Plantation Ceylon at auction met a good demand, and all sold with spirit at full rates—triage, 55s. to 69s. 6d.; fine ordinary to good middling, 72s. to 85s. 6d.; pea berry, 78s. to 86s.; 1,000 bags of native Ceylon also sold at 68s. to 70s.; 1,100 packages of other East India, at 71s. to 93s.

COTTON continues dull, and prices are still on the decline.

RICE.—Business inactive, and the little done was barely at previous quotations. At auction, 1,300 bags, middling to good white Bengal, at 11s. 6d. to 12s. 3d.

CASSIA LIGNEA.—Easier; a part of 870 cases sold at 86s. to 89s.

NUTMEGS.—In good demand, and rather dearer; sales at 1s. to 2s. 8d.

GINGER.—A parcel of Cochin went off at 65s.

MACE.—14 cases disposed of at 9d. to 1s. 10d.

PEPPER.—Black: Penang, 3½d.; Singapore, 3¾d. White: 4,200 bags Singapore, fair, at 5¼d.

TAPIOCA.—Penang: 650 bags, 2½d. to 2¾d. Singapore: 370 bags pearl, at 20s. 6d. to 21s. per cwt.

SAGO.—On Friday 316 boxes 140 bags were bought in at 22s. 6d. to 24s.

HEMP.—Manila firmer; 1,000 bales bought in at £34. 10s. to £35. 10s.

JUTE.—At public sale 9,900 bales were offered, and about one-fourth sold heavily, at a reduction of fully 20s. to 40s. per ton, fine qualities being most in request; prices ranged from £20. 10s. to £31. 10s.; and cuttings at £11 to £11. 5s.

LAC DYE.—27 chests SLD taken in at 1s. 3d.

CUTCH.—569 boxes 19 brls. 2,032 bags Pegue sold readily, middling and good, 25s. to 25s. 6d; 1st to 3rd class dam., 23s. to 24s. 6d.; broken, 23s.

DRUGS.—The periodical sales commenced on Thursday. Large parcels were declared, of which a portion only passed auction; aloes, Cape, sold at 35s. to 49s.; East India, £4. 17s. 6d. to £8. 2s. 6d.; cubebs, 90s. to 100s.; Gums: Olibanum, 29s. to 52s.; myrrh, £4 to £7. 7s. 6d.; Arabic, East India, 25s. to 60s. 6d.; Ipecacuanha, 8s. 6d. to 8s. 7d.; oils, castor, 4½d. to 6½d.; opium, Turkey, 15s. to 18s. 6d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s.; nail rod, £9. 10s. to £10.; hoops, £11; sheets, single, £12; Staffordshire bars, £10. 10s.; rails, £8.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £120 per ton; yellow metal, 10½d. per lb.

TIN.—116s. for block; 117s. for bar. Tin plates, best charcoal, I.C., 30s. per box.

LEAD, &c.—English Pig, £21; W.B., £21. 15s.; shot, patent, £23. 10s.; sheet, £21. 10s. to £21. 15s.; spelter, £20 to £20. 5s.; zinc, English sheet, £25. 10s.; quicksilver, £7 to £7. 10s. per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton the 4th January by the P. and O. Company's mail steamer.

	Gold.	Silver.
Shanghai	—	£32,530
Foo-chow-Foo	—	2,250
Hong Kong	—	5,560
Amoy	—	—
Singapore	£3,750	2,700
Penang	—	39,265

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9	
Spanish Doubloons	3 16 0	to 3 17
United States Gold Coin	3 16 3½	
Silver in Bars	0 5 2⅛	to 5 2⅛
Mexican Dollars	0 5 2	

COMMERCIAL POSTSCRIPT.

TEA.—Market firm; sales trifling since last mail. About 70,000 packages will be offered on the 19th. About 550 packages recovered from the wreck of the *Friar Tuck* have been sold. The latter were kiln-dried, bulked, and repacked: they sold at prices varying from 2¼d. to 1s. 0¼d.

SILK.—Market firm, at last mail's quotations; tendency upwards.

COTTON.—The Liverpool advices received this morning state that the demand throughout the week has been on a limited scale, and prices are generally ⅛d. per lb. lower. Of the 2,920 bales taken for export, 200 were China. China, indeed, is in fair demand, but freely offered at ⅛d. to ¼d. lower rates. The quotations are, middling fair, 19½d.; fair, 20¼d.; good, 21d. to 22d. The total stock is 250,000 bales, against 395,000 in 1863.

SUGAR.—3,000 bags of clayed Manila went yesterday at 40s. 6d.; and from Liverpool we hear of 2,100 mats unclayed Manila at 21s. 6d. per cwt.

SPICES.—Liverpool quotations are, Singapore black pepper, 3¼d. to 3⅜d.; Cassia Lignea, 92s. for pile 1, and 90s. for pile 2.

HEMP.—There has been a large and speculative inquiry for Manila at Liverpool, closing prices showing an advance of £2 on the spot, and £2. 10s. for arrival. Sales, 800 bales, at £35 in store, and 8,000 bales to arrive, at £33. 10s. to £35 for Liverpool, and £33 to £35 per ton for London.

MISCELLANEOUS.—Gambier: Small sales of heated, at Liverpool. at 23s. 6d., and 150 tons to arrive at 20s. 9d. to 21s. 6d. per cwt. Mother o'Pearl Shells: 60 cases of Manila at 80s. Rattans: 3,400 bundles at £29 for sound large, and £32. 10s. for 1st class damaged Singapore small canes. Sapan-wood: 15 tons Manila at £9. 10s. per ton. The above sales, all at Liverpool.

The memorial of the Singapore Chamber of Commerce for the reduction of duty on Pepper is considered to have great claim on the Chancellor's well-known advocacy of fair and equitable rates.

ARRIVAL NOT INCLUDED IN THE TABLES.—Jan. 15, at Liverpool, from Hong Kong, John Nicholson.

FREIGHTS AND CHARTERS.

There has been no change of importance in freights since our last issue. The different berths for the East are now moderately supplied with tonnage, but freights have not improved. Vessels are still in request for homeward freights.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and £2. For Shanghai: £45 and £47. 6d. to £50. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £24 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of 20 tons light Government stores from the river Thames to Hong Kong.

The P. and O. Company have accepted tenders for the supply of 6,000 tons coal at Hong Kong, the shipments to extend over three months.

CASUALTIES.

The Voorwaarts, Kerkstra, from Batavia for Rotterdam, put into Mauritius Nov. 15 leaky in her upper works; had caulked topsides.

The Staatsraad van Ewyck de Winter, from Batavia for Amsterdam, was frozen up in the North Holland Canal on the 6th Jan.; also the Elizabeth Jacoba, Zwaneveld, from Amsterdam for Macassar.

Advices from Mauritius to Nov. 6th received at Boston, state that the ship Thomas W. Sears, of Boston Wilson master, from Padang for New York, which put into Mauritius Sept. 28, leaky, &c., had been condemned at that port.

The Carausius, Baird, from Hartlepool for Hong Kong, put into Falmouth 11th inst. with fore and main topsail yards carried away.

The Maid of the Tyne, from Singapore for London, put into St. Thomas's Dec. 25, very leaky, and wasdischarging.

The Therese, Denicke, from Hamburg for Singapore, which was discharging at Mandal on the 19th Dec., had broken masts and jibboom, and had sustained damage to rigging.

The East Anglian (str.) arrived at London on the 14th inst. from Scilly, bringing a cargo of damaged tea from the wreck of the Friar Tuck, from Foo-chow-Foo.

At MAURITIUS.—Nov. 23, from Penang, Chance; Dec. 4, from Sunderland for Shanghai, Wo-ke (str.).

At MADEIRA.—Dec. 25, H.M.'s Wasp, from Portsmouth, and left, 27, for China; 4, H.M.'s Pelorus, sailed for China.

NEW VESSELS FOR CHINA, &c.

Another vessel for the Singapore and Penang trade has been launched by Mr. Lawrie, named the Beaumaris Castle, of 1,200 tons.

At Maryport, from the shipbuilding-yard of Messrs. Robert Ritson and Co., a fine new ship of 700 tons register, called the William Ritson, built for Messrs. Fawcett, Johnston, and others, to be commanded by Captain John Brough, formerly of the Robert Ritson, and intended for the China trade.

From the yard of Mr. William Duthie, jun., Aberdeen, a fine clipper barque, of 342 tons O.M., named the Satzuma, by Mrs. George, sister of the owner. The vessel is the property of Charles T. Glover, Esq., of Aberdeen, and is intended for the Japan coasting trade, and will be commanded by Captain William Glover, brother of the owner.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all, with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAFRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON & Co., 1, Crown-court, Philpot-lane, London.

TERMS OF BUSINESS AT THE HEAD OFFICE IN LONDON.

The Bank receives deposits at ten days' notice of withdrawal, on which interest is allowed at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not exceeding 5 per cent. The rates of interest allowed on deposits for fixed periods vary according to amount and the length of time for which they are made.

By special agreement quarterly or half-yearly payment of interest is allowed on deposits for six, nine, or twelve months.

The Bank issues drafts on its branches in India and China, and circular notes and letters of credit, payable throughout Europe, for the convenience of travellers per Overland route.

The Bank purchases approved bills on India and China, and also receives the same for collection on private account.

The Bank undertakes the purchase and sale of Indian and other securities, and receives the same for safe custody.

The Bank realises interest, pay, dividends, pensions, or other moneys for remittance through the Bank or otherwise. On remittances through the Bank no commission will be charged.

The Bank effects the registry of Indian Government loan notes, so that the interest may be paid in England.

The Bank grants credits in favour of parties abroad. Applications for such credits must be sent in at least three days before despatch of the mails, otherwise they will be deferred until the following mail.

Applications for drafts, bills for collection, and all matters involving correspondence by the mail, must be sent in one clear day before its despatch.

Every other description of Indian banking and money agency business conducted, and the utmost possible facilities given to parties in their transactions with India, China, &c.

Forms and powers of attorney furnished at this office.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.—HAPPINESS ROUND THE HEARTH.—With the sore trials, temptations, and accidents daily endangering health and life in large cities, it is most important to have at hand some means of stopping the budding evil, for the longer it is neglected, the more wide-spread is the degeneration. Holloway's medicaments supply this great want; they are inexpensive, purchaseable everywhere; can be readily used, are safe even in inexperienced hands, and perfectly reliable as healers and purifiers. Holloway's Ointment and Pills cure inflammation, abcesses, and ulcerations with a facility hitherto unknown. Holloway's noble remedies will give relief to sufferers from skin diseases of the most revolting character, for which in bygone days a dangerous mineral was often administered with fatal consequences.

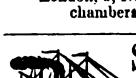
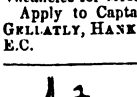
Shanghai	Solent... ...	W.I.D.	With des.
H. Kg. & Foo-chow-F.	Philomela ...	W.I.D.	Jan. 20.
Penang	Suniuni ...	W.I.D.	With des.
Singapore	Alice Mary...	W.I.D.	With des.
Manila	San Luis ...	W.I.D.	Jan. 20.
Manila	Conchita ...	W.I.D.	With des.
Bombay	Leonidas ...	W.I.D.	With des.
Nagasaki & Kanagawa	Satzuma ...	W.I.D.	With des.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.



STEAM to HONG KONG and SHANGHAI (taking goods for Hangkow and Japan), the splendid new, river-built, twin screw steam clipper ship, FAR EAST, A 1 twelve years, 1,200 tons register, 160 nominal horse power, working up to 600-horse power, HENRY JONES (late of the Ballarat), Commander; loading in the East India Docks. This magnificent new steamship (built by J. and W. Dudgeon, of Millwall), affords the best opportunity to shippers requiring despatch. Her cabin accommodation cannot be surpassed. Vacancies for Midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.



PASSENGERS by Steamer for HONG KONG and SHANGHAI.—The new twin screw steamer FAR EAST, A 1 12 years, 1,200 tons register, HENRY JONES (late of the Ballarat), Commander, to load in the East India Docks, and to leave early in January. This beautiful steamer has a full poop, with capacious cabin accommodation, and will carry an experienced surgeon. It is confidently expected, from the build of this steamship, and her powerful engines, that she will make a very fast passage. Vacancies for midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL 27, Leadenhall-street, E.C.

MANILLA direct (sailing under the Spanish flag), the splendid new Spanish clipper bark ELISA, A 1 at Lloyd's for 10 years, 481 tons register, FRANCISCO RIVERO, Commander. This fine vessel has just been built at Sunderland expressly for the Manilla trade.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helens, E.C.

FOR NAGASAKI (Japan) direct, the splendid British-built, clipper ship ALICE, A 1, 473 tons register, will be immediately despatched from the East India Docks, and having nearly the whole of her cargo engaged and shipping, will be found the most desirable opportunity for shippers desirous of despatch.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill.

FOR SHANGHAI direct, the well-known clipper ship ASSYRIAN, A 1 ten years, 555 tons register, ANDREW MEARNS, Commander; lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper ship COREA, A 1 fourteen years, 581 tons register, J. GARRY, Commander, lying in the West India Docks. This ship has good accommodation for passengers, and has just made the passage from Foo-chow-Foo in 111 days.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

THIRTY-THIRD EDITION.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Our advices by the mail just arrived completely confirm the opinions we have expressed in late numbers of the *London and China Telegraph* as to the course of policy resolutely purposed by Satsuma and the party of Daimios of which he appears to be the head. That this policy is, as we ventured to predict, of a kind favourable to progress and commerce, seems to have been at length openly and boldly proclaimed. The *Japan Herald* of the 21st November has the following:—

"We hear from a generally well-informed source the following very important intelligence. We have another reason to believe it to be correct, but do not give it as a fact without further confirmation. A cabal, it is said, has been formed by the following great Daimios at Kioto, having for its purpose to move the Emperor (Mikado) to the pursuit of a more liberal line of policy. These are the names and ranks of those mentioned (for the behoof of our distant readers, we repeat that the value of the koku of rice may be estimated at three-fourths of a pound sterling):—SHIMADZOO Sasshiu *Satsuma!* no Kami, with his 710,000 kokus; HOSSOKAWA "Higo" Etszin no Kami, a Kokoshioo, with his 540,000 kokus. KOORODA Tchikshni Matzdaira Mino no Kami, a Kokoshioo, with 520,000 kokus; NABASHIMA (Hishin) Matzdaira Hisen no Kami, a great Kokoshioo, whose income is 357,000 kokus. ETZIZEN (Tisingo sama), a Kammong, with 320,000 kokus."

Up to the 28th November nothing further had been heard from Satsuma in reference to the matters on which his Envoys held the conference with Colonel Neale. There is no reason for alarm, or even for disappointment, in this. The final conclusion of arrangements could scarcely have been arrived at in so brief a space. As our Yokohama contemporary justly observes "These are not days of railways or electric telegraphs in Japan." The indemnity was to have been paid on the 19th November; but we have reason to believe that the British Minister consented to allow a short further time for the fulfilment of that part of the agreement.

We hear something more of a supposed wish on the part of the Japanese Government to close the port of Kanagawa to foreign trade; but the *Japan Commercial News*, which is singularly persistent in its endeavours to keep up distrust and anxiety in the Foreign Settlement, admits that the natives themselves consider "the Government makes this extraordinary proposition merely for the purpose of going through the form of a programme drawn up for them by the Mikado."

In pursuance of this plan of action, the Gorogio had endeavoured to get an opportunity of making to the French Minister a communication of the same purport to that noticed in the *London and China Telegraph* of the 9th inst. as having been made to the Ministers of Holland and America. Those officials had prepared the representatives of England and France for what was likely to occur. On the Gorogio, therefore, intimating a desire to have a conference with the French Minister, his Excellency, being unwell, desired to know the subjects upon which the Japanese Vice Minister wished to confer with him, and sent an officer to make the necessary inquiry of the Governor. The Governor declined to tell; and the result

Digitized by Google

has been that the Vice-Minister has failed to obtain the desired conference. It has transpired, however, that what he had to say was exactly of a piece with the communications made to the American and Dutch Ministers relative to the determination of the Government to close the port. Subsequently a despatch from the Gorogio, embodying what he had to say upon the subject, was sent, we hear, to the French Minister.

A change in the Governorship of Kanagawa is reported. The former Governor Kiogokon-Note-no-Kami (chief Ometski to the embassy to Europe) has been transferred to the Governorship of Nagasaki, and Hori-Kounay appointed in his stead. Hori Kounay is the son of Hori Oriba-no-Kami, who was Governor of Yokohama at the time the Prussian frigate *Arcona* was here, and who committed "hari keri" in consequence of a quarrel with his superior Ando-Tsusima-no-Kami, arising out of the question of a Treaty with Prussia. The father was generally supposed to be opposed to closer relations with foreigners.

The rebellion of the Prince of Tsiosiu has given the Government a good deal of trouble. The three Daimios first sent to suppress it, found themselves unequal to the task, and seven others were despatched to their aid. Their united force was greatly superior to that of the rebel or Ronin army, which y the last accounts was surrounded in a valley of the Yamatho district, and would be obliged to surrender, or be starved to death.

Our readers will have been prepared, from the letters of our Amsterdam correspondent, to learn that the Dutch naval force in the Eastern seas was receiving reinforcements. A 16-gun frigate has already arrived at Japan. Immediately on the arrival at Batavia of the despatches from his Netherlands Majesty's Consul-General, communicating the intelligence of the attack on the *Medusa* at Simonoseki, the Dutch Admiral on the station was at first determined to send immediately a squadron of men-of-war from six to eight in number, then at his disposal, to inflict immediate and signal retribution for the insult. It was, however, determined to await further advices from Holland. Meanwhile the *Djambi*, 16, frigate, called at Nagasaki on the 17th November, and reached Yokohama on the 24th.

The intelligence received in London, *via* San Francisco and New York on the 18th inst., of the payment of the indemnity for the attack on the *Pembroke*, an American vessel, in the Inland Sea, in June last, is confirmed by our present advices. The amount, $10,000, was proffered quite unexpectedly to the American Minister, and, if accepted, is to be paid to Messrs. Russell and Co. This sum, however, has nothing to do with the settlement for the attack on the *Wyoming* in the same locality. General Pruyn is said to have referred the latter affair to his Government, and will await their instructions before he demands special reparation for that offence. As the *Commercial News* remarks: "The *Pembroke* was not materially injured in the course of Tsiosiu's attack upon her at Simonoseki, and therefore the penalty inflicted upon the Tycoon's Government, and now agreed to be paid by them, for even an attempt to injure an American vessel in Japanese waters must have a very salutary effect upon the conduct of the Daimios, and upon the Government also."

The same import of news from San Francisco asserted that a military expedition was being organised at Hong Kong, under General Sir John Michell, for immediate employment in Japan; that Kanagawa was guarded by Europeans; that the Tycoon was at war with the Daimios, &c., &c. We need scarcely say that of the above there is not one particle true, except so far as the suppression of Tsiosiu's rebellion can be construed into the Tycoon's being at war.

We admit, with pleasure, that the Japanese have recently witnessed an imposing display of British force, as much, no doubt, to their own intense gratification as to the delight of "jolly Jack and Joe the Marine." The *Japan Herald* states: —"On Tuesday (Nov. 24) the settlement was actually enlivened (so dull as it has been of late) by the landing of detachments from several of the British men-of-war in harbour for walking exercise. About 1,150, including 150 Marines, were formed in marching order under command of Captain Alexander, on the Bund, and, accompanied by the enlivening strains of the *Euryalus*' band, marched out some four miles from Yokohama, on the Kanagawa road, going some distance along the Tokaido. Many of the residents availed themselves of the inducement to a ride, and accompanied them, regarding with pleasure the evident enjoyment with which our brave tars entered upon the 'run out.' The Japanese, too, appeared to think it quite a spectacle, and lined the roads in great numbers, making their shrewd and intelligent observations upon the good order and briskness of the promenaders. The re-embarkation was well worth the inspection, and knowing that the same brave fellows would maintain a like excellent order were they landing before an enemy's hottest fire of ball or grape, none could witness it without a renewed feeling not only of pride in them, but in confidence for themselves."

An "Army and Navy Club" has been formed at Yokohama, which, though so lately established, has, under the guidance of the indefatigable Hon. Secretary, Lieutenant Smith, proved to be of the greatest convenience to the many officers attached to to the fleet in harbour, and to the residents who have been admitted to membership. New and more commodious premises than those previously occupied are found to be required, and have been secured.

The withdrawal by the Government of the restrictions on the trade of the native merchants has produced the good effects that were expected from it. "From the 1st to the 17th Nov (reports the *Commercial News*) 1,430 bales of silk had been brought into Yokohama for sale; and at the rate of supply during the last few days, we anticipate that our returns for the remainder of this month will show a very decided improvement. The improvement in the supply has yet had no effect in moderating the late high quotations, which, however, may be said to be in the buyers' favour. The supply of tea also has been large during the week, and some really *fine* tea—a thing extremely rare in this market for a considerable time past—has been offering, but at rates far too high to induce much business. Prices have ranged as high as $32 a picul. Our anticipations in raw cotton have been realised; the high prices have induced large supplies, and a considerable business has been done in this article. The high prices obtained here lately for raw cotton have, doubtless, contributed in some degree to bring about the advance in the prices of piece goods, in which —especially in cotton and woollen imports—a fair average business has been done. We are surprised to find metals still so neglected as they are."

EXPORTS.

Per *Dolphin*, for London, despatched by Aspinall, Corns, and Co.—368 bales silk, 6,103 packages tea, 215 bales cotton, 52 bales flax, 186 boxes wax, and 26 packages sundries.

Per *Scawfell*, for London, despatched by S. J. Gower.—181 bales silk, 112 bales flax, 1,312 chests and 677 half-chests tea, 751 bales cotton, 232 bales tobacco, 568 slabs tin, and 15 cases sundries.

NAGASAKI.

The circular of Messrs. W. J. Alt and Co., of the 1st of December, furnishes still further corroboration of the justness of the views we have expressed in reference to the character and tendencies of Satsuma. It states:—

"Our last report was dated the 1st of November, since then no political change has occurred; the greatest tranquillity prevails in the neighbourhood, and business is again reviving. It is rumoured among the native circles that the Prince of Satsuma is ready and willing to pay the original money indemnity demanded of him, being anxious to cultivate friendly relations with foreigners, and extend his trade with the open ports. These reports are to some extent confirmed by the fact of his agents having been both buying and selling to a considerable amount of late, and it therefore depends on what measure our own Government may direct whether the present improvement will be permanent or not."

CHINA.

PEKING.

DISMISSAL OF MR. LAY.

Despatch from the Foreign Board to the Ministers of England, Russia, and United States.

The Prince of Kung has to inform the foreign Ministers that Mr. Lay, the Inspector-General of Customs, having been commanded to conduct the purchase of steam vessels, has failed to act in conformity with his instructions, and has thus entailed the waste of the pecuniary resources of the Chinese Government. He has further to remark, that any person whom the Chinese Government may employ must be capable of so conducting business on behalf of this Government as to ensure its advantage in every way, if he is to be invested with authority for the administration of affairs. Now in the case of Mr. Lay, he has been in the receipt of a salary from the Chinese Government to the amount of upwards of 10,000 taels per annum,

Digitized by Google

nd has been treated with constant liberality. Yet having been ommanded to arrange the affair of the steamers, he has failed to do so properly and satisfactorily, and he has uselessly wasted the revenues of the State.

Were he a Chinese subject he would undoubtedly be amenable to punishment; but inasmuch as he is a subject of your honourable nation * Great Britain * what is right is that he should be directed

to return to {your honourable * / his own *}

country, and as regards the Chinese Government, it is inexpedient that they should longer employ him. With respect to pending matters of business in which Mr. Lay is concerned, together with all monies and accounts, he has been called upon to send up everything within a period of four months and to hand over charge to his successor. During this period of four months the Chinese Government, in manifestation of their benevolent intentions, will still continue his salary at its former state. The Prince has further to add that he has appointed Mr. Hart to the post of Inspector-General of Customs; and he communicates herewith a copy of the despatches addressed to Mr. Lay and to Mr. Hart conveying his appointment.

In addition thereto the Prince has further to communicate with your Excellency, and to request that instructions to this effect may further be despatched to the consuls of all the ports. A necessary despatch.

N.B.—In the despatch to the English Minister, the following is added after the words "former rate:"—

"If Mr. Lay fails to hand over all matters of business, monies, and accounts within the period of four months assigned to him for this purpose, the Prince will further communicate and request your Excellency to take the necessary steps to enforce this settlement."

Our advices from Peking reach to the 23rd November. The weather was intensely cold, and game very plentiful. It is expected that the tomb ordered by the present Emperor, to be erected to the memory of Hsien-fêng, will be completed early next year, at the estimated cost of four million taels.

SHANGHAI.

THE TAKING OF SOO-CHOW.

The *Shanghai Recorder* gives the following account:—This city has at last fallen into Gordon's hands. The course of events which led to the fall of the city may be thus briefly related:—

Under date of 22nd November, we learned that Macartney had had a very narrow escape from being captured by the rebels. He started from Pa-ta-chiao, on a reconnoitring expedition in the country between Wu-lung-chiao and the Shimen. His boat was seen from a rebel camp, and a body of horsemen immediately started in pursuit. The boatmen, of course, instantly gave in, and nothing remained but to try a race on dry land. After a hard run of about two miles, Macartney with his orderly, who alone accompanied him, reached Wu-lung-chiao, but the rebels had become too much excited to pull up, and seemed surprised when the tables were turned upon them, and they were forced to become fugitives. Another race now commenced. The rebels got back safely to the spot at which Macartney's boat had been left, but while endeavouring to take it away, some few of them were killed. The affair, such as it was, counted for little on either side. If, however, any advantage was gained, it was on the part of the Imperialists.

Meanwhile Major Gordon had left his position at Wanti, with a large force of Infantry and Artillery and the *Tsatlee* steamer (commanded by Captain Jones), and had advanced towards the south-west for a distance of six or seven miles. He sighted the grand canal at a place called Fu-tzu-kuan, distant six miles from the west gate of the city. The rebels had thrown two dams across the creek so as to prevent entrance into the canal, but these were easily removed. They had recently entrenched themselves in a series of eleven or twelve stockades extending in a line a little way out from the bank of the canal, on the west side. The field trains, one 32-pounder one-eight inch, the steamer's gun, and the gun-boats, opened fire on two of the stockades—while the infantry, drawn up on the east bank of the canal, were being passed over in boats. The rebels after a few rounds gave way in two of the stockades, which were at once entered by a few men of the 4th Regiment and the French corps. The rebels still occupied the stockades up the creek towards Wowsi, and down towards Soochow, but a move of the troops in those directions soon dispersed them, while the *Tsatlee* pursued them towards the city. They evacuated position after position, until the steamer reached the suburbs outside the west gate. The Imperialist casualties were two wounded, and the rebel loss was likewise very trifling. This victory completed the line round Soochow in the occupation of the Imperialists. The positions held were as follows. On the south-west, Wulung-chaio; on the south-east, Ta-ta-chiao; on the north, Lu-kow and Wanti; on the north-west, Fu-tzu-kuan. There still remained a small creek leading into the Taiko, but this was threatened by Imperial gun-boats, to be assisted by steamers if necessary.

To follow up this victory, a force, consisting of the 3rd and 4th regiments, under the command of Major Kirkham, advanced on the evening of the 27th ult. to take four stockades and a breastwork in front of Ching's position, and close to the north-east gate of the city. The rebels had been in the habit of leaving these stockades at night, trusting to their position under the guns on the walls. On this occasion, however, the stockades, instead of being deserted, had been strengthened by a large reinforcement of men from the city. When, therefore, the disciplined troops advanced, expecting to have merely to march into and occupy the position, the enemy opened a most destructive fire and drove back the assailants, killing and wounding a large number. We regret to have to announce that Major Kirkham lies dangerously wounded, having been struck in the head by a bullet. Major Brook has taken his place temporarily. The casualties on the Imperial side were as follow:—Killed: Captains Wylie, Christie, and Hodson, Lieutenant King. Private Upshot of the bodyguard, and forty Chinese. Wounded: Four officers and sixty men.

This reverse was however retrieved on the following day by Major Gordon in person. That officer renewed the attack with his whole disposable force, excepting the 1st Regiment. On this occasion almost the whole of the artillery was brought to bear on the stockade immediately commanding the breastwork, before the attack was made, and the defences reduced to ruins. About 1,800 men were then thrown across an intervening creek, and after a sharp struggle, the breastwork was carried; the rebels retiring as before into their stockades. From these they kept up a heavy fire. They were quickly followed by the whole attacking force, and driven out of the first and second stockades, though not till they had offered a gallant resistance. The remaining two stockades were evacuated by them, and the whole open country in front of the east gate was thus cleared. Thirteen officers were wounded in the latter affair,—five amongst them dangerously—and 130 Chinese killed or wounded. Two twenty-four pounders and a number of smaller guns were captured from the rebels, who had evidently devoted all their energies to the defence of the position, which was within about 1,200 yards of the walls. Among the wounded were Col. Brennan and Major Tapp, both slightly.

The Chinese Mandarin steamer *Illawarra*, F. Torckler, master, which arrived at Chinhai on the evening of the 21st Nov., reports, that on the 20th, when off the Seshan Group, fell in with a large piratical junk, with about twenty Canton and fifteen Ningpo men on board. Went alongside for boarding, when from thirty to forty stink pots were thrown on board the steamer, which, as is generally the case, paralysed the Chinese portion of the steamer's crew. Steamer on this went full speed ahead. The pirates, who were close to an island, managed to get on shore. On this the steamer anchored, and lowered boats, intending to land, and attack them on the island. Captain Torckler and Sankee, one of the owners in command of the boats, seeing the junk with the Ningpo men still on board (who turned out to be prisoners) pull up sails and steer for the boats, waited and took her alongside steamer; having so done again prepared to land. The Seshan's are very steep with no good place for landing; steep rocks line the shore; on the heights above, fortifications are erected for the use of pirates in such an emergency as this. From these places muskets were directed on the *Illawarra's* crew, as they approached the shore, and when within five yards of the landing place, Sankee, who was sitting next to the captain, in the stern of the boat, received his death wound. Captain Torckler on this decided to return and get the steamer again under weigh (having only succeeded in killing two of the Cantonese). As the only plan by which they could have succeeded was to attack in the front and rear at the same time, and not having sufficient force so to do, proceeded to Chinhai for reinforce-

* According as the despatch is addressed to Sir R. Alcock or the other Ministers.

Digitized by Google

ments, which being taken in, started again for the island on which they had left the pirates. On landing there they found only two dead bodies, with no clue as to what had become of the other pirates. The supposition is that finding they were alone, without food, or any means of obtaining it, they drowned themselves. Finding it useless to stay there any longer, got under weigh, proceeded to Chapoo, and anchored 1,000 yards from the shore, it being then low water. Commenced firing on the piratical junks anchored under the forts (about eight in number). The pirates there use their guns well, and must have had long 18 and 24-pounders, as nearly all the shots fell over or within a few yards of the steamer. After doing all the damage possible, weighed anchor, and returned to Chinhai.

Another *crim. con.* case came before the Court. The facts, as elicited on the trial, are briefly these :—A Mrs. Cheshire, who has been living for some time in Shanghai, accused Mr. Campbell, one of the Custom House assistants, of having inveigled her up to his bedroom, and having there made an indecent assault upon her. It appears by her statement, that on the evening of November 9th, Campbell called for her by appointment at a quarter past seven, and, at half past, went out with her for a walk. On the other hand, Campbell endeavoured to prove that at half past seven that evening he was in the Custom House mess-room, and that it was not until after that time he started for Mrs. Cheshire's lodgings. These statements he established by the testimony of two other Custom House assistants, who on that night dined at the mess. Mrs. Cheshire further asserted that the walk proposed by Campbell took them in the direction of the Custom House quarters, and that when they arrived there, he asked her in, and having taken her up to his bedroom, committed the offence with which he was charged. Campbell acknowledged having conducted her to the door of the house, but made no statement whatever as to whether he took her upstairs. He rested his case on the fact that during the time at which Mrs. Cheshire asserted the offence was committed, he could not have been within the walls of the Custom House quarters. Some ew things conspired to throw discredit on Mrs. Cheshire's tale—such as the fact that, although the assault was said to have been committed on a Monday evening, she did not mention it to her husband until the following Saturday. The reason she gave for so extraordinary a course of conduct is frivolous enough to create a smile :—"I allowed five days to elapse before I to d my husband, because I wished him to enjoy himself at the races. There was some little race to take place on Saturday, but h did not go, and I told him on that day."

However the sympathies of the settlement went, and however universally it was acknowedged that the crime of which Campbell stood charged should be carefully guarded against, there was absolutely nothing in the evidence to convict him. The court therefore took the foreign residents by surprise by bringing Campbell in guilty, and sentencing him to a fine of $1,000, or three months' imprisonment. This sentence was referred to Mr. Markham, H.B.M.'s Consul, for revision, and has been reversed by him. The feeling of the large majority of foreigners in Shanghai was that Campbell had been hardly dealt with, but the swearing on both sides was so positive that a decision in favour of either wats necessarily tantamount to a charge of perjury against the witnesses on the other.

Mr. Cheshire then addressed a letter to the papers, which we append with the remarks of the *Friend of China* :—

(To the Editor of the *Friend of China.*)

SIR,—May I request that you will insert the following copy of a letter which I have felt bound, in justice to myself, to send to the Editor of the *Daily Shipping and Commercial News*, as, after the very unfair treatment I have received in their columns, I have asked the same favor of the Editor of the *Recorder*, and trust you will both kindly do me justice :—

(To the Editor of the *Daily Shipping and Commercial News.*)

CHESHIRE *v.* CAMPBELL.

SIR,—After your very unfair and partial report in this case (all the evidence that told with the Vice Consul and Assessors having been as much as possible suppressed, and your leader in the *North China Herald* prejudging the case), an action to which the editor of the most common-place journals in England would not condescend, after seeing your reporter "hail fellow well met" with Mr. Campbell's and his honourable witness, I was fully prepared for your comments "on Mr. Markham's reversal (so called) of the verdict." I hope, for Mr. Campbell's sake, that every one in Shanghai will accept the verdict of "not proven" as equivalent to "not guilty," regardless of the opinion of Mr. Lay and the three impartial gentlemen who listened to the case throughout with the greatest possible attention, and therefore must be the best judges.

When, however, I see public opinion so perverts public inquiry as to admit a man's innocence, and, of course, his re-admission into ladies' society in consequence of a verdict of "Not Proven" ina case, stated by Mr. Lawrence (Mr. Campbell's own counsel), to be "the most difficult to prove," I shall, indeed, believe it true, what I have often heard since I have been here, that morality is not at a very high standard in this country. It is well known that in Scotland such a verdict is only one degree removed from "Guilty," and is about equivalent to the Irish one of "Not Guilty," only don't do it again. I have not the least hesitation in saying that had Mr. Markham *seen* and *heard* the witnesses in the witness-box, he would have approved of the verdict given by Mr. Lay and the three assessors.

I trust that in justice to myself, you will insert this letter in your journal of to-morrow.—I am, sir, your obedient servant,

WILLIAM CHESHIRE.

We should have waited to see if the *Shipping News* did contain the above letter, before publishing it for Mr. Cheshire in our columns, but that the closing of the mail to-night makes it necessary for an exhibition of the strictest impartiality in the press in this quarter.

Hitherto, we have abstained from any remarks on the matter; —and what we have to say now is embraced in a few words :—

1st.—In a case involving a thousand dollar fine it was presumptuous, and in contempt of the law, for a Vice Consul to adjudicate.

2nd.—The Consul's reversal of his sub-ordinate's judgment is as improper as the decree annulled ; for we agree so with Mr. Cheshire, that, unless a judge sees the style of deponing in such a case, he is hardly able to decide rightly.

3rd.—This is the first appearance of Mister Cheshire in the matter, and we take the opportunity of his addressing us to say, that, in allowing his wife to take such a case into Court, he has proved himself—in crudest Anglo-Saxon—

AN UNMITIGATED ——— !

At last the man who has kept North China, from January to December (both months inclusive), in a state of ferment and anxiety—we mean General Burgevine—has gone from our gaze. He left for Yokohama, in the P. & O. S. N. Co.'s steamship *Aden*, accompanied by his faithful henchman William, and Mr. Benson—ex-Quarter Master General of his old Imperial levies.

The *North China Herald*, of the 28th of November, says : —"It is stated that the rebels have succeeded in obtaining another man-of-war steamer, and that they have likewise captured two silk boats. The latter, along with the *Firefly*, are in the neighbourhood of Sauzali. The *Feilloony* left this river for Pa-ta-chiao on the 19th, with a quantity of ammunition, and about fifteen hundred dollars for the payment of Macartney's troops.

We are very glad to see the following letter from Mr. Webb, chairman of the Chamber of Commerce. It is too often the case in China that addresses are presented to persons who have by no means been agreeable to the interests of merchants :—

(To the Editor of the *Daily Shipping and Commercial News.*)

SIR,—In noticing the fact of Mr. Lay, Inspector General of Foreign Customs in China, being about to leave that post, you say that "you believe that his resignation will be regreted by the great body of mercantile men in China."

As a merchant myself, and knowing pretty well the opinion of my fellow-merchants, I venture to dissent from that opinion, and to say that Mr. Lay's *dismissal*, and the appointment of Mr. Hart in his place, will give great and universal satisfaction. The merchants in China are well pleased to see the duties well and even sternly collected, and not only do not object to, but approve of, foreigners being employed in such collection; but they have always protested, and with reason, against the arbitrary and uncontrolled actions of Customs officials, whether foreign or Chinese, and the unnecessary difficulties thrown in the way of business. Mr. Lay is thought to be (whether justly or not I do not wish to argue) utterly regardless of the interests and convenience of merchants, whereas Mr. Hart has won golden opinions, by giving every facility to trade consistent with a due regard to the Chinese revenue.

Now that Mr. Lay's connection with the customs is at an end, it is not worth while to enter into any other differences which exist between him and the foreign communities at the various open ports in China, for they are already too notorious; but I really cannot see why pœans should be sung in honour of one who, in various capacities, has done more harm to foreign interests in China than the lapse of many years will repair ; nor do I think that "the great body of mercantile men" will be content to be represented as sitting in sackcloth and ashes, and mourning his untimely departure. I am, sir, yours, EDWARD WEBB.

The English garrison has received a reinforcement of 150 men, volunteers from the 1st Belooch Regiment.

The American Government have appointed Mr. Seward, who has hitherto held the post of Consul at Shanghai, Consul-General for China. For the future, therefore, all communications with the minister will be addressed through the Shanghai Consulate.

On the 20th November, one of the largest meetings of Land Renters which has ever assembled in Shanghai, met at the

Digitized by Google

British Consulate to consider several important propositions made by two of the principal Renters—Messrs. Smith and Hanbury. The annexation of Hong-ku to the English Settlement was determined upon. The resolution as passed was as follows: That whereas the Hong-ku district having been formally incorporated with the so-called English concession by the resolutions at the public meeting of 31st March, 1862, and 4th April, 1863, the Municipal Council be desired actively to proceed with the laying out of lines of road and other elementary improvements on that side, but that the expenses to be so incurred shall be regulated by the estimated income to be derived from that quarter.

"This meeting is furthermore of opinion that the large police force maintained there is necessitated by the presence of great numbers of that foreign seafaring class who cannot fairly be regarded as Hong-ku residents, but as generally appertaining to the port. Therefore the land renters on that side should not bear more than half of the heavy expense for police thus incurred."

On a question to that effect being asked by the chairman of the English Council, Mr. Seward announced that the land regulations hitherto in force in the English Settlement had been adopted by the Hong-ku Renters. The old question as to the right of the Chinese Government to tax their own subjects in those portions of their own territory known as Foreign settlements, was again brought up. The following resolution was proposed and seconded:—

"That whereas it is reported that the French Municipal Council deny the right of his Excellency the Taoutai to levy any taxes, dues, impositions, or squeezes in that portion of the settlement under their jurisdiction, and have refused to allow a certain tax of eight per cent. on rentals to be collected for the Chinese Government.

"This meeting is of opinion that the interests of landholders in other parts of the settlement will be seriously prejudiced by the adoption of a different line of policy; and whereas the said landholders have never yet consented to the levying of any such taxes, dues, impositions or squeezes on the part of the Chinese authorities as are now proposed, this meeting desires the Municipal Council to resist the collection of the same, until such time as one uniform system is agreed on for the whole European settlement, which system shall receive the approval of a future meeting before being acted on.

After a short discussion, however, the following amendment was carried:—

"It is inexpedient to raise a question as regards the past, but in respect to the future levy of the Chinese tax, the Council is requested to arrange that the collection of the tax shall be continued so long as present circumstances exist."

The Imperialists have lost another steamer, and forty men, though this time not by the accident of war, nor by treachery. The vessel so lost is the *Antelope*, formerly the property of Mr. Fernandes, of Macao. The following is the report brought to Shanghai by the *Szechuen*:—Nov. 30. The steamer *Shon-se* arrived at Kiukiang, having on board the body of chief engineer Groves, of Chinese steamer *Antelope*, who died at 10.30 P.M. the night previous. Also first assistant engineer Boyce, and two Chinese servants badly injured. They were taken on board the steemer *Sze-chuen*, and brought to Shanghai. Dec. 1st.—Left Kiukiang at 5 A.M., anchored in a fog, at 7 A.M. underweigh again. Met steamer *Fire Cracker* up at Little Orphan. At 9.40 A.M. stopped at Ngan-kin and Lai-toong, and at 7 P.M. anchored near the wreck of steamer *Antelope*, in Osborne Reach, above the crossing from two fathom channel. Took on board the wounded Chinese, and obtained the following particulars:—The *Antelope* got on shore about 9 A.M. of the 28th inst. On the 29th the vessel was nearly afloat, the heavy cargo having been discharged, and commenced to get steam on about 1 P.M. of same day to back off, after making a turn with the engine the port boiler blew up, tearing up the deck and carrying out the whole port side. There were on board at the time about 50 Chinese passengers and soldiers, 40 of whom are missing and killed. The two engineers were the only Europeans killed. The steamer is a complete wreck.

On the dismissal of Mr. Lay, &c., the *Friend of China* has the following:—We remember that in 1842, for instance, the year of the *Friend of China's* establishment in Hong Kong, we vaticinated anent the [illegible] of its birth, which James White, the then Editor "didn't"—as Punch has it—"seem to see," and with his pen—smiled! But time has shown that we were right, and that the now Member of Parliament was a little wrong. Occasionally, an editor talks to friends who call on him; and there are those in Shanghai who will not have forgotten our speaking thus:—"There is something suspicious "about that dismissal of Custom House Subs. Lay wants "to make it appear that even he himself is liable to instant "dismissal. The suspicious part of the business is this. Lay "has been accused of having said that the Chinese Government "gave him certain powers; when, in fact, he is *not* invested "with such powers. It's a bold game. If he wins the point, "we shall hear naught of the duplicity. If he loses—he'll be "kicked out ignominiously, and our Government dare not "defend him." Now to our story. By the *Gerard*, just in from Tientsin, we learn that the French, English and American Ministers were formally notified, a short time ago, that Mr. Lay had misunderstood both his position and his powers;—in a word—ignorantly, or with dishonest intentions—he had presumed to do what he ought not to have done. For these offences, punishable by Chinese law with the secret girdle—(*i. e.* coerced suicide,)—he was punished by dismissal, four months being allowed him to make up his accounts! The *Gerard* also brings advice of a letter having been written to Mr. Commissioner Hart, offering him the post from which Mr. Lay is thus contemptuously ejected;—with this condition, however, that he shall not make a call at Pekin until his presence is solicited. All glory to you, Prince Kung,—there's a kick in the old horse yet!

HANKOW.

A correspondent's letter from this place of 28th November, says:—"The *Fusi Yami* brought us the papers containing the 'Marquis of Argyle' business; and, singularly, we have something of the kind up here. A wretch, in the shape of a man, took advantage of his admission to a respectable house here in Hankow, to say what he ought not to say to the lady at the head of it; actually, one night, when he thought the husband was out, sneaking into the private apartments shoeless. But he reckoned in error. The husband was in another room, and hearing a noise of footsteps, dashed out, lamp in hand, and threw it at the fellow, giving him oil for dirty intentions. Desirous of keeping his wife's name from the public tongue—(I will not mention names, although, as it is to be a Consular business, it is but a question of time, and little odds) he was willing to remain silent; but the wretch I speak of, himself talked, and the consequence was that —— went and punched his head with a pistol, in the presence of two witnesses, who had then to perform the unpleasant task of separating the combatants."

At Hankow, the native authorities are talking about digging a defence creek at an expense of a quarter million of taels. It is proposed to dig it for a distance of six or seven miles, from a spot about a thousand yards below the British settlement, to the Han river. This would run behind the settlement and the Chinese city of Hankow. Hanyang would, however, be totally unprotected. The foreigners in Hankow put no faith in the proposal.

HONG KONG.

The Hong Kong papers are this mail (as of late) chiefly filled with extracts and comments on affairs in Japan and the north of China—the south, which they are supposed to represent, being next to nothing.

On the capture of Soochow, &c., the *China Mail* says:—

"Hang-Chow will, no doubt, soon fall, and, failing other means, the Imperialists will be able to starve the rebels out of Nanking. Between surrender and death, the Soochow army will, no doubt, cease to exist.

"Hang-Chow and Nanking cannot keep up communication; and, as the rebels have not now (as they had in 1860, when they burst through the besiegers of Nanking) any large army to help them from Kiangsee or anywhere else, they will soon be in a bad way. Full information has not yet reached us. At the date of our last advices Captain Murray and Mr. Mayers of the Consulate, who had both gone to the front, had not returned with detailed intelligence."

The *Iron Prince* steamer which reached here on the 8th instant, from the west coast, brought, as passengers, about 600 adult Chinese, and 200 children from Thaifu, a Hakka country 90 miles to the west of Macao. She reports the schooners *Beaver* and *Tientsin*, also the lorcha *Centaur*, as following her similarly laden. The occasion of this exodus was the termination of a contest which has been going on in that part of the province for many years, the combatants being Poontees on the one side, and Hakkas on the other. During the last twelve months the Hakka tribes have been the losing party, and being cut off from communication with their allies in Quangsi, the Poontees had no great difficulty in driving them from place to

Digitized by Google

place, until, arrived at their *Ultime Thule*, the miserable remnant was "driven into the sea."

We gave in our last the estimate of cotton exported from China to 24th November. By the present mail we have to add the following vessels :—

			Piculs.
Istamboul ...	from Hong Kong	... ...	6,000.
Glen Huntly...	„ Shanghai...	... ...	4,000.
Light of the Age	„ Hong Kong	... ...	4,500.
Falcon	„ „	... ...	3,400.

The report on the price of this staple will be found under China exports.

The following items are from the *China Mail* :—

A meeting was held this day (Dec. 15) in the Club Chambers regarding the supply of ice—Mr. W. Ormiston (Chartered Mercantile Bank) in the chair—when a resolution was carried unanimously—"That the members of the present committee be requested to form a fresh association on the same footing as the former, give the supply of their cargoes of ice to succeed that expected in April, and that the list be sent round for subscribers' names."

At the west corner of the cricket-ground, on a spot where two roads diverge, preparations are in progress for the erection of a public drinking fountain where the meanest passer-by can stop, and help himself to a tinful of "sovoy." The fountain, in addition to being useful, is likely to be highly ornamental, and the site is most happily chosen. The structure will be the gift of Mr. John Dent.

The Theatre is doing good business. Mr. Faylor, an American, who plays the heroes, is spoken of as wanting genius and education, while Mrs. Faylor is commended as an actress of very great finish. Miss Lizzie Gordon, too, is mentioned as a lady who vividly recals the performances of the late Madame Vestris.

On the dismissal of Lay and the Osborn fleet the *Daily Press* writes :—

"There does not appear to have been any pecuniary demand made by the Prince Kung, either on the British Minister, on Captain Osborn, or on Mr. Lay. The Chinese Government appear to have been content to lose the money they had remitted, seeking only to be excused from being saddled with a fleet, the expenses whereof were quite beyond their means to liquidate. Captain Osborn consequently returned to Shanghai, registered the vessels as British at the consulate, dispatched them—part for England, and part for Bombay. They have all left ere this—and thus ends this singular act of officious, unacceptable, high-reaching interference."

"It should not be omitted to be stated that the substitution of Mr. Hart for Mr. Lay, as the Inspector-General of Customs, is a subject of sincere congratulation to the foreign community. Mr. Hart has ever exhibited a disposition to facilitate business, and to remove unnecessary annoyances and obstructions. He is, moreover, very popular with the Chinese officials. It will now be seen that the opposition of the merchants to the strict enforcement of the payment of duties was a pure fallacy—unnecessary obstructiveness, and arbitrary confiscations for palpable errors, were all they ever objected to:

"It should be further added, that during this juncture, when nothing but the clemency of Prince Kung affords Mr. Lay an immunity from being prosecuted criminally—and whilst his position with the Chinese Government is most unseemly—yet still he is acting (if all reports be true) in Mr. Wade's absence as Chinese Secretary to the British Legation—in other words, is the medium of communication between the British and Chinese Governments. It is not that other interpreters cannot be procured, but that there are subject matters on the *tapis* which it might be dangerous for those not implicated in the crooked line of policy lately pursued by the British Legation at Pekin to be acquainted with."

The *Chinese Commercial Guide* has not yet reached us from the author, Dr. S. Wells Williams; or the publishers, Messrs. Shortrede & Co., Hong Kong.

The following mercantile notices have appeared :—

The interest and responsibility in our firm of the late Mr. Andrew Brand ceased on the 31st of December, 1862. The partners now are Robert Smith, Thomas David Neave, Robert Richard Westall, Robert Brand, and R. Humpston Chambers, Smith, Kennedy, and Co.—China, November 21, 1863.

On and after this date William W. Robinet is no longer authorised to sign for our firm. Thomas Hunt and Co. —Shanghai, November 30, 1863.

We have this day business as merchants and general agents under the style of D. Nowrojee and Co.—Hong Kong, December 12, 1863.

North China Insurance Company.—The undersigned having been appointed agents in Ningpo for the above company, are now prepared to accept risks and to grant policies on the usual terms.—Davidson and Co., Agents. Ningpo, 1st Dec., 1863.

The undersigned beg to intimate that they have been appointed Agents to the Swiss Lloyds, Transport Insurance Society of Wintertheer.—William Pustau and Co. Hong Kong, 1st Dec., 1863.

The business hitherto conducted under the style of De Coningh Carst and Lels, will in future, from and after the 1st December, be carried on by the undersigned under the firm of Carst Lels and Co. P. Carst, junr., Mark Lels, H. Bruijn, G. F. Plate.—Yokohama, 28th Nov., 1863.

Mr. Clement Lucas is authorised to sign our firm in China.—Blain, Tate, and Co. Shanghai, 2nd Dec., 1863.

We have this day established ourselves at this port, as General Merchants and Commission Agents.—Theric and Co. Shanghai, 7th Nov., 1863.

Mr. Jamieson Elles has retired from the firm of Elles and Co., Amoy.

During the absence of Mr. J. W. Broadbent, Mr. Herbert Cope is authorised to sign our firm per procuration.—George Barnet and Co. Yokohama, 1st Nov. 1863.

CANTON.

The *Daily Press* says :—

Houqua died a few days ago at Canton, at the age of fifty-four. His son, who is about twenty-eight years old, succeeds to the estates; but as the young man does not possess much aptitude for business, his uncle, a brother of the deceased, and the seventh son of the first Houqua, is entrusted with the management of affairs.

The deceased was a most upright and liberal man in his dealings with others. He appears to have avoided the character of shrewdness and overreaching, for which his father was so well known. His gifts for charitable purposes were on an extensive scale.

STRAITS OF MALACCA.

SINGAPORE.

Deficiency of the principal exports continues. Business must be limited until the beginning of the year, when the new crop of pepper will be offered. A few Bugis boats have arrived with Archipelago products, but there is still a great scarcity of the usual imports by these craft.

The Confederate steamer *Alabama* anchored in the Roads on the 21st December. The *Contest*, already reported, was the last prize destroyed by the *Alabama*.

The last news from Sarawak, brought by the steamer *Rainbow* on the 12th December, is of a very satisfactory character, owing to a large tribe of Kayans having made peace with the Dyaks of the Rejang. It will be seen in another column that a Consul has been appointed to Sarawak by our Foreign Office.

No fewer than seventeen merchantmen are at present in our harbour. Their gross tonnage may be roughly set down at 12,000 tons. Some of these have been lying here now for upwards of three months, and most of them for at least half that period, and so long as the *Alabama* is in the vicinity they might as well be abandoned.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ARNOULD—On the 21st Jan., at the residence of her father, Shirley, near Southampton, the wife of Henry Arnould, Esq., of Hong Kong, of a son.

HARDING—On the 8th Dec., at Singapore, the wife of Capt. Harding, of a daughter.

JONES—On the 21st Jan., at Derry Ormond, Cardiganshire, the Lady Elizabeth Inglis Jones, of a son.

KUSTERMANN—On the 12th Dec., at Singapore, Mrs. F. Kustermann, of a son.

LITTLE—On the 17th Jan., at Vanbrugh-fields, Blackheath, the wife of J. M. Little, Esq., of a daughter.

LARKEN—On the 7th Dec., at Foo-chow, the wife of Thomas Lancaster Larken, of a daughter.

WATSON—On the 11th Dec., at Singapore, the wife of N. B. Watson, Esq., of a son.

MARRIAGES.

ANGIER—FOURNIER.—On the 19th Jan., at Dusseldorf Reformed Church, by the Rev. E. Roffhack, Samuel Haynes Angier, to Augusta Fournier (d'Albe), daughter of the late Lieutenant C. F. A. Fournier, of the Prussian Cavalry.

ROBERTSON—CARRUTHERS.—On the 26th ult., at St. Peter's, Eaton-square, Russel Robertson, Esq., Consular Service, Japan, to Annie, youngest daughter of the late Jacob Carruthers, of Glasgow.

MCBARNET—DE FONBLANQUE.—On the 14th Jan., at Corfu, Captain D. H. McBarnet, H.M.'s 9th Regt. of Foot, to Constance Barrington, eldest daughter of Edward Barrington De Fonblanque, Esq., Assistant-Commissary-General.

MAR—GOUSLACK.—On the 23rd Nov., at Swatow, China, John Mar, pilot, to — Gouslack, widow of the late pilot Gouslack.

POWNALL—SWAYNE.—On the 9th Jan., at St. John's, Hackney, by the Rev. W. A. Cornwall, M.A., the Rev. W. H. Pownall, late of Shanghai, to Sarah Sophia, daughter of the late Robert Swayne, Esq., of Liverpool.

POWER—SCOTT.—On the 5th Dec., at Hong Kong, at St. John's Cathedral, by the Rev. J. J. Irwin, Colonial Chaplain, Alexander Bath Le Poer Power, eldest son of the Rev. A. B. Power, M.A., Blackheath, Kent, to Maria Scott, eldest daughter of the late Joseph Scott, of this colony.

DEATHS.

CUMMINS—On the 24th Nov., at Ningpo, Captain Cummins, of the British barque Henrietta.

EVES—On the 2nd Dec., at Shanghai, Captain Eves, of the ship Star Queen.

CHRISTIE, &c.—On the 27th Nov., near Soochow, the following officers of the Quinsan Force:—Capt. Henry Christie, 4th Regt.; Capt. Upshot, Bodyguard; Capt. Wylie and Capt. Knight, killed together with sixty Chinese soldiers, in action with the Taiping rebels on a stockade.

DUNN—On the 5th Dec., at Shanghai, Sarah Neufield, the beloved wife of John George Dunn, of Shanghai, and the daughter of the Rev. Charles Cookson, vicar of Maxey, Northamptonshire.

SMALES—On the 3rd Dec., at Malacca, J. T. Smales, Esq., M.D., of the Madras Medical Service.

GROVES—On the 29th Nov., on board the steamer Shanse, on the Yangtse Kiang, from the effects of a boiler explosion, Mr. C. W. Groves, an Englishman, for several years chief engineer of the Chinese steam transport Antelope.

HALL—On board the Chinese transport steamer Williamette, aged 32, at Woosung, by the accidental discharge of a fowling-piece, Mr. Richard M. Hall, native of Kingston, Long Island, U.S., formerly chief engineer of the Williamette.

HUTH—On the 15th Jan., at 33, Upper Harley-street, Frederick Huth, Esq., in the 87th year of his age.

JONES—On the 24th Nov., at the American Protestant Episcopal Mission House, Hongkong, of small-pox, Miss Catherine E. Jones, Superintendent of the Mission's Native Girls' School, and daughter of General Walter Jones, late of Washington City, U.S.A.

JENKINS—At Bangkok, Chief Engineer James L. Jenkins, of Newark, N.J., United States of America, aged 48 years.

LEMPRIERE—On the 16th Jan., at Pelham, Hampshire, Admiral George Ourry Lempriere, in the 77th year of his age.

MALTBY—On the 19th Jan., at his father's residence, Hanwell, Middlesex, Charles Maltby, Esq., of Fenchurch-street, City, late of Shanghai, China, aged 40.

PEREIRA—On the 5th Dec., at Hong Kong, Joseph Pereira, Ships' Compradore.

PARTRIDGE—On the 12th Dec., at the Seamen's Hospital, Hong Kong, Wm. C. Partridge, late second officer S.S. Cosmopolite.

SWAN—On the 15th Jan., at Denmark-hill, Camberwell, Robert Dalgleish Swan, Esq., late of Ceylon, and formerly of the Indian Navy, aged 61.

COMMERCIAL REPORT.

CHINA IMPORTS.

COTTON YARN has again been almost entirely without inquiry, and the sales effected in this market during the fortnight amount only to 55 bales of sound, and 20 bales of damaged Yarn moved off at auction. Nothing doing in Canton.

GREY SHIRTINGS.—The value of these goods is now much higher than at the date of last report, but the transactions which are put at about 75,000 pieces have been almost entirely on foreign account. From Amoy, sales are reported of 1,200 pieces, and at Foochow some 2,000 pieces have changed hands.

WHITE SHIRTINGS have met with good inquiry at the hands of the dealers in this colony, and sales of 16,050 pieces are reported, while in Canton 3,000 pieces have changed hands, in both instances at a material advance in price.

T-CLOTHS.—The sales of these fabrics in Hong Kong are estimated at 2,500 pieces purchased by the Chinese dealers, and about 11,000 pieces taken by foreigners.

AMERICAN DRILLS.—The market is quite bare of stocks, and there are not any transactions to notice.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The value of White Spotted Shirtings and Brocades is now about 60 cents higher than at the date of last report, while assorted colours remain without change to notice. The sales in Hong Kong are put at 1,000 pieces of the former, taken by a foreign purchaser, and 400 pieces of Dyed Spotted Shirtings sold to a Chinese buyer. In Canton 1,000 pieces Coloured Brocades have changed hands.

DAMASKS are without inquiry.

CHINTZES AND HANKERCHIEFS.—There have not been any sales of these goods reported during the last fortnight.

RAW COTTON.—The market for this staple has been in a very excited state during the fortnight, and the value of all kinds has advanced $5 to 7 per picul. The bulk of the purchases continues to be made upon foreign account for reshipment, and the transactions reported amount to 17,250 boles, of which some 1,400 (exclusive of 300 sold at auction) have been taken by the Chinese dealers. In Canton the sales of the fortnight are put at 600 bales.

WOOLLENS.—SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—The above goods have met with very limited inquiry during the fortnight, and the values of them remain unchanged—the sales reported in this market amount in all to only about 90 pieces. Neither does any demand exist for them in Canton.

LONG ELLS.—The prices of assorted colours of these goods show a marked improvement as compared with the rates current at the date of last report, but the transactions of the fortnight have been limited in this colony to 290 pieces. From Canton (where prices remain unchanged) sales of 1,000 pieces are reported.

CAMLETS.—The demand noticed as existing for these goods in last circular has not been maintained, and neither from this port nor from Canton are there any transactions in them to advise.

LASTINGS have not met with any inquiry either here or in Canton.

BLANKETS 400 pairs which have changed hands in this colony, constitute the sales of the past fortnight.

METALS.—Iron, Flat, &c., with the exception of Hoop and Wire, show some decline in price. The value of Iron shows no material change as compared with last advices, and the sales of the fortnight are put at 2,562 piculs of Nail Rod, 300 piculs of Square and Flat Bar, and 150 piculs of Wire. In Canton settlements of 3,200 piculs of Nail Rod, at an advance of 5 to 15 cents per picul, constitute the transactions reported.

LEAD.—There is not any change noticeable in the value of Lead either here or in Canton, and the sales of the past fortnight are put at 520 piculs, and 1,450 piculs for each port respectively.

TIN.—There are not any transactions to notice.

TIN PLATES have declined in value, to the extent of about 50 cents per box, without sales to report.

STEEL.—Nothing doing, either here or in Canton.

OPIUM.—HONG KONG.—The supplies of the fortnight have been per Bombay Castle, Nepaul, Imperatrice, Reiver, and Singapore; in all, 1,950 chests Patna, 1,100 ditto Benares, and 1,350 ditto Malwe. Prices:—Patna, $570; Malwa, $645; Turkey, $520.

CHINA EXPORTS.

TEA.—There is still a good supply of black teas at Canton. The supplies at Foochow are becoming slacker, but show no immediate symptoms of coming to an end. At Shanghai stocks are considerable. At Kewkiang the market for new greens, which will be short, is in full blast. At Hankow it is clear that the supplies are nearly exhausted. The export continues unprecedentedly large, and the firmness of the teamen is such as to cause prices to be maintained at a standard much beyond what the rates in the London market will justify. The advance in exchange may make shippers more cautious, and the coming China new year may cause the teamen to be more anxious to sell; but even so the export will amount to a figure which will place any hope of advance in England out of the question.

MACAO.—Tyshans, Congou prepared in Kysow fashion, sales 1,000 half-chests at 23.8 ts.; Souchong, 600 half-chests at 28 ts.; common Tyshans, sales 1,500 half-chests (mostly for India) at 14 to 16 ts.; stock of common leaf 300 piculs.

CANTON.—The teamen have remained as firm as last represented, and the consequence is that no business has been transacted during the fortnight in Congous, and very little in other descriptions. Three additional chops of country Congous and 1,000 half-chests of new Greens have arrived down, but the latter have not been placed upon the market as yet. About 1,000 half-chests Oolong have also come to hand. The settlements of the fortnight are as under:—Pouchongs: 2,000 half-chests (probably for India) at 22 to 23½ taels. Scented Caper: 3,000 boxes at 17½ to 18½ taels for fair, and 20 to 23 taels for medium to good. Scented Orange Pekoe: 4,500 boxes at 17 to 22 taels for common to fair, 24 to 26 taels for med. to good, and 28 to 33 taels for fine to finest. Canton Greens: 750 half-chests Young Hyson at 17 to 24 taels, and 600 chests Hyson for India at 17 to 23 taels. The stock on the market is thus stated:—Congous, 50 chops; Oolongs, 1,000 half-chests; Scented Caper, rather large; Scented Orange Pekoe, small; Country Greens, 1,000 half-chests.

AMOY.—During the early part of last month the market was very quiet, and the teamen continuing firm the business transacted was on a small scale. Latterly a demand for Oolongs for New York has sprung up, but still rates exhibit no material change. It is stated that there only remain 3,000 half-chests Oolong in the country, to complete the season's supply. Of Congous the full season's yield may be said to have come to hand. The settlements of the month are reported as follows:—Oolongs and Ankois, 5,000 half-chests of the former at $17 to 20 for inferior to common cargo, 21 to 22 for good common, and 23 to 24 for fair cargo—400 half-chests of the latter at 15¾ to 16½. In addition to which about 1,600 half-chests of last season's crop are reported as settled at 7½ to 8. Congous, 1,900 half-chests at 15 to 20—for good ordinary to but middling. Plain Orange Pekoes, 100 half-chests and 200 boxes at 13½ to 14. The remaining stock on the market is thus stated: Congou 1,400 half-chests. Oolong and Ankois 9,500 half-chests and 100 boxes. Plain Orange Pekoes 450 boxes.

FOOCHOW.—Exporters are unwilling buyers in the face of late advices from London, whilst the teamen, on the other hand, evince much firmness, on the pretext that the cost price in the country is so high as to exhibit a loss on current rates. Prices have not receded, as might have been expected; good common and flavory Congous are one tael lower, but the descriptions suitable for Australia and the United States have been maintained. The tone of the market generally is flat, and it appears to tend downwards; but a comparison of current rates with London quotations exhibits the fact that the standard of prices is still far too high. The settlements of the fortnight are as follows: Congous, 7,200 chests 9,700 half chests and 1,200 boxes at 6½ to 13 taels for ord. and broken leaf, 14 to 19 for good com. to flavory, and 18 to 24½ for Souchong kinds. Souchongs, 500 chests at 22 taels for com. Fowery Pekoe, 600 do. at 21 to to 24 taels for com. Oolong, 19,400 half chests at 13 to 21 taels for very com. to good cargo. The stock on the market is thus estimated: Congous, 69,200 chests (say 30,000 ord. 35,000 good com. to flavory and 4,200 good flavory to fine), Souchong 5,800 chests. Oolong 26,500 half chests, and Scented tea 10,000 boxes. The total supplies of Congous this season to date amount to 535,000 chests against 551,000 chest corresponding period of last season; the deficiency, however, being made up by the increased supply of Souchongs.

SHANGHAI.—Black: Since the date of the last report, the market has again been very dull, and only 9 chops are reported as settled. These were purchases made immediately after the departure of the last mail, and established a decline of two taels on previous quotations. Since the sudden advance in exchange, business has entirely ceased, and to tempt buyers a very considerable reduction would have to be made. Holders are showing more desire to realise, as their stocks are considerable. Settlements on the market, 9 chops, 4,582 chests Oopacks, Oonahms, Ningchows, and Hobows. Reshipped on owners' account, 15 chops, 5,816 chests Oopacks, Oonahms, Ningchows, and Hobows—24 chops—9,144 chests; making total to date 348,708 chests. Stock, waiting shipment, 6 chops, and for re-sale, 29 chops—35 chops. We quote, second and third crop Ooopacks and Ningchows. Taels 25 to 29 nominal; second and third crop Oonhams, taels 20 to 25 nominal; second and third crop Hobows, taels 17 to 20 nominal. Green: Throughout the whole fortnight there has been a steady demand for country teas, but settlements are small in consequence of the greater portion of the arrivals from Kewkiang being immediately re-shipped without being offered on this market. Fychows have been taken at taels 33 to 35, and Moyunes at taels 39 to 43, prices may be quoted from two to three taels higher. Pingsueys have

Digitized by Google

also been inquired for, but the few chops remaining on offer are held for extreme rates. Shanghai packed have been dealt in at higher rates and stocks are now very much reduced. Re-shipments and settlements 26,558 half-chests Fychow, &c.; 3,166 chests Pingsuey 2,336 half-chests Japan—32,060 half-chests, making total to date 107,117 half-chests. Stock of Green Tea is estimated at 27,960 half-chests Fychow, &c.; 2,000 half-chests Shanghai packed Japan, 4,000 chests Pingsuey—33,860 half-chests.

HANKOW.—Foreigners continue to be unwilling buyers by reason of the advices from London. On the other hand, supplies from the country being small, the teamen are disinclined to yield on late quotations. The result is a small business, the settlements for the fortnight being, sales, 8 chops, contract 1 do.; shipped to Shanghai on native account, 5 chops—total, 14 chops, the stock on the market being 12 chops, which is mostly low dusty held at 17 to 18 taels. The following are the current quotations (short price) which show a decline of 5 mace on rates last reported. Oopacks, Ningchows, Leylings, and Choongsowkyes, 22½ to 26 taels per picul. Oonahms, 17½ to 20½ taels. The total shipments from Hankow this season, according to Custom-house returns, amounts to 34¼ millions of lbs., besides 2½ million lbs. of brick tea.

KEWKIANG.—A large business has been transacted during the fortnight, the settlements of Green being reported at fully 60,000 pkgs. There is an apprehension of a short supply, and prices have advanced fully 3 taels on opening rates. Quotations are:—Moyunes, 34 to 38 taels; Fychows, 28 to 32 taels. The season's yield of Green is estimated at 220,000 half-chests, or fully 60,000 less than last season. The export this season of Green is estimated at 3¾ million lbs. to Great Britain, against 6¼ millions same period last season. To the United States, 1¼ millions against 3 millions.

NAGASAKI.—The article continues to arrive pretty freely, and considerable settlements are reported at previous rates.

YOKOHAMA.—A fair business has been transacted in this staple during the past week, and prices have advanced $1 to $2 per picul on medium and fine kinds. Settlements estimated at 1,100 piculs.

RAW SILK.—CANTON.—The Silk season is drawing to its close. Beyond the little which still remains to deliver of what was contracted for, only a few bales have been sold on the market for this departure, and the prices asked by the brokers are consequently firmer than before. In Loong-Kongs about 10 bales go forward on Indian account for Europe, and of Canton Tsatlees and Imitation Japans about 50 bales only. Advices from Bombay being unsatisfactory for Silk, there have been no settlements for that quarter. Quotations are nominally the same as those given last mail, viz.:—Loong-Kong, No. 1, $440 to $445 (None); Loong Kong, No. 2, 425 to 430; Kow-Kong, No. 1, 400 to 405; Canton Tsatlees, 480 to 485; Imitation Japan, 465 to 470; Waste Silk, No. 1, 50 (very scarce); Waste Silk, No. 2, 40.

MACAO.—Nothing has been done in this staple during the month, present stock offering amount to 10 piculs Cumchook, held at $390, and 5 piculs, No 1, Kow-Kong, at $350.

SHANGHAI.—Since last mail about 1,400 bales have been settled, and as the receipts from the interior have continued moderate, the stock is further reduced, and some estimates do not make it equal 6,000 bales. The certainty of a short supply has caused the Chinamen to remain firm for late high prices, notwithstanding the rapid and considerable rise in the rate of exchange, and the purchases of the fortnight have been made without any alterations in previous quotations. Taysaams are still very scarce, and for coarse descriptions extreme prices have been paid. Tsatlees have been chiefly in demand, but some Hainings and Taysaams have also been sold. The settlements of the fortnight are reported at 1,600 bales against 3,000 bales at corresponding fortnight of last season, and against 4,000 bales the season before. The present unsold stock is 9,000 bales, against 7,000 bales same time last season, and 10,000 bales the season before. The following are the latest quotations:—Tsatlees: No. 2, chops, 450 to 460 tls. per picul; No. 3, 430 to 440. Market: No. 3, chops, 415 to 425 tls. per picul; No. 4, 400 to 410; No. 5 and common, 385 to 395. Taysaams: No. 1, chops, 400 to 410 tls. per picul; No. 2, 380 to 390; No. 3, 360 to 370; No. 4, 5, and common, 330 to 350. Yuenfa: No. 1, chops, 425 to 435; No. 2, 410 to 420; No. 3, 390 to 400; No. 4, and common, 370 to 385. Hainings: 370 to 430 tls. per picul. The P. and O. Co.'s steamer *Cadiz* has about 845 bales of silk engaged, and the *Egmont* (134 bales) and *Prince of Wales* (250 bales) loading for London have 384 bales now on board. The mail steamer *Granada* has just arrived from Yokohama, and brings 697 bales for Southampton, 314 bales for Marseilles, and 34 bales for Shanghai, making a total of 1,045 bales. Her advices report larger settlements at very extreme prices, and an increase in the supply, the receipts amounting to nearly 200 bales per diem.

YOKOHAMA.—Since our last, supplies have increased very considerably, and a large quantity of this staple has arrived to market. A few days ago there were 700 bales on offer, and considerable settlements have been made. Prices are rather in buyers' favour, but for good and fine silk, quotations are unaltered.

DRUGS, &c.—MACAO—Cassia Lignea: Sales 1,300 piculs, at $16.50 down to $16.25; stock 1,500 piculs. Cassia Oil: Sales 15 piculs at $202 to 205; stock 15 piculs. Aniseed Oil: Sales 60 piculs at $145 to 148; stock 40 piculs. Star Aniseed: Sales 700 piculs at $23 down to 21; stock 500 piculs held at $20. Galangal Root: Sales 500 piculs at $2.70 to 2.80; stock 800 piculs. Gall Nuts: Sales 20 piculs at $14.75; stock 10 piculs. Ginger Preserves: £2.90 for best. Vermilion: $38.

CANTON.—Cassia Lignea: No settlements. The stock is only 500 pls. which is held at $17.80. Cassia Oil neither stocks nor settlements. Cassia Buds: The market has been cleared by the purchase of 25 piculs, at $57.50. Aniseed: There are no supplies of either Star or Oil. Gamboge and Rhubarb: None on the market. China Root: No sales, quotation $3.75; stock 300 to 400 piculs. Galangal: No sales—stock small. Vermilion has advanced to $13 to 14. Galls are quoted $12.75; stock 200 piculs.

CAMPHOR.—HONG KONG.—In no demand, and with the advices from London by last mail it will be difficult to dispose of any for shipment to that market. For Singapore and the Straits there is little inquiry, and but 250 piculs are reported as sold during the fortnight at $21 to $22 picul packed. A lot of 500 piculs arrived since issue of last report, large shipment has taken place to Liverpool per *Falcon*. Nagasaki.—further supplies or settlement.

RAW COTTON.—CANTON.—This market has participated in the general excitement, and the rate for Shanghai and Ningpo has advanced to 25 to taels per picul. There is little or no stock.

SHANGHAI.—The speculative feeling mentioned in last report continued some days after the date thereof, until the rate for dry unadulterated reels touched 24 taels. The article continued scarce, and the market was "rigged" by gamblers who entered it against legitimate shippers to England, whose contracts had been violated, and who were compelled to take up the vessels which they had engaged, and had nearly laden. Lately, however, the demand for money and the advance in exchange has made it more difficult to obtain accommodation on cotton shipments and especially on purchases, and the consequence has been that gambling has been checked, and more prudence manifested, and the market has receded to 20 taels. Four ships have been dispatched to Liverpool during the fortnight, and about fifteen are still loading for that port and London. There is some stock on the market, but it is generally wet and adulterated. It is difficult to procure the article without these vices.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 5½d. to 6s. 5¾d.	6s. 6d. to 6s. 7d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s.10d. to 4s.10½d.	4s. 10½d. to 5s. 0d.
At Singapore	6	ditto	4s. 10d. to 4s. 9½d.	4s.10½d. to 4s.11d.
At Manila	6	ditto	Mail not	arrived.
At Batavia (guilders.)	6	ditto	..	..

The Exchange on India at Shanghai was 312 to 315 rupees per 100 taels, and at Hong Kong 231 to 228 per 100. Bar silver at Shanghai 111 per 100 tls., and Hong Kong 4½ per cent. prem. The current quotations at Shanghai for Mexican dollars was 80 tls. per $100, and the rate of exchange on Hong Kong was 25 to 26 per cent. discount.

The following is from Messrs. Sharp and Co.'s circular of 14th Dec. ;—

GOLD.—During the fortnight since last report we have received in gold about three and a half lakhs of dollars value, whilst the amount exported included that by the *Emeu* on the 1st instant, and excluding that to leave by the *Orissa* to-msrrow is two and a half lakhs. The reduced value in India consequent upon the scarcity of money there may sufficiently account for the fall on this side.

SILVER.—There has come to hand these two weeks past about $130,000. and there has been sent away $80,000, a portion of which left by the Europa Mail on the 1st instant. This bullion being now available both for Shanghai and India has commanded an improved price of late, its advance being only checked by the probable delay in its outturn at the Bombay Mint.

DOLLAR CURRENCY.—The amounts to hand during the lest fortnight sum up to tweive lakhs of dollars, whilst there have been sent away but a little over three. There has been no improvement in the price of clean coins.

DISCOUNTS AND MORGAGES.—Money is still worth twelve per cent for mortgages of house property, and discounts for short periods have been made at nine and ten per cent.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From Newcastle, Nov. 28, Oliver Cromwell. From New York, 30, Gertrude.

At FOOCHOW.—None.

At AMOY.—None.

At SWATOW.—None.

At HONG KONG.—From Sunderland: Dec. 2, Ethel; 6, Queen Bee. From Bordeaux: 3, Der Fruihs, (Fr.) From United States: None.

At MANILA.—No report.

At SINGAPORE.—From Sunderland: Dec. 3, Ottone (Brem). From Cardiff, 10, Sterling, (str.); 12, Emily, (Ham.); 19, Liberia. From Liverpool: 12, Early Dawn. From Bordeaux: 15, Marie (Fr.) From Hamburg: Dec. 1, Ida Maria (Ham.); 14, Elise (Ham.); Sophies (Hanov.); 16, Mathilde (Brem.); 21, Blohm (Dan.) From Rotterdam: 16, Louisa.

At BATAVIA.—From Great Britain: J. C. Schotel.

DEPARTURES.

From JAPAN.—For London: Nov. 27, Scawfell, Dolphyn; 29, J. C. Munro. From Nagasaki.—For London: 24, Europe.

From SHANGHAI.—For Liverpool: Dec. 1, Agincourt.

From FOOCHOW.—For London: Nov. 25, Renown; Dec. 5, Chalmers. For United States: Nov. 28, Florence Nightingale; Dec. 1, Helen Nicholson.

From SWATOW and AMOY.—None.

From HONG KONG.—For England: Dec. 5, H.M.S. Scout. For Liverpool, 6, Light of the Age, Falcon; 11, Lord Lyndhurst; 12, Itsamboul. For New York.—None.

From SINGAPORE.—For Liverpool: Nov. 22, Oasis; Dec. 16, Helene (Dan.), for Falmouth for orders.

LOADING.

At KANAGAWA.—For London: Confiance, Governor V. Swieten.

At NAGASAKI.—For London: Stamboul.

At SHANGHAI.—For London: Anglo-Saxon, Heroes of Alma, Lammermuir, Nelly, Island Queen, Prince of Wales, Egmont, Sir H. Parkes, Strathallan, Lodore, Lansdown, Marquis of Argyle, Minerva, Sappho. For Liverpool: Spirit of the Times, Cissy, Fow-Tsum, General Putnam, Princess Royal, Rhine, Young England, Royal George, Childe Harold, Lovdianah, Solway, Zingara, Thos. Royden. For New York: Appollo, Anne Wood, Capella.

At AMOY.—For London: Confucius.

At FOOCHOW.—For London: Bankside (full), Glarama, A. Oswald, Isabella Ridley, Standard, Stuart Wortley, Weymouth. For United States: Queen of the Seas (full), Peep o'Day (full).

At HONG KONG and CANTON.—For London: Tamerlane, Mary Ann Wilson, Agra. For Liverpool: Gemini, Junapore.

At SINGAPORE.—For London: Early Dawn, Tre Broder (Norwg.) For Liverpool: Crusader, Spanker. For Bordeaux: Hoogly, Orixa, Saint Michael.

At BATAVIA.—For Channel for orders: Scharenhorst (Brem.), Sophia, Kon der Nederl (Dutch).

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Nov. 19, Elize (Ham.), from Hamburg to Singapore, Ida Maria (Ham.), Hamburg to Singapore; 21, Ferris, Cardiff to Singapore; 27, Marie (Fr.), Bordeaux to Singapore; Dec. 4, Mary Goddard, Rotterdam to Hong Kong, Sirius (Dutch), Amsterdam, A. Piet Hein (Dutch), Amsterdam to Batavia, Anna Decatur (Am.), Cardiff to Singapore, Bahama (Eng. str.), London to Batavia; 6, Stirling (Eng. str.), Cardiff to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Nov. 5, Rubicon, from Amoy to London; 6, Julia, Shanghai to London; 7, Lorton, Shanghai to Liverpool; 13, Iron Crown, Hong Kong to Liverpool; 14, Broadwater, Yokohama to London; 15, Palmyra, Shanghai to Liverpool; 16, Ravensbourne, Yokohama to London; India, Shanghai to London; Cordova, Shanghai to Liverpool: 17, Siam, Shanghai to London; William Eggets, Kanagawa to Liverpool; Carn Tual, Nagasaki to London; 18, Sheveningen, Batavia to Rotterdam; 19, Mimosa, Foochow to London; Langdale, Foochow to London; Nile, Hong Kong to Liverpool; 20, Mirage, Shanghai to London; Bosworth, Foochow to London; 21, Der Preusse, Manila to London; Jas. Vinnicombe, Shanghai to London; Melrose, Amoy to London; Osprey, Shanghai to London; 22, Spirit of the Sea, Shanghai to Liverpool; Forfarshire, Hong Kong to Liverpool; Selina Jane, Macoa to Hamburg; 23, Spirit of the Deep, Shanghai to London; Ophelia, Macao to Hamburg; Cambridge, Yokohama to London; Venezuela, Macao to Hamburg; 24, Sarah and Emma, Shanghai to Liverpool; 25, James Gibson, Shanghai to Liverpool; J. C. Munro, Yokohama to London, 26, Clarendon, Shanghai to London; Lord Macaulay, Shanghai to London; 27, Abdul Medjid, Hong Kong to Liverpool; Portland, Foochow to London; 29, Our Queen, Shanghai to Liverpool; 30, Martha Theresia (Dutch), Nagasaki to Amsterdam; Dec. 2, Maggie Lauder, Manila to Cork; Avalanche, Singapore to London; 4, Gemima (Ham.), Hong Kong to Liverpool; Spirit of Trade, Shanghai to London; Hawthorn, Shanghai to London; Ranee, Shanghai to Liverpool; Macduff, Shanghai to Liverpool; Magus, Macao to Bremerhaven; 7, Star of the North, Shanghai to Liverpool; 8, Philip I. (Ham.), Shanghai to London; 9, Daisy, Shanghai to London.

From CHINA, &c., to UNITED STATES.—Nov. 8, Anna (Oldbg.), Shanghai to New York; 16, Clara Novella, Foochow to New York; 21, Bavaria, Manila to New York; Melbourne, Manila to New York; 23, Maggie Atkinson, Kanagawa to New York; 25, Caroline (Brem.), Singapore to New York; Helvetia (Olden.), Manila to New York; 27, Graff Eulenburg, Whampoa to New York; Dec. 2, Sarah, Shanghai to New York.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Tea, £4 to £5; cotton, £4; silk, £5 to £6.

SHANGHAI.—To London and Liverpool: £3 to £3. 17s. 6d. To New York: A better demand exists for tonnage at advanced rates, viz.: £3. 17s. 6d. to £4 per ton of 40 cubic feet.

HONG KONG.—Tonnage is more inquired after, both for home and for the North. The following are some of the settlements, viz.;—Adriana (Dutch), 650 tons, 5 months certain, at £375 per month: Junapore, to Liverpool, with cotton, £3. 7s. 6d.; Offor (171), to Liverpool, with cotton, £3. 12s. 6d.; Troas (Br.), 666 tons, to Great Britain or United States and Manila—£6. 10s. for hemp, and £3 for sugar. Rates to Shanghai, &c., 35 cents per picul.

FOOCHOW.—To London, £3. 10s. to £4 per ton of 50 cubic feet; to United States, £4 per ton of 40 cubic feet.

SINGAPORE.—To London and Liverpool, £3 to £3. 15s.

COMMERCIAL POSTSCRIPT.

TEA.—The auctions concluded yesterday 10,931 packages passed, and 5,584 packages were sold; 4,994 packages were "without reserve." The sales have finished very heavily. The Indian tea sales are postponed to Friday, the 29th.

SILK.—The following quotations, &c., are from Messrs. Waithman's Circular:—Tsatlee, No. 1, 23s. to 23s. 6d.; Taysaam, 20s. 6d. for No 1; Maibash, 23s. to 23s. 6d. for No. 1. We have had a very dull market during the past fortnight, and prices for Tsatlee are rather weaker, some sales having been made at about 6d. under our last quotations. Importers generally, however, are not sellers to any extent at this reduction. Japans have been almost entirely neglected, except Taysaam kinds, of which the stock is very small. Deliveries from 1st to 23rd inclusive: China, 1,992 bales; Japan, 1,057.

MANCHESTER MARKETS.—Grey Shirtings, 7 lbs., 17s. 3d. to 17s. 6d.; 8¼ lbs., 21s. 6d.; 9¼ lbs., 26s. 6d.; Cotton Yarn, Nos. 16 to 24, 2s. 8d. to 2s. 9d.; Nos. 28 32, 2s. 9d. to 2s. 10d.; Madapollams, 7s. 7d. to 7s. 9d.; Long-Cloths, 21s. 9d.; T-Cloths, 14s. 6d.; White Spot Shirtings, 22s. 6d.; Brocade, do., 22s. 6d.; Damasks, do., 40s. The Circular of Sam Mendel of yesterday says:—"On Tuesday and Saturday last there was a more cheerful feeling in this market, with prices the turn stronger; but the more threatening aspect of continental politics has again caused depression, and quotations are nominal."

The specie to be taken by the Bombay mail steamer *Poonah* amounts to £567,940, of which £23,500 in gold is for Alexandria, and £57,100 in gold, and £487,340 in silver, for Bombay. Bar Silver, 62d. to 62¼d.; Mexican Dollars, 64d.

ARRIVALS NOT INCLUDED IN THE TABLES.—January 24, at Falmouth, from Sourabaya, Wave; off Dungeness, from Java, Zwaan, Henrietta Gertruida, and Eensgezindheid, all for Amsterdam. Dec. 31, at Ascension, from Shanghai for London, Runnymede; 6, off Ascension, from Batavia, Zambesi, for Rotterdam; Jan. 21, at Texel, from Batavia, Hercules; 26, at Liverpool, from Rangoon, Jane Henderson.

DEPARTURES.—January 25, from London, for Singapore, Dewa, Gungadhur, from Liverpool, for Shanghai, Narari; 27, from Liverpool for Manila, Jose y Maria; for Shanghai, Caractacus; for Singapore, Maggie Lauder; from Greenock for Shanghai, Taiping,

Digitized by Google

SPOKEN.—Banda, Hong Kong to Buenos Ayres, Dec. 2, 30 S., 38 E.

CASUALTIES.—The Landbouw, Kleynenberg, from Batavia, which arrived at Brouwershaven Jan. 21, is leaky, and has lost sails and boat, having experienced heavy gales. The Swallow (sch.), Scott, of and from London for Shanghai, with part cargo of coals, was totally wrecked off Cape Recife, during a heavy N.W. gale in the night of Nov. 26, in which she lost most of her spars and sails, and became unmanageable; crew saved; ship and cargo were sold Dec. 2. The Eliza Stewart, Osborne, from Hong Kong for Liverpool, put into Algoa Bay, Dec. 16, short of water, and with crew sick.

At TABLE BAY.—Dec. 7, Spray of the Ocean, Slaughter, from Foochow-Foo, with loss of main topsail and main deck bulwarks, having encountered a heavy north-wester Nov. 11, in 30 S. 43 E., and sailed 9, for London: 11, Macassar, Rip, from Amsterdam for Batavia, to repair rudder. Tuisco, Decker, from Batavia for Falmouth, had been on her beam ends in 28 S. 47 E., and cut away fore and main top-gallant-masts, yards and sails. Sunbeam, Barge, from Shanghai, and sailed 13, for London; 12, Johannes Christian, Obelt, from Batavia, and sailed 18, for Amsterdam; 14, Cambalu, Richardson, from Shanghai, and Beautiful Star, Catto, from Hong Kong; 16, Alfred Ray, Meades, from Hong Kong; Hainan, Schroeder, from Amoy; 17, Latona, Sedgwick, from Singapore.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 22.

In accordance with the arrangement mentioned in my last letter the Second Chamber of the States-General met and passed the Ministerial Bill for a vote of 599,245 fl. for the current use of the Foreign Department, being one-half of the sum placed on the estimates for that branch of the public service in the present financial year. Since the estimates were made up an unexpected demand on the finances of the country has sprung up on account of the Duchy of Limburg, which, forming an integral part of the German Confederation, is bound to pay her share of the seventeen millions of dollars voted by the Diet to defray the expenses of the occupation of Holstein. Of this sum the two hundred and forty-eighth part falls on Holland for Limburg—making about 70,000 fl.—according to the 52nd Article of the Final Treaty of Vienna in 1820. The anomalous position of Limburg in its joint relations to Germany and Holland has always been a sore subject with the Dutch, who have tried over and over again to get that province out of the German Confederacy. As, however, it is quite apparent from their internal dissensions and angry feelings on the subject of Schleswig-Holstein that the Bund is falling to pieces, the hopes of the national party are raised at the prospect of being at length released from what was certainly a very injudicious and inconvenient arrangement to both parties.

After passing the Bill for which they were convoked, the Second Chamber adjourned till their services are again required, and now the First Chamber is convened to meet on the 25th inst. to confirm the Bill.

Offers have been made by the Civil Governor of the Province of Groningen to Mr. Stieltjes, the civil engineer so summarily dismissed from his appointment in Java, to undertake the superintendence of the new canals about to be made in that province. That gentleman, however, has indignantly refused the offer, declining to have anything to do with the public works till he had received full satisfaction from the Government for their unjust conduct towards him.

From accounts received in this country from Java it is not improbable that a fresh expedition will have to be sent to Boni, to demand satisfaction for the murder of a Dutch subject in one of the provinces of that empire, all demands to deliver up the murderers having hitherto been peremptorily refused.

In a former letter I stated that the Netherlands Trading Company had given notice to the holders of the four per cent. loan of 1858 for five millions of florins, of their intention to reduce the rate of interest from four to three and a-half per cent., and giving the holders the option of acceding to these terms, or being paid off at par. It is a significant sign of the abundance of capital in this country, that of the five thousand bondholders 4,781 accepted the reduction of the interest, and only 219 objected, and were paid off at par.

By Royal Decree of November 18, 1863, No. 124, just published in the official *Staats-Courant*, on the petition of Messrs. J. S. Le Vino, L. Pineoffs, and J. Van Stolk, all of Rotterdam, as directors of the association called "The Netherlands Indian Gas Company (Limited)," the draft of the deed of settlement, together with the bye-laws, have received the King's approval and confirmation, so that the company is now fully constituted.

The following vessels have been chartered by the Netherlands Trading Company to load cargoes of produce in Java for the undermentioned ports:—*Sourabaya Packet*, Capt. S. C. Olivier; *Willem Daniel*, Capt. H. Zeylstra; *Rotterdam*, Capt. H. G. Adriaans; and *S. van Heel*, Capt. D. H. Dietz, all for Amsterdam. *Wilhelmina*, Capt. H. D. Wiersma; *Pieter*, Capt. H. Hogewerff; and *Gurtje Maria*, Capt. J. Flens, for Rotterdam. *Dordrecht*, Capt. F. A. Loos; and *Euterpe*, Capt. A. Kuypers, for Dordrecht; and *Grondwet*, Capt. F. C. Kaminga, for Middelburg. The charter of the *Vriendschap*, concluded in December last, has been cancelled, and the ship *Hollands Trouw*, Capt. K. J. Brauer, substituted, to carry a cargo to Amsterdam.

The *Record*, Capt. Butcher, from Samarang to Rotterdam, has put into Falmouth with loss of main-yard, and will remain there till the disappearance of the ice permits her to proceed to her destination.

The *Princess Amalia*, Capt. Van Bentveld, from Batavia to this port, has arrived at the Texel, where she lies for the present, icebound.

The Netherlands Trading Company have advertised on the part of the Colonial Department for tenders for 86,400 kilogr. of salt meat for the use of His Majesty's ships on the East India station; the tenders to be sent in by the 26th inst.

Permission having been granted to the soldiers of regiments in this country to exchange into the East India army, receiving the bounty of 120 florins for each, upwards of fifty men of the regiment, "Grenadiers and Jagers," quartered at the Hague, have volunteered for the service, and received orders to repair to the depot at Harderwyk for conveyance to Java as soon as the navigation is again open.

It is satisfactory to observe that, notwithstanding the continuance of the war in America, and the change in the tariff that came into operation in this country last year, the receipts of the Custom-house duties in 1863 were more than 100,000 florins above the estimates placed in the budget.

By Royal Decree of the 14th inst., No. 53, H.N.M. fourth class screw-corvette *Soestdyk*, of 10 guns, lying at Helvoetsluys, is ordered to be got ready for active service in the East Indies, and will be commissioned on the 1st of February. She will be commanded by Lieut. R. A. Houck, R.N.

The screw-corvette *Princess Maria*, of 10 guns, is to be commissioned at Nieuwe Deep on the 1st of May. Her destination is as yet unknown, and it is probably not yet determined; nor is her commander yet appointed.

PASSENGERS ARRIVED.

Per *Amalia Augusta*, Capt. de Veer, at Amsterdam, from Batavia: Mr. and Mrs. J. E. Everts.

Per *Johann Lodewyk*, Capt. van de Waal, at Brouwershaven, from Batavia: Messrs. van der Veen, Niclou, and Sellingen, four passported soldiers, and a Japanese woman and child.

Per *Kinderdyk*, Capt. Zwanenfeld, at Brouwershaven, from Batavia: Messrs. P. J. Outmans and A. J. Buyzet, four non-commissioned officers, and fourteen passported soldiers.

Per *Doggersbank*, Capt. Nuss, at Brouwershaven, from Batavia: Messrs. van Mansveld, van der Star, Willekins, and Wittenrood.

COMMERCIAL.

COFFEE.—Since last mail this market has been very active, considerable sales having taken place at full prices. Last week 10,000 bags of private trade Padang, ex *Antonia Petronella*, at 44½, and 7,000 bags of Java, ex *Sliedrecht*, *Lobelia*, and *Ocean*, at 43 to 45, were taken, and this week 2,400 bags of Java, ex *Staatsraad van Ewyck*, at 45 and 45½ cents, and 1,500 bags of pale greenish Padang, ex *Julie*, were sold by importers at 46. A few lots out of the Company's last sale also changed hands at 45½ to 46 cents for good ord. Java, whilst 47 was obtained for some No. 6, and 47½ for No. 29. The Company have advertised for public sale on the 3rd of February next 2,078 bags and 107 casks Ceylon. The market closes in a firm condition.

SUGAR.—For the raw article there has been a very animated demand, and prices are much improved, whilst there is every appearance of a rising market. 836 kranjangs of very fine Sourabaya, No. 16½, ex *Tasmania*, were sold at 42 fl., since which a further rise of 1 to 1½ fl. has been established; and 5,000 kranjangs of Java have been sold at 2 to 2½ fl. above November sale prices. Brown and medium qualities are in most request, the demand for the finer descriptions above No. 16 being rather slack. In refined but little has been done, but manufacturers have also raised their demands. Owing to the severity of the frost the navigation is interrupted, and no shipments can be made.

RICE.—There are no transactions of any importance to record. 1,695 bags of rough Java, ex *Fanny*, are in the market.

SPICES.—A few parcels of nutmegs, No. 2, have been done at 55 cents; No. 3 is in request at 29, and likely to improve. For cinnamon, No. 3, 86 cents have been paid. Pepper looking up; 430 bags of Sumatra, ex *Antonia Petronella*, were sold at 20½ cents in bond.

METALS.—Banca Tin is regaining its former position; 500 blocks have been sold at 73 fl., but this price could not be maintained, and purchases might be made now at 72. Copper is higher, and cannot be had under 61 fl.

INDIGO firm, but with few sales.

COCHENILLE inactive; stocks nearly exhausted.

TOBACCO moves off, and fetches good prices. Stock of Java 8,413 bales.

RATTANS.—900 bundles (100 piculs), per *Fanny*, have been sold this week at former prices, to be received on board and landed at buyers' expense.

DRUGS.—The 60 chests of Gum Damar, to hand per *Fanny*, have been disposed of at full values.

CIGARS.—There have been some sales by auction of Manila, which went off as follows:—

350,000	Second Cortados, 1863, more or less damaged, all sold at 26¾ to 34¼ fl. per 1,000, duty paid.		
100,000	do.	do.	sold at 33 to 38¼ fl. duty paid.
50,000	do.	do.	sold at 28 to 37 fl. do.
20,000	do.	do.	bought in at 39 fl. do.
90,000	Second Habanos, 1863, partly damaged, sold at 24½ to 32½ fl., duty paid.

THE MUSSULMANS AT THE CAPE.

Some very interesting letters signed "H. C.," describing life, and society, and opinions at Constantinople, have been lately making their appearance in the *Athenæum*. The one in the number for the 16th inst. contains a singularly curious statement in reference to the establishment of a Mussulman ecclesiastical dignitary at Capetown. The writer says:—

I have before me a volume of the *Mejmoouai Funoon*, or "Magazine of the Arts," a monthly publication. It belongs [to the Jemiyeti Ilmiyehi Osmaniyeh, or Ottoman Literary Society, the newly-formed Useful Knowledge Society, and is compiled by its members. The editors are Munif Effendi and Kadri Bey. Among the contributors are H. H. Kiamil Pasha, late Grand Vizier, H. E. Edhem Pasha, H. E. Safert Pasha, H. E. Mehemed Jemil Pasha, Ambassador in Paris, Said Effendi (now in London on a mission), and Abu Bekr Effendi, Mussulman missionary at the Cape. The latter has contributed a series of letters on the Cape of Good Hope, which furnished the groundwork of a cock-and-bull story in the English papers, according to which the missionary of the Turkish Society for the Propagation of Islam among the Christians had depicted the dissensions among the Christians at the Cape, how a Bishop Colenso had criticised the text of the Scriptures, and how he believed that in ten years' time the inhabitants would abandon Christianity and adopt Islam; to promote which result he recommended that a number of well-paid Turkish missionaries should be sent to the Cape, and that a liberal distribution should be made of well-written Mussulman tracts. The real history of Abu Bekr's mission is, perhaps, more interesting than the imaginary one. In Capetown, a city of 30,000 inhabitants, 10,000 are Mussulmans, acknowledging the Padishah as the head of their religion When you were in Constantinople the Turks were much tickled by hearing from their Consul-General, Mr. De Roubaix, that there were Mussulmans who only spoke English or Dutch. It is a great satisfaction to the Turks to have these Mussulman dependents in an English territory, as they do not always bear with perfect complacency the assertion of some of the English here, that Queen Victoria is the greatest Sovereign over Mussulmans, and that our ambassador, Sir Henry Bulwer, represents the first Mussulman power. Dissensions on points of doctrine arising among the Mussulmans at the Cape, the matter was referred to Stamboul; and the Sublime Porte, instead of giving a verbal opinion, with great liberality sent out a distinguished mollah, Abu Bekr Effendi, well known in Stamboul circles, and they continue to pay him a salary of £400 a year. Abu Bekr Effendi has done much to improve the religious and moral condition of the Mussulmans of the Cape, and has established a school there. He has communicated to the *Mejmoosi Funoon* some interesting accounts of the Cape, and his proceedings; not, however, mentioning one little fact which has interested his numerous Stamboul acquaintance, that he has married there an English-speaking Mussulman lady, who is highly accomplished, and plays the piano, like several fashionable Khanums in Stamboul. The *Mejmoosi*, besides purely literary articles, has articles on geology, by Edhem Pasha; banking, by Munif Effendi; and Kadri Bey, telegrams, &c. As it is written in a good and pure style, it is much liked.

THE FEDERAL FRIGATE "NIAGARA."—The steam frigate *Niagara*, now lying off the battery, has been ordered to send half her crew on board Admiral Farragut's flagship *Hartford* and then proceed to Hampton Roads for the winter, thus virtually putting out of commission one of the finest ships in the navy. She was refitted, with her armament changed, at Boston last fall, and has since been among the fishermen on the coast, and more recently at Halifax, whence she sailed for this port. Her armament originally consisted of 12 11-inch guns, mounted as pivot guns on the spar deck. In the changes which were made she received 12 additional guns of the same calibre, besides several rifles. Being built to carry only 12, the additional weight of her armament, together with the increased quantity of ammunition she was required to carry, sunk her so low in the water that she became unmanageable. Indeed it is asserted that so useless was her armament of heavy Dahlgrens that she might have been captured by the *Alabama* had she met that vessel with an ordinary sea running. Even in mild weather and a moderate sea it has been found impossible to cast loose an 11-inch pivot gun and work it without endangering the lives of the men. The lower deck ports of the *Niagara* being only two feet out of water, it would have been equally impossible to have opened them without subjecting the ship to the imminent risk of being foundered. In fact, on her trip from Halifax, although she encountered no severe weather, it was found necessary to caulk her lower ports, and even then the sea frequently swept her decks. So this splendid ship is reported to be really as harmless at sea, for all purposes of war, as an unharmed merchant vessel, owing to the excessive weight and number of her guns.

THE "FLOWERY LAND" CASE.—The prisoners in this case have been committed for trial at the next sessions. The following letter has been written on the subject:—"Sir,—The inquiry now going on at Bow-street is another link in the long chain of crimes, "murders and piracy," committed on board our merchant ships by Greeks, Turks, Spaniards, Chinese, Italians, &c. The case of the *Flowery Land* (a sad burlesque on the hideous tragedy which occurred on board of her) starting with a valuable cargo on a distant voyage with such a gang of ruffians of all nations for a crew, is unfortunately not of rare occurrence; on the contrary, an affair of every day. Can this evil be remedied, and how? First, the commander of a merchant ship has little or nothing to do with the selection of his crew; he probably never sees them until a few hours before he sails, when he is fully occupied in settling shore accounts, and takes little heed of his crew till the pilot leaves him. How often at this crisis an unfortunate master finds himself in command of a sort of floating Babel, no three men speaking or understanding the same language? Supposing the motley group of many nations to be honest and well-conducted, how can a man speaking but one tongue give orders to, at the same moment, three or four sets of foreigners, having no common tongue? The case of the ill-fated *Tayleur*, wrecked on the Irish coast, was attributed to the ship being unhandy, and the crew, "composed of all nations," not understanding the orders given by the officers. Another case, the *Globe*, of Allos, in the Black Sea: the crew, consisting of Ionians, Maltese, Greeks, and Italians, early planned and discussed the murder of their shipmates, the English portion, and the plunder of the vessel, in their own languages, amongst each other, and in the presence of their unsuspecting victims. These ruffians had banded together on shore and shipped expressly for the purpose of murder and plunder. Surely British lives and the property entrusted in British ships deserve better protection than this. I trust that some one of the many members who represent in the House of Commons the shipping interest will consider this matter of foreign seamen, and what we gain and learn by their employment."

TELEGRAPH TO INDIA COMPANY.—The report of the directors states that the remaining assets have now been disposed of, and there are no further liabilities. Messrs. Glass, Elliot, and Co., the lessees of the line, have intimated that they will make no deduction from the half-yearly payment of £1,250 for the period ending 31st December, 1863, although the through communication was interrupted for about two months; they reserve to themselves, however, the right to claim the amount (£200) at any future time, should they think fit. The directors recommend that a dividend, at the rate of 5 per cent. per annum, free of income-tax, to be paid to the shareholders for the half-year ending 31st December, 1863, payable on and after the 15th inst. The directors regret to inform the shareholders that intelligence has been received of a further interruption on the Malta and Alexandria cable, but they understand from Messrs. Glass, Elliot, and Co. that a ship has been despatched with a proper staff to repair the fault, and that the communication will, in all probability, be restored in about a month from this time. During the interruption on the Malta cable, this company will get the benefit of the receipts on the Alexandria, Cairo, and Suez line; and in consequence of the recent increase of the local traffic, the directors do not anticipate that there will be any deduction from the dividend of 5 per cent. per annum during the remainder of the lease. Before that term shall have expired, it is confidently expected that there will be a further extension of the telegraph in the direction of Aden, and possibly of India, by which the company's property will be greatly enhanced in value, and the directors will be able either to dispose of the line or to work it themselves with advantage and profit.

CANDELABRA FOR THE NIZAM.—A curious and very magnificent specimen of the style of Oriental luxury in which the great native chiefs of India indulge in their palaces, is now being exhibited in the Dudley Gallery of the Egyptian-hall. It is a gigantic candelabrum of the most costly design and elaborate execution—a specimen of one of five which were last year ordered in this country for the Nizam of the Deccan's palace at Secunderabad. The fact of such an order being given in England instead of Paris is a fresh proof of the great stimulus which was given last year to English trade by the International Exhibition, and to no trade more than the manufacture of English cut and engraved glass, which at Kensington last year carried off the honours from competitors in all parts of the world. Two conspicuous objects in this class were the great glass candelabra exhibited by Messrs. Defries under the east dome, and which were lighted with gas as darkness came on. On the last public day of the Exhibition an order came from India for five of these at £3,000 each, and for two of the concave prismatic mirrors similar to those manufactured by the same firm for the Sultan's new palace on the Bosphorus at £2,500 each—a single order for £20,000. The mirrors and four of the candelabra have been sent; the fifth is now on view at the Dudley Gallery. Its weight is no less than three tons, its height is 22 feet, its diameter at the head is 10 feet, and its 20 arms carry no less than 154 lights. In all there are upwards of 4,000 pieces of crystal and coloured glass used in the erection of this fragile structure, some of which are among the largest ever manufactured, such as the bowl under the arms, which is big enough to bathe in, being more than a foot deep and four feet wide, and all of which are either cut or engraved in every form of design which can be executed by the wheel. As a matter of course, a great deal of coloured glass is introduced to suit Oriental taste, and at the wish of the Nizam each candelabrum has been surmounted with a copy of the Imperial Crown of England, also in colours. The whole work would, no doubt, have better suited English notions of beauty had it been executed in bright crystal glass only, but such simplicity was found to be at variance with Oriental tastes, and coloured glass had to be partly introduced. The tints, however, have been well managed and harmonised skilfully.

SILKWORMS FROM CHINA VIA SIBERIA.—Since the appearance of the disease among silkworms, which has caused such serious loss to the producers of silk in France, several attempts have been made to procure seed from China. Some energetic travellers determined to carry the seed through Siberia, to protect it from the heat to which it would be exposed during a voyage by sea from China to Europe. M. Paul Maignon, a member of the Agricultural Society, has just arrived in Paris, after having accomplished a perilous voyage. Having carefully visited the southern provinces of China, and penetrated as far as 500 miles into the interior, he returned to France through Peking, Irkoust, and St. Petersburg, following the road taken two years since by M. de Bourboulon, the French Ambassador in China. He has obtained a vast deal of valuable information, which may be most useful to those who may feel disposed to undertake a similar journey. In his opinion the supply of seed required in France is not to be found in the province of Tohekiang, as was generally supposed, but in the western provinces on the frontiers of Thibet, rather even than in Japan. Nothing daunted by the danger and fatigue he has experienced, M. Paul Maignon speaks of extending his search at no distant period. It is said, moreover, that the Messagéries Imperiales Steam Navigation Company have resolved to fit up cool compartments in their ships for the conveyance of silkworms' seed from Shanghai to Suez.

THE PERSIAN GULF CABLE.—The ship *Marian Moore* has arrived at Bombay with a portion of the Persian Gulf submarine telegraph cable, and has gone to the Government transport moorings to have some fittings made ready prior to being taken in tow by the steamer *Victoria* for the Persian Gulf.

APPOINTMENT.—The Queen has been graciously pleased to appoint George Thorne Ricketts, Esq., to be Her Majesty's Consul at Sarawak.

The London & China Telegraph.

LONDON, WEDNESDAY, JAN. 27, 1864.

THE JAPANESE POLICY PROCLAIMED.

THE whole mass of the intelligence from Japan is but one continued proof of the correctness of the information which enabled us to assert that the views and tendencies of Prince SATSUMA have been entirely misapprehended in this country. From Nagasaki, where, be it remembered, being in SATSUMA'S own neighbourhood, his intentions and purposes are almost certain to be better understood than at Kanagawa or Yedo, we have it stated positively that he is, above all things, anxious for trade and friendly relations with foreigners. That the indemnity agreed on for past offences has not yet been paid to Colonel NEALE is probably owing to a delay caused by some Japanese forms of which we know nothing, since the belief current at Yokohama was that his people had junks not far from that port with cargoes of specie, or of goods, or both, to the value of upwards of $2,000,000. Another clue to the influence that produced the change in the policy of the TYCOON is obtained from the further accounts we have of the rebellion of the Prince of TSIOSIU, who is the chief instigator of hatred towards Europeans, and the direct actor in the latest outrages perpetrated against unoffending trading vessels. There has been published the order from the Government to certain Daimios named, announcing that TSIOSIU is "in open rebellion against the MIKADO and the TYCOON," having seized the commissioner sent to inquire into the occurrences at Simonoseki (the firing at foreign ships), and that, unless he submits, they are "to take himself and every mem- "ber of his family by force, and bring them to Yedo for trial "and punishment." The Daimios thus ordered were at first worsted, the Gokara, or chief officer of the father of the present TYCOON, meeting with his death in one of the engagements that took place. Later accounts represent the rebel army as surrounded, and reduced to the greatest straits. Thus, then, we find the head of the anti-European faction at open war with the established Government, and suffering defeat. The further little incident of the trifling indemnity for the attack on the *Pembroke* being tendered without pressure and almost without solicitation, is another, and not the least, important link in the evidence that convinces us our past anticipations were well founded, and that a future of rapid and undisturbed advancement may reasonably be prognosticated for our commerce with Japan. Not only, then, are we now enabled to speak from official facts and documents as to the clearly notified intentions of the Government, but every mail that arrives adds instances of the kindly feeling prevalent among the nation at large. If there be any section of the Japanese dissatisfied with the removal of the bars that prohibited intercourse with foreigners, that section will be found among the higher nobility alone—constituting even of them not the most numerous though a powerful part.

CHINA IN FOREIGN-OFFICE PIGEON HOLES.

THOSE who are in the habit of reading news from China, and of weighing what they read, must sometimes rub their eyes, and ask whether this jumble of disjointed provinces really corresponds to our idea of an Empire. Even when the Roman Empire was in the throes of dissolution, the mere name of Rome served as a rallying point for men's ideas; and to this day "Washington D.C." exercises a certain charm over all who had ever dreamed of a Republican Empire beyond the Atlantic. But what Chinaman cares twopence about Peking? What association has it with his history or his literature, supposing him to be of a soul aspiring to mandarin buttons? It is in this incapacity of the Chinese for any higher national life that the great difficulty will, we are confident, be found by any foreign nation which seeks to reconstruct the fast-decaying fabric of Chinese society. Therefore it is that we revert to our proposal of obtaining a foothold in the north of China, which might serve as a centre whence strong ideas might radiate, to redeem the bulk of the nation from that utter apathy to public life, which is the natural result of such a state of society as has been introduced by the Tartar dynasty of MING. It is vain, we fear, to hope that departmental jealousy at home can ever be so far allayed as to permit of the conduct of the delicate negotiations, which we shall have, ere long, to set on foot with the Peking Cabinet being entrusted to either of the only two boards that can pretend to any knowledge of Eastern affairs—the Colonial or the Indian. Yet if there is one lesson that the experience of our diplomacy in the Far East teaches us more clearly than any other, it is that our traditional routine of diplomatic formalities is utterly powerless in China. Merchants have long since discovered that in China they must incur tremendous responsibilities, for which, however, they reap in return enormous profits. Everything is on a scale commensurate with the vastness of the country and the population, with the exception of the space allotted to China in the pigeon-holes of the Foreign-office. There, the very lack of all that enables us elsewhere, even in Japan, to bind or to loose, to make treaties and bring to summary reckoning those who violate them—the absence, in short, on the part of the Chinese people, of national self-respect—instead of inducing anxiety and grave deliberation, serves only to lull the officials to repose. Were the most insignificant of European States to present the symptoms of decay which he who runs may read in every mail from China, we should have successive relays of couriers on the road, advising, imploring, snubbing, and remonstrating. Here with a trade increasing in one port alone (Shanghai), some 40 per cent. annually, with new centres of enterprise springing up within the heart of the country, with fresh landward routes in process of survey every year—some, we fear, not likely to benefit our own *prestige* with the great mass of the population—with all this before its eyes, the Foreign-office professes to wait the course of events, and is content to meet each new incident in the great drama with its own stereotyped European formulas. We look in vain for any attempt to make available even the concessions which were wrung from the Mandarins of Peking by the blood of some of our best soldiers and sailors. Captain BLAKISTON and Colonel SAREL showed us what could be done up the Yang-tze, provided we would assert our treaty rights. Captain SPRYE only awaits official sanction to give effect to the numerous memorials presented by almost every mercantile corporation in the country, as to the advantages of a south-west landward route through Burmah. Other projectorrs are eager to convey through Assam *viâ* the head-waters of the Yang-tse the enormous wealth of the Western provinces. Other Powers even, with interests avowedly opposed to our own, are pressing forward, so as to be in readiness to commence trade as soon as the catastrophe shall have occurred which the most short-sighted perceives to be imminent. Yet the Foreign-office folds its hands, shuts down the folio that opens at the heading "China," and—waits. The potent spell of "*non-possumus*" has, after the lapse of three centuries, been borrowed from Rome, with this difference, that whereas it is the talisman which alone preserves vitality in the Temporal Empire, it is used in Downing-street to check enterprise and prolong the agonies of decay.

Nor we fear is the apathy we complain of to be confined henceforth to instances of general inefficiency. It is obvious that armed bands, trained more or less to foreign drill, are everywhere organising. The very last intelligence we have points to imminent peril impending over even our latest opened ports. The mail from Newchwang, we read, was robbed four times in less than 200 miles, in suspicious proximity to which announcement we read that some 3,000 Chinese troops, organised by Captain CONEY, had disbanded for want of pay. Of course it is what we may expect to see, so long as the Foreign-office abdicates its function, as at present. Here were all the elements of confusion, which ought to alarm even an official mind—Chinese troops, a British commander, a Russian rifle—the kind of weapons that picked off men in the trenches before Sebastopol at 800 yards. In short, whichever way we attempt to interfere, whether by granting permission to commissioned officers of our twin services to do a little land piracy on their own account, or by endeavouring to secure the observance of

Digitized by Google

treaties solemnly guaranteed, we are equally met with indifference at home and unblushing chicanery abroad. Yet the same Chinese question has before now unseated the very strongest ministry, and would infallibly be used as a party weapon in the event of any party move being again resorted to.

TO CHINA AND JAPAN *VIA* BRITISH COLUMBIA.

If one point more than another may be considered settled in what relates to the future of the world's destiny, it is that the progress of invention has deprived the ocean of the prestige it had acquired as the safest, easiest, and most pleasant means of communication between distant hemispheres. The land has again asserted its pre-eminence as the element most adapted for man's purposes in all respects—even for the requirements of those restless habits of locomotion which, whether engendered by the adventurous spirit of commerce, or by a craving for the excitement of travel, are so eminently characteristic of the present age. Railways and telegraphic wires seem destined to throw back the ocean from being the magnificent "silent highway" of nations into the position of a mere canal, of wider proportions than ordinary, excellently calculated, and, to that extent serviceable, for the heavy traffic that does not need and would not pay for speedier means of transit. Wherever a railway can be constructed, either to supersede or merely to shorten the sea voyage, there we may be sure a very short space of time will behold the steam-horse snorting and puffing his way. The rapid interchange of commodities is so essentially the very basis of modern commerce, that the many reasons which induce this desire for bringing all the centres of production and consumption as closely together as possible need not be recapitulated. They are known to the youngest clerk in a merchant's office, who has commenced the new year with the discovery that the more he knows of geography the easier will he master many of the mysteries of a Price Current. No wonder, then, can be felt that ever and anon, at intervals lessened at each recurrence, we hear of some new effort, some new route, some new projector, aiming at the shortest *trajet*, both for passengers and traffic, between Great Britain and the stores of wealth and trading activity that lie in the Far East. It is worthy of note, too, that this grand desideratum does not engage the attention alone of those who are resident at the two extremes of this golden chain. Wherever a route practicable for the engineer and convenient for the traveller is to be found, there, along the whole line, do we continually see advocates springing up, zealously setting forth its advantages and obviating objections. One glance at the Map of the World, following out indications with which our readers are well acquainted from former articles that have appeared in our pages—and coupling the much that has been done with the more that remains to do—will show that while we must look for telegraphic communication with China and Japan through St. Petersburg and Russian Asia, we ought to bestir ourselves at once to shorten the voyage for goods and passengers, by the agency of a railway, right through the British possessions in North America to Vancouver's Island.

In British Columbia they are fully alive to the subject, and are earnestly discussing the best route for the railway to run. In a prize essay, just published in that colony, the writer, the Rev. C. L. Brown, goes into the matter at length, and demonstrates that difficulties have been alleged that have no existence at all, or that have been grossly exaggerated. His statement is as follows:—

There is steam communication to the head of Lake Superior; thence to the Red River Settlement a road could be made without much difficulty From the Red River to Edmonton the way lies up the valley of the great Saskatchewan River, navigable for 700 miles. This is described as a splendid and extensive valley, capable of supporting a large agricultural population. At Edmonton the difficulties begin. Thence to Jasper House in the Rocky Mountains, 400 miles, the country is swampy and bad. There is a coalfield here, and the seams appear on the surface, at some places on fire. Here the party from which this information is obtained (the party of Canadians who entered British Columbia by this route last autumn) built their nightly camp fires of coal. The gorge through which this road enters British Columbia is the New Caledonia or Jasper Pass. It is described as a natural roadway through the mountains, which rise on either side like a wall, to a height of many thousand feet. From Jasper House to Tete Jaune Cache, at the head of the Fraser, the country around is rugged and mountainous, yet there is a valley through which a road or railway could be carried. From Tete Jaune Cache the road would probably take a direct course for Cariboo, by one of three valleys, as yet unexplored, which appear to connect the latter with the head waters of the Fraser. From Cariboo the line would be taken to the mouth of Quesnelle River, where it would join the great highways from the lower Fraser and (should such be ultimately constructed) from Bentinck Arm or any other seaport on the north-west coast. The whole distance between the heads of navigation, namely, from Lake Superior to Bentinck Arm, by this line is about 2,200 miles. It is preferable to the route by St. Paul's, Minnesota, because the whole course lies through British territory; and the Jasper Pass Road is more free from Indian molestation than the more southerly passes.

This line of route, it will be seen, has therefore the twofold advantage of bringing us not only to the shores of the Pacific, opposite Japan and China, but of affording conveyance to that increasing string of emigration that will be attracted to British Columbia by the further gold discoveries each mail adds to the allurements held out by the colony to the young and enterprising. No settlement has been so much abused as the one in question: no colony has had such a jealous rival close by its side. Every effort has been made by the Americans of San Francisco, and Oregon, and Washington Territory—assisted, singular to say, by a discontented party here in England—to deter emigrants from proceeding thither. But the gold is there, on British ground; that cannot be gainsaid. And what is more, further investigation has led to the conviction that the precious metal is to be found on the eastern slope of the Rocky Mountains as well as on the western. Never was there a line of railway projected so tempting in all respects to the capitalist. It commences almost at the outset by running along the valley of the great Saskatchewan River, a wide level flat of fertile land, stretching away to the Rocky Mountains, and perfectly fitted for cultivation. The moment the difficulties of the route are met with, the constructors will be encouraged by finding that the progress they have already made has landed them in a coal-field, where that grand motive power in all kinds of vulcanic operation—locomotive, mining, smelting, forging, casting—actually crops up to the surface. The gorge in the Rocky Mountains once passed through, the constructors will probably become aware of their proximity to the richest gold-fields in the world by missing their labourers. Gold-finding, however, has its seasons, and when tired out or drowned out the navvies would gladly revert to the rail or tramway—to sure pay, and less hard work.

Neither, must it be remembered, is any portion of the route already without its wants to be supplied and its produce to be taken in return. The new Hudson's Bay Company will gladly avail themselves of its agency to forward goods out to their stations, and to receive back their valuable furs. By adopting, indeed, the American notion of enabling the railway company to locate settlers along the line, the Hudson's Bay Company, who are the ground landlords of half a continent lying between the Atlantic and Pacific, could not but be immensely benefited. Their predecessors observed so much mystery as to everything relating to their territory that its capabilities will never be known till they are in process of development by actual settlers. The selfish cunning of the old corporation has been justly punished by their now waking up to the fact that the grim secrecy of their policy has ended in letting a country abounding in gold slip through their fingers. Canadian geologists scruple not to say that two gold-bearing ranges, some 1,200 miles apart, will gladden the hearts of those who are bold enough to venture into a region now established to be no desert fit only for the occasional visit of the Indian hunter. A better acquaintance with it shows it to be a fine and noble territory, the interior of which, till a very high northern latitude is reached, has a soil and a climate that will amply reward the labours of the agriculturist, and, in its wilder districts, mineral deposits that will enrich the adventurous miner.

Once arrived by this easier and speedier route at Vancouver's Island, there is little need to enlarge on the benefits to English commerce that would at all times result from our possessing this new line of steam communication with China and Japan across the Pacific. We should then have, what we cannot get by any other possible means, a communication throughout along British ground or in British ships. That little strip of earth or sand between Alexandria and Suez may be closed against us at any moment. Our passage across that narrow isthmus is by permission, not by treaty; and between the PACHA, the SULTAN, and third parties, of whom there are too many concerned, it is hard to say what complications might at any moment arise that would result in the permission being withdrawn, were it only to assert the right of withdrawal. We will not go into the question of the time that would be taken in traversing the distance between London and Shanghai by this "north-west passage," as we are not in possession of the full data for speaking positively on the subject. When the thing is

Digitized by Google

seriously taken up, it will be found that the economy of time will be much greater than would at first sight appear. The voyage across the Pacific would certainly have the merit of being safe and pleasant; and islands lie so abundantly in the track—to say nothing of Hawaii—that there would be no difficulty in fixing on suitable coaling stations, that, like all the rest of the ground trodden on, should be British property.

THE COMMUNICATION TO CHINA VIA SIBERIA.

SOME of our contemporaries have a paragraph announcing that we can communicate to Peking in a week. As already stated in our last, the telegraphic line is now open to Irkutsk, which is about two days' journey from Kiachta. The transmission of messages to Irkutsk occupies from one to three days, according to the state of the weather, &c. From Kiachta to Peking by express courier route the distance can be accomplished in nine ten days, or a total of say fourteen days from London to Peking. From Peking to Tientsin, and thence by steamer to Shanghai, would occupy about five days more, assuming a steamer to be ready for the purpose.

Literature.

Travels and Adventures of an Officer's Wife in India, China, and New Zealand, by Mrs. MUTER, form two delightful volumes, from the pen of the wife of Lieutenant-Colonel D. D. Muter, of the *13th Light Infantry*, just published by Hurst and Blackett. The interest abounding in their pages will be recognised at once when we state that they embrace a residence in India during the outbreak, which found the lady's husband holding the rank of Captain in the 60th Rifles. The rebellion over, the story of the authoress wafts us to Canada, whither she accompanies her consort on a visit to his father. On their return they proceed to China with the 2nd Battalion of the 60th, go on to the Peiho, winter at Hong Kong, again embark for Tientsin, visit Peking, and, on getting back to England after the Chinese war was a thing of the past, the Colonel exchanges to a battalion in India, and obtains permission to visit New Zealand on private business, on his way to join the regiment at Calcutta. With such a variety of lands, and manners, and men to describe, it is impossible that an accomplished woman, jotting down her impressions in a diary at the moment of their sensation, should not have produced a series of sketches that have all the reality and vividness of photographs. Then, professional subjects are continually touched on, and the opinions enunciated on such topics are put forward in a decisive tone, as becomes the convictions of a man who has experienced the evils he desires to remedy—for these portions of the volumes are acknowledged in the preface to be the composition of Lieutenant-Colonel Muter. A residence of some duration at Hong Kong on two occasions causes three or four chapters to be devoted to Victoria and Canton, and these are certainly not the least amusing of the series. The authoress sums up a comparison of the Indians and Chinese, as the result of her personal acquaintance with both, considerably to the advantage of the latter. She says—

> There are fewer barriers opposing the onward progress of the Chinese than of the people of India; and I prophecy that after the sharp trials which their own cruelty and the folly and ignorance of their rulers have brought on the "Flowery Kingdom," the race will rapidly rise, while the priest-ridden Hindoo will remain sunk in sloth, and the Mussulman in his savage fanaticism.

From one who has travelled so much, a description of Victoria, embracing a tribute to the courteous hospitality of Sir Hercules Robinson, acknowledged more than once in the course of the narrative telling how she was tossed to and fro in the China seas, will be received as especially trustworthy. The Governor of Hong Kong, it would appear from what follows, may at least congratulate himself on being lodged more nobly than the great majority of Her Majesty's vicegerents:—

> Victoria, as the loyal subjects of Her Majesty insist on calling every new place, is the city of Hong Kong; and, in speaking of Hong Kong, as I before observed, Victoria is our only concern, and one well worth the attention of the nation. This city has many peculiar points, as it has not grown like others, but sprung full-blown into the world. With the single exception of Melbourne, it has developed in a shorter period a greater growth than any other city in our empire. Unlike Melbourne, Victoria had no small beginnings. The trade now transacted in Hong Kong was created when the island was a wretched fishing-place, where pirates resorted for concealment. This trade required a depot protected by England, and the protection desired England guaranteed on that rock. The chief of the great China houses established their principal offices on the soil annexed to the British empire; and the exports and the imports, estimated at tens of millions sterling, quickly did the rest. It must not be supposed that all the goods exchanged are stored in the city. It is more like a broker's office, where samples only of the bulky articles are shown; ships proceeding from the harbour to ports along the coast for cargoes. Were the trade to be transferred to another site, Victoria would disappear as quickly as it has arisen, and the wretched and unhealthy rock would again become a desolate haunt of the pirate. How far the openings of new ports may have the effect of transferring the trade remains to be seen. Canton is doomed, for only the most absurd regulations of the Government of China could have made it the European mart for the commerce of that empire. The opening of the Yang-tse, the true channel of commerce, must have an effect; the results experience only can show. But in the meantime our Chinese city is growing with a vigour that bids fair to make it one of the most considerable of the British empire, and to shed on the nation no small credit throughout the Far East.
>
> I commence my sketch, as in duty bound, at the Government House. If I exaggerate the pretensions of the abode of the Queen's representative, the fault lies with the Governor and Lady Robinson, whose kindness to me has thrown over the place a rose-coloured tint. The house warm and gay in the occupation of one may appear dull and cold when occupied by another; then the tints which feeling throws in may convey a false impression. I doubt whether there is a Government House in any of our colonies equal to this. It stands on a spur to the left of the principal ravine, across the rocky bed of the torrent. On the right spur is Head Quarter house. The architect selected the best spot, had it levelled, and on the plateau raised the structure, overhanging the town and overlooking the harbour. It is surrounded by a garden, and the hill, falling abruptly on three sides, is planted with trees and intersected by walks. The house is therefore isolated, and, as it ought to be, the finest by far among no ignoble competitors. The building is square, rising from a base composed of blocks of cut granite, and facing the harbour and city. The land at the back, by which the house is approached and entered, is on the level of the first floor, but in front it is much lower, that level being attained by a noble flight of granite steps, a fine verandah running along the full frontage. Two reception-rooms, occupying the whole length, and separated by a vestibule, open to this verandah. The vestibule leads to a square in the centre of the house, lighted from the roof by coloured glass—a noble hall, and one worthy of a London club. Half-way up, a projecting gallery encircles the hall, leading to the bed-rooms. The gallery is reached by a stone staircase, whose winding steps may be seen between pillars of granite. A passage leads from the hall to the entrance at the back. The apartments at the sides and behind the hall are the library, billiard-room, waiting-room, &c. They were all papered and painted, carpeted, and furnished as in England. There was no appearance of India about the place; no stucco-work, nothing bare and empty; all was rich, massive, and comfortable. The stables are connected with the residence on one side by a covered way, and the kitchens and other outhouses on the other side, giving the house, from the rear, a crescent-like appearance. It stands some three hundred feet above the sea, with the town extending before it to the right and left.
>
> The city is built along the shore, facing the mainland. Much of its ground is reclaimed from the sea. Wherever I turned I saw evidences of energy and wealth—miles of granite quays, and good streets, well paved and macadamized, with rows of thriving young trees. The barracks, hospitals, Government stores, commercial depots, banking establishments and shops, are all of a good order of architecture. The most eligible sites are occupied by barracks, navy-yards, ordnance and commissariat stores. But this expanding town will have a fine opening for its increasing commerce on the opposite shore of Kowloon.

Randolph Methyl; a Story of Anglo-Indian Life; from the pen of Mr. W. W. IRELAND, author of the "History of the Siege of Delhi;" London: Ward and Lock. This is a picture of society and incident in India just prior to and during the late mutiny. Without making the slightest pretence to fine writing, the story is carried on with the greatest rapidity, every page almost having its own action and character. The interest never flags, and the author is never dull, whether he is narrating an exciting scene of the mutiny or recording the scandal of an out-station. He is ready with an opinion on every subject he touches, and if he startles at times with the singularity of his views, his remarks always evince knowledge of human nature and experience of the world. Mr. Ireland is an admirer of the past, so far as our Indian rule is concerned. His hero, "like most officers belonging to the Indian army, is disgusted with the treatment they received from the Home Government;" and Major Campbell, his model man, "meets any attack on the native character with indignant protest." These two volumes certainly contain some of the lightest and pleasantest reading that ever issued from the establishment of their publishers.

Messrs. NEGRETTI and ZAMBRA, who have attained such a high reputation as meteorological instrument-makers, have published a most valuable work, to be had at all their establishments, being a *Treatise on Meteorological Instruments*. The publishers are also the authors, which is alone a guarantee that the book fulfils its intention, that of a plain description of the various instruments now in use, with such information as is generally required regarding them. The descriptions are copiously illustrated by woodcuts, and nothing seems wanting to render the volume a complete hand-book of reference.

The *Chinese and Japanese Repository* for January has a very interesting article by Sir J. F. DAVIS, Bart., on "The Poetry of the Chinese," in which comparisons with Scriptural and classical poetry give great zest to the subject. The solemnity there is

Digitized by Google

in the serene stillness of a moonlight night is expressed with wonderful power in the four following lines from a Buddhist poet:—

The rain has ceased, and the shining summits are apparent in the void expanse;
The moon is up, and looks like a bright pearl over the expanded plain:
One might imagine that the Great Spirit had stretched forth an arm
From afar—from beyond the sea—and was numbering the Nations.*

Another paper is a translation from the "Arte China" of Père Gonçalves, by Sir John Bowring. "Japan: its Political State, &c.," is a reprint from the *Chinese Repository*.

Practical Lessons on the Comparative Construction of the Verb in the French and English Languages, by JULES FESTU, published by Simpkin, Marshall, and Co., is a book we can earnestly recommend to all who desire to speak or write French with ease and correctness. The author rightly observes in his preface that "Syntax is one thing and construction another." Construction is precisely the difficulty most embarrassing to the Englishman who attempts to hold a conversation in French. M. Jules Festu's rules are so plain, and his examples so well chosen, that the difficulty just referred to will disappear, as if by magic, before his instructions.

THE DEFUNCT ANGLO-CHINESE NAVY.

(ECONOMIST.)

The danger just escaped in China was even greater than we had imagined. We knew that our recent acts in that empire tended towards a Protectorate, but we did not know they had been arranged with a view to that identical end. We believed that the Government favoured Captain Osborn's appointment, but we did not believe, after Mr. Layard's assurances, that his engagement was formally sanctioned by Her Majesty's Ministers, or that he considered himself responsible both to the Ministry at home and the British Ambassador in China. More extraordinary papers than those contained in the correspondence between Captain Osborn, Mr. Bruce, Mr. Lay, and Prince Kung were, we venture to say, never laid before a people professing to manage its own affairs. They show that Mr. Lay, formerly British Consul, now Inspector-General of Chinese Customs, and British referee on all occasions of difficulty, had devised a plan for creating an Anglo-Chinese fleet, for emancipating it from the authority of every one except himself—and, in a very limited degree, the Emperor of China—had planned a complete revolution in Chinese administration, and missed success in his enormous schemes only through a change of purpose on the part of the Chinese Regent.

The correspondence is, for Asiatic correspondence, very unusually clear, all the personages concerned having lost their tempers so completely as to leave them neither wish nor discretion for any further concealment. It appears, then, that in October, 1862, Mr. Lay, Inspector-General of the Foreign Customs of China, and manager of the large and increasing Customs revenue, persuaded Prince Kung that a foreign fleet was necessary to the Empire. The Regent accordingly authorised him to obtain such a fleet, specially empowering him to "arrange the terms and conditions of every description of agreement." This commission was almost plenary, but it must, of course, in justice be read as only conveying such powers as its framer had the right to convey—that is, such powers as could be considered legal under the laws and customs of China. Mr. Lay, however, a daring, ambitious, and probably philanthropic man, was determined to stretch his authority to its utmost possible bounds, and accordingly returning to England, selected Capain Sherard Osborn as Admiral, and entered with him into the following astounding contract:—Captain Osborn was to be "Commander-in-Chief of the European Chinese navy," under a commission from the Emperor, and engaged—we quote the actual words—"to act upon all orders of the Emperor which might be conveyed direct to Lay, and *not to attend to any orders conveyed through any other channel*," while "Lay, upon his part, engaged to refuse to be the medium of any orders of the reasonableness of which he was not satisfied." In other words, while Captain Osborn was to be Admiral, Mr. Lay was to be Admiralty, and to possess the power, moreover, of refusing to obey the nominal Sovereign of both. The whole system of Chinese administration was at once set aside, and an independent navy created, not amenable to the order of any Viceroy, or any Cabinet officer in Peking, or any Chinese authority, except the Emperor, and to him only when acting under the veto of Mr. Lay. It appears, moreover, that these stipulations were not worded in this manner, as stipulations sometimes are, merely to meet extreme contingencies, such as an Imperial order to the Anglo-Chinese fleet to attack a British ship, but were deliberately framed "after long and careful discussion," in order that Captain Osborn should never have any Chinaman as his superior, and that all Chinese customs whatsoever should be superseded. "I did not come here," writes Captain Osborn, "*or my followers either*, to accustom ourselves to the treatment usual with Chinese sailors or soldiers, or to assist them in a retrogressive policy in the treatment of European *employés*, or Europeans in general. The employment of ships of war and war steamers of European construction is an innovation, and that of European officers and gentlemen still more so. I and my force are part and parcel of a new order of things indicating progressive China. I will be no party to her lapsing back into her ancient system, and treating Europeans *as if they were Chinamen*." The determination to create an *imperium in imperio*, applicable to all cases, and active at all times, was never more frankly expressed, and Captain Osborn will probably admit that this was his real design. At all events, it is quite certain that this is the way in which it would have worked. Mr. Lay, being virtually for marine affairs chief Emperor—for the veto lay with him—and already in possession of a growing and great revenue, would, through the fleet, have been master of all the rivers and coasts of China, on which rivers and coasts stand all her great cities, except Peking. There is not, to speak plainly, a great commercial city in the Empire which ten lines from him to Capt. Osborn would not have battered down, while he could prevent the Emperor from undertaking operations against any one of them. A European would have been, in fact, the only effective authority in the country, which differs from all others, except the United States, in its dependence on water communications, and had the same system been applied, as it would have been, to the army—Captain Osborn complained openly because it is not—he would have been a visible Mayor of the Palace, with whom rather than with the Emperor foreign nations must have treated. It is difficult, perhaps impossible, to define the precise limits of the authority possessed by a Chinese Emperor, but we do not hesitate to affirm that this arrangement was beyond it. The very basis of such authority is the tacit contract that it shall not be transferred to foreigners, and even if Prince Kung intended to grant it, he could not have effected his object without treachery to the lad whose guardian and mouthpiece he is. We cannot believe that he intended anything of the kind, any more than that the giver of a general power-of-attorney intends that it should be employed to abolish his own right to cancel the instrument. The authority granted to Mr. Lay was actually used to cancel the power of the Sovereign who conferred it, a view which no Plenipotentiary, however ample his powers, could be justified in indulging. The Regent, therefore, in refusing to ratify Mr. Lay's agreements, has not, so far as these papers show, been guilty even of a technical breach of faith.

This, however, is but a part, and a very small part, of this remarkable affair. If the Regent of China chooses to transfer the country to a foreigner, that is an act on which his people must judge, not we, but there is evidence in these letters that he was transferring it to the British Government—that Captain Osborn was, perhaps in a limited sense, but certainly in some sense, in their employ. Captain Osborn himself writes to Prince Kung in terms which certainly seem to imply that the British Government had come to an arrangement with the Regent in the sense of Mr. Lay's contract, for he complains that the Regent's instructions are "entirely contrary to the understanding under which Her British Majesty's Government permitted himself and others to agree to serve the Emperor." Moreover, Captain Osborn, on receipt of definite refusals from the Court of Peking, at once applied to the Ambassador, requesting his official instructions as to the disposal of the fleet, and Sir F. Bruce responds that "he will not consent to the ships and stores being handed over to the Chinese Government without instructions to that effect from Her Majesty's Government." And, finally, Captain Osborn, in a general order disbanding his crews, makes this distinct and formal statement:—"Were I to accept such a position for this force, and thus take service under provincial and subordinate Chinese officials, instead of under the Emperor of China, I should violate the spirit and word of Her Most Gracious Majesty's Order in Council, *and act in disregard of the wishes of Her Most Gracious Majesty's Government*, forgetful of every pledge I gave before I undertook the organisation of the squadron." In other words, Her Majesty's Government did, in Captain Osborn's belief, instruct and desire him to assume *quasi* independent authority in China, and made this the condition of permitting him to serve. They may have been right in so stipulating, or Captain Osborn may be mistaken in making this statement, but the subject is one which cannot fail to attract grave attention in Parliament. A British Minister is justly allowed very considerable latitude in dealing with Asiatic affairs, but to assume a Protectorate over China, under cover of leading her a few officers, without previously consulting Parliament, is an act which demands not only serious but satisfactory explanation. For the present the plan is stopped; but our pleasure at that result must remain imperfect until the country has been assured that it will not be resumed.

(SPECTATOR.)

Mr. Lay has missed empire by a hair's breadth. Those who wish to understand what manner of men Anglo-Asiatics are, why England finds it so difficult not to extend her Asiatic dominion beyond all limits of moderation, why we alone of mankind seem able in the Far East to found, should study the correspondence published this week between Captain Sherard Osborn and Prince Kung. There they will find that an Englishman, known at home chiefly as an interpreter and assistant in various minor missions, without official dignity, without a single subordinate, without even a national reputation, has devised, and nearly carried out a scheme which in its imperial grandeur of conception makes European designs, even when announced by Napoleon, look almost dwarfish; has prepared, and almost consummated a revolution in the destiny of a third of the human race; has deliberately thought out and barely failed in a plan for reducing the most populous of the empires of the world into a dependency of Great Britain. They will perceive—if they can recognise character through correspondence—that he was pursuing this plan with a full consciousness of its end, with an adaptation of means to objects such as we find in Europe only among the few men who, at intervals of a century, leave a deep mark on the history of the world. They will recognise, in short, the great truth of our Asiatic position—that the strange careers opened by English authority in Asia breed statesmen such as were bred when Spain in her day of vigour pitched herself upon the New World, men whose thoughts are not the thoughts of every-day home life, who are not bound by the laws, or the limits, or the morals which chain down all classes in England, who at once in the grandeur of their aims, and the unscrupulous character of their plans, belong to a class whom comfort-seeking Londoners believe to have passed away, the true "Conquistadores." Mr. Lay is not unique except in his opportunities. There are scores of such men in India, and floating through half the great towns of Asia—men who start from the thought that they are by nature rulers, whose day-dreams are of conquering kingdoms and organising provinces, who are ready, grant them but a foothold, to add any empire in Asia to the long list of British dependencies, who not only believe that England had better govern all Southern Asia, but who have thought out the means by which to secure that enormous end, and ask little except an official smile to stake their lives and their fortunes upon the realisation of ideas which even to statesmen often seem the most unreal of dreams. Creating an army is said to be the most difficult of tasks, but there are Indians who have created a dozen; there is one in London now who made a disciplined force of the enemies he had just

* China was formerly divided into separate and independent States.

Digitized by Google

been conquering, and every adventurer employed in China licks the most unpromising of materials in a few weeks into effective soldiers. It is thought a great thing to found a new trade, but less than ten firms built up in China a commerce now more than twenty-two times as great as the whole commerce of India, when the company, after seventy years of exertion, surrendered it to the nation as a perfected work. It is a great matter to found among any people a Government which shall be at variance with its history, its instincts, and its prejudices, yet create no insurrection; but Anglo-Asiatics will point to a hundred men, each one of whom, if vested with the authority of Great Britain, will land in any corner of Asia, obtain instruments from within the country itself, and in twelve months change a new conquest into an orderly dependency, where everybody, from the day labourers to the Governor, is growing rapidly rich.

(ARMY AND NAVY GAZETTE.)

The reason which induced the Regent to swerve from his original agreement was this—that he had since observed that officers in Her Majesty's army, acting under a similar Order in Council to that granted to Captain Sherard Osborn, had considered themselves justified in taking service under the authority of local mandarins, and not under that of the Emperor. The administration of the Imperial and local Governments in China being totally distinct, had Captain Sherard Osborn been weak enough to take service under the local Government, he would not only have acted in defiance of Her Majesty's Order in Council, but have enabled the Emperor to ignore his existence wherever it pleased him to do so, and have been placed in as false a position as that occupied by Major Gordon, Royal Engineers, which gallant and most able officer is now sighing to escape from the thraldom of local military service under the Foutai of Shanghai. On the 9th of November, Captain Sherard Osborn disbanded the force, and called on the officers and men to carry out the request of Her Majesty's Ministers. Though all law had from that moment virtually ceased, there was not one dissenting voice, either amongst crews or officers, as to their determination to carry out the wishes of their chief; and the letter addressed to him by the captains of the squadron, which—together with his memorandum—we publish elsewhere, is alike honourable to both, and may be said to interpret the unbounded confidence in all concerned in his integrity and ability. Were other proof required of the rectitude of Captain Sherard Osborn's conduct it will be found in the concluding paragraph of the last letter addressed to him by Her Majesty's Ministers at Peking.

MINING IN CHINA.

The following interesting article is from the *Mining Journal*. There are several portions which are open to correction :—

The mighty empire of China, reaching with its tributary countries 900 leagues from north to south, and about 1,500 from east to west, has given evidence in all ages of great metallurgic wealth. A metallic currency, running centuries back, constitutes an evidence of the value that has attached to the precious metals, whilst the infinite uses to which these are applied in the manufactures and the arts indicate a large and never-failing supply. Copper may be obtained in China at £40 per ton, and so abundant is silver, that Capt. Kinder, the master of the mint that is to be set up at Hong Kong, and which will be in operation in the course of eighteen months, contemplates getting all the silver he may require on the spot, not only from the influx of foreign silver currency, which the Chinese are accustomed to cut and melt, but from the native mines. The province of Kiang-nan gives 32,000,000 taels of silver in tribute to the Emperor every year, each tael being worth 6s. sterling, and this tribute coming mainly from its mines. The natural productions of the province of Trapien are gold, silver, iron, tin, and mercury. The silver mines are extensively worked. There are no means of ascertaining the value or supply of the quicksilver mines, but it is only reasonable to anticipate that in time to come China will overthrow the present monopolies in this most important article. The moderate extent to which gold mining is carried on—mines of gold being under the absolute control and the personal property of the Emperor—prevents that demand for a supply of quicksilver which would not fail to test the capacity of these mines. The western part of the province of Honan abounds in metals. In the province of Chensi the gold is washed so plentifully from the mountains that numbers of people earn a living by searching for it in the streams flowing from the mountains. This province touches on its northern boundary Tartary, and on its western the Mogul country.

The province of Se-Tchnen, touching on the west the kingdom of Thibet, carries on a large trade with the produce of its silk, its iron, tin, and quicksilver mines, as well as in loadstones and lapis armenius. At Tchong-king, a place of great trade, two rivers meet, one of which is called Golden Sand, from the character of the deposits on its banks. Along the whole course of its progress, and it appears to receive all the streams which flow from the mountains on the confines of Tartary, people are engaged in sifting the sand for the auriferous particles obtainable. In the island of Hainan, in the vicinity of the province of Quantung, an island large, mountainous, and populous, one part of which only is subject to the Emperor of China, the gold used in traffic for which the Chinese merchants once gained immense profits, comes from the mountains inhabited by an independent people, who, driven by the Chinese from the plains and valleys, have retired to the mountains in the interior of the island, where they preserve their freedom. Notwithstanding that communication with them is forbidden on pain of death, a considerable illicit intercourse is still kept up. The island of Honan is likely to prove one of the most promising fields for gold mining, if ever the country should be opened to foreign industrial enterprise. The province also of Koei-tcheon, a barren country, consisting almost entirely of inaccessible mountains, and the natives of which are rude and barbarous, affecting a defiance of the Chinese laws and government, abounds in mines of gold, silver, quicksilver, and copper. Gold is the only metal which enters into exchange between this province and the East of China, collected sometimes with great danger, from difficulty of access, from the sands of the mountain streams. The mineral wealth of the mountains of Tartary lying beyond is still unrevealed. Gold dust, it is very well known, is in abundance, but the tedious and broken communications of an unsettled country, and, indeed, the limited wants of the people, are far from favourable to any considerable yield.

The rivers of the province of Yunan, some proceeding from extensive lakes, and others from the mountains, bring in their currents quantities of gold dust and precious stones. Rubies of extraordinary size and beauty are found in these mountains, but the gold mines are not allowed to be worked. The gold here, as well as in Sechnen, is pale, soft, and ductile. The silver is not only used in exchanges for goods, but drawn into threads for silk and cotton manufactures. The white copper, called "petung," produced in this province, is of a close grain, takes a fine polish, and presents the general appearance of rich silver ore. It consists of copper, zinc, a little silver, and sometimes a few iron particles and nickel. For making "petung" the Chinese roll the copper into extremely thin sheets, which they first make red hot, and then, by increasing the strength of the fire, almost bring the metal to a liquid state. The sheets are now suspended over the vapour of tutenang, and placed in a sulphurising vessel on a quick fire, which fixes the vapour on the copper. The plates are then cooled, but more gradually than in the European mode.

Chinese tutenang, mines of which exist and are worked in Yunan and other provinces, is in reality zinc, and is extracted from a rich ore, or calamine. This ore is pulverised, and mixed with coal-dust, and the composition is then placed in earthern jars over a slow fire. Presently the metal rises as a vapour, and the fumes passing through a distilling apparatus are afterwards condensed in water. The calamine contains but little iron, and no lead or arsenic. As to iron ore, which is extensively distributed throughout the empire, the Chinese are far from managing it well. Although severe and arbitrary imperial restrictions are placed on the working of gold mines, frequently amounting to prohibition, these restrictions are to a very great extent evaded by the Mandarins, whose passion is to hoard up these metals, like the robbers of Eastern story; in a country where bribery can effect anything, the larger amount they can thus acquire the greater is their security. They can obtain at any time and at all points a vast aggregation of individual labour; but under such auspices, and labouring under such restrictions, the mining operations must assimilate very closely to those carried on in the Pyranees previous to the great associative efforts of modern times.

Then, as to coal. The Chinese possess this article in abundance, but it is unequally distributed. Some of the largest coal mines are amidst the rude and broken hills bordering on the River Pekiang, 260 miles from Canton. Those in the hills known as the Five Horses' Heads are worked by means of horizontal tunnels, from the mouths of which the coal is directly discharged into barges on the river. The levels are kept clear of water by means of adits in the same position. The Chinese have always proved capital hydraulic engineers. The coal is extremely soft, burns with a strong flame, and emits great heat. As the Chinese burn their fuel in close stoves, they previously char their coal in deep pits near the mines, and a living is gained by thousands in gathering the dust, mixing it with soft water, and then baking it in the sun, in forms convenient for transport. At Kelung, in Formosa, the coal mines, which outcrop on the hills facing the sea, are worked by the Chinese, and are sixteen miles in extent. They outcrop again in the neighbourhood of the north branch of the Tamsuy River, where the commodity is also procured, and brought down to the harbour for sale. The prevailing rock of the neighbouring hills is limestone. The lime used for domestic purposes is burnt out by the Chinese from the white nuggets of limestone that they unearth from the hill sides. At Kelung they use for this purpose the white masses of coral found in the harbour.

The Chinese are fond of terming their country the "navel of the earth"—a title which, in reference to its natural supply of minerals, is not inappropriate. The whole country is evidently of volcanic origin; the nitrous quality of the air in the province of Pecheli, in most parts of which provisions may be kept for a long time without undergoing corruption, is a circumstance not less confirmatory of this than general geologic structure. The inimitable lustre given to the silks dipped in a remarkable lake in the vicinity of Nan-yang, in the province of Honan, can only be attributed to the metallic exhalations with which its waters are charged.

Amidst the hills that dot the large alluvial plains of the Chinese territory on the south-west, and more especially where Taiwanfoo is situated, are immense sulphur deposits. Although the working of these deposits is forbidden by the Chinese Government, which in its arbitrary interference with trade and industry would compel the Mandarins to send to Foochow for the materials of their ammunition, the hills are literally alive with workmen. The demand which has sprung up at Hong Kong and elsewhere for purchase on European account, and the large quantity necessary for the manufacture of gunpowder for carrying on the present civil war, has naturally nullified the imperial prohibiton. As the Mandarins cannot sell it directly to the Imperialists, they dispose of it indirectly, and English and Americans take all they can deliver. The immediate neighbourhood of the mines has that dead, dreary stygian look and sulphurous stench which the traveller is accustomed to encounter in Tuscany. The straw sheds of the miners scattered over the ground are a relief to the eye for the prevailing grey and black, set off here and there by a red tinge of a stratum of clay, and the bright yellow of sulphur crystals. A haze rests on the scene from the steam rushing up impetuously from between the crevices of bleached limestone rocks; the condensed drops as they settle on the overhanging stones form long pendent crystals of clear sulphur, looking like petrified moss, of a bright yellow colour. From the hills above streams of fresh water run down into the mines. The filling of a pit freshly dug with water generates steam so fast that water is thrown up several feet, and the resounding noise is almost deafening in the vicinity. The mines amidst these hills would appear to have been originally worked at a lower level, for in the descent we come upon bleached sulphur-marked stones, and the remains of abandoned pits. On a long reach of sand, 200 feet above the plain, along which flows a mountain torrent, a sulphurous stream is continually bursting out at different points, rendering the water almost boiling, and strongly tainting it. The sulphur is deposited about the stones in this stream in ochreous and white crystals, and in the deeper parts the rocks at the bottom are coloured of a bluish green tinge.

There are no people in the world better adapted to mining pursuits than the Chinese. They have vigour of constitution, indefatigable industry, and keen and quiet perception, following up with almost unerring exactitude, and with little waste or superfluous labour, the veins of ore on

Digitized by Google

which they are set to work. Their furnaces may be primitive; but their metallic manufactures are excellent, and the superior quality of some of these productions may be quite as fairly attributed to the completeness of their refining process as to the richness of the ore. They have been stimulated to refine their precious metals to the highest point possible, for the purpose of cloth embroidery. The value for this purpose set by them on the ductility of silver has been so great that they gave to the Japanese, in former times, an equal weight of gold for all the Japanese silver of a certain fineness that could be supplied. Like all eastern countries, China would seem to find full use for all the metal it produces, as well as for all the metallic currency it absorbs, and for which there is no return. In a country possessing such vast conveniences, by means of rivers and canals, for internal communication, none of the difficulties of transport which oppose themselves in some other countries to the transport or interchange of the products of the mines present themselves; but, with an arbitrary Government, seeking still to regulate the value of money, and which has not ceased to place restrictions on foreign trade—not to speak of its excluding as much as possible foreign industrial enterprise—and with no great middle class to bring about powerful combinations for mineral exploration, mining in the precious metals is carried on with but indifferent results to those which would follow the application of proper skill and well-directed enterprise.

JEWS AND SYNAGOGUES IN CHINA.

It has been long known that Jews existed in China. From the time when the Jesuits pursued their missionary efforts in the Celestial land it has been no secret that there, as in India and remoter countries still, small bands of Jews were found maintaining their peculiar national characteristics and engaged in industrial pursuits. It was not known, however, and could hardly have been imagined that they existed in such numbers as recent discoveries have shown they do. The following interesting narrative is published in the *Jewish Chronicle*. The incidents being communicated by a Jewish officer in the navy.

"At the breaking out of the war with China he received his commission as lieutenant, and went to the seat of war, and served under Commander Hollins. Our friend was assigned the command of a small vessel carrying three guns, for the purpose of penetrating the rivers and streams of the interior, and preventing any hostile assemblages. In an engagement with the Chinese the lieutenant was astounded at recognising the familiar tone of the Hebrew language. Thanks to his parents, in his youth he had received a good Hebrew education, and was able to carry on a conversation in the Hebrew language with the chief, who told him if he would give him up he would promise that they would not be molested, but permitted a free egress, and also, if he desired, he would show him the city. The officer accepted the preposition, and accompanied by him as a safeguard, and also a body of men from the ship, they visited the town. It was an immense city, surrounded on all sides by walls and fortifications, and contained over one million of inhabitants, all Jews. In no other part of the Chinese empire are there any Jews. Here they are allowed every privilege. They can carry their produce to other cities, and trade with them, but are not allowed to emigrate. They have their own laws, and their chief officer is a Jewish Rabbi, who with twenty others enact laws, decide disputes, and deal out justice to the inhabitants of the city. In this tribunal is vested the power of life and death, and from their decision there is no appeal. They keep a standing army of the young men of the place in order to protect their city. Their laws command the observance of the Jewish religion; but their rites and ceremonies differ from ours in many respects. They observe the Sabbath on what is to us Thursday, but still they call it the seventh day. Their synagogues are the most beautiful buildings that are to be seen in the empire. They are all built in one style, which resembles a mixture of the Gothic and Corinthian, and are ornamented by beautiful pagodas. Each synagogue is capable of holding over 2,000 worshippers, and generally consists of a large hall, with an arched roof all of stained glass, which presents a beautiful appearance. The roof is supported by pillars of variegated marble ornamented by fine porcelain cornices.

"The holy ark is a beautiful structure in itself, and is approached by nine steps of the whitest marble. On opening the doors and drawing the curtain the whole building is flooded by the light which issues forth. In every available spot inside the ark candles are placed, which are kept burning continually, but still are not seen. The effect, as may be imagined, is beautiful. In each house of worship are three 'saphorim,' which are written on pure white vellum. These are handled with the greatest care, and only by the priest himself. Women are not allowed to enter the synagogues, except on holidays and days of festivity. In the aggregate their rules are in strict accordance with our religion, and are sensible in themselves. The military leader who had been taken prisoner, together with the priests, spared no pains to make themselves understood, explaining everything which they thought would prove interesting.

"The party spent about six hours examining the place, and then returned to the ship laden with presents, what to them were curiosities. The officer has still in his possession several cabinets, not over four feet square, which contain over 300 drawers and secret places.

"The most interesting curiosity which he received was a prayer-book written in Chaldaic, on vellum, which he presented to the British Museum. Several little articles yet remain in his possession, which are highly treasured by him.

"Thus a community of Israelites exists in Oriental China never heard of before, yet consisting of over 1,000,000 souls speaking the original sacred tongue, keeping their own laws, and possessing documents which record their history thousands of years ago."

Naval and Military.

The following appears in the *Morning Herald*:—"The affairs in Japan are considered so satisfactory that telegrams have been forwarded to stop the *Conqueror*, with the detachment of marines on board, and to deliver to Captain Luard orders to return to Plymouth instead of proceeding to China and Japan. It is not probable that Captain Luard will meet these orders until he reaches Singapore."

A letter received in Plymouth from a naval officer at Yokohama, Japan, states that the English Admiral thought the result of the conference on the 15 h of November of so much consequence that he sent despatches immediately to Hong Kong by the Centaur, which, at the same time, embarked invalids for England. It was expected at Yokohama that when the Pelorus arrived in Japan the Pearl would go to Hong Kong. The Encounter and Scout have been nearly five years in commission, and the officers and crews of those ships expect that they will soon be sent home to be paid off. The Rattler is at Nagasaki, and the Barossa, all well, at Yokohama. The Hesper arrived there early in November. She had been terribly knocked about, having lost jib-boom, boats, bulwarks, &c., in a hurricane. A large quantity of stores and provisions is spoilt. The Hesper is considered unfit to do duty as a Government transport.

Captain John Moore, C.B., recently private secretary to the Duke of Somerset, First Lord of the Admiralty, has been appointed a naval aide-de-camp to the Queen, vice Capt. the Hon. James Robert Drummond, C.B., promoted to be Rear-Admiral.

The huge condensers and cylinders for the iron frigate Achilles, 35, 1,250-horse power, fitting at Chatham, have arrived at the dockyard from the establishment of Messrs. John Penn and Sons, the firm employed to supply the engines and machinery for the Achilles, and the mechanics employed on the vessel since her removal from the dockyard to the entrance of the harbour have completed fixing the boilers, cylinders, and condensers on board. The cylinders are the largest ever constructed for a vessel of war, each weighing between 29 and 30 tons. The two condensers weigh 23 tons 5 cwt. each, and the ten boilers nearly 22 tons each. The whole of the heavy portions of the machinery has been shipped on board without accident of any kind by means of the floating masting sheers, which have been towed down to Gillingham for that purpose. The work of completing the Achilles and fitting her for sea is being carried forward with the greatest possible energy, the number of mechanics employed on board daily being upwards of 1,000.

Her Majesty's ship Princess Royal, of 73 guns, 3,129 tons, 400-horse power, will be commissioned on the 6th of February, at Devonport, for the flag of Rear-Admiral George St. Vincent King, C.B., by Captain William Gore Jones (1861). The Princess Royal is intended to relieve the Narcissus, bearing the flag of Rear-Admiral Sir Baldwin Walker, K.C.B., whose period of service will have just expired on the day above mentioned. We have in a former number explained that the Cape station under the new Admiral will be very different to that which it has been under the present commander-in-chief.

Lieutenant Tickell, R.N., one of the oldest naval mail agents on the Southampton station, has been promoted to the rank of commander. Lieutenant Tickell has several times received the thanks of his superiors. When wrecked in a Peninsular packet he carried the mails, at great risk, over an unfrequented mountainous region in Spain; and when wrecked in a Mediterranean packet he boldly applied to the Bey of Tunis for assistance to carry the Indian mail to Marseilles, and obtained it. In the West Indies he conveyed the mails in an open boat a long distance for the purpose of giving early intimation to the Admiral on the station of an insurrection which had broken out in one of the Antilles.

The Ordnance Select Committee have recommended that the grip at the muzzle of the Armstrong breech-loading guns shall be ground out, as the recent action at Kagosima has confirmed the experience gained by the experiments at Newhaven of this being the principal cause of the frequent explosion of the Armstrong shells at the muzzles of the 110-pounders. This alteration will greatly lessen the severe jar which is thrown upon these guns through the projectiles being detained when at their highest velocity. In the case of 12-pounders, the damage caused by the grip has been obviated by cutting off the muzzle. The Armstrong and Whitworth Committee hope to commence their trials with the rival 12 pounders next week. One of Mr. Whitworth's guns has already been sent to Shoeburyness, and the rest will soon follow. His three guns are made out of solid blocks of steel. Armstrong's six 12-pounders, viz., three muzzle-loading, shunt-rifled, and three breech-loading polygroove rifled, are also of steel, but finished with a thin trunnion and breech-coil.

Monetary and Commercial.

At the meeting of the Bank of Hindustan, China, and Japan, the directors were authorised, after some discussion, to increase the capital from £1,000,000 to £2,000,000 sterling, by the issue of 10,000 new shares of £100 each at 2 prem., 8,000 of which are to be allotted proportionately to the existing shareholders, and the residue at the same premium to any persons that the directors think fit.

At the half-yearly meeting of the London Joint-Stock Bank, Mr. W. J. Lancaster in the chair, the profits for the six months were stated at £80,573, out of which £61,500 had been appropriated to the usual dividend at the rate of 12½ per cent. and a bonus of 8s. per share, and £19,073 had been carried to the reserve, which now amounts to £279,759.

At the half-yearly meeting of the City Bank a dividend and bonus equal to 12 per cent. per annum, both free of income-tax, were declared. The reserve fund now amounts to £130,000, and the directors consider the time has arrived to take into consideration the expediency of allowing it to accumulate at compound interest. The chairman stated that the earnings of the six months were considerably in excess of those of any previous period, although high rates of interest had only recently come into operation, they being at the rate of no less

Digitized by Google

than 17 per cent. per annum. The accounts altogether be regarded as most encouraging for the prospects of the concern.

At the half-yearly meeting of the Alliance Bank of London and Liverpool, Mr. J. N. Daniell in the chair, the report stated the available balance to be £26,689, making with a previous sum of £244 a total of £26,933. A dividend at the rate of 6 per cent. per annum was accordingly adopted, which will absorb £16,000, the sum of £2,000 was placed to reserve fund (which with £50,000 for premiums for new shares will amount to £54,000), and a balance was carried forward of £8,933. A resolution was passed for the name of the bank to be altered so as to be simply the Alliance Bank.

At the half-yearly meeting of the shareholders of the Bank of London the operations of the six months showed a disposable balance of £35,530, out of which a dividend at the rate of 10 per cent. per annum, and a bonus of £1. 5s. per share—together equal to 15 per cent. per annum—were declared, both free of income-tax. £12,000 is also transferred to the reserve fund, increasing it to £112,000, and £1,030 carried to the credit of profit and loss account. The chairman, Sir J. V. Shelley, M.P., stated that the business of the last half-year had exceeded that of any previous period, and the distribution is now raised from 10 to 15 per cent. per annum. The increase in the deposits amounted in the past year to £1,000,000. A shareholder having suggested that any new shares should be issued to the present proprietors at par, the chairman said he thought the period for their issue, together with the terms, might be safely left to the directors, who would look to the permanent interest of the bank rather than the immediate interest of individual shareholders. He certainly did not consider it desirable to issue new shares at par. The report was adopted unanimously.

At the annual general meeting of the shareholders of the London and Westminster Bank, the net profits for the last half-year amounted to £147,815, which is increased to £175,575 by the addition of £27,759, the unappropriated balance of the preceding half-year. Interest on the "rest," or surplus fund, at the rate of 5 per cent. per annum, has been added to that fund, which now amounts to £275,953, and a dividend was declared at the rate of 6 per cent. per annum, besides a bonus of 12 per cent., making a total distribution of 15 per cent. for the six months, and of 25 per cent. for the year 1863. The balance carried forward to the profit and loss account for the current year is £18,844. The chairman, Mr. Alderman Salomons, M.P., said that the deposits are £1,000,000 in excess of those of July last. In March next the bank will have been established thirty years.

The following is the first report of the directors of the General Credit and Finance Company of London (Limited), to be submitted at the meeting on Feb. 1st:—

The company was constituted in May last, the allotment of shares being made on the 30th of that month. The deposit of £2 per share, equal to £250,000, received in June, with the first call of £250,000 due 30th October, make the whole capital employed to the 31st December equivalent to £360,000 for six months. During a great part of this period the aspect both of political and monetary affairs has been such as to inculcate extreme caution; and the unlooked for delay in the concession of the allied French company has caused a state of suspense with regard to important branches of international business. This concession now stands on the orders of the day of the Conseil d'Etat for final approval; and the directors have every reason to hope that all obstacles are removed, and that it will be granted in a few weeks. Notwithstanding these drawbacks, the directors have the satisfaction of stating that the net profit of six months' working, as shown by the annexed accounts, after deducting rebate, current expenses and income-tax, amounts to £33,168, being at the rate of nearly 18½ per cent. per annum. In ascertaining this profit, all securities held by the company are valued at the market price of the day. This represents the actual rate of divisible profit. The directors do not, however, recommend that it should be all divided. In the infancy of a company of this description it seems to them more prudent not to exceed a moderate rate of dividend until an ample reserve shall have been accumulated out of profits. Accordingly, they recommend the preliminary expenses, amounting to £4,883. 13s. 7d., to be written off at once; the sum of £9,534. 11s. 1d. to be carried forward to next account, and £18,750 to be appropriated to dividend, being 3s. per share, or at the rate of a fraction above 10 per cent. per annum, free of income-tax. The directors have purchased the freehold of the premises, No. 7, Lothbury, for carrying on the business of the company.

The biddings for 40,00,000 rupees (£400,000) in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, 21,10,000 rupees; to Bombay, 17,00,000 rupees; and to Madras, 2,00,000 rupees. The minimum price declared was as before, viz., 1s. 11⅛d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to 247 lacs (£2,470,000). Tenders on Calcutta at 2s. 0¼d. and upwards receive in full, and nothing is allotted at lower rates; those on Bombay at 2s. 0⅛d. receive about 9 per cent.; on Madras, at 2s. ⅛d., about 42 per cent.; and all above these prices in full. At the bidding on the 6th inst. the applications within the limits amounted to 370 lacs (or £3,700,000).

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 20th inst., was, in gold—to Alexandria, £62,000; to Galle, £4,500; to Madras, £4,481. 10s. In silver—to Singapore, £535; to Hong Kong, 23,750; to Shanghai, £10,200; to Madras, £21,220; to Calcutta, £119,780; to Penang, £520; to Hobson's Bay, £50. Total in gold, £71,381. 10s.; in silver, £176,055.

ARTICLES OF IMPORT.

TEA.—During the past fortnight there has been a fair amount of business transacted, the trade buying, however, only for immediate wants; the statistics being such as to prevent any speculative feeling, added to which the uncertain state of the money market tends to make buyers very cautious. Prices have, however, on the whole, been fairly maintained, the large public sales now in progress passing off with comparative steadiness. Low and dusty kinds of Congou have sold to a fair extent from 7d. to 9d. per lb.; fair common from 10d. to 11½d. per lb., and a few good common at 1s. to 1s. 0½d. per lb. Flavoury kinds below 1s. 2d. show no material alteration, but those ranging from 1s. 2d. to 1s. 6d. per lb. have been difficult of sale at ½d. to 1d. decline. Good Kaisow kinds have been better supported; Common to fair blackleaf kinds have sold rather easier; good Ning Chow and second-class Honam and Wopak kinds, of old import, have been taken to a moderate extent at from 1s. 3d. to 1s. 5d. per lb. In second-class Monings and Wopaks, of new season, sales have been made from 1s. 6d. to 1s. 11d., being about previous rates; fine to finest have been in demand from 2s. to 2s. 6d. per lb., the finest grades being still wanted for export. Fine to finest Kaisows maintain former value. Tayshans, of old import, have been sold to some extent at 1s. 0½d. per lb. for fair quality. Common Oolongs have been inquired for; medium to good are difficult of sale, but fine are in moderate demand. A few fine Souchongs have been taken at full prices, but the great supply renders buyers cautious, and sales difficult to make, except in very small parcels; the medium kinds remain without change. Flowery Pekoes have sold at very low prices, at public auction, from 11½d. to 1s. 1d. for common to fair quality. Common to fair Scented Capers remain dull of sale; good to fine have been in better request at previous prices. Good to fine Foo-Chow kinds have sold 1d. per lb. lower, fair to good Canton-make Orange Pekoes have sold to a moderate extent at previous prices, fine to finest have also been inquired for. Fair to good Foo-Chow kinds have sold 1d. per lb. lower; fine to finest maintain former value. Uncoloured Japans have sold to some extent for export at rather higher prices. Indian Teas at public auction went at former prices. Green teas continue scarce, and all the good to fine descriptions fully maintain former value; some Ping Suey kinds, recently to hand, realised extreme rates. There has been some demand for fair to good Hysons at former prices. Japan Young Hysons have also found buyers at former rates. Imperials continue scarce, and prices fully maintained. All country kinds of Gunpowder are in very limited supply, and extreme rates have been obtained for the few offering. Canton-made greens show no change to notice. 1,732 packages Indian tea were offered on the 12th inst., of which 1,668 packages were sold. The sales which commenced on the 19th inst. comprised 52,170 packages, of which 41,533 packages have passed auction, and 23,579 packages have been sold, including 20,364 packages without reserve. The

Digitized by Google

following is a list of the sales:—3,947 packages Congou, 7d. to 1s.; 8,072 packages Congou, 1s. to 1s. 6d.; 790 packages Congou, 1s. 6d. to 2s. 3d.; 1,186 packages Souchong, 9½d. to 2s. 0½d.; 154 boxes Oolong, 9½d. to 1s. 9½d.; 3,545 boxes Scented Orange Pekoe, 8½d. to 2s. 1d.; 43 half-chests Padrae Pouchong, 1s. 2¾d.; 1,074 packages sea-damaged tea, 2d. to 6¾d.; 1,010 boxes Scented Caper, 7¾d. to 1s. 2¼d.; 89 half-chests Hyson, 1s. 4¾d. to 1s. 10¾d.; 407 half chests, 318 boxes Young Hyson, 7d. to 1s. 4d.; 37 half-chests Imperial, 1s. 1½d.; 840 boxes 22 half-chests Gunpowder, 1s. 3d. to 1s. 9d.; 108 boxes Kaisow Buds, 1s. 3d.; 658 half-chests Flowery Pekoe, 11¾d. to 1s. 9½d.; 479 boxes Orange Pekoe, 9¾d. to 1s.; 200 baskets Brick Tea, 2d.; 231 half-chests Twankay, 7d. to 9¾d.; and 392 packages sundries.

SILK.—A notice will be found in our Postscript.

SUGAR.—The heaviness of the market has not abated, and with little offering only small purchases have been made at drooping rates, now ruling about 1s. per cwt. lower than last week. In foreign the only business reported on last market-day was 5,500 bags Clayed Manila at 40s. 6d. Penang (price in bond): Grey and white, 32s. 6d. to 33s. 6d.; brown and yellow, 23s. 6d. to 32s. 6d. Siam and China: White, 30s. to 34s.; brown and yellow, 21s. to 29s. 6d. Manila: Clayed, brown, and yellow, 26s. 6d. to 28s; Muscovado, 20s. 6d. to 21s. 6d. Java: Grey and white, 33s. to 35s.; brown and yellow, 22s. 6d. to 32s. 6d.

COFFEE.—The market had a quieter tone last week, and for Plantation Ceylon a reduction of 6d. to 1s. per cwt. has in most instances been established. Java (price in bond) is quoted 60s. to 83s.; Singapore, 58s. to 70s.; Sumatra and Padang, 58s. to 70s.

COTTON.—The total import from China and Japan in 1863, was into London 14,500 bales, and into Liverpool, 146,307 bales—total, 160,867 bales of 130 lbs. each. Continued flatness existed during the past week, and even at a pretty general decline of ⅛d. per lb., barely 1,200 bales have been sold on the spot, part good fair Tinnivelli Madras at 22⅛d. to 23d. For arrival, 5,200 bales have been taken, the bulk China, at 18⅜d. to 19⅛d.

RICE.—The market on the spot has remained extremely quiet, and nothing of importance has been done, but for cargoes to be shipped in the Spring, there has been a renewal of inquiry, and three, together 4,000 tons, have been sold at 10s. 9d. for Nakrenzie or Ragoon. No business of consequence doing in Java.

CASSIA LIGNEA is about 2s. per cwt. cheaper, and of 872 cases at auction a few only sold at 86s. to 89s. for middling 2nd to 1st pile. Buds: Much dearer; single chests sold privately at a quotation of £16; 42 boxes at auction retired at £17, since selling slowly thereat.

DRUGS.—Cubebs: Are 10s. per cwt. lower, owing to increased supplies; and of 1,126 bags at auction one-fourth sold at £4. 10s. to £5. for fair but stalky to very good. Dragon's Blood: Flat; only four cases at auction, retired. Rhubarb: Has risen 9d. to 1s. per lb., and of 168 cases at auction, one-fourth sold at 4s. 3d. for good flat, and 3s. 3d. to 4s. fair to good round; good business likewise done privately upon corresponding terms.

GUMS.—Benjamin: Steady; and of 84 cases at auction three-fourths sold at £12 to £12. 15s. per cwt., for false packed 2nd quality; £6. 5s. to £10 fair to fine 3rd. Damar: Remains flat; and of 522 cases at auction, a small portion only found buyers at 45s. to 45s. 6d. per cwt. for good. Gamboge: Very dull; 59 cases at auction, all retired.

OILS.—Anniseed: Considerable business has been done on the spot, and for arrival at 6s. to 6s. 3d. per lb., upon which terms no more can be had; 6s. 4d. has since been paid, and for single cases 6s. 5d. Cassia has gone back 9d. to 1s. per lb.; limited business done since our last, and the market now flat at 10s. sellers, 9s. 9d. buyers. Cinnamon steady. Of 14 cases at auction, half sold at 2s. 4d. to 2s. 7d. per oz. for good. Mace and Nutmegs: Nothing doing; Nutmeg Paste cheap; sales at 1d. to 1¼d. per oz.

HEMP.—Manila: This market has been very animated, with extensive operations for arrival and on the spot, attended with an advance of £2 to £3 per ton. 3,391 bales at auction, mostly retired.

SAGO.—Large and medium firm; small Pearl a shade easier. 2,311 packages at auction, mostly sold at 22s. 6d. to 24s. per cwt. for fair to very good small, and 19s. to 21s. 6d. large and medium. Flour: No auctions held; moderate business done privately at 15s. 6d. per ton. Tapioca: 516 bags of Penang, at auction, were withdrawn; middling white, 2¾d., siftings, 1¼d. per lb.; 342 boxes of fair to fine white Pearl were realised at 20s. to 20s. 6d., being again cheaper than the previous sales.

TERRA JAPONICA.—Cutch, Pegue: Has gone back in value 6d. per cwt., but 3,988 bags at auction were mostly sold at 24s. 6d. to 26s. for middling to fine; little private business passing. Gambier had also again receded 3d. to 6d. per cwt. Only 718 bales at auction sold at 21s. 6d. to 22s. for middling to fair block. Fair transactions have taken place privately upon similar terms.

SPICES.—Cloves: Not any Penang brought forward; Zanzibar ½d. pe lb. dearer; and of 3,765 bags at auction, the bulk sold at 2⅞d. to 3¼d. for ordinary to very fair. Mace: Continues very firm; and 25 cases Penang, 3 Sincapore, and 11 cases Madras at auction were nearly all sold at 1s. 10d. per lb. for fair palish, and 9d. to 1s. 5d. for low dull wormy to very good reddish. Nutmegs: Are 1d. per lb. dearer, and of 13 cases Penang, 6 cases Sincapore, and 37 cases Madras at auction, the bulk sold at 2s. 8d. to 4s. 1d. per lb. for bold ordinary to fine; and 1s. to 1s. 5d. ordinary small to middling medium. Pepper: Black continues gradually to improve; 2,951 bags Singapore at auction, mostly sold at 3⅛d. to 3¾d. per lb., and 2,169 bags Penang at 3⅜d. to 3¼d. Fair business done privately, and the market remains firm. White: Steady; and of 564 bags Singapore at auction, half sold at 5¼d. to 5⅝d. per lb. for middling to fair, and 60 bags Penang sold at 5d. for ordinary.

TIN.—There has been considerable speculation in this metal during the month, with large operations on the spot and for arrival: prices were driven rapidly up to £123 for Straits, three months prompt, £120 cash, and £123 for arrival; but for the last week the market has been very quiet, and prices have receded £2 to £3 per ton.

TOBACCO.—Java: The imports have been bad and dear until lately, when they have been quite the reverse; and the stock now on sale is the most desirable in every respect that has been seen for years. The sales of the month have been large. Manila: Another year has elapsed without bringing any supplies, but it is hoped that the Manila Government will alter their suicidal course, and allow regular auctions to be held in future. A far better course would be to allow anyone to buy it from the growers for export, the Government doing as is proposed by the Federal Government—laying a tax on it. Japan: Very scarce till the large arrival, which has been nearly all sold this month. Another lot just in is not yet landed. This article of import, though wretched in quality, possesses properties that are at present highly in favour with our manufacturers; the greatest care is requisite to maintain this, for, if it is lost, Japan would barely fetch half the price in other markets. The quotation is 4d. to 8d. Manila cheroots and cigars have been in large demand since the reduction of the duty, and until the supplies, recourse was obliged to be had to the Dutch markets. On the first arrival of the new, prices were let down needlessly low; soon after, news arrived of the advance in price at the factory. Next, a ship reported with a large quantity is found to have dropped more than half at Batavia. The stock here is very moderate; there can be none for months, and holders of No. 2 are now up to former quotations. No. 3 are scarcely inquired for, and much cheaper. The present quotation is 7s. 3d. to 7s. 9d.

JAPAN WAX.—Steady, but not much doing; of 321 cases at auction a few sold at 70s. to 70s. 6d. per cwt. for five large saucers.

MISCELLANEOUS.—Galls: All kinds—Bussorah, China, and Japan—very scarce, and much inquired for. None at auction. We quote Japan and China 50s. to 70s. per cwt. Camphor: Remains firm, and in demand, notwithstanding excessive supply; moderate business done privately in China at £5. 7s. 6d. per cwt., and 292 chests at auction were mostly sold at £5. 5s. to £5. 10s. Gutta Percha: Rather quiet; 19 tons at auction all retired. India-rubber: Remains very inactive, with scarcely any inquiry for either Batavia, Sumatra, or Penang; 165 baskets Java at auction, all retired. Musk: Has again experienced good demand, and 52 caddies sold at auction with spirit, at 27s. to 30s. per oz. for middling to good Tonquin, and 21s. 6d. pickings; but of 10 tins Grain only two found buyers at 40s. for middling. Rattans: Firm and in demand. Sapanwood: Firm; of 58 tons Manila at auction half sold at £9 to £9. 5s. per ton, and 31 tons Siam retired: very little private trade. Mother-o'-pearl Shells: Arrivals of Singapore, which are held for 150s. per cwt., with buyers at 140s. Star Anniseeds: Remain very scarce, and are much wanted. Sticklac, Siam: Remains very flat, and 390 cases at auction were all retired. Ivory: Sound Siam is in demand, and very scarce. Tortoise Shell: Auctions confined to 6 cases Singapore; sold upon fully previous terms, 11s. to 17s. per lb. Turmeric: Nothing doing; 40 bags China and 50 bags Java at auction all retired. Vermilion: A good deal inquired for, with very little offering.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod, £9. 10s. to £10; hoops, £11; sheets, single, £12; Staffordshire bars, £10. 10s.; rails, £8.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £120 per ton; yellow metal, 10d. to 10½d. per lb.

TIN.—116s. for block; 117s. for bar. Tin plates, best charcoal, I.C., 30s. to 31s per box.

LEAD, &c. — English Pig, £21. 5s. to £21. 10s.; W.B., £22; shot, patent, £24; sheet, £21. 15s.; spelter, £20. 15s. to £21; zinc, English sheet, £26. 10s.; quicksilver, £7. 15s. per bottle.

The following is from the Circular of Messrs. French and Smith:—The Welsh and Staffordshire iron market continues strong, with a good demand. Scotch Pig has fluctuated a good deal, and is not now at all active. Copper: Ores continuing very scarce, the price again advanced at the Swansea Ticketting about 7 per cent., and yesterday the English Smelters declared an advance of £5 per ton on all descriptions of copper. Tin: English is very steady at quotations. A parcel of Straits has been spoken of as obtainable at £118 cash, the general quotation is, however, £119 to £120. Tin Plates in great request. Lead also in demand, and price has again improved from 5s. to 10s. per ton. Spelter has been easier the last few days. Quicksilver is only to be had in small quantities for early delivery, and price quoted is £7. 15s. per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

From PENANG.—At LONDON: John Masterman, Daylight, Nipisiquit, Teesdale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

The freight market is quiet, and without any change of importance to report. Outward rates show no improvement, although the amount of disengaged tonnage in port is small. British vessels are readily placed homewards from the East, especially from China and Manila.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and 37s. 6d. For Shanghai: £45 and 47s. 6d. to 50s. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £24 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

Amsterdam, Jan. 15: The Johannes Lodewyk, v.d. Waal, and the Kinderdyk, Zwanenburg, both from Batavia, have arrived at Brouwershaven, the former with damage to bulwarks, the latter with loss of bowsprit, cutwater, and cathead, having been in contact with one another 13th January, in Brouwershaven Roads.

The Lochleven Castle, for Singapore and Penang, put back to the Clyde, Jan. 18, much strained and leaky.

Deal, Jan. 18: The Benvenue, Keay, from London for Singapore, has been supplied with an anchor and chain to replace others lost.

The Swallow, from London for Shanghai, was wrecked, Nov. 26, during a severe gale near Cape Receife—crew saved.

TERMS OF BUSINESS AT THE HEAD OFFICE IN LONDON.

The Bank receives deposits at ten days' notice of withdrawal, on which interest is allowed at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not exceeding 5 per cent. The rates of interest allowed on deposits for fixed periods vary according to amount and the length of time for which they are made.

By special agreement quarterly or half-yearly payment of interest is allowed on deposits for six, nine, or twelve months.

The Bank issues drafts on its branches in India and China, and circular notes and letters of credit, payable throughout Europe, for the convenience of travellers per Overland route.

The Bank purchases approved bills on India and China, and also receives the same for collection on private account.

The Bank undertakes the purchase and sale of Indian and other securities, and receives the same for safe custody.

The Bank realises interest, pay, dividends, pensions, or other moneys for remittance through the Bank or otherwise. On remittances through the Bank no commission will be charged.

The Bank effects the registry of Indian Government loan notes, so that the interest may be paid in England.

The Bank grants credits in favour of parties abroad. Applications for such credits must be sent in at least three days before despatch of the mails, otherwise they will be deferred until the following mail.

Applications for drafts, bills for collection, and all matters involving correspondence by the mail, must be sent in one clear day before its despatch.

Every other description of Indian banking and money agency business conducted, and the utmost possible facilities given to parties in their transactions with India, China, &c.

Forms and powers of attorney furnished at this office.

Office hours, 10 A.M. to 3 P.M.; Saturdays, from 10 to 2.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £500,000. Reserve Fund, £100,000.

The Bank negotiates and collects bills and grants drafts, payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all, with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 ,,

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAFRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

ESTABLISHED IN INDIA, 1833. PAID-UP CAPITAL £1,000,000 (One Million Sterling). SUBSCRIBED CAPITAL, £2,000,000 (Two Millions Sterling), in 20,000 Shares of £100 each. RESERVE FUND, £192,658 17s. 8d.

HEAD OFFICE, 27, Cannon-street, London, E.C.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong and Sydney.

Current Accounts of firms and individuals are kept at the Head Office, on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received at ten days' notice of withdrawal, at rates fluctuating with those of the Bank of England; and for longer periods at fixed rates, particulars of which may be obtained upon application.

Every other description of banking business and money agency, British and Indian, transacted.

Letters of Credit and Circular Notes issued, payable at the chief cities of Europe and Asia, and also at Cairo and Alexandria.

MACKINTOSH BALFOUR, General Manager.

NORTH CHINA INSURANCE COMPANY.—A General Meeting of the Shareholders of the Company will be held at the residence of Messrs. Gilman and Co., on Monday, 4th January, 1864, for the transaction of the following business:—

1.—To elect Directors of the Company for the year 1864. The retiring Directors are re-eligible, and will offer themselves for re-election.

2.—To consider an alteration in fundamental regulation of the Company, No. 11, with a view of making policies payable at thirty days' sight (instead of sixty days' sight), in conformity with the established custom of local offices.

By order,
W. LEMANN, Secretary pro. tem.

Shanghai, 1st Dec., 1863.

NORTH CHINA INSURANCE COMPANY.—NOTICE.—That in all policies of the Company granted on and from this date, the percentage under which Tea and Silk are warranted free from average, will be reduced to three per cent., instead of five per cent. as formerly.

By order,
W. LEMANN, Secretary pro. tem.

Shanghai, 1st Dec., 1863.

F. BLACKHEAD & CO.
AUCTIONEERS, SHIP CHANDLERS, AND COMMISSION AGENTS,
HONG KONG.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

ADAMS, 76, King William-street, London, E.C.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa, &c, with Plates. Post free by the Author, 13 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Patients in India and the Colonies can be successfully treated by letter, by enclosing the consultation fee of £1, and medicines forwarded with secrecy and despatch. Consultations daily from 10 to 3 and 6 to 8.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS.—SATISFACTORY RESULTS.—Whenever the blood is foul, the stomach disordered, or the bowels irregular, these Pills prove infallible curatives. A gentleman who had been a sufferer for years, though he had sought the best professional aid, writes:—I cannot describe the effect your medicine had upon me; it carried off more bile and made me feel lighter and more cheerful than all the medicine I had taken previously." Holloway's Pills strengthen the stomach, prevent biliousness, purify the blood, raise the spirits, and give energy to both body and mind. In diseases of the head, heart, and kidneys, these Pills are invaluable, not only removing dangerous symptoms, but warding off the dire effects often resulting from injudicious treatment.

How, A. J. How, Fearon, and B. A. Clarke.—To Shanghai: Mr. L. S. Dunlop, H. Evans, and Mr. Eyles.

Summary of News from the Far East.

JAPAN.

We have no later advices from Japan by the French mail steamer delivered to-day. There appears to have been no arrival at Shanghai or Hong Kong from that quarter since the departure of the previous P. and O. mail, details of which were given in our issue of January 27.

The following is an extract from a private letter, dated Yokohama, Dec. 1, 1863:—"The *Pearl*, 21, screw, Captain J. Borlase, leaves to-morrow for Hong Kong and Portsmouth. The 'old stationers' are clearing out, and in a month or six weeks the flag will be the senior ship on the station, Mr. Parker, master of the *Euyralus*, goes home in the *Pearl*, invalided. Commodore Osborn and his followers have met with unexpected disappointment, and the Anglo-Chinese fleet no longer exists. It appears that Prince Kung (the Regent) wanted Osborn to be subject to the orders of the Foutais, or heads of provinces—a proposition which the commodore strenuously opposed, as being contrary to the Order in Council, and derogatory to his position. The matter could not be settled, so the squadron is dispersed. The officers and men return home. The new ships go to Bombay for sale, and those bought from the Government will be returned. It is said so great was the anxiety of the Chinese authorities to obtain two or three Whitworth guns that they offered to place weight for weight of pure silver in the scales to purchase them; but even this was refused. Brother Nathan (American) has been nicely checkmated in his attempt to make dollars by supplying Dahlgren guns to Prince Satsuma, the *Scotland* (a sister ship to the *England*, burnt at Kagosima) having been seized by the Chinese for shipping stores at Cumsingmoon, a port not opened by treaty. At Yokohama everything is quiet, but no one can say how long such a pleasing state of affairs is to continue. The *Tartar*, 20, screw, Captain J. M. Hayes, reached Yokohama a few hours after the last mail left. The cold weather has set in here; the thermometer was at 33 deg. this morning. At Nagasaki everything is quiet. Mr. Alexander F. Boxer, master in command of the *Hesper*, goes to Hong Kong as acting master-attendant, vice Swain, invalided."

CHINA.

SHANGHAI.

Our dates from this port are to the 20th Dec. The *North China Herald* of the 19th states that until the opinion of the Court of Peking has been ascertained regarding the Footai's recent violation of his promise to the rebel Wang, Major Gordon will refrain from further operations. The *Herald* considers that any attempt to impress upon the Footai that his breach of faith towards the Na-Wang and his associates was wrong, because it was dishonourable, would fail, for a Chinese is incapable of appreciating the dishonour. But if he finds that the consequence of his conduct has been to deprive him of the all-important aid of the disciplined Chinese contingent, he will in future refrain from acts of treachery which involve consequences so serious as to eclipse the immediate benefit to be derived from them. The Footai's career has now been stopped in the full tide of conquest. The loss of Soochow has inflicted a far more serious loss on the rebel power than the mere material loss of an important city. It was regarded

Digitized by Google

as a principal stronghold; and its fall has depressed their courage proportionately to the reliance which had been placed in its strength. They would naturally conclude that if Soochow were untenable against Gordon's prowess, the attempt to defend smaller cities must be hopeless. The evacuation of Woosih was the first fruit of this conviction, and the remaining cities between Soochow and Nanking would have quickly followed on the first appearance of Gordon's troops before their walls. These prospects are now effectually checked. The news of Gordon's quarrel with the Footai will spread far and wide through the rebel armies; and their courage will revive when they learn that they have in future to deal only with their disguised enemies "the imps." We are sure (continues the *Herald*) that Sir Frederick Bruce will see the impossibility of Gordon again acting in concert with a man who recklessly violates, not only his own word, but that of others, and will urge the removal of the Footai to a scene where his peculiar talents may be employed without risk of offending the prejudices of foreigners in favour of truth and honesty.

MEETING OF THE FOREIGN CONSULS.

A meeting was held at the British Consulate on the 16th December, at which Major-General Brown was present. Mr. Seward, the United States Consul-General, was in the chair and the Consuls of all the European Powers attended. After the Chairman had read the statement of Major Gordon with respect to the surrender of Soochow, and the execution of the rebel leaders and pillage of the city, General Brown said it would be impossible for Major Gordon to co-operate further with the Footai. Unless, in fact, the Government of Peking disavowed the latter's proceedings, there would be no alternative but to withdraw altogether from active support of the Chinese Government.

Mr. Kroes, the Netherlands Consul, stated that he had heard something from M. Bonnefoy, commanding the French force, to the effect that the rebel leaders, after entering into their agreement with the Footai, had sought to fortify themselves within the city, and to oppose further resistance.

General Brown replied that in the interview he had with the Footai on the 11th, the latter did not attempt to advance any justification for the act, simply endeavouring to maintain that, granted he might be considered to have done wrong, foreign nations were not concerned in what had passed. Replying to a question from M. Rameau, the acting French Consul-General, General Brown stated that Major Gordon's connection with him as a British officer was such that he could not do otherwise than afford him protection and support, but that his instructions to him were to remain inactive until the decision of the Imperial Government on the point should be received. His attitude was to be one purely defensive, and he would cover Soochow as a point indispensable to the safety of Shanghai. As regarded the retention of command by Major Gordon, he felt happy in having been able to see him still at the head of the force, since, were he to resign, as he was undoubtedly anxious to do, there could be no doubt whatever that the larger part would join the rebels, and carry to them an accession of strength which the Imperialists would be powerless to resist. Of this danger he had fully warned the Footai, who, he believed, was quite alive to it, and who expressed relief when he was told that Major Gordon would still remain in command.

Mr. Cunningham (Swedish Consul) adverted to the confusion certain to ensue in case the Footai should refuse to continue the regular payments to the force.

Mr. Dent (Portuguese Consul) was strongly of opinion that a material guarantee for the payment of the force should be obtained, and that the Consular body, by virtue of their interest in the safety of Shanghai, were entitled to require such a provision.

The following resolution was next offered by Mr. Markham (the British Acting-Consul), and seconded by Mr. Keswick (Danish Consul), "That this meeting, as representing the whole foreign community, views with unqualified disapprobation the late proceedings of the Footai at Soochow, as an act of extreme treachery abhorrent to human nature, calculated to withdraw from the Imperial cause the sympathies of Western nations, and the aid of the gallant officers who have hitherto assisted them." Passed unanimously.

Discussion next ensued on the subject of the measures likely to be rendered necessary, pending the receipt of the views of the Government of Peking, and of instruction from the foreign Ministers. It was considered by several Consuls advisable that the meeting should not separate without the adoption of some means for securing the pay of the disciplined force, whilst by others it was thought a matter beyond the province of the meeting to discuss, and an eventuality which might be left to be dealt with by the military authorities. A resolution to the effect that a material guarantee should be obtained, securing the pay of the force, was proposed by Mr. Cunningham, and seconded by Mr. Dent, but was not carried.

The meeting dissolved, after passing resolutions of thanks to General Brown for the information afforded, and to the Chairman for presiding.

Bulkly, who murdered Captain McKinnon a few months ago at the International Hotel, in the French Concession, and caused so much excitement, has at length been arrested. He had taken passage for Havre, *via* Nagasaki, on board the French brig *Jean Joseph*, and was recognised at the latter port by a Mr. Lozey, who was present on the occasion of the murder. The arrest was made by the French consul, as Bulkly was on board a French ship, but he will, we presume, be sent to Shanghai for trial at an early date. Of the many outrageous acts which have been perpetrated in Shanghai during the past few months none has excited so much attention or horror as the murder of McKinnon. That men of the stamp of White and Webster should give way to their brutal instincts and resort to revolvers on the slightest possible provocation may be comparatively intelligible. But when men who hold in a certain degree a respectable position in society, at any rate sufficiently so to render them eligible residents at a respectable hotel, reply by a bullet to an unpalatable argument, the most severe measures of repression which the law allows become necessary. Bulkly's trial will, of course, only be a *pro forma* one, as the murder was an open one.

The W. M. and Wardens elect of a new Scotch Lodge about to be opened in this settlement, gave a banquet on Monday evening, the 30th Nov., at which a number of the members of the craft in Shanghai were present. Covers were laid for sixty-four, and about fifty sat down. The room was tastefully decorated with flags, and the dinner and wines excellent. The following toasts were drunk:—"The Queen," "Supreme Rulers of our Respective Countries," "Grand Lodge of Scotland and all other Grand Lodges," "The Masonic Lodges in China," "The Cosmopolitan Lodge," "Absent Brethren," "Our Guests," "The Ladies," and "The Press." The new lodge is to be named "The Cosmopolitan," and will be under the government of Bro. Donaldson, W. M.; Bro. Farr, S. W.; and Bro. Daly, J. W.

The sentence of death, passed by the American Consul on David Williams, who was the principal in the *Jupiter* piracy and murder case, has been confirmed by Mr. Burlinghame. The unfortunate man will suffer on the 18th December.

According to the correspondent of *The Times*, the following was the programme after the capture of Soochow:—

"Pending the receipt of Sir Frederick's reply, Gordon will act solely on the defensive, protecting Soochow in case the rebels should gather courage to attack it, but strictly refraining from any offensive movement. The tide of Imperialist success will thus be arrested when it promised to carry all before it. The Chung-wang was known to despair of further successful resistance, and there can be little doubt that the remaining rebel cities between Soochow and Nanking would have opened their gates directly Gordon approached. Soochow was considered as impregnable, and, having lost it, the rebels would naturally look on the defence of less strongly fortified places as hopeless. Woo-sih, a city on the Grand Canal, about thirty miles from Soochow, had already been evacuated, and overtures of surrender had been received from the important city of Kia-shing. The news of Gordon's intended inactivity will quickly spread through the rebel districts, and all thoughts of surrender will be abandoned. They readily acknowledge the immense superiority of the disciplined troops, but express utter contempt for the Mandarin soldiers as adversaries. Finding that for the future they will have to contend with these alone, their courage will revive, and the Futai will have the gratifying reflection that by his treacherous and cruel conduct towards the rebel leaders he has checked a career of success which promised fair to extinguish the rebellion in the province.

"It is to be feared that the Court of Peking will not be persuaded to view the Futai's conduct in the light in which foreigners look on it. According to Chinese notions, to compass

Digitized by Google

two such important ends as the capture of an important city and the punishment of four noted rebel leaders, at the simple cost of a breach of faith, is rather a proof of diplomatic acuteness than a subject for reprehension. During the Futai's tenure of office nearly half the province has been recovered from the grasp of the rebels. Two years ago they were close to the gates of Shanghai; now their nearest station in this province is Chang-chow, about half-way between Soochow and Nanking. With the exception of the siege of Soochow, in which Gordon derived considerable assistance from the Mandarin soldiers, every success which has led to this result has been achieved by the disciplined troops, led by foreign officers and commanded by a foreign general. But it is in the highest degree improbable that more than a very small share of credit will have been awarded to them in the Futai's despatches to Peking. He himself will figure therein as the successful leader, and Mandarin troops as the men to whom the Emperor is indebted for the re-establishment of his authority in so important a portion of his dominions.

"Persuaded that this is the case, Prince Kung will hardly be likely to accede to any request by our Minister to express disapprobation of conduct on the part of a high officer which, according to Chinese notions, is really justifiable, and which, in this particular instance, resulted in the submission of an important city, and the destruction of four noted leaders of revolt. It is possible that he may be sufficiently enlightened to appreciate the real value of the force to the Imperialist cause, and to give Gordon permission to act independently, not because the Futai has done wrong, but in order that the Imperialist cause may not suffer. This, it seems to me, is the utmost that can be expected. If even this be refused, no alternative seems to remain but to withdraw permission from English officers to aid the Imperialists, in which case the Quinsan force would probably be disbanded. In the meantime, the Futai has taken up his residence at Soochow, which is garrisoned by Mandarin soldiers. Gordon is shut up in Quinsan, and unless a projected expedition by Ching against the small city of Pingwang be carried out, it seems likely that active operations are at an end for the winter. A meeting of foreign consuls was held on the

"That this meeting, as representing the whole foreign community, views with unqualified disapprobation the late proceedings of the Futai at Soochow, as an act of extreme treachery abhorrent to human nature, calculated to withdraw from the Imperial cause the sympathies of Western nations and the aid of the gallant officers who have hitherto assisted them."

"The propriety of taking some means to secure the pay of the disciplined force, pending the receipt of instructions from Sir Frederick Bruce, was next discussed; but the meeting concluded that any such matter was beyond its province. It is certainly possible that the Futai may decline to pay the troops if Gordon will not act; but he is unlikely to widen the breach already existing between himself and the foreign authorities."

The *crim. con.* case of "Andrews *versus* Bellwood," master of the British ship *Marquis of Argyle*, noticed in a previous issue, has ended in a verdict of £1,500 to the plaintiff Andrews, a clerk in the Agra Bank.

The *Shanghai Recorder* of December 15 gives the following as the latest from Soochow:—

"Lieutenants Cardew, of H.M.'s 67th Regiment, and Storey, of H.M.'s 99th Regiment, arrived here with their battalion of Disciplined Chinese (formerly commanded by Captain Kingsley) on Saturday morning. This is the first fruits of General Brown's visit to Major Gordon; doubtless other necessary and judicious arrangements will follow.

"We understand that General Brown returned yesterday per *Tsatlee*, from Quinsan, accompanied by Capt. Murray, R.A., Capt. Hartman, D.A.Q.M.G., and Mr. Mayers, of H.M. Consulate. Major Gordon, with his force, still remained at Quinsan, and the Footai continued in Soochow. We are not yet in possession of particulars with regard to what has taken place, but we understand that an interview took place between the General and the Footai, on Friday, the 11th inst., when we believe General Brown expressed to the Footai the horror and indignation generally felt in consequence of his late atrocious act, and warned him that upon the view taken of his conduct by the Government of Peking, must undoubtedly depend the future course of foreign policy with China. The Footai, we have been told, appeared much disturbed at the tenor of the interview. With regard to Major Gordon's force, we understand that its gallant commander, waiving his private feeling for the public good, will, in the present emergency, retain command, though without further co-operation with the Footai; and pending the decision of the Peking Government upon the conduct of the latter, the force will remain in *statu quo*, unless under circumstances of pressing danger to the country.

"The adopted son of the Na-Wang, a fine youth of eighteen, remains under the protection of Major Gordon, by whom his father's body has been recovered, and honourably interred at Quinsan. Major Gordon having learned that some 500 of the Na-Wang's late adherents were still assembled within Soochow, despatched his A.D.C., Major Brown, to the city, for the purpose of withdrawing these men from their position of danger. Major Brown having discovered these men, passed the night amongst them, and marched them from the city on the morning of the 11th. Unfortunately, on reaching the open country on their way to Quinsan, the men were plundered by the braves they met, and four or five were cut down on offering resistance. Major Brown himself was attacked by an Imperial soldier whilst endeavouring to protect these refugees, and would have doubtless suffered for his gallant interference but for the timely arrival of a Mandarin.

"Major Tumblety, with the 1st Regiment, returned to Quinsan on the 12th inst., from the outpost at Fu-she-kwan, having been called in by Major Gordon. The rebel prisoners, who, to the number of 2,000 or 3,000 had given themselves up to Major Tumblety, were dismissed by the latter before leaving for Quinsan.

"With respect to the interior of Soochow, we learn that the entire city has been completely gutted by the troops and peasantry, the latter having slaughtered a number of the rebels on the west side of the walls. We are glad to hear, however, that the accounts which first reached Shanghai with reference to the reported massacre by the Imperial troops were, to a considerable extent, exaggerated. From all accounts it appears improbable that indiscriminate slaughter took place; and we understand that the first party of foreigners who traversed the city; three days after the entry of the troops, saw but one corpse bearing marks of violence, though undoubtedly several hundreds must have perished in the pillage and sack of the place. We cannot learn that much treasure was discovered, though much private property of value was looted by the braves. Silks and furs were being sold in the latter part of last week at Ching's stockades. The Mo-Wang's palace is described as a very pretty place, and appears to have contained very little of value, beyond the furniture of the usual Chinese style, which was taken possession of by Dr. Macartney, whose ambiguous position with the Footai must place him in a position of considerable embarrasment at present. The place, after being stripped, was fired by a shell dropped either accidentally or intentionally among the ammunition with which several rooms were filled, and was in consequence totally destroyed by the fire and explosion.

"The following is the official list of the killed and wounded officers of the East Gate outpost of the city:—

2nd	Regt.	...	Captain Wiley	Killed.
„	„	...	Lieut. King	do.
„	„	...	Captain Maule	do.

The French steamer *Hydaspe* run down the steamer *Hellespont*, from Hankow, near Woosung; crew saved. The *Hellespont* sunk almost immediately.

HONG KONG.

The dates are down to the morning of the 25th of December. The English mail of the 10th of November arrived out on the 24th, just in time to distribute the plum puddings and other good things sent from many a home in England to their relations in the Far East.

A correspondence appears in the Hong Kong papers between the P. and O. Company and the Post-office, giving a caution

Digitized by Google

against the carriage of letters by the hands of officers on board their steamers.

At the criminal sessions William Smith was charged with having with a pistol loaded with ball fired at Thomas Stone with intent to kill and murder him; there was another count for shooting with intent to do grievous bodily harm. Mr. Stone, master shipwright in the P. and O. Company's service, was walking down the Queen's-road with his friend, his chair following behind, the prisoner stopped the chair and got into it, the prosecutor desired him to get out saying the chair was a private one; the prisoner then used abusive language, but got out; he had a revolver in his hand which went off, either fired by the prisoner or accidentally, the shot passing close to the prosecutor.

A constable named Anderson who was present at the time said that when he saw the prisoner draw the revolver, he snatched it out of the prisoner's hand, during which the revolver went off. The prisoner, in defence, said that the men beat him because he got in the chair, and he only drew the revolver to "scare" them.

The jury found the prisoner guilty of shooting with intent to do grievous bodily harm, but recommended him to mercy on the ground that they thought there was some provocation. Sentence, twelve months' imprisonment.

The Legislative Council met on the 22nd of December. Present, his Excellency the Acting Governor, the Hon. the Chief Justice, the Hon. the Attorney-General, the Colonial Secretary, the Auditor-General, the Colonial Treasurer, the Surveyor-General, and the Hon. Messrs. Chomley and Murray.

The minutes of last meeting having been read and confirmed, his Excellency said that it would be ten days yet before the report of the special committee appointed to examine the bankruptcy ordinance could be sent in. The Council then proceeded to amend the draft of the Bill to prevent the use of fraudulent trade marks.

This was the signal for one of the most amusing discussions about eatables and drinkables that perhaps ever occurred a Council board. Nothing was heard sometimes but a confused Babel of—porter—penalty—pint—bottle—hogshead—sold—label—each—bottle—fined $50——What if he sold a dozen? —I think every bottle would carry the penalty of £5—the innocent purchaser—no—as it stands, the manufacturer, for whose protection the ordinance is framed, is not one whit protected by it.

The Ordinance was finally revised and passed under the name of "An Ordinance to prevent the fraudulent marking of merchandise," and was numbered 8 of 1862. His Excellency the Acting Governor next informed the Council that the main object of the meeting that day was the establishment of a mint in Hong Kong for the purpose of supplying the trade of China and Japan. A letter was read from the Duke of Newcastle recommending a local Ordinance for carrying the scheme into effect.

A second letter stated that the scheme had been matured at home. The establishment is to be under a master; a superintendent of bullion office, an assayer; superintendent of coining office, and machinery; and a superintendent of melting department. Clauses of an ordinance to provide such officers were read to the Council. The above designated officers are to receive, respectively, £1,400, £800, £800, £800, and £800. Various letters having been read, and the matter being brought to a close,

His Excellency read a despatch from the Duke of Newcastle proposing that Hong Kong pay to the Imperial Government a sum of £20,000 per annum for the five years commencing on the first of January, 1865, in part liquidation of the expenses of military protection. The Duke had intended making the demand for the 1st of January, 1864, but on consideration that the Mint's establishment would cost some money, he had determined to delay for a year.

The Mint Ordinance was read a first time and ordered to be printed in the *Gazette*. The Council then adjourned *sine die*.

General Brown, the commander of our forces in China, arrived from Shanghai per steamer *Ganges*, but nothing is noticed in our advices in reference to his movements. No doubt, however, he was there to arrange for the disposition of the 20th Regiment, which had arrived from Calcutta, per P. and O. steamer *Nubia*, at a cost of £30,000—a needless outlay, owing entirely to the conduct of General Brown in despatching to England from Shanghai the 31st Regiment, against the protest of Colonel Neale and Admiral Kuper.

Charles Ryall and Andrew Johnson, the gaol-keepers, were charged with the escape of Stanford, the opium swindler, and sentenced to six months' imprisonment.

The *China Directory*, published by Messrs. A. Shortrede and Co., will appear in January.

The Amateurs gave the first of their performances for the season. The house was little more than half filled, owing, perhaps, to the sum required in the shape of subscription. The latter used at one time to be $15, which many paid with a sigh, then $18, which increased the sigh to a groan, and now the charge, this year, of $20, has proved the proverb that it is the last straw that breaks the camel's back. Numerous patient animals have succumbed to the application of two dollars more, and the house was unfortunately thin compared with former years.

According to the latest returns, the circulation of notes of the—

Oriental Bank was	$1,093,937
Mercantile Bank	777,410
Agra Bank	488,680
India, Australia, and China, ...	413,267
Total	$2,773,294

It is noticed that the cargo of the *Amanda*, from Manila to New York, was on British account, and surprise is expressed that Captain Semmes did not respect it. In another column it will be seen that the cargo was fully insured.

CANTON.

The following letter in the *China Mail* of the 17th December gives an interesting account of the ceremony of laying the foundation-stone of the new Catholic church at Canton:—

The laying of the foundation-stone of a Christian Church at Canton, and within the walls of that city, would have been under any circumstances an event of no ordinary interest; how much more so now that the principal Chinese officers of the province and city were present; especially when one reflects upon the course of events which, since November 1856, has changed the spot on which stood the palace of Yeh and his predecessors the Viceroys of the Two Kuang into the site of the French Cathedral, whose construction is now being proceeded with under the auspices of the Right Reverend Philippe François Zephyrin Guillemin, Lord Bishop of Kuangtung and Kuang Se. Preparations on an ample scale had been made by the erection of suitable temporary buildings in which to receive the guests invited to be present at the expected solemnity; as also for the accommodation of the large trains of the high Chinese officers and their immediate *entourage*, and a body of three hundred Tartar troops under the conduct of a sous-officer and squad of Infanterie legere d'Afrique, who were marched to the ground, "Clarion-en avant," not only for the purpose of giving *eclat* to the spectacle, but also to co-operate with the Chinese police in preserving order; and here it may be said, with reference to this feature of the ceremony, that in general they were tall, good-looking men, carefully and neatly dressed in their peculiarly picturesque uniform, purely Tartar, armed with musket and bayonet, and reflecting great credit upon their instructors by their efficiency in drill and manœuvre. These soldiers formed a double line from the outer gates of the enclosure to the reception-hall, and from it entirely around the foundations of the cathedral. Opposite to the gate of entrance was placed a band of Chinese music, whose shrill strains announced the arrival of the guests, while the usual Chinese salute of three guns, with the "present arms" of the troops, gave notice of the approach of the various officials. The streets adjoining were densely crowded with Chinese, whose curiosity seemed unbounded. Hundreds penetrated inside the enclosure, but the behaviour of all was orderly, and no indication of hostile or unfriendly feeling was visible either in word or act.

At one end of the reception-room the Insignia of the Church were portrayed upon the wall, and beneath stood a desk approached by two steps, a rostrum, as it were, nicely carpeted. At a short distance from it were arranged rows of chairs, the front one of which was occupied by the Viceroy of the Two-Kuang, having on his left the Governor of Canton and the Hoppo, the Vice-Consul of England and Consul of Prussia, and on his right the Tartar General; another officer, whose rank answered to that of Marechal de Camp, the Treasurer of the Province, together with the Consuls of the United States and Spain. The other rows were filled by about a hundred foreigners, amongst whom were the Acting Chief Justice (Judge Ball) and the Assistant Magistrate, Mr. White, of Hong Kong. Several ladies were also present.

Digitized by Google

The scene was at once remarkable and interesting, not only from the old associations connected with the spot on which were now gathered the representatives of many nations and various creeds, but from the unusual circumstance of the presence of the chief dignitaries of the province, who thereby gave to the solemnity its distinctive and exceptional character. I was given to understand that their coming was mainly due to the diplomatic tact and address of the French Consul, Monsieur Le Baron de Trenqualye, whose wishes to secure their co-operation were thus crowned by the most complete success.

Immediately on the arrival of the Viceroy, who came attended by the Governor and Hoppo at 3 P.M., the Consul ascended the rostrum and read an address in which he described briefly but comprehensively the history of the Roman Catholic missions in China, dating from 1583, making particular reference to the well known patronage and friendship extended by the Emperor Kang He to the Italian Missionary Mathew Ricci; his grief at his death and the providing of his place of sepulture over which he raised a costly monument, as well as to the fact, not probably so well known, that at one time there existed in the province of Canton, forty churches, of which seven were in the city itself, and that the number of converts was not less than 300,000.

The Bishop next addressed the company in a discourse more strictly confined to the objects of the Cathedral, and touching on many interesting points in connection with the labour of the missionaries and the founding of the building. Translations of both addresses had been placed in the hands of the Chinese officers, who, with the aid of Monsieur Blancheton, the Consular Interpreter, followed them as they were read, apparently with much interest, the Viceroy often turning to the Governor and drawing his attention to some particular point mentioned in connection with Chinese history.

The laying of the foundation-stone now took place by Bishop Guillemin, clothed in full episcopal costume, with mitre and crozier. This stone was a massive block of granite, so arranged as to slide easily into the place prepared for it; in its centre a space was hollowed out large enough to contain two slabs of marble, presented by Pope Pius the Ninth, one of which was brought from the brook Cedron, and bore the following inscription in Latin and Chinese:—

Ex torrente Cedron ex loco ubi D.N.J.C. lapsus est et genuum S.S. vestigia reliquit.

the other from the Catacombs near Rome, and on which was engraved in the same language as follows:—

Lapis sacerex catacumbis romanis extracus et a Papa Pio IX. dono datus.

These being deposited by the Bishop, the ceremony terminated by the chaunting of the Psalm "*Nisi Dominus*," &c., in procession, around the foundation of the Cathedral—the Viceroy and his colleagues, who had manifested much curiosity in all the proceedings, took their leave, when more than fifty of the foreign community present partook of a repast offered by the Bishop.

In the evening a large party of ladies and gentlemen were entertained at dinner by the French Consul at his Yamun, and thus terminated a day marked by a ceremony not easily forgotten, which was conducted throughout with the utmost order and solemnity, and elicited the respectful attention and sympathy of all present. Those who remarked the earnestness, devotion, and sincerity of the worthy Bishop, whose name is now inseparably connected with an event unprecedented within the ancient walls of Canton, must wish him a full measure of success in his ministry here, wherein he has so long and arduously laboured, and at its close the reward of the faithful in the life which is to come.

SIAM.

The *Singapore Free Press* has the following on the Sultan of Linga, about whom, it will be remembered, there was a discussion in our last session of Parliament:—

The ex-Sultan of Linga lately arrived here in the steamer *Chow Phya* from Bangkok, in disguise, and he has since gone to Muar to join his relative Sultan Ali. His departure from Bangkok was apparently without the knowledge of the Siamese officials, and was rather cleverly managed. It appears it was the ex-Sultan's custom to retire to his room about nine o'clock in the evening, accompanied by one of his wives, and he did not generally make his appearance again until about eleven or twelve o'clock on the following forenoon. He retired, as customary, on the evening of the 14th Nov., but next day he did not open his door at the usual hour. About one or two o'clock in the afternoon some anxiety began to be felt at his long seclusion, and inquiries were made as to which of his wives had been his companion during the previous night, but when the ladies were mustered they were all found present. The door of the ex-Sultan's apartment was then forced open, but it was found he had vanished, and that he had taken with him some valuable krises and other property. As the *Chow Phya* left Bangkok that morning it was at once conjectured that he had gone in her, and this has turned out to be correct. Captain Orton, of the *Chow Phya*, we understand, had no knowledge of the transaction, although it is probable that some of his underlings must have been in the secret. After what has taken place with reference to the ex-Sultan's intrigues on the east coast of the Peninsula, the Siamese Government is naturally annoyed at the manner in which he has chosen to quit Bangkok, as it might bring suspicion on it of having aided in his evasion. This suspicion would be the more likely to arise, as instead of carrying out the intention formerly expressed by the first King of Siam of removing the ex-Sultan to one of the inland provinces, the Siamese Government allowed him to remain at Bangkok, where the facilities for escape were much greater. We believe the first King has assured the Governor of the Straits Settlement that he was entirely ignorant of the ex-Sultan's intention to leave Bangkok and that His Majesty highly disapproved of his conduct. It is supposed to be the ex-Sultan's intention to make his way to Pahang to join Wan Ahmat, and these worthies will probably try to disturb the peace of the Peninsula by an attack on that part of the territories of Johore which adjoin those of Pahang. Wan Ahmat has already been intriguing in that quarter, but if he and the ex-Sultan make any open demonstrations we trust they will be dealt with promptly.

MALACCA STRAITS.

SINGAPORE.

Intelligence reaches us of the capture by the *Alabama* of the following American vessels:—*Sonora*, Captain Brown, and the *Highlander*, Captain Snow, from Singapore for Akyab. The vessel reported to be the British ship *Martaban* turns out to be the American ship *Texan Star*, Captain Pike.

The following particulars are from the *Straits Times*:—Captain Pike, of the British ship *Martaban*, burnt by the *Alabama*, in compliance with our request, has sent us the following statement of the circumstances attending the destruction of his vessel. The statement speaks for itself; and as we do not wish to be hurried into an expression of opinion on a subject which is sure to arrest the attention of every Court in Europe, we must delay our comments till we are well informed as to the legal bearings of the question:—"I left Amherst on the 12th instant for Singapore, having on board a cargo consisting of 12,354 bags of rice. On the 24th inst., at 2 P.M., Pulo Pisang and the Carimons plainly in sight from the deck, made a steamer steering to the north, which upon making out the *Martaban* altered her course directly for us, and when within one mile set the Confederate flag and fired a gun across our bows. In answer I immediately set the British ensign at the peak and hove to. Upon nearing the *Martaban*, an armed boat's crew, with an officer, left the steamer, and came alongside; the officer, when coming on board, demanded to see the ship's papers, which he immediately did. The papers were, register, port clearance, and bill of lading. Upon examination, the officer informed me that they were not satisfactory, and that he should take charge until he could communicate with his commander, Captain Semmes, of the *Alabama*; calling two armed men, one of whom was stationed on the forecastle, the other on the poop, he sent the boat back with a message to Captain Semmes, who at once came on board the *Martaban*, and demanded to see my papers. I handed him the register, which he examined. The register was a *bona fide* British register on parchment, issued by the proper British authorities in Moulmein. After examining this document, Captain Semmes said to me 'that he was not to be humbugged by any false papers—that I ought to have had a certificate that the transfer was legal, and that he should burn my ship. Upon this I said 'that the documents I held were legal and sufficient proof of my nationality, and protested against his burning the vessel.' To this he paid not the slightest attention, but went on deck and said to his officer, 'Sir, you will burn this vessel.' He then returned on board the *Alabama*. The first lieutenant then came on board the *Martaban* and took charge, hauled down the English flag that

Digitized by Google

was lying at the peak, let go anchor, clewed up sails, and made preparations for setting the vessel on fire, staving in the cabin skylights to make a good draught. In the meantime my crew, by his orders, had hoisted out my ship's boat and gone on board the *Alabama*, leaving myself and my officers on board, who were ordered to pack up a few clothes, giving us half an hour to do so and follow them. I was allowed two small trunks, my officers each a small bag, armed men in the cabin watching the packing. I was assured by the first lieutenant that the contents of my two trunks would be respected, but my two chronometers and all my nautical instruments were taken from me. We were then taken on board the *Alabama*, and immediately after the *Martaban* was set on fire.

"The *Alabama* then proceeded up the Straits, and at midnight came to anchor five miles off the town of Malacca. Steam was kept up all night. At daybreak I was called upon to open my trunks, which were searched by an officer and the master at arms; a bag containing 400 rupees was taken from me, and also a night glass and part of my private papers. My officers' bags were searched in the same manner. We were then required to sign our parole not to serve against the Confederate States until exchanged. We were put on board the *Alabama's* boat (my ship's boat having been broken whilst towing) and landed at Malacca. I had passed my examination as British shipmaster at Moulmein, and held my certificate of competency, as also my chief officer. On the part of self, officers, and crew, I beg to express my sincere gratitude for the kindness and friendly treatment shown us by the authorities and European inhabitants of Malacca, who ministered to our every want in the most generous manner, and procured us passage in a native brig to Singapore—they defraying entire expense—we being entirely destitute."

We have received the following communication from Mr. Beaver:—

(To the Editor of the *Daily Times*.)

Sir,—A false aspect having been attempted to be given to the exercise by Captain Semmes of his belligerent rights in burning the vessel called the *Martaban*, of Moulmein, formerly the *Texan Star* of Boston, United States, I request you to publish the following copy of the deposition of Samuel B. Pike, who was master of the *Martaban*. The document speaks for itself, and a certified copy of the original is in my possession.

I have received information that the American vessels *Sonora* and *Highlander* have also been burned by the *Alabama*.—I remain, &c.,

H. R. BEAVER.

Singapore, 30th December, 3 P.M., 1863.

DEPOSITION OF CAPTAIN S. B. PIKE, OF THE "MARTABAN," OF MOULMEIN.

Q. What is your name?—Ans. Samuel B. Pike.

Q. Where were you born?—Ans. Newbury-port, Massachusetts.

Q. Are you a naturalised citizen of any foreign Government?—Ans. I am not.

Q. How long have you been in command of the *Martaban*, formerly the *Texan Star*?—Ans. About two years and a half.

Q. In what port of the United States was the *Texan Star* registered?—Ans. She was built and registered at Boston.

Q. Has she ever had but one register in America?—Ans. There was a change of ownership, and she has had two American registers.

Q. Who were the owners under the last American register?—Ans. John Atkins, Samuel Stephen, George L. Rogers, and myself.

Q. What proportion of the ship did you own?—Ans. One-sixth.

Q. When did you sail from the last port in the United States?—Ans. A year ago last July.

Q. It is stated in the present British register that Mr. Mark Riddell Currie is the owner?—Ans. That is as I understand it.

Q. Do you state under your oath that this sale was a *bona fide* sale?—Ans. I do not state this.

Q. Do you not know that it was intended merely as a cover to prevent capture?—Ans. Yes, I do know it.

(Signed) S. B. PIKE.

(Signed) Witnessed by W. B. SMITH, Captain's Clerk.

LETTER FROM CAPTAIN PIKE.

(To the Editor of the *Straits Times*.)

Singapore, Dec. 31, 2 P.M.

Sir,—With reference to your Extra of yesterday, containing a letter from H. R. Beaver, Esq., in which he states that "a false aspect had been attempted to be given to the exercise, by Captain Semmes, of his belligerent rights in burning the vessel *Martaban*, of Moulmein," I beg to state, that previous to the burning of that British vessel under my command I signed no paper or document whatever, nor was I submitted to any examination such as that said to have been signed by me under oath.

I shall detail the particulars of my interview with Captain Semmes, the only one I had with him before he burnt the vessel I commanded, and to the truth of which I pledge my honour.

Captain Semmes, when he boarded me, came into my cabin. I asked him to be seated; he replied, "I *shall* sit down!" and demanded to see my papers. I handed him my register, a register emanating from the British authorities at Moulmein, which he seemingly read, repeating aloud the name of the owner, Mr. Mark Riddell Currie, of Moulmein, a British subject, and also the date of execution. Turning to me, he said, "I am not to be humbugged with any sham papers; you ought to have a certificate of sale," and (some document which I do not remember) immediately adding, "I shall burn your ship." I protested against this decision, stating that my papers were regular, and were positive proof of the nationality of my ship. Paying no attention to this, he then, with the register in his hand, directed the officer to burn the vessel, and immediately left the ship.

As correctly as I can calculate, the interview did not last more than three minutes. This is the true state of the case to the best of my recollection, so help me God.—I am, &c.,

SAMUEL B. PIKE.

P.S.—In the middle of the night, when on board the *Alabama*, many hours after the ship was burnt, I was asked some questions and signed a paper, the context of which I do not clearly remember—imagine the state of my mind at that time.

The *Thule*, *Amoy*, *Quantung*, and *Keangsoo*, of the Sherard Osborn fleet, have arrived from Shanghai, and sailed for Bombay.

H.M.S. *Scout* left for England on 19th December.

The French transport *European* arrived from Pondicherry with 950 troops, *en route* for Saigon.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London, Dec. 4, Australia; 14, Madura. From Liverpool, Dec. 11, Silver Craig. From Sunderland, Dec. 8, Ben Nevis. From Cardiff, Dec. 10, Benjamin Bargis; 12, Magdalina. From Newcastle, Dec. 7, Etrick. From New York, Dec. 4, Donette.

At AMOY and SWATOW.—None.

At HONG KONG.—From London, Dec. 23, Alchymist. From Liverpool, Dec. 22, Annie Duthie; 23, Bella. From Cardiff, Dec. 12, Solo; 13, General Norwell; 14, Wellic; 20, Norna. From Hamburg, Dec. 23, Gottengen.

At MANILA.—Dec. 3, from Liverpool, Barinaga; 4, Asuncion.

At SINGAPORE.—From London, Dec. 27, Couranto. From Cardiff, Dec. 19, Liberia (Fr.); 29, Ferris. From Hamburg, Dec. 16, Mathilde; 20, Blohm.

DEPARTURES..

From JAPAN.—No report.

From SHANGHAI.—For London: Nov. 27, Nelly; Dec. 3, Star Queen; 10, Balmacarra; 14, Heroes of Alma, Princess of Wales; 17, Lammermuir. For Liverpool: Dec. 5, Glenhuntly; 8, Fow Tsun; 9, Princess Royal, Loodianah; 16, Chryseis. For New York: Dec. 14, Apollo, Elizabeth.

From FOOCHOW.—None.

From AMOY.—For London: Dec. 10, Maria Wilhelmina. For New York: Dec. 14, Louise Kohn; 16, Confucius.

From HONG KONG.—For Liverpool: Dec. 21, Amazone; 22, Esmeralda.

From MANILA.—Dec. 5, for Liverpool, Conference.

From SINGAPORE.—For London: Dec. 19, Pilgrim. For England: H.M.S. Scout. For Bordeaux: Dec. 26, Orixa.

LOADING.

At SHANGHAI.—For London: Egmont, Fairleader, Island Queen, Lansdowne, Marquis of Argyle, Minerva, Sappho, Sir Harry Parkes, Strathallan. For Liverpool: General Putnam, Lodoise, Montmorency, Nonpareil, Royal George, Solway, Spirit of the Times, Young England, Zingara. For New York: Anne Wood.

At FOOCHOW.—For London: Albrecht Oswald, Bankside, Glaramara, Isabella Ridley, Standard, Stuart Wortley, Weymouth. For New York: Kahlamba, Peep o'Day, Queen of the Seas.

At HONG KONG and CANTON.—For London: Ocean Bride, Tamerlane. For Liverpool: Devonshire, Koh-i-Noor, Virginia. For New York: Ceres. For Havre: Tafferette.

At MANILA.—For Liverpool: Elias, Teide. For Falmouth: Manila. For New York: Castiliau.

At SINGAPORE.—For London: Tre Brodre (Norwg.), Early Dawn. For Liverpool: Crusader, Spanker. For Bordeaux: Hydaspes, Saint Mitchell (Fr.), Hoogly (Fr.) For Boston: Pearl (Am.) For Copenhagen: Emma.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Feb. 3, at Deal, from Foo-chow-Foo, Bucton Castle; from Shanghai, Gauntlet.

DEPARTURES.—Jan. 29, from Portland, for the River Amoor, Aalborg; 31, from off the Start, for Hong Kong, Northland; 29, from Cardiff, for Shanghai, Launceston; 30, for Japan, Great Western, from Sunderland, for Singapore, Jane Woodburn.

SPOKEN.—Grondwet, Shields to Sourabaya, Dec. 10, 8 N., 23 W.; Java, Batavia to Falmouth, Dec. 11, 35 S., 19 E. (had lost bulwarks in a gale Nov. 19, in 29 S., 49 E.)

LAID ON.—At Liverpool, for Hong Kong, *via* Cardiff, Beatrice.

ETHNOLOGICAL SOCIETY.—THE EASTERN ARCHIPELAGO, &c.

At a recent meeting of this society, Mr. J. Craufurd, F.R.S., Vice-President, in the chair, an important paper was read "On the Varieties of Man in the Malay Archipelago," by Mr. A. R. Wallace. The term "Oceania" has been applied to the region of islands extending over two-thirds of the Pacific Ocean, the inhabitants of which, though notoriously differing widely among themselves, have been considered by all ethnologists to form one of the most strongly marked varieties of the human race. The paper was an account, from personal observation, of the inhabitants of the chief islands of the Malay Archipelago, and an attempt, by a comparison of these with the inhabitants of the surrounding countries, to arrive at definite conclusions as to their mutual relations or their common origin. From Asia on the one hand, and from Australia on the other, immense submarine banks connect the adjacent islands to the mainland,

Digitized by Google

while beyond the limits of these banks an unfathomable ocean is always found. The great islands of Sumatra, Java, and Borneo are situated on the Asiatic bank, and, from the fact that a number of the largest animals which could not have crossed the sea, such as the rhinoceros of Java and Sumatra, the elephant of Sumatra, and the tapir of Sumatra and Borneo, being all found in some part or other of the Asiatic continent, it is highly probable that all these great islands have formed a part of Asia from which they have been separated by the same convulsions which have raised the volcanic chains of Sumatra and Java. In the like manner, New Guinea and some adjacent islands have been once connected with Australia. The belt of deep ocean, however, between those banks indicates the separation as of very long [existence, and there is evidence in the geological structure of Java and Borneo that some parts of these islands are of recent formation, so that the gulf between the Asiatic and Australian regions was formerly greater than at present,—a conclusion strikingly confirmed by the almost total diversity of the animals of the two halves of the Archipelago. In the western islands all the chief forms of the Asiatic continent are found, while in the eastern half they are chiefly those characteristic of Australia, so that a line drawn across the Archipelago west of Celebes marks the division between two vast zoological areas. Turning from the consideration of the lower animals to man, two very strongly contrasted races are found in the region—the Malays, inhabiting almost exclusively the western half of the Archipelago, and the Papuans, whose headquarters are New Guinea and the adjacent islands, and these range over the eastern area, the people over all the islands as far as the Fiji being identical in their chief features with the Papuans, and the varieties being all forms of one great Polynesian race. But here arises the question, Are these races derived from America or Asia, or have they originated in some of the islands, and thence spread over the whole area they inhabit? The author considered there was evidence to show, which he gave in detail, that they had been derived from none of these sources, but from a great Pacific continent which had, geologically speaking, been recently submerged, and of which the numerous Pacific islands were the residuary relics. The discussion which followed was unusually interesting. Dr. Falconer strongly supported the views of the author as to the derivation of the inhabitants of this region both upon zoological and geological grounds. The elephant ranged on the continent as far north as 30 degrees, and these and other great beasts he believed had passed over during the human epoch on dry land. Certain species of oxen and deer, too, were met with alike in these islands and on the continent of India, but nowhere else on the globe; and while we had a parallel case in Europe, where, before the glacial epoch, there were deer like those of this archipelago, and rhinoceroses and other great mammalia living in this country and over Europe which had spread in from the south, while after the glacial era had passed away there was another fauna of great mammalia which had come in from the north, and arctic in character, we had less reason for objecting to such geological changes in the Pacific as were brought forward by Mr. Wallace to account for the distribution of the mammalia and the two races of man which inhabited those regions. The close proximity of Sicily to Italy seemed naturally to suggest a dismemberment from that peninsula, but the fossil fauna of the late tertiaries there affords convincing proof of its recent connection with Africa, and no doubt within the human epoch the great mammals of Africa had walked on dry land across the present Mediterranean. If such views as we admit in European geology be applied to the Malayan Archipelago, there are good grounds for supporting Mr. Wallace's theories. Sir Roderick Murchison, Professor Busk, Sir William Armstrong, Captain Speke, Mr. Christie, Mr. Bohn, Mr. Crawfurd, and others spoke upon various topics in connection with the paper.

BURGEVINE.

The Times correspondent at Shanghai writes:—Burgevine has at length left China, under pressure from the American Consul. Having become so notorious as a partisan of the rebels, every movement made in their favour by foreigners was naturally traced to his instigation. Rightly or wrongly, the seizure of the *Firefly* was said to have been planned and executed under his direction; his arrest by the Chinese on board the *Feiloong*, which they asserted he was actually endeavouring to carry off when taken, followed immediately, and increased the already prevalent suspicion that he intended to rejoin the rebel cause. The fact of his being allowed to remain at large was exciting much ill-feeling in the minds of the Chinese, who, being themselves firmly convinced of his hostile intentions, looked on the apathy of the foreign authorities as little short of connivance at his misdeeds. The United States Consul accordingly desired Burgevine to leave China, but he at first flatly refused, denying the power of the Consul to interfere, and expressing his willingness to undergo a trial rather than obey. On this he was arrested and confined in the Consular Gaol, until he could be impeached for misdemeanour; but after a week's imprisonment he consented to leave, and took his departure for Yokohama last week in the *Aden*. In whatever light Burgevine's conduct may be viewed by different judges, no one can deny a meed of pity at the close of a singularly checkered and somewhat remarkable career. Three years ago he arrived in Shanghai as second mate of an American ship, and shortly afterwards joined Ward, when the latter collected a band of Manilla men for the purpose of attacking Soonking. The attack was successful, and the Imperialist mandarins gave a large reward, which Ward, according to his custom, appropriated. The band was increased, and Tsing-poo was attempted; but the surprise failed, and the attaking party narrowly escaped destruction. When the foreign authorities interfered and refused to permit a body of foreigners to join either side in the contest, and Ward was obliged to disband his corps, Burgevine was the first to suggest the enrolment of a body of disciplined Chinese. The experiment was made and succeeded, was looked on favourably by the foreign authorities, and prospered. The career of this force was one of unchecked success until Ward's death in September, 1862, at the siege of Tse-kee. Burgevine, who had only partially recovered from a severe wound received at the siege of Tsing-poo, succeeded him in command of the Soonking force, as it was now called, and planned the expedition to Nanking which, through no fault of his, resulted in his disgrace and dismissal. During the three months of his command he had raised the force, from a small number of men in a state of inferior discipline, to 5,000 men, well armed and equipped, and provided with every requisite munition of war. In two months, under the command of Captain Holland, it had fallen to 3,000, and had experienced its first disgraceful reverse before Tai-tsan. In the mean time, Burgevine had twice been to Pekin to endeavour to get reinstated. The first time he obtained fair words and promises, which his return to Shanghai proved empty phrases. On his second visit he was arrested and threatened with death, released eventually at the instance of the Foreign Ministers, and sent back to Shanghai. His whole thoughts were now bent on attaching himself to the rebels, and negotiations were opened which promised to be most satisfactory. It was arranged that Burgevine should take command of a force of Chinese to be equipped and drilled after the European method under his orders. Officers were sent to Soochow for the purpose, and in July Burgevine himself followed, capturing the Kiao-chiao *en route*, and carrying her with him as an earnest of success. At first everything was *couleur de rose*; Burgevine went to Nanking, had an interview with Chung Wang, and was made a prince and second in command of the rebel forces. Money was advanced and sent to Shanghai for the purchase of arms, and the drill of the troops progressed. But difficulties supervened. The arms failed to arrive at the time they were expected. The rebel chiefs, not appreciating the difficulties which attended the transit, in avoiding Imperialist cruisers, became suspicious, and refused to pay the foreigners their wages until the money advanced had been accounted for. The latter, in their turn, became discontented. Burgevine's old wound broke out again through over-exertion and lack of medical attendance. He had resort to stimulants to deaden the excruciating pain, and indulged sometimes to excess. The result is known. Negotiations were entered into with Gordon, which resulted in the secession of the whole foreign contingent from Soochow, and now Burgevine has gone to Japan, broken in mind and body, poorer than when he first landed in China, a victim of Imperialist suspicion and ingratitude. He was indebted to his friends for money to pay his passage, and yet the local Government owes him more than £8,000, which it absolutely refuses to pay. Whether it should be allowed thus to repudiate its obligations towards a man who, in conjunction with Ward, was of infinite service in protecting Shanghai when the foreign troops here few, is a question for the foreign authorities to decide.

DESTRUCTION OF KAGOSIMA.—A public meeting was held in St. James's Hall, Ramsgate, on Tuesday, the 26th ult., J. Nottidge, Esq., in the chair; when Mr. Edmund Fry delivered an address on our late attack on the Japanese. The following resolution was unanimously adopted:—"That this meeting has heard with deep regret and dissatisfaction of the employment of a British naval squadron to bombard the city of Kagosima, and the consequent total destruction of the homes of 180,000 people—an act calculated greatly to prejudice the interest of civilisation and Christianity in Japan."—Last week a meeting was held in the Athenæum, Bristol, to consider the propriety of memorialising the Government in reference to the "late outrage in Japan and destruction of the Japanese city of Kagosima by British ships of war." Mr. H. O. Wills presided, and on the platform were Mr. Woodforde Ffooks (barrister-at-law), Mr. Robert Charleton, Mr. J. Whethered, Mr. J. G. Thornton, the Revs. J. Edwards B. Nicholson, and U. Thomas. The following resolution was passed:—"That this meeting regards with deep sorrow and surprise the recent destruction of Kagosima, in Japan, involving, it is believed, an awful sacrifice of human life, on what is regarded by this meeting as a totally insufficient cause of offence by the Japanese."

THE BRITISH POSSESSIONS ABROAD.—The annual official volume just issued of statistical tables relating to the British possessions beyond the four seas shows us territory exceeding 4,000,000 of square miles, and containing a population of about 145,000,000 souls. There is India, with its 933,722 square miles and 135,634,244 people; the North American colonies (not reckoning the immense Hudson Bay and Red River territories), with their 498,169 square miles and 3,305,872 people; the West Indies, with 88,511 square miles and 1,081,687 people; Australia and New Zealand, with 2,582,070 square miles and 1,333,338 people; and there is Ceylon, the Cape, Mauritius, and the rest. The public revenues of these vast possessions amounted in 1861 to £56,218,420, India furnishing £42,903,234 of this amount. The public revenue of Victoria exceeded £3,000,000, and that of Canada exceeded £2,000,000. The public debt of India is stated at £101,877,081; of the North American colonies, £16,058,724; of the West Indies, £1,695,911; of Victoria, £6,285,060; of New South Wales, £4,017,630; of the Cape, £565,005. The imports into these our possessions amounted in value in the year 1861 to £93,945,885, and their exports to £86,286,034, and these figures are exclusive of Hong Kong and of Gibraltar, from which no return of these particulars is given. From the United Kingdom there was sent to them in that year produce and manufactures of the value of £47,412,166 (again with the omission of two colonies as before, and of the Ionian Islands); to India, £21,679,032; to Australia, £13,467,370. The shipping frequenting these territories in the year, counting both entrances inwards and clearances outwards, amounted to 22,849,641 tons.

THE P. AND O. STEAMER "ELLORA."—The P. and O. Company's steamship *Ellora*, which broke down on her outward passage, and had put into Malta for repairs, arrived at Southampton on the 27th Jan. She left that port on the 19th. The *Ellora* brings 1,499 packages of general merchandise, of which 1,216 are bales of raw silk, value £120,000 sterling. She has neither passengers nor specie.

EMIGRATION TO DEMERARA.—During eleven years no less than 52,064 immigrants have been introduced into the colony. The following table shows the number introduced in each of the eleven years:—

1853	5,483	1859	4,809
1854	2,620	1860	8,152
1855	3,397	1861	7,180
1856	2,269	1862	8,802
1857	2,938	1863	3,192
1858	3,322		

Of these 31,775 were from the East Indies and 9,642 from China, the remaining 10,647 being made up of immigrants from Madeira, the West Indian Islands, the Azores, Africa, and Cape de Verde.

The London & China Telegraph.

LONDON, WEDNESDAY, FEB. 3, 1864.

MAJOR GORDON'S STATEMENT.

THE *Shanghai Recorder* furnishes the statement of the events discussed at the meeting of the foreign Consuls (reported in another column), in the shape forwarded to the papers by Major GORDON. It appears that after the failure of the night attack on the Low-mun stockades, General CHING came to the MAJOR and informed him that LAR-WANG, with three other Wangs and thirty-five Tunchwangs, and their followers, had opened negotiations for the coming over of their troops, and handing over Soochow to the Imperialists. CHUNG-WANG and MO-WANG were averse to this, and wanted to fight it out. The negotiation was continued, and on the 1st December GORDON told CHING that "if the FOOTAI did not grant the Wangs terms "sufficiently good to induce them to come over, he thought the "attack on the city might be foiled, as he had lost heavily in "officers and men in the attacks of 27th and 29th November, "and a little hitch with the bridge, which had to be seventy "yards long, might cause a repulse." At length GORDON himself sees LAR-WANG, and tells him that mere neutrality would not do, that "unless they could give up one of the gates "it would be better for them to fight, or else vacate the city." CHING and LAR-WANG continue their interviews; GORDON makes it imperative that MO-WANG should be given up to him, and this being agreed to, he "went to the FOOTAI, who was out, but he saw "a very high Civil Mandarin, named POW, and told him to tell "the FOOTAI that he would secure MO-WANG'S not giving any "more trouble to China." That unhappy individual was, it seems, by that time, past all the troubles of this world, for, at a council held that very afternoon in MO-WANG'S palace, "the "discussion got higher and higher, till KONG-WANG got up and "took off his robes. MO-WANG asked him what he was doing, "when KONG-WANG drew his dagger, and stabbed MO-WANG "in the neck. The MO-WANG fell over the table in front of "the throne, and the other Wangs seized him, and decapitated "him in the entrance. They then mounted their horses, and "rode off to their troops, MO-WANG'S head being sent to Gene-"ral CHING." On the night of the 4th, the rebels all shaved their heads, in token of submission to the Imperialists. Meantime, Major GORDON'S men are getting clamorous for pay, and he proposes to the FOOTAI, in order to keep them employed, to march on Wusieh, if he would give them two months' pay, as they had received no reward since GORDON had taken the command. Ultimately, he determines to make the men accept one month's pay—an offer made through CHING—which he did with difficulty, the men having made an attempt to march down on the FOOTAI. He then, at that functionary's request, gave orders for the march to Quinsan. In pursuance of an arrangement (the terms of which are not given in the document before us) Soochow was handed over to the Imperialists the next day at noon; but circumstances occur which lead Major GORDON to suppose that the FOOTAI was not keeping his promises of safety and protection to the Wangs. He became uneasy, and finds at last that LAR-WANG and four other Wangs had been beheaded, and their bodies brutally treated. Just before leaving for Quinsan the Major received a letter acquainting him that a chief had come over with 3,000 men, but he sent orders to inform the chief of the late treachery, and "to let him go with his men "and arms if he liked, or else to bring his troops to Quinsan."

THE DAIMIOS AND THE TYCOON.

THE meeting of Parliament will put an end to whatever uncertainty may still be felt among the mercantile community as to the position of our relations with Japan. A question will no doubt be put to Earl RUSSELL on a very early day that will enlighten us on the exact proposals made by SATSUMA'S envoys to Colonel NEALE, and on the spirit in which they were received by that diplomatist. We conceive that facts enough have been accumulated in our columns to justify the reader in framing for himself the answer that will be given by the Foreign Secretary. Every successive mail represents the powerful Prince in question as more and more anxious to be on amicable terms with the English. He complains, indeed, that he was harshly dealt with at Kagosima, but rather in the tone of a man who has been the sufferer from an unlucky misapprehension than of one whose anger has been justly aroused by wanton aggression and unlooked-for outrage. At the risk of laying ourselves open to a charge of wearisome repetition, we must again reiterate that we are only now beginning to arrive at anything certain with regard to the forms and processes of Japanese Government. All that we had hitherto learned was really no more than the names and titles of some half-dozen of the higher officials. Their attributes and functions have been explained to us by the Dutch and other authorities in a fashion that we shall discover to have been half invention and half guess-work. As long as we should have confined ourselves to negotiations with the MIKADO and the TYCOON, so long would our position in Japan have been dependent on the arbitrary decrees of a despotism that has always treated foreign commerce with a view simply to its own peculiar and personal profit. It is absolutely impossible, in our view of the matter, to overrate the value of the immense step gained in our intercourse with Japan by the appearance of the British squadron in Kagosima Bay. The talk about the immutability of the routine of affairs in that island-empire is now absolute nonsense. The supposed unchangeableness, far more unyielding, it was pretended, than that of the laws of the Medes and Persians, met with its death-blow the instant consent was given to the opening of the ports to foreign vessels. The fabric of its old institutions was shaken to the foundation to such a degree that it could never regain its former solidity. And here we have one of the most independent of the Satraps—for that old-fashioned word seems best to describe the position of these great Daimios—demanding to treat with the English Minister himself, and clearly intimating thereby that he feels unsafe in the hands of the TYCOON; seeing that he has been made to pay to his own damage, for the latter's mismanagement in past transactions, or, worse still, for the latter's bad faith in not impressing him with the resolute determination of Colonel NEALE to enforce instant satisfaction for the murder of Mr. RICHARDSON. The interview of SATSUMA'S representatives with the British Minister at Yokohama will be found to have marked an epoch in the history of Japan.

All that we have said in former articles of the bent of SATSUMA'S inclinations towards intercourse with Europeans and the acquisition of the vast advantages to be derived from their superior skill and knowledge, is confirmed to us by information obtained or volunteered in various quarters. He is evidently *the* man of his time. His character has been long known as that of an able administrator, keen in his appreciation of the benefits to be derived from trade, determined in his purpose, and brooking no interference from either the Spiritual or Temporal Emperor. He already monopolises the whole trade between Lewchew and Japan, governing Lewchew and the intermediate islands by his own officers; and, says the last number of the *Chinese and Japanese Repository*, "has the reputation "of allowing an underhand trade with the Chinese in a few "articles." Then, again, it is the custom, the *immutable* custom, of the Japanese system that all the great vassals should be closely watched by spies, whose duty it is to convey intelligence of their every act to the central power; but, we quote again from the authority just named, "it is said that into "some of the principalities those spies penetrate at the hazard "of their lives. From one, SATSUMA, hardly any are said ever "to return, and the Yedo Government, never acknowledging "them as its servants, never inquires into or avenges their "fate." In fact, there can be no doubt that our new acquaintance finds means for evading or turning to his own purpose the alleged rigorous routine of the customs of the country, whenever it suits his object so to do. His character may be

Digitized by Google

summed up in the street phrase—"He stands no nonsense from anybody."

The intention, therefore, of SATSUMA in entering into direct relations with the British Minister need not for a moment be doubted. As we before stated, the trade with foreigners at Yokohama results, at present, in a very large degree to the sole personal benefit of the TYCOON. Nor is this any novelty in Japan. The Dutch have always asserted that at Nagasaki, which has been open to their commerce for two hundred years, the whole profit was cleverly monopolised by the TYCOON and the Council of State; and to effect this the more surely, the place was actually severed from the principality to which it belonged, and converted into an Imperial city. We know here at home to what an extent our trade with Japan has already developed itself, and the promise it gives of an extension far exceeding anything that was originally conceived. SATSUMA and others of the powerful Daimios see all this, not in Blue-books and official returns, but in the shape of bales of goods imported and exported under their own eyes. We in England also can clearly perceive that up to this time he has been virtually independent when in his own principality. But how long will he remain so if the TYCOON can monopolise all the wealth to be created for Japan by commerce with the foreigner? SATSUMA has taken the bold step of introducing himself to Colonel NEALE, in the person of his agents, paying the TYCOON the compliment of asking him to present them. We may rely on it that this is intended to be no mere exhibition of diplomatic proprieties. It is to be fraught with important results. Other Daimios will follow the example set by the most influential and most politic amongst them. The island-empire of the Far East is studded round with ports having a territory at the back of each thronged with consumers and producers. Unless there be some blunder on the part of our Foreign-office, or some fatal inattention to Japanese notions and prejudices on the part of the Europeans residing out there, trade and commerce will, with gentle pressure, and amid the cordial greetings of the whole native population, high and low, open to themselves haven after haven along that magnificent seaboard.

OUR ALLIES THE IMPERIALISTS.

AGAIN have we to cry shame on our alliance with such people as the Chinese. Our prognostication that Major GORDON would never be able to carry out the work he has been long engaged in is now verified. It is quite transparent, as we have often stated, that Europeans are only engaged and kept in pay so long as they serve to carry out Mandarin cruelty and rapacity. As soon as they demur or revolt at being the instruments of such cruelty as that perpetrated at Soochow, the Mandarins do not hesitate to turn round on them. Be it understood that we do not in any way mean these remarks to be construed into "coming "round to the rebels." We hold them to be as worthless as we did in 1859, when we stated that "right sure are we that "no Government could be worse than the present one, but we "cannot discern in the rebels any power or desire to consti-"tute a better Government." The following extracts of letters from Shanghai confirm our views in reference to the Anglo-Chinese forces:—

THE SACK OF SOOCHOW.

"'I and Major Williams and Mr. Smyth went for a walk right to the walls on the 4th. We got up and entered the city: saw the Mo-Wang's headless body. Gordon came in and had the body wrapped up. Ching's* men were looting the city. Gordon's men not allowed inside. Volleys were fired at us, and we ran. Whether the firing was from Ching's men or from the Taepings I cannot say. Gordon, I afterwards heard, was so disgusted with the Footai's breach of faith in not giving his men two months' pay, as promised, only giving promise of one month, that he flung his credentials in his (the Footai's) face, and the Footai would have been killed but for our interference. Gordon did take all his men back to Quensan in disgust, and when I left orders came for three regiments and some artillery to return. The rebels had risen on the troops, and it was said drove them out.' This is the latest."

ANOTHER ACCOUNT.

"It appears that the rebel chiefs refused to surrender on the Footai's word that no unnecessary blood should be shed, whereon Gordon got the Footai's promise to himself, and gave his word, on which they capitulated. The Footai got in, had his troops concealed about, and, when Gordon was outside, commenced a wholesale massacre—men, women, and children. Gordon heard of it, gathered a few men together, among the rest Count or Prince Wittgenstein, and broke into the place, and the scenes then witnessed were so revolting that the Prince says they all fired and loaded and fired again on every mandarin and Imperial soldier they met. Gordon is said to have shot thirty-five *buttons* himself. They penetrated to the Footai's palace; but, suspecting, it is supposed, that some such thing might be looked for, he proved too strong for attack. Everyone is disgusted to no ordinary extent, and the feeling of regret is universal that Gordon did not succeed in capturing the Footai and hanging him. Gordon has returned to Quinsan, which he continues to hold in the mean time."

ANOTHER ACCOUNT.

"Major Gordon, it appears, exerted himself to the utmost to save the wretched place from the terrors of Imperialist vengeance, but with so little avail that he was compelled to retire to Quinsan to save his own life from the hands of his allies. A correspondent writes from the North:—"The streets are running with blood." The mind refuses to picture to itself the horrors of such a scene. Soochow was five years ago the commercial metropolis of China, and its inhabitants numbered over a million. Those who have visited it recently describe it as still busy and populous. Imagine a town the size of Liverpool, defenceless and unarmed, given over to be sacked by savage soldiery, the same men who tortured our poor countrymen. Bowlby and Brabazon—men who crucify their prisoners in cold blood in their own camps, who hang women by their breasts till they die of agony or starvation, the most unfeeling whilst the most refined of tortures, the most relentless and unsparing of executioners—in fact, our good allies the Imperialists. Imagine, if you can, such men let loose on the inhabitants, with orders to spare neither man, woman, nor child. No words could describe one tenth part of the horrors which ensued. Not the aggregate of all the sufferings endured by the Poles from brutal Cossacks, savage peasants, or woman-whipping generals, which have brought all Europe to the brink of war, would equal the atrocities committed in the sack of this one city, taken virtually by British arms, with the assistance of Her Majesty's officers, with the sanction of Her Majesty's Government, and with supplies from Her Majesty's arsenals. And who is responsible for the blood which lies smoking on the soil of Soochow? Is it the Chinaman who follows the brutal instincts of his nature as developed by his education, or is it the Englishman, the professor of Western civilisation, who, having roused these passions and instincts, and given the opportunity for their employment, has found himself powerless to control them?

"What must be the feelings of those philanthropists who listened to Mr. Lay's scheme for the regeneration of China and the emigration of the Taeying! Within one year Mr. Lay has received his dismissal from Imperial employ, *with four months' double pay and* 6,000 *taels* (£2,000) *to pay for a passage home.* Captain Sherard Osborn has made some similar arrangement for himself, getting 10,000 taels, and his fleet is already on its way home under British colours. The general commanding in China has been for some little time in possession of an order recalling all British subjects from the Imperial military employ. The rebels are cleared out from the country between Shanghai and Soochow, and by the fall of the latter are scattered over the peaceful country to pillage and devastate the villages, whilst the Imperialists are glutting themselves with blood and pillage in Soochow. The amount of fighting men lost on both sides is probably not far short of 5,000; and now all British assistance is to be absolutely withdrawn from the Imperialists. The order has been withheld up to this date, for the purpose, it is said, of enabling Major Gordon to retire with some *éclat* under cover of the fall of Soochow. We should imagine this gentleman would bitterly regret that he ever lent his aid to an enterprise which has had such a bloody ending.

"This is the end for which Ministers have made statements in the House utterly at variance with the truth; for which generals have taken the responsibility of garrisoning Quinsan thirty miles beyond the radius with British troops, and sending guns with artillerymen in plain clothes to Taitsan to give moral support; for which they have rescinded orders in council and withheld instructions; for which British officers have prostituted themselves and the service by fighting for hire in the Imperial ranks; for which poor Tinling and Clayton met their death—and we are as far as ever from the regeneration of China and the suppression of the rebellion. All that we have succeeded in doing is to exasperate to the last degree against ourselves a people who were inclined to be friendly, and in whose power it lies to inflict enormous injury on our trade by devastating the tea and silk districts; we have introduced into Chinese warfare an element of rowdyism which it will take years to eliminate, and we have put into the hands of the Imperialists drilled troops and European arms to be turned against ourselves at the first opportunity."

* The Imperialist General.

NEW STEAMERS FOR CHINA.

On the 26th ult., Messrs. William Denny and Brothers launched from their lower yard the beautifully-modelled iron paddle steamer *Dumbarton*, for Messrs. T. A. Gibb and Co., of London. On leaving the ways she was named the *Dumbarton* by Miss M'Mickin, of Helensburgh, in the usual manner. The *Dumbarton* is intended for the Chinese river trade, and is constructed for passengers and cargo. Her dimensions are:—Length, 245 feet; breadth of beam, 35 feet; depth moulded, 22 feet 6 inches to spar deck, 14 feet to main deck; tonnage, nearly 1,500 tons, builders' measurement. Her engines, which are to be supplied by Denny and Co., engineers, will be 300 horse-power nominal. All the latest improvements have been introduced in the construction of the *Dumbarton*, and we anticipate from her light draught of water and model, that she will prove a very fast vessel. A considerable number of spectators witnessed the launch. She will, it is expected, be ready for sea in all this month, and will, we understand, be commanded by Capt. Findlay, late of the *Berwick Walls*. Messrs. Denny and Co. have also in hand a similar boat on account of Messrs. Jardine, Matheson, and Co., which will be shortly ready to launch, and will, we believe, be commanded by an old commander in their service, Capt. Thomas O'Sullivan, who has just arrived from China.

The double-screw *Far East*, Capt. Jones, will be despatched

Digitized by Google

about the 10th inst. for Hong Kong and Shanghai. She will have a full general cargo, valued at about a quarter million sterling, and about twenty passengers.

There was launched, on the 26th Jan., from the yard of Messrs. J. Wigham, Richardson, and Co., Low Walker, a handsome paddle steamer of about 500 tons burthen, for the firm of Messrs. Apcar and Co., of Calcutta. The vessel is for the Indian coast trade, and has been built from designs by R. B. Durham, Esq. The engines, of 200-horse power, are by Messrs. Thompson, Boyd, and Co.

Messrs. Blumer, of Sunderland, launched from their building yard at North Sands a barque of 355 tons, classed nine years A 1, for Mr. John M'Donald, of Glasgow. This vessel, named the *Jane Woodburn*, proceeds to Singapore, for the purpose of trading in the China Seas.

The *Hoang Ho*, new China clipper ship, of about 700 tons, was launched by Messrs. Alex. Stephen and Sons at Kelvinhaugh. This fine ship is constructed on Messrs. Stephen's principle of iron frames and wooden planking, is for Liverpool owners, and classed 15 A 1 at Lloyd's. The ceremony of naming was gracefully performed by Mrs. Carrington, the wife of the captain who is to command the vessel.

MR. LAY CONFOUNDED.

Mr. Horatio N. Lay, the late Chief Inspector of the Customs, has not succeeded in becoming virtually Emperor of China. That many persons, who know anything of the high-handed manner in which he has carried out his functions, will be surprised at the edict of dismissal, which we gave in our last number, we do not expect. It is, nevertheless, one of the most ignominious downfalls that ever a man had. He has not even the consolations of his countrymen, for in the same number we published a letter from Mr. Edward Webb, chairman of the Chamber of Commerce, who congratulates the community on being relieved from his overbearing and sometimes untruthful conduct, evidence of which stands in the Parliamentary Blue-books. Had his conduct been defensible, we feel quite sure Sir Frederick Bruce would have succeeded with Prince Kung in preventing such an *exposé*. That this will be a warning to his successor, Mr. Hart, we cannot doubt, and we trust that he will long maintain the good opinion of the Chinese and of his own countrymen. The great bulk of the merchants in China prefer a regular system of customs under Europeans rather than the venal habits of mandarins, who are ever open to private arrangements with unscrupulous people.

THE ROUTE THROUGH MONGOLIA AND SIBERIA.

We have been favoured with the following sketch of the route from Peking, lately travelled over by an English merchant from Shanghai. This route has now been accomplished by several gentlemen to and from Peking. All persons who are desirous of following this road must be possessed of a large stock of patience :—

Versts.		
204	Peking to Chan-kia-kow	3½ days.
1,171	Chan-kia-kow to Kiachta	34 „
516	Kiachta to Irkutsk	6 „
1,003	Irkutsk to Krasnoyarsk	6· „
560	Krasnoyarsk to Tomsk	4½ „
907	Tomsk to Omsk	6¼ „
632	Omsk to Tumen	4 „
669	Tumen to Ekaterineburg	1½ „
	Ekaterineburg to Perm	2 „
575	Perm to Kazan	3 „
392	Kazan to Nijni-novgorod	3 „
6,629 versts.		74 days.

At Nijni-novgorod the railway is in connection with St. Petersburg. The mode of travelling was as follows :—

From Peking to Chan-kia-kow—by mules and mule-litters.
From Chan-kia-kow to Kiachta—camels and camel-carts.
From Kiachta to Tumen—Russian post carriages.
From Tumen to Kazan—sledges.
From Kazan to Nijni—post carriages.

In summer travellers can come by steamers from Perm to Nijni; time, from five to seven days.

In winter the whole journey from Kiachta to Nijni is done in sledges, at the rate of 250 versts a day.

CONSULAR APPOINTMENTS.

The following appointments of Consular offices in China have been gazetted :—

Walter Henry Medhurst, Esq., Her Majesty's consul at Tangchow, and at present in England on sick leave, to be Her Majesty's consul at Hankow.

Martin Crofton Morrison, Esq., now Her Majesty's consul at Foo-chow-Foo, to be Her Majesty's consul at Tangchow.

Francis Gerhard Myburgh, Esq., to be Her Majesty's consul at Nagasaki, v. George Staunton Morrison, pensioned.

Correspondence.

(To the Editor of the *London and China Telegraph.*)

DEAR SIR,—You have published, in your last issue, a narrative extracted from the *Jewish Chronicle*, the information in which may well startle your readers and the world in general, namely, that there exists in China a community of Jews, numbering more than a million of souls, living under their own laws, practising their own time-honoured rites and ceremonies, maintaining an effective army composed of the young men of their own tribe, possessing a beautiful ark, and most rare and ancient documents, and worshipping in synagogues which are the most magnificent buildings in the empire. Surely, if this narrative be true, the lieutenant to whom it is ascribed must have not only tumbled upon the missing ten tribes, but found out what has become of the ark, a question I believe which the most careful research has hitherto failed to solve, and he owes the public an apology at the very least for not having made known his interesting discovery before. The fact, at any rate, is of so important and wonderful a character that the lieutenant can scarcely consider me exacting if I suggest that he should be asked to furnish the religious and scientific world with some more details concerning his valuable discovery, which may assist them in deciding how far his story is to be credited. Perhaps he will let us know in what ship he served, the date of his visit, the name of the stream up which he sailed, and of the immense city he saw; the name, also, of the province or district in which they are situated, and the reason why so valuable and notable a discovery was not made known at the time by the commander of the vessel to the naval Commander-in-Chief or to the world at large. These and other particulars are essential to the acceptance of his story as true, for, until its publication, the only reliable information extant as regards the existence of Jews in China was that published a few years ago under the warrant of two well-known men—the Bishop of Victoria and the late Rev. Dr. Medhurst, who were instrumental in sending a mission, at the suggestion and cost of some philanthropic people in England, to Kae-fung-foo, the only place in China were, till then, Jews had been reported to exist. The result of that mission was the discovery of a *small* community in the aforesaid city, numbering, if I mistake not, but a few hundred, who were certainly living in the practice of the Jewish faith, who possessed a synagogue (built, however, after the fashion of the well-known Chinese temple), and who had amongst their records a number of copies on sheepskin of the Hebrew Pentateuch; but by their own account they were *very poor*, and their numbers were rapidly diminishing; they had *no* Rabbi, the last having died years before, they had utterly *lost* the knowledge of the Hebrew tongue both spoken and written, and they believed themselves to be the *sole* representatives of the race in China. Having been one of the many persons who saw the two or three *bona fide* members of this community whom the mission had brought back to Shanghai, and having been present when the late Dr. Medhurst conversed with them in the Chinese language, and examined the copies of the Pentateuch purchased from them, I can vouch for the truth of this version of their story. I beg leave to enclose my card, and I am, Sir, very faithfully yours,

Shrewsbury, 29th Jan., 1864. YOUNG CATHAY.

[Enquiries have been instituted, the result of which, we trust, we shall be able to give in our next.]

KING LAY.

(DAILY TELEGRAPH.)

"Shall we annex China?" was the audacious but not untimely question which was lately discussed in a popular magazine. Translate the tremendous query into what it means, and the mind of every thoughful and honest Englishman must be staggered at the prospect. It implies the gradual assumption of a territory five times as large as British India—the actual possession and government of the half of the continent of Asia—the direct and responsible rule of two hundred millions of the human race, in addition to as many as now obey the sceptre of England; in a word, it is a project for bringing under Anglo-Saxon supremacy a full third of all the habitable globe, and more than a third of the human creatures whom God has placed upon it. Even as a dream, how awful and breath-suspending the idea appears! Whence could come the omniscient sagacity—whence the omnipotent administration—which would dare address itself thus to control and direct from one centre the affairs of a hundred nations and a thousand tongues? Is there, could there be, so much spare energy and opulence of brain and blood in this little island that it would add to those vast dominions which are already tinted with its colour upon the map, those which stretch along one whole side of the immense Pacific? Has even our own astonishing race lordly gifts enough to annex, beside the creeds and civilisations which we are modifying already, the oldest culture and the most teeming brood of heathens that are known under one name? To all these reflections which the thought suggests, we say solemnly—almost sorrowfully—that the thing may actually be! We have come in contact with these polished savages, and their polish has not saved them from the fate of all barbarous forms of society which admit our ships. We have shattered with Armstrong guns and shrapnel shells the edifice of Chinese Government, which was as imposing as the porcelain tower in appearance, and as brittle in reality. We stand at Shanghai and Canton in presence of a disorganised society and a broken rule, which hang together just as long as we are pleased to think it convenient. The vultures of general insurrection and revolution keep off from the carcases of old Chinese ideas, just as long as we stand by to guard their relics. In a word, we have destroyed a vast and ancient order of things, and can now build with the fragments, or upon the fragments. Russia is not ready to prevent us;

Digitized by Google

America has not the time, nor France the governmental skill. We alone are strong enough, and have opportunity enough, to occupy China if we please—not to-day, indeed, nor to-morrow, but with a progress as steady and sure as that which led us from the little factory on the Hooghly to be lords of the gates of the Khyber and the mouths of the Irrawaddi.

If this stupendous supremacy be our "manifest destiny," we shall not shun it. Nothing seems written down in the decrees of Providence so clearly as that the education of the human race is to be advanced by the agency of vast embracing empires, like that of Rome and of England. But in the name of England, of civilisation, and of the nineteenth century, we demand one thing—and that is, that the work shall be done, if at all, honestly. "*Quocunque modo*" must not be the shameful badge of our flag, if, after the sins and the repentances of India, we are to advance it to the source of the Yang-tse-Kiang. We blush to say that this flag is now returning upon the seas, in ignominy and detected cunning, from as flagitious an endeavour as was ever made to filch an empire. If Captain Sherard Osborn feels as we feel, he will lower his jack half-mast, and paint with "mourning blue" the hulls of the vessels which he is bringing back from the waters of China. Whoever passes them upon the ocean, whoever sees them sail into an English harbour, beholds the break-down of a piece of business which we denounced at its commencement, grieved over in its course, and will now not scruple to describe as those who set it on foot deserve. Not until now has the bright flag of Britain, and the honourable swords of her soldiers and sailors, been offered to the barbarian for sale. But these vessels which Captain Osborn is disconsolately bringing back, and the men on board of them, have been bought and sold to the yellow-faced Chinese; and the reason why they are not at this moment helping Tseng-Kwo-Fan to cut the flesh from Taiping prisoners, and stick arrows in their wretched living limbs, is because the Chinamen outwitted us at last in the cunning bargain we were driving. The men who have conducted this sorry and frustrated plot have made Her Majesty play the recruiting sergeant to the Regency of China; and, for the first time in history, persuaded a British Sovereign to recognise as her soldiers and subjects men who sailed to fight for a cause they knew nothing about, and for a prince whose language they could not speak. Worse than this—these vessels, which Prince Kung has contemptuously rejected upon learning their double errand, were fitted in Royal dockyards, furnished with national stores, and hoisted the colours of England, to go and do the dirty work of tea-merchants and compradors upon the rivers of China.

Happily, the gigantic bubble has burst. His Majesty "King Lay" has collapsed along with it. Its design was this. The authorities found it costly to carry on the war against the Taepings, and keep the peace—as we ought only to have done—in the treaty-ports and upon the seas. They lent a too-ready ear, therefore, to King Lay, who, being already the Chief Commissioner of Foreign Customs under the Chinese Regency, saw his way to be also Commander-in-Chief of an Anglo-Chinese fleet. His Majesty of the dock-warrant and port-entry accordingly got Prince Kung to agree to pay for a fleet of English war-ships, with English crews and officers, to be used against the Taipings. Captain Osborn was to be the admiral, and the ships the security to him for pay and expenses. The thing went so smoothly, that the flag of this filibustering squadron was duly recognised at the Admiralty, and published for respect upon the seas; and, with much flourish of trumpets, the fleet arrived in China. But, meantime, Prince Kung had put on his "considering-cap," and therewith perceived that a foreign fleet not completely under Chinese orders would make *nominis umbra*, shadow and nothing more, of his Government; while in the same interval Messrs. Lay and the authorities had been laughing in their sleeves at the capital trick put upon the Celestials, in making them pay at once for ending our wanton war with the Taipings, for getting an English fleet upon the Yang-tse, and for annexing China—Government and all—in the sort of way that a skittle-sharper annexes the savings of a rustic. The ships arrived, and King Lay proceeded to explain to the Chinese Regent that he would be "the pivot" for orders and communications to this fine force, which would shortly make "dog's-meat" of the "Heavenly Father" and his followers. Undoubtedly that consummation was desirable to Prince Kung, but not at such a price. He pointed out that the Viceroy, Tseng-Kwo-Fan, who governs nearly all North China under the Council, was the proper person to direct the fleet. King Lay demurred. Prince Kung was judiciously firm. Captain Osborn refused to obey the direct orders of the new Government to which he belonged. The scheme broke up ignominiously. King Lay was dismissed from his position for acting disloyally and unfairly towards his Chinese master, and Captain Osborn struck his fighting flag, and weighed his anchors for home again. Thus the end of this sad affair is, that in the face of the whole world we are caught out in such a bargain as a China tea merchant would be ashamed to plot in the Hong. We have refused to give Prince Kung the ships which he bought, and was ready to pay for. We have made the Regency men our deadly enemies by plotting, as we made the friendly Taipings our foes by the sword and cannon. We are laughed at, loudly and bitterly, by all the amused barbarians of Eastern Asia; and to the humiliation of having offered the arms and flag of England for a quarrel not ours, we have added the shame and disgrace of being detected and rejected. Never had worthless dodge so worthy an ending; never was cunning ambition so helplessly flung! If we had only to record the discomfiture of King Lay and his friends in London, our satisfaction would be complete; but, alas! the sting of the affair is that the banner and the honour of England come tarnished out of this scheme to "annex China."

Naval and Military.

The following vessels on the China station have been ordered home—Scout, Vulcan, Hornet, Pearl, Encounter, Ringdove, Centaur.

The clipper ship John Lidgett, 770 tons register (owned by Messrs. John Lidgett and Sons, of London), Commander Gamble, arrived at Spithead on the 2nd inst. from Hong Kong with the following military and naval (invalids and time-expired men) officers and men on board from Hong Kong, the Cape of Good Hope, and St. Helena:—There embarked at Hong Kong—Royal Artillery, Capt. H. Porter (invalid); Assist.-Surg. Tate (invalid); and seven men. Royal Engineers, two men; 44th Regiment, one man; 67th Regiment, Lieut. Dawson (on duty) and one man; 99th Regiment, Brevet-Major Kempson and 50 men; Commissariat Staff, eight men; Army Hospital Corps, six men Assist.-Surg.; M'Dowell (in medical charge of troops), wife and child, one naval assist.-surgeon, one midshipman, and 51 naval invalids and time-expired men. Three military invalids were embarked at the Cape of Good Hope, and four at St. Helena. Five naval and eight military invalids died during the passage home. The ship sailed from Hong Kong on the 16th of September, and was 28 days to Batavia, where she lay at anchor five days. From Batavia to the Cape of Good Hope she made the somewhat long passage of 44 days, owing to the unusual circumstance of having to beat to windward through the trade winds. At the Cape she lay at anchor 16 days. She made the passage thence to St. Helena in ten days, where she anchored for two days, and thence she completed her voyage to Spithead in 35 days—making 45 days under canvas from the Cape. The weather was very fine throughout the whole voyage. The John Lidgett is a novelty in naval architecture, she being the first vessel built on the newly-introduced plan of an iron framing with wooden outer planking—an iron ship with a wooden skin. She is of large capacity for stowage, and her officers report her to be an exceedingly fast ship under canvas, having surpassed in speed every vessel she has fallen in with on the outward and homeward voyage. On her outward voyage she had as cargo 1,100 tons of railway iron, and southward of the Cape met with a very severe cyclone gale, in which the cargo shifted and the ship went over on her beam-ends, in which position she lay 48 hours, with her starboard rail under water. The poop cabins were destroyed, and everything moveable on the deck was swept away, yet such was the enormous strength of the ship that she took in no water through a leak, nor was there the slightest strain in any part of the hull afterwards discovered. Had she been an ordinarily framed wooden ship she would in all probability have foundered. The ship's fittings throughout combine all the most recent improvements. The anchor is weighed and the topsails are hoisted, and all other heavy work is done by steam, for which a small engine is provided. The same engine furnishes an ample supply of distilled water. One hundred pounds weight of fresh bread was baked on board, and served out to the troops per day throughout the voyage. The accommodation on board for the troops and the general arrangements and ventilation of the troop deck appear to have been excellent. After disembarking the troops the John Lidgett will sail from Spithead for the Thames, having a quantity of Government stores on board, and a part tea cargo from Hong Kong, and wool from the Cape for London.

Her Majesty's six-gun paddle-wheel steam sloop *Gorgon*, Commander J. C. Wilson, from the Cape of Good Hope, went alongside Woolwich dockyard yesterday, having discharged her ammunition and guns at the Royal Arsenal on the foregoing day. Commodore Dunlop, C.B., accompanied by Mr. Ponsonby, his secretary, went on board and mustered the ship's company, preparatory to their being paid out of commission. Having witnessed the usual course of exercises performed by the men, the commodore inspected every part of the ship, and expressed himself much pleased with the cleanliness and order which was apparent throughout, and specially remarked the healthy and robust condition of the crew. On the eve of her intended departure for England, the admiral of the station, Sir Baldwin Walker, ordered her to proceed to Madagascar, in consequence of the reported death of the King. She was detained there between four and five months. The *Gorgon* has been in commission nearly five years, and has taken some valuable prizes during the command of Commander Wilson, who exchanged from the *Fury* with Commander Pym in March, 1861. Commander Wilson was enabled to render some valuable assistance to Dr. Livingstone and his mission, for which he has received a letter of thanks from the Bishop of Oxford. The *Gorgon* had a fair passage home of fifty-four days. She left Admiral Dupré and several French ships at Madagascar. Commander Wilson states that he has no doubt the French admiral is stationed there with the intention o establishing a protectorate over Madagascar, and will probably land at Bembatooka Bay, at the north-west end of the island—a most convenient spot, and near the capital. The inhabitants, the North Sacklavas, have exhibited much friendly feeling towards the French rule, and are in opposition to the ruling tribe—the Hovas.

WESTERN CHINA.—A letter from Calcutta says:—The easiest road to Central Asia is through Cashmere and Ladakh. The highest pass on the line is 13,000 feet, by which a road for ponies could easily be made. But the transit duty is prohibitory, and yet it yields only a miserable £1,800 a year in the exports and imports from and to Yarkand and China. Thus the supply of shawl wool, which is so important for our Umritsur manufacturers, is cut off from us. The Mharajah forestalls all purchasers by making large advances to the Thibetans, and his agents are not only exempt from the transit duty of 10 per cent. on both sides, but their purchases are carried by forced labour free of charge. The Thibetan taxes are annually becoming more oppressive, so that the population of the wool-producing districts is only two-fifths of what it used to be. The result of all these causes is that Cashmere shawls are yearly degenerating in quality, and the export from Bombay in 1862-63 diminished from £423,657 in the previous year to £241,337. The Punjab Government despatched the son of a native official in Lahore, our frontier province, to the Gurpon, or governor of Gurtokh, the capital of the Chinese province of Narè Khoorsum, asking him to select a convenient site for a fair, and to meet an English officer on the frontier. He returned the letter unopened, and the native has gone to the province of Rodokh, only eighteen marches from the Karakorum hills, by which the best route is supposed to lie to Yarkand. It is somewhat disgraceful to us that while our subject, the Maharajah of Cashmere, annually interchanges presents with the Chinese Viceroy at L'hassa, we have no communication whatever with Thibet, and Sir F. Bruce refused to apply for passports for the expedition which Lord Canning proposed to send there.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

SILLAR—On the 22nd Jan., at South Norwood, the wife of W. C. Sillar, Esq., of a son.
THOMPSON—On the 31st Jan., at Tooting-common, the wife of Wm. Jas. Thompson, Esq., of a daughter.

MARRIAGES.

WINCHESTER—CHISHOLM.—On the 6th Dec., at Belford Church, Northumberland, by the Rev. Geo. Walker, Capt. John Winchester (late of the Caribean), to Annie, eldest daughter of Geo. Chisholm, Esq., of Ellwick Farm, Northumberland.

DEATHS.

NOTLY—On the 20th Oct., 1863, drowned off Cochin, E.I., while nobly endeavouring to assist the crew of the Wing of the Wind, John James Notly, aged 25, second mate of the Victoria, and second surviving son of the Rev. Charles Notly, Eye, Suffolk.
M'CULLOCH—On the 16th Jan., at Lochenhead, N.B., Edward M'Culloch, Esq., of Kirkclaugh, late of Ceylon.
PARKER—On the 6th Dec. at the United States Consulate, Fuhchau, Montgomery D. Parker, of Boston, Mass. U.S.A.
LINSTEAD—On the 21st Jan., at Adelaide-villa, Camberwell, Constance Elizabeth Rose aged four years; and, on the 24th Jan., Ernest Theophilus, aged six years—the two eldest and beloved children of Theophilus Gee Linstead, Esq., of Hong Kong.
WITT—On the 26th Nov., before Hankow, Jacob Witt, a native of Hamburg, Germany.

Monetary and Commercial.

M. Behic, the active Minister of Commerce, has sent to the Chamber of Commerce, at Mulhouse, specimens of the English and American tissues sold in the markets of China; and has suggested that an examination of them will enable French manufacturers to make tissues which will obtain a sale in that country.

The steamer *Atrato*, with the mails from the West Indies and Mexico, has brought no less than £750,000 in specie; of which £395,000 is in bar silver and Mexican dollars, and £355,000 in gold. The proportion in gold is unusually large. The Mexican dollars amount to about £70,000. A portion of the silver is not of a kind suitable for transmission to the East. Bar silver 62d.; Mexican dollars 64d.

The amount of bullion going forward by the steamer from Southampton on the 4th inst. is as follows:—

(These particulars could not be obtained in time for this number.)

The export of gold to China from San Francisco for the year 1863 was $4,000,000.

To satisfy many inquiries, we beg to intimate that the cargo per *Amanda*, from Manila to the consignment of Messrs. Halliday, Fox, and Co., London, was fully insured with the war risk.

We regret that in June last we inadvertently announced Mr. F. M. Page's China Exchange Tables for sale at a lower price than that named in the subscription list circulated at the time, and we doubt not that our readers in China will exonerate Mr. Page from any loss by such error.

The exports as per Sam Mendel's Circular are, from London, Liverpool, and the Clyde, from Jan 17 to Feb. 1, 1864, as follows:—

To SHANGHAI.—Plain cottons, 114,000 yards; coloured cottons, 103,035 yards; printed cottons, 3,360 yds.; twist, 138 lbs.

To HONG KONG and CANTON.—Plain cottons, 472,860 yds.; coloured cottons, 52,519.

To SINGAPORE.—Plain cottons, 293,490 yds.; coloured cottons, 49,850 yds.; printed cottons, 38,000 yds.

To BATAVIA.—Plain cottons, 130,260 yds.; coloured cottons, 76,100 yds.; printed cottons, 88,750 yds.; twist, 21,550 lbs.

To MANILA.—Plain cottons, 70,250 yds.; coloured cottons, 333,822; printed cottons, 7,500.

ARTICLES OF IMPORT.

TEA.—About 20,000 packages are advertised for this week, including 7,000 without reserve. The duty-paid clearances from the port of London, for the week ending Saturday, Jan. 23, 1864, were 1,168,000 lbs., against 1,018,316 lbs., for the corresponding week of 1863. The following is a list of the sales:—Total offered at the China sales, 52,366 packages, of which 28,899 sold, 24,443 being without reserve. 261 chests, 211 half-chests Congou, 5½d. to 1s. (the lowest price being for damaged); 1,481 chests, 419 half-chests Congou, 1s. 1d. to 1s. 4¾d.; 24 chests, 5 boxes Congou, 1s. 9d. to 2s. 4d.; 152 half-chests Twankay, 7d. to 7½d.; 232 half-chests Imperial, 10½d. to 1s. 6d.; 733 half-chests Hyson, 9½d. to 2s. 4d.; 976 half-chests 200 boxes Young Hyson, 11¾d. to 1s. 6d.; 42 half-chests Gunpowder, 1s. 5½d. to 2s. 5½d.; 31 boxes scented Caper, 10½d. to 1s.; 52 boxes scented Orange Pekoe, 1s. 3½d.; 100 chests 200 half-chests Souchong, 1s. 1½d. to 1s. 9¾d.; 243 half-chests Oolong, 1s. ½d. to 1s. 4d. Of Indian Tea, 2,050 packages were offered, and all sold. 200 chests Congou, 1s. 4d. to 2s. 3½d.; 33 chests Pekoe Fannings, 2s. ½d.; 553 chests Souchong, 1s. 11½d. to 3s. ½d.; 628 chests Pekoe, 2s. 10d. to 3s. 4d.; 81 chests Pekoe Souchong, 1s. 7½d. to 2s. 8¾d.; 206 chests Broken Leaf, 7½d. to 1s. 8½d.; 44 chests broken mixed Black, 1s to 1s. 2½d.; 41 chests Broken Leaf, 1s. ¾d. to 1s. 6¾d.; 42 chests Dust, 6½d. to 1s. 6½d.; 18 chests Hyson skin, 1s. 5d.; 2 chests 24 boxes Orange Pekoe, 3s. 1½d. to 3s. 1¾d.; 85 chests Bohea, 8½d. to 1s.; 3 chests Tea Pickings, 9½d.; 5 chests Jungley Pekoe, 3s.; 20 chests 23 half-chests Green Dust, 8½d. to 8½d.; 6 chests Broken Pekoe, 2s. 6½d.; 20 chests Jungley Broken Congou, 1s. 4d. to 1s. 9d.; 34 chests Jungley Souchong, 2s. 4d. to 3s. ½d.; and 3 chests Jungley Broken Souchong, 1s. 9½d.

SILK.—During the early part of the past month, there was some disposition to do business in China and Japan raw silk, but this rapidly subsided; the market has since become very quiet, and prices show a decided downward tendency. The deliveries for the month are again small, being only 2,494 bales of China and 1,275 bales of Japan.

COTTON.—Of East India and China sorts the circular of Messrs. Whitaker, Whitehead, and Co. reports:—This description of cotton has been very much depressed during the past fortnight, and sales have been made with difficulty. Fair and the better grades, which are exceedingly scarce, have steadily maintained their value, but there has been great irregularity in the medium, and lower qualities and a further serious decline in price has resulted. China Cotton has been in moderate demand at about ¾d. per lb. decline. Bengal and Scinde have been very much depressed, and to effect sales a decline of 1d. and 1½d. per lb. has to be submitted to. Cotton to arrive is almost entirely neglected. A few sales have been made, but at lower and rather irregular rates. The transactions, however, are not worth reporting. We quote Madras: Tinnivelly, good fair to good, 23d. to 23½d.; fair, 22½d.; Western, 21d. to 22d. China: Middling fair, 19d.; fair, 19½d.; good, 20½d. to 21d. Bengal: Middling fair, 15¾d.; fair, 16¾d.; good, 17d. to 18d. Scinde: Middling fair, 15d.; fair, 16d.; good, 16½d. to 17d. The quantity of China cotton afloat is about 70,000 bales.

NUTMEGS, which had before risen, have advanced 2d. to 3d. per lb. further for the middling and fine descriptions, and smaller kinds have fetched 1d. to 2d. per lb. more money. 85 cases at sale were actively bid for, and sold generally at the advance we have noticed.

CLOVES sell freely; 2,467 bags Zanzibar were all taken at firm prices; 28 cases Penang have realised fully previous value.

PEPPER.—The possibility of an alteration in the duty on this article has led to an active demand; 4,902 bags of black at auction were all taken at very firm prices; privately there is a good inquiry, but holders generally want an advance. White is also rather dearer.

PIMENTO continues to be freely offered; of 1,895 bags at auction, only about 700 sold, prices being rather in favour of buyers.

CINNAMON.—The quarterly public sales of cinnamon were held on Monday, and 2,634 bales Ceylon were offered. Common qualities changed hands at 1d. per lb. more money than at last auctions, and other kinds sold at the rates then current. Prices ranged from 10d. to 3s. per lb. Advices from Colombo state that cinnamon was in good demand, at 9½d. to 10d. for plantation, and 7d. to 7½d. per lb. for inferior. The shipments from October 1 to December 27 amounted to 137,565 lbs., against 197,355 lbs. during the same period in 1862, 259,823 lbs. in 1861, and 195,259 lbs. in 1860.

HEMP.—For Manila there is an active demand, and fair to good roping sold at £34. 10s. to £35.

RICE.—The demand is still inactive; no sales reported by private contract, and 7,000 bags of Rangoon offered by auction were bought in at 10s.

SAGO.—Flour, 620 bags offered were bought in at 16s.

TAPIOCA.—600 boxes of pearl offered were mostly sold at 20s. to 21s.

TIN still remains in the same position as during last week; transactions are by no means numerous. Business has been done in Straits at £118, cash, and small parcels have obtained £119, cash, and £122, three months.

MANCHESTER MARKETS.

The uneasiness caused by the warlike prospects of the continent, which led to all but a suspension of business some time ago in the market for cotton cloth, continues without much change, and with much the same effect. This market, like the Liverpool cotton market, has lately been very flat, and any business that has been effected has been almost of a forced character and at lower prices. The state in which the money market was at Calcutta and Bombay according to the latest letters prevented many of the leading houses from being in a position to make remittances, and even the richest and wealthiest men were in this position. With such advices it will not be surprising that the houses here who are in the India trade are not doing much just now for shipping. The yarn market has also been very quiet, and there has scarcely been business enough to test prices. Some sellers, however, seem to think the feeling is less desponding than it has been, that prices have reached about the lowest point, and that we may possibly have a resumption of business next week provided the fears engendered by the present warlike rumours should subside. During the flatness, which has now lasted something like a month, it is thought that a good many orders on shipping account will have accumulated, which would be executed at present prices if only the political horizon should clear a little. In home trade yarns some sellers report rather more business doing, but it has not been of much account, and there is no change in prices.

FREIGHTS AND CHARTERS.

The amount of tonnage loading on the different berths for the East has again decreased, but no improvement in outward freights has taken place, there being but little business doing in exports from this. Homeward freights continue firm at somewhat higher rates, especially from China and Manila. In coal freights there is little alteration, but a few vessels could be fixed for Singapore, to load from the north.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £37 and 37s. 6d. For Shanghai: £45 and 47s. 6d. to 50s. For Manila: £1. 10s. For the Philippine Islands, Penay or Zebu: £2 (nominal). For Singapore: £26 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight by the Corea for the conveyance of twenty-five tons light government stores from the River Thames to Hong Kong.

CASUALTIES.

The Landbouw, Kleynenberg, from Batavia, which arrived at Brouwershaven Jan. 21, is leaky, and has lost sails and boat, having experienced heavy gales.

The Swallow (schr.), Scott, of and from London for Shanghai, with part cargoe of coal, was totally wrecked off Cape Recife, during a heavy N.W. gale in the night of Nov. 26, in which she lost most of her spars and sails, and became unmanageable; crew saved; ship and cargo were sold Dec. 2.

The Eliza Stewart, Osborne, from Hong Kong for Liverpool, put into Algoa Bay Dec. 16, short of water, and with crew sick.

LIVERPOOL, Jan. 25.—The Hidalgo, Roberts, arrived here; reports having spoken, Jan. 12, in lat. 37 N., long. 24 W., the Pieter Schoenmakers, Kers, 128 days out, from Batavia for Amsterdam, with crew sick; Europeans all well. Advices from Lisbon since received report the arrival there, on the 28th Jan., of the Pieter Schoenmakers, with twenty Lascars dead, and the rest of the crew sick.

The Antonio Terry, Luces, which arrived at New York Jan. 15, from Manila, had experienced very heavy weather, and had sprung mainmast.

AMSTERDAM, Jan. 28.—The Schoonderloo, Otto, from Batavia, lying aground in the Great North Holland Canal, was run into yesterday by the Odin or Idun, Jacobsen, from Dram to this port, and sustained considerable damage in her stern post.

According to advices from Singapore, under date Jan. 4, the Alabama (Confederate str.) had burnt the Martaban (British ship), from Maulmain, and the American ships Sonora and Highlander, from Singapore to Akyab, in the Straits of Malacca. The Martaban was the Texan Star (American), Capt. Pike, and to have changed her name.

SHANGHAI, Dec. 22.—The Hellespont (British str.), Mackenzie, from Hankow, was in collision Dec. 21 with the Hydaspe (French str.), and immediately sunk; crew and passengers saved by the Hydaspe, which put back leaky.

The Maggie Leslie, Stephen, from Shields for Hong Kong, put into Portsmouth Jan. 30 with windlass broken.

The British ship Coy Barroln parted from her anchors Dec. 10 outside Ningpo, went on the rocks, and became a total wreck; crew saved.

OFF ASCENSION.—Dec. 6, Zambesi, from Batavia for Rotterdam; 31, Runnymede, Rickaby, from Shanghai for London.

At ST. HELENA.—Dec. 7, Graf v. Heiden Reinestein, Boer, from Batavia, and sailed, 9, for Amsterdam; 11, Gouverneur General Duymaer v. TERMS OF BUSINESS AT THE HEAD OFFICE IN LONDON.

The Bank receives deposits at ten days' notice of withdrawal, on which interest is allowed at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not exceeding 5 per cent. The rates of interest allowed on deposits for fixed periods vary according to amount and the length of time for which they are made.

By special agreement quarterly or half-yearly payment of interest is allowed on deposits for six, nine, or twelve months.

The Bank issues drafts on its branches in India and China, and circular notes and letters of credit, payable throughout Europe, for the convenience of travellers per Overland route.

The Bank purchases approved bills on India and China, and also receives the same for collection on private account.

The Bank undertakes the purchase and sale of Indian and other securities, and receives the same for safe custody.

The Bank realises interest, pay, dividends, pensions, or other moneys for remittance through the Bank or otherwise. On remittances through the Bank no commission will be charged.

The Bank effects the registry of Indian Government loan notes, so that the interest may be paid in England.

The Bank grants credits in favour of parties abroad. Applications for such credits must be sent in at least three days before despatch of the mails, otherwise they will be deferred until the following mail.

Applications for drafts, bills for collection, and all matters involving correspondence by the mail, must be sent in one clear day before its despatch.

Every other description of Indian banking and money agency business conducted, and the utmost possible facilities given to parties in their transactions with India, China, &c.

Forms and powers of attorney furnished at this office.
Office hours, 10 A.M. to 3 P.M.; Saturdays, from 10 to 2.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £500,000. Reserve Fund, £100,000.

The Bank negotiates and collects bills and grants drafts, payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

Merchants and Shippers supplied on liberal terms.
12, THREE KINGS COURT, LOMBARD-STREET, LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored, one application per month will keep it in perfect colour. Price One Guinea per Bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect and the nerves in good order, we are well. These pills possess a marvellous power in securing these great secets of health by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to persons of irritable constitutions, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

"The best and most convenient Mill in use."—*Family Herald.*

ROTARY KNIFE-CLEANING MACHINES of SUPERIOR QUALITY from £2 and upwards.

79, WARDOUR-STREET, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Gregor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

NOTICE IS HEREBY GIVEN,

THAT the PARTNERSHIP heretofore subsisting between us, the undersigned JOHN STUART BOLTON and THOMAS BARLOW, trading together in the City of Manchester, in the county of Lancaster, as Commission Merchants, under the style or firm of John S. Bolton and Barlow, is this day DISSOLVED by mutual consent.

All debts owing to and by the said concern will be received and paid by the said Thomas Barlow, by whom the business in future will be carried on.

Dated this thirtieth day of November, 1863.

JOHN STUART BOLTON.
THOMAS BARLOW.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all, with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

12 stamps; sealed ends, 20.
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Patients in India and the Colonies can be successfully treated by letter, by enclosing the consultation fee of £1, and medicines forwarded with secrecy and despatch. Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

Per Far East, for Shanghai for Hong Kong.—Mrs. Boyle, daughter, and servant, Mr. and Mrs. Henderson and servant, Mr. and Mrs. Langan, Mrs. Atkins, Mrs. Hy. Jones, family, and servant, Miss Patridge, and Miss Henry, Messrs. Finnis, Morgan, Hay, Egan, Robertson, Peyton, Goddard, Limber, Grosser, Hilder, Jones, McKenzie, Abell. Two Japanese, and ten second-class passengers.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Intelligence of the highest importance is brought by the present mail. In addition to the payment of the indemnity levied on Satsuma, the Japanese Government, and the Daimios too, give a still further and unlooked-for pledge of their desire for amity with "the foreigner," by determining to send another embassy to the European Courts. This interesting announcement was made on the occasion of a conference held on the 6th December on board the *Semiramis* French steamer of war, at which the Minister of that country, accompanied by Admiral Jaurez, were the only European representatives present. The following facts are gathered from a communication made to his countrymen by the diplomatist just named:—

It will be recollected by our readers that, since the extraordinary communication made by the Japanese authorities to the American and Netherlands Ministers, relative to the determination of the Japanese Government to close Yokohama to foreign trade, or rather that it should be abandoned by foreigners, the Gorogio and native authorities have been persistent in their endeavours to obtain an opportunity to make the same communication to the English and French Ministers, which opportunity has been as carefully avoided by them, especially as heretofore the conference, on the part of the Japanese, was proposed by them to be conducted by one or two governors of inferior rank. The proposition, however, to appoint a special envoy to confer with the foreign Ministers put the matter in another shape; and having it clearly understood that the question above referred to—the closing of the ports—could and would not be entertained for a moment's conference, two members of the Second Council of State were admitted to the conference above mentioned. It was first again repeated by the French Minister, that the proposal itself in reference to the closing of the ports could not be listened to; that the making or unmaking of treaty obligations could be only in the Imperial Sovereigns themselves, but that any explanation of the ground upon which any such proposition could be made might be open to another reading. The old story of discontent on the part of some of the Daimios was, of course, repeated, and the suggestion made that, if the concession were granted by foreigners, it need only be of a temporary nature, &c.; that the Gorogio had been deeply moved by the lamentable occurrence of the murder of Lieut.

Digitized by Google

Camus; and were anxious to initiate the settlement of any questions arising out of it; and, further, that as the matters now introduced could not be concluded by the Plenipotentiaries, it was the purpose of the Japanese Government to send an embassy to the Court of the French Emperor (which would also visit other Courts) to treat upon them. We believe that, on the several conditions that the envoys shall be of the highest rank, and that their powers shall be complete, there will be every encouragement given by the foreign representatives to its going forward. But not one word has transpired of any *resident* ministers and envoys from Japan to other Courts being contemplated by the Japanese Government. The calculations said to have been made, and the *personnel* of the legations canvassed, are, at present, purely imaginary.

We extract the account given by the *Commercial News* of what refers to the payment of the indemnity by Satsuma:—"We announced in our last issue that Satsuma's envoys had given notice of their intention to call upon the British Minister on the 9th inst., with a view to bringing the negotiations upon which they had entered to a close. Accordingly, on the 9th inst., Satsuma's envoys, accompanied by some strangers, who, curiously enough, turned out to be special envoys of Shimadzu Sabro himself, were at the British Legation at the hour appointed. After getting through some preliminary matters, the original envoys stated to the effect that they had the honour of bringing the negotiations so far, and they now wished to introduce envoys of Shimadzu Sabro himself. Shimadzu's people were then shown by Satsuma's envoys to the chief seats at the conference, the latter removing to lower places. During the conference the Japanese showed the strongest desire to see the difficulty which they had been sent to arrange amicably settled. They appointed Friday, the 11th inst., for the positive payment of the indemnity—$100,000; and they further signed a written engagement that Satsuma would undeviatingly seek up the murderers of Mr. Richardson and execute them in the presence of the British authorities who might be appointed to witness the execution. Afterwards the envoys made some characteristic presents, according to Japanese custom upon joyous occasions. On Friday, speculation as to the payment of the indemnity was put at rest by the money having been actually brought in hand-carts to the British Legation about noon that day. The agreement to seek up the murderers having been signed and the indemnity paid, the envoys returned to Yo lo, where they gave an account of their doings to the Tycoon's Government, who immediately addressed a handsome congratulatory despatch to the British Minister, stating their gladness and sincere satisfaction that matters had been so far settled between Great Britain and Japan, and expressing a hope that this might prove to be a sign of solid, lasting peace between the two countries, and that no further difficulties may arise. This, they say, is their sincere wish and desire. The great number of merchant junks and the unprecedentedly large quantity of raw cotton (about 5,000 bales) which have come to this port since the indemnity has been paid, lead to the belief that a more liberal trade policy has been agreed upon. During the week there has been very little heard of the rebellion of Mats'daira Daized-no Daibu. All the intelligence from the South is to the effect that matters stand now just as they did a month ago. From all we have heard, it appears that Tsiosiu has not met with the support which he expected, and that he must in consequence succumb for the present to the authority of the Mikado. Still, seeing how ripe this country is for rebellion, it is hard to say how Tsiosiu's enterprise may turn out.'"

As respects the general position of affairs, the following statement puts in a singularly strong light the great fact that the party of the Daimios favourable to an extended intercourse with foreigners is daily gaining power, and if Satsuma has joined them, the victory may be considered as already decided. A correspondent who has peculiar opportunities of piercing through the mist that has hitherto enveloped the internal dissensions now disturbing Japan, writes:—"It seems there is an under-current in our favour, working secretly, slowly, but, it is to be hoped, surely. A party, headed by Echizen-no-kami, a powerful Daimio, but one who has been forced to shave his head and become a priest for expressing too openly his friendly feelings towards foreigners, seems to be taking advantage of the general confusion, and is gradually on the increase; and it is believed that several Daimios are secretly favourable to the wish of Echizen-no-Kami, to admit foreigners into the country, and have added their names to the league. Echizen-no-Kami himself is running out piers for the accommodation of foreign shipping, and secretly making preparations on a large scale for opening a commodious harbour."

HAKODADI.

The advices from hence are to the 30th November. The Japanese vessels *Waterwitch* and *Governor Wallace* were in port on that date. The small Russian Government sch. *Perwee*, which left there on the 7th inst., bound for the Manchourian coast, was totally lost on the following morning by running ashore on the south, or Nambu, side of the Straits of Tsugar, opposite Hakodadi. Only one life was, however, lost, and the remainder of the crew returned to Hakodadi a few days afterwards. Some cold weather and snow had been experienced, but the weather had lately been more mild. The harbour was deserted by ships of war of all nations, and the foreign residents left to take care of themselves, or trust in the goodwill of the native authorities and people. There had not been the slightest disturbance, or threat of any hostile movement. There was still a great want of native money, and as, from there being no vessels of war there, the Consuls are the only persons who can obtain any exchange from the Government, they now actually rule the market. It is strange that foreign Governments allow this state of things to continue. In insisting on consular officers being allowed exchange by the Government we seem to make it their interest to frustrate one of the principal clauses of the treaty—viz., that foreign coin shall pass weight for weight with native money. So long as this exchange is allowed, the representatives of foreign Governments cannot expect to see the dollar taken in Japan at anything near its intrinsic value; and one of the greatest obstacles to trade will continue to exist.

The following market report is from the *Japan Herald*:—

IMPORTS.

Since our last report our market has continued satisfactory for imports. Supplies of woollen and cotton goods have come to hand, and sales have been made at a slight advance upon former quotations. A further improvement would have taken place but for the difficulties reported to exist in the dealers trading with foreigners. American Drills:—Grey Shirtings, 5½ catty, 4 00 to 4 10; 6 do., 4 25 to 4 40; 6½ do., 5 25 to 5 50. White do., spots, 3 85 to 4 00; do., dyed spots, 4 50 to 5 00. Chintz, assorted, 2 50 to 4 00. Camlets, BBB, good colours, 22 50 to 23 00; assorted, 21 50 to 22 00; S, good assortment, 22 00 to 22 50; SS, assorted, 21 50 to 22 00; SSS, good assortment, 20 00 to 20 50. Taffachelass, 4 00 to 5 50. Lead, 7 25 to 7 50. Tin, block, best, 29 to 30, none; plate, 8 75. Spelter, 6 75 to 7 00; assorted, 12 75 to 13 00. Long Ells, assorted, 7 50 to 2.

EXPORTS.

SILK.—Since our last report, supplies have fallen off to a very perceptible extent. There have been rumours of silk merchants at Yedo having been murdered by Ronins, and the dealers of Yokohama affect to believe that this system of intimidation will deter the country merchants from sending their produce down here. In consequence of anticipated imports they look forward to higher prices, and have therefore been very firm throughout the week. A pretty fair business has been done at the high rates quoted, but we should not be surprised to see a somewhat easier tone ere long. Ida: Medium, 540 to 555; inferior, 510 to 520. Mybash: Best parcels, 560 to 575; medium, 540 to 550; inferior, 520 to 530. Coshu: Best parcels, 500 to 515; medium, 470 to 480; inferior, 440 to 450. Hatchogee: 410 to 420. Oshio: Best parcels, 530 to 545; medium, 500 to 520; inferior, 450 to 475. Mashta: 450 to 460. Æchesan: 480 to 490.

TEA.—Business in this article has been moderate, owing to the ad- 200; common, 350; good ditto, 500; medium, 300; fine, 200. Quo 720 piculs at our quotations;—Stocks ordinary, 150 piculs; good ditto, vanced rates demanded by the teamen. Settlements amount to about tations are as follows:—Ordinary, $1.00 to 3.00; good ditto, $4.00 to 6.00; common, $8.00 to 12.00; good ditto, $13.00 to 18.00; fair to good, $19.00 to 24.00; fine, $25.00 to 28.00; finest nominal, $29.00 to 32.00.

RAW COTTON.—Our market has again been badly supplied during the past week, and it appears evident that some influence must be at work to keep supplies back; they are quite insufficient for the demand, and for the fulfilling of contracts incompleted. Late advices from Europe and China are favourable, and prices have further advanced in consequence. Japanese raw cotton, $24.50 to $27.00; vegetable way, 13.50 to 14.00; rapeseed, 2.00 to 2.10; rapeseed oil, 7.00 to 7.50; fish, 4.50; seaweed, cut, 4.50 to 6 00; uncut, 2.50 to 4.50; cutterish, 10.00 to 14.00; mushrooms, 28.00 to 30.00; isinglass, 59.00 to 21.00; coir, 3.50 to 4.00; gall nuts, 7.00 to 7.50; dried shrimps, 13.25 to 13.50; iron, 3.20; camphor, 26.00 to 30,00; fokling, 3.00 to 4.00; copper—bolts, 24; wire, 27 to 28; ginseng, 1.50 to 2.00 per cat.; flour, 2.30 to 2.60 per pcl.; coal, 9.10 to 10,00 per ton; tobacco, 2.00 to 5.00 per pcl.; saltpetre, 11.00 to 12.00 per pcl.; timber—Planks 12ft. by 1ft. per hundred planks, 18 to 20.

EXCHANGE.—London, Bank, 6 m. st. 5s. 1¾d. to 5s. 1d.; private, 5s. 2¼d. to 5s. 2d., buyers; documents, 5s. 2¼d. to 5s. 2d.; Shanghai Bank, 10 d.s.s., 82 to 81; private, 10 d.s. 82, buyers; Hong Kong, Bank, 4½ to 5; private, 6 to 7; Peking gold, per bar, 215; Spanish dollars, 1 per cent. discount; Itzibus, buying 238, selling 239 for 100 Mex. dollars.

FREIGHT.—To Shanghai, per sailing vessel; for silk $3 per picul, measurement $3. Per steamer; for silk $4 per picul, measurement $3 to $5 per ton. To London; cotton £4, tea £4 to £5, silk £6 to £5.

CHINA.

SHANGHAI.

The London Mail of 26th October arrived on the 19th Dec. When the previous mail left (20th Dec.) per French steamer *Hydaspe*, she run into the *Hellespont*, but no particulars were given. We now append an account from the *Friend of China*:—

We have been favoured with the following report by Mr. Thos. Devine, pilot of the French mail steamer *Hydaspe*, on her down trip this morning:—

The French mail steamer *Hydaspe* left Shanghai at 8 A.M., and passed Woosung at about 9.45 A.M. Five miles below Woosung, met the steamer *Hellespont*, coming up. We were steering S.E. by E. ½ E., and the *Hellespont* steering about N.W. by W., I should judge. The *Hellespont's* helm was put hard-a-starboard, and I ordered the *Hydaspes'* helm hard-a-port. Seeing, however, that we could not clear her, I ordered the engines to be reversed, and to go full speed astern, which was done; and we had been running astern full speed for fully five minutes when the *Hellespont's* broadside struck the *Hydaspes* on the port bow, knocking in three of the iron plates, and forcing the cutwater over to starboard.

"The *Hellespont* struck just forward of her starboard mizen rigging, and began sinking rapidly. The *Hydaspes* lowered three boats, and succeeded in getting off all the passengers, captain, and crew, and every possible assistance was rendered. I would have towed her ashore, had it been possible, but she was sinking too fast. She went down in eight fathoms water, the lone tree bearing S.S.W., distance three-quarters of a mile; and the wreck of the *Ocean Mail* bearing E. by N., distance about a mile and a-half. The *Hellespont* had no pilot on board. The *Hydaspes* returned to Shanghai, and anchored below the shipping, bringing with her all who were taken from the ill-fated steamer. We learn that the *Hydaspes* also fouled the brig *Sea Horse* early this morning, on first leaving her berth, doing, however, only trifling damage. We are told by Capt. Munro, of the *Sea Horse*, that no blame is to be attached to the steamer, as she had not a clear passage out, which certainly should have been kept open."

On the 11th December an attack was made on the city of Wousie by the Imperial force, commanded by Major Rhode and the Mandarin Kosoling, one of the fighting generals of this province. They did not succeed in taking it, on which account they proceeded in throwing up stockades on each side of the Grand Canal within 500 yards of the city wall and 200 yards of the rebel stockades. These were finished before daylight and all guns brought in position. They commenced firing on the two rebel stockades in front of them, as also the city. After the rebels had stood the fire for an hour manfully in the stockades, they left the same in utter confusion. This opportunity Major Rhode took, and followed the rebels right up, and was in the city with men before they had time to close the gate. The rebels at once retreated, and a good number of them were killed. The Chung-Wang, who was present himself, retreated with his men on Chang-how-foo. Three Europeans were taken prisoners, who stated that they were lately very badly treated by the rebels.

The company of Royal Engineers, hitherto stationed in Shanghai, together with the invalids of the Royal Artillery and 67th Regt., proceed to Hong Kong, on board H.M.'s *Vulcan*, Lieutenant Maude in charge.

An interesting case of salvage has taken place in the English Consular Courts, in which the owners of the tug steamer *Martin White* claimed taels 11,000 from the owners of the ship *Electra*. The *Electra* got badly on shore, and her captain engaged the services of the tug to tow him off. She failed on the first attempt, but succeeded during the next high tide, when the *Electra* was found to have sprung so bad a leak that she was obliged to be deposited on a mud bank to prevent her sinking The *Martin White* remained by her for some time, checking an inclination which she manifested to slip off into deep water, and eventually claimed the above-named sum for her services. The defendants asserted that the vessel swung off with the tide, irrespective of the efforts made by the *Martin White*, which they asserted was deficient in steam power for the required purpose. They further insisted that the *Electra* could have been kedged ashore as easily as the *Martin White* could have towed her there, and argued consequently that, as the *Electra* would not have been lost without the steamer's aid, no claim for salvage was admissible. The court, however, thought differently, and estimated the value of the *Martin White's* services at 5,000 taels, for which judgment was given.

Everything was quiet at Ningpo at the date of our last advices; but active operations were being carried on against Hangchow by the Anglo-Chinese and Franco-Chinese contingents, aided by a large force of mandarian soldiers under the Foutai.

The pirates appear to have recovered to a certain extent from the blow given them by Colonel Cooke at Wantaquan, and have resumed their depredations in Hangchow Bay. The brigantine *Wandering Wave*, from Hong Kong to Hangchow, was captured by pirates in Hangchow Bay last week. While lying there, she was suddenly boarded by a number of men who approached in boats. Stink-pots were thrown on board, and the crew murdered. The captain, Lynill, managed to escape (after receiving a gunshot wound in the shoulder) by getting into a lorcha which was lying alongside. The pirates were fired on from the lorcha, which got under weigh and stood out to sea, but was shortly afterwards pursued by the pirates, who chased her during three hours, but ineffectually, and she got safely to Ningpo. The *Wandering Wave* was engaged in rebel interests at the time.

The following refers to gas:—A lover of light could hardly have selected a more obscure subject on which to ask information than as to the steps which are being taken to light the settlement with gas. Most persons have a vague idea that some project of the kind is in existence; some, even, may be aware that the energetic step of ordering pipes and fittings from England has been taken. But we doubt whether even the shareholders in the Shanghai Gas Company know much more. A meeting is called occasionally, at which some five or six individuals attend, and are informed that the necessary arrangements are in progress. The great proportion of the shareholders, however, are, we imagine, resigned to their fate, and will be agreeably surprised whenever the arrival of the necessary materials and a fresh digging up of streets offers hope that their capital is, at least, likely to be utilised, and that even a prospect of dividend may loom dimly in the future. The following short paragraph, which formed part of the last half-yearly report of the Municipal Council, contains the sum of our present information on the subject. It could not well be more vague, nor express a more resigned determination to hope against hope that all will come right—some day:—

LIGHTING.—Your Council trust that, ere long, the plans of the gas company may be sufficiently developed to admit of some satisfactory arrangement being concluded with regard to the effective lighting of the settlement.

"Christmas is coming—so is gas!" as our correspondent observes. We wish we could thing gas was so near at hand as the Christmas even of 1864.

KIU-KIANG.

CUSTOMS EXACTIONS.

(To the Editor of the *North China Herald*.)

SIR,—Now that Mr. Hart, a gentleman who is believed to have some regard for the convenience of merchants, has replaced Mr. Lay at the Foreign Customs, it might not be out of season to point out, through your columns, one of the greatest difficulties under which we labour in connection with that institution, leaving the remedy to one of your Shanghai correspondents to suggest, and the execution to the fertile resources of the new Inspector-general to carry out.

I allude to the "Half-duty System" [illegible] whereby a merchant is compelled [illegible] of fifty per cent. additional duty as a guarantee that the produce sent down from a river port to Shanghai for transshipment abroad be really re-exported. This regulation is particularly oppressive in its working as regards our most heavily taxed article of export—tea. To the question of the justice of a law which compels the payment of a guarantee in silver, while the return is made in inconvertible paper, I will not now allude, my wish being solely to bring the *modus operandi* before the public.

On every chop of tea shipped from a river port the shipper has to pay a sum averaging five hundred taels in addition to the regular export tax, as a so-called coast trade duty between that inland port and Shanghai, redeemable in the shape of a drawback granted ultimately at the original port of shipment on presentation there of the Shanghai certificate of re-exportation, this drawback being available only in payment of duties on further shipments. In this way a merchant can never recover the whole of his advances, a fixed sum being left perpetually in the hands of

Digitized by Google

the Chinese collectors. The floating capital enjoyed by this means by the bankers at this second rate port I estimate at seldom less than one hundred thousand taels. What the proportion of this amount is to each individual merchant here may easily be imagined.

Now, what object can the Chinese have in collecting a coast trade duty on an article at once recognisable as *packed solely for foreign consumption*, as all tea for exportation is, unless it be to place capital in the hands of Chinese bankers at the ports, as an equivalent for the heavy bribes they have to pay in order to obtain the concession of privileged collectors to the Customs? This being the object, I would ask whether it be fair that foreign merchants should be called upon to provide this capital without themselves receiving any equivalent? In directing the attention of your readers to this main point I pass over the further loss of time, money, and trouble, incurred where teas are re-sold or divided in Shanghai, a grievance of itself worthy a separate and special explanation.

I believe I am right in saying that not one chest of tea packed for foreign export ever passes into Chinese consumption, and that, were this vexatious impost to be withdrawn, the office of Customs would gain as much in the actual saving of the labour that this "Half-duty System" causes, as the merchant loses in interest on his capital locked up in the Haikuan banks.

Trusting that, if my remarks will not succeed in leading to an abolition of the system, they may at least serve as a profitable exposition of the difficulties under which any but large capitalists must suffer as long as it continues in force.

Yours, &c.

MACAO.

A proposal is announced for building a dock in Macao. The prospectus will be found in our advertising columns.

HONG KONG.

On the arrival of the French mail on the 3rd inst., we gave the intelligence of the arrival of the London mail of November 10 on the 24th of December. The present mail brings dates to January 1, five days later than per French mail.

The following is from the *China Mail*:—

THE CHAMBER OF COMMERCE.

The report of the committee of the Hong Kong General Chamber of Commerce has just been published. It displays an amount of vigour and intelligence which will, in future, stamp the Chamber with an authority which it never before possessed. We shall leave it to our readers to form their own estimate of the report; but, at the same time, we cannot avoid congratulating the Chamber upon the very complete manner in which its affairs appear to be managed. Those who take the trouble of reading the report will undoubtedly be impressed with the idea that the Hong Kong General Chamber of Commerce is assuming a position of authority which it will be difficult to set aside. We are now, at length, being made to feel that there is a mercantile body in China which claims to have a voice in the commercial affairs of the different nations. Why such moral power should not long ago have been erected, we are at a loss to imagine. It is almost surprising that the commercial community of Hong Kong should so long have overlooked the decided influence which was at their disposal by merely arranging themselves into the present simple form of organisation. There is scarcely any trouble, and no serious expense required in order to give weight to the opinions of a large mercantile community; and this consummation has at last been reached by the Hong Kong Chamber of Commerce.

The Chamber's report evinces a very wholesome regardlessness of recent attempts to bring the merchants of China into disrepute, while the honest, straightforward language in which it is uttered must certainly command the attention of the few English statesmen who interest themselves in China affairs.

The Chamber of Commerce, as it is now conducted, supplies a want which has long been seriously felt in this part of the world. It is not the business of newspapers here to advocate any particular interest, and a journal which devoted itself to supporting the interests of trade, and to following them out in all their minor ramifications, would very rapidly lose influence among that class of readers in Europe whose attention it is of importance to command. The Chamber at length speaks for itself. It is its own organ. It addresses the world, so to speak, without the cumbrous intervention of a newspaper. This, we think, is not only in good taste, but shows excellent judgment; and we are glad at last to see the Hong Kong Chamber come to the front in such a creditable manner, and display an amount of honesty and intelligence which is certain to give the mercantily community of this colony an amount of influence which it assuredly never possessed before.

We now reprint the report of the Committee of the Hong Kong General Chamber of Commerce, presented to the members at the half-yearly meeting held on the 16th November, 1863:—

REPORT.

In obedience to the 13th Rule of the Chamber, the committee have now to submit to the general body of its members their report of the various subjects that have engaged their attention, and of their proceedings in furtherance of the objects of the institution during the six months ending on the 31st ult. On some subjects they have had to give their consideration to questions bequeathed to them by their predecessors in office; while on the other hand, the necessities of an ever-increasing and restlessly active commerce, have suggested several matters of detail, productive, if adopted, of much convenience to the commercial community.

In the report for the year ending last May, notice was taken of the great want of a bankrupt law in this colony, and of the steps that, up to that time, had been taken to remedy the evil. A draft ordinance prepared in England, under the sanction of the Colonial-office, is about to remove this long-felt defect in the insolvent law of the colony, as it has already been read a first time before the Legislative Council, and is published for general information in the *Government Gazette* of the 31st October.

The correspondence between the Secretary of State for the Colonies and the Governor of Hong Kong upon the subject of the currency of the colony has been printed and circulated; and a new subsidiary coinage will be soon introduced into the colony. The committee doubt not that the change when effected will prove a great boon to the population of the island, where alone its character as a legal tender can be maintained. The larger question of an Imperial Local Mint has, the committee are happy to announce, been approved of by the Home Government, and a draft ordinance for submission to the Legislative Council has been received by the Colonial Government, and will appear in due season as a preliminary step to its establisment.

The Proclamation of February 28 of this year, prohibitory of the export coastwise of munitions of war, had led to some correspondence between this Chamber and the Colonial Government during the tenure of office of the late committee. Subsequently several Indian firms, feeling that its stringent terms pressed severely on them, as regarded shipments of saltpetre made in Bengal in ignorance of its existence, had an interview with his Excellency the Acting-Governor, to pray for some delay in carrying out the provisions of that Proclamation, so far as these shipments were concerned. Out of that interview a correspondence (which is annexed as Appendix A), arose, from which it appeared that the local Government had no power to make the concession.

The scheme proposed by the Baron de Meritens, Commissioner of Customs at Fuh chau, for extending trade in Formosa by adding two new ports—Keelung and Takao—to those, Tamsui, and Tai-wan-Foo already opened by treaty, had claimed the attention of the late committee just before their retirement from office. The correspondence commenced by them, and continued by your present committee, appears in the annexed appendices marked B; but there have been later modifications of the original plan therein specified, which have made Keelung, for Custom-house purposes, a dependency of Tamsui; and while laying down certain regulations for the control of vessels resorting to the port, have done away with bonds and passes in connection with it. The rules appended to the correspondence, therefore, apply only to the Southern port of Takoa, and the committee have reason to believe that the Baron de Meritens is at present endeavouring to introduce there an arrangement similar to that already in operation in the north, by making Takao a dependency of Tai-wan-Foo, with a custom-house establishment at the latter station. When that is done, there will no longer be any necessity for exacting the securities at first proposed as the consideration for enlarging the field of trade in the Island of Formosa.

The Baron de Meritens deserves much credit for the sagacity and breadth of view shown by him in his efforts to open more widely the trade of China to foreign enterprise, and success at these new ports will encourage an extension (already contemplated) of the system to important stations on the mainland.

On the appearance of the Blue Book on affairs in China, laid before Parliament in January of the present year, it was found to contain the memorandum addressed to Earl Russell by Mr. H. N. Lay, referred to in the Committee's Report to the Chamber of last May. The document was evidently not meant for the eye of the parties assailed in it, but Lord Russell, as was to be expected, published it, and in doing so, only did justice to the general commercial body in China. The Chamber of Commerce at Shanghai, and many of the firms specially accused by Mr. Lay of smuggling, have written in disproof of these charges, and in refutation of his bold and reiterated assertions of the existence of universal fraud on the part of the foreign community in their dealings with the Chinese Customs' revenue. But it appeared to this committe that, in the memorandum, many other questions of vital importance to foreign residents were advanced, in a manner unfavourable to their interests; and that the adoption of the whole of the paper by Mr. Under-Secretary Layard, in his place in Parliament, as an authoritative text book on all matters relating to foreign commerce in China, made it incumbent on them to review these and other questions in a communication to the Secretary of State for Foreign Affairs. They accordingly addressed on the 22nd ult. a letter to Earl Russell, which is now submitted to you, and will appear in the appended correspondence as Appendix C. The letter was enclosed (open) to Sir F. Bruce, for transmission to London, and a duplicate of it was forwarded yesterday direct to the Foreign Office. The committee have only to add, in explanation of the scope of their letter, that they framed it in the conviction that it is essential to a right understanding with the Government in China, that the treaty rights of foreign consuls should be rigidly main-

Digitized by Google

tained—but that their judicial decisions, whatever might be the grade of the deciding officer, should not be final. Mixed courts, which have been frequently suggested, would offer in their construction almost insuperable difficulties; but there is another description of court, adverted to in the letter, and established at the present time in Turkey and Egypt, which might possibly be introduced with much advantage in China, in connection with the supreme court of Hong Kong.

The committee, in concert with the Shanghai Chamber of Commerce, have made arrangements for receiving from London a fortnightly telegram, to the latest date possible, by each mail. The form of message and the letter to Mr. William Walkinshaw, one of your late vice-chairmen, requesting him to make suitable arrangements, are marked D in the appendices. The Shanghai Chamber have agreed to pay half the expense. The contents will, immediately on arrival, be available to all members of the Chamber; and it remains for them to decide now whether other parties may be admitted to a knowledge of these telegrams on payment of a subscription. The committee trust that their action in this matter will meet the approval of the members.

A scale of maximum commissions has been prepared (see appendix E) by the committee as applicable to the business of Hong Kong, and as valuable for reference in disputed cases. It has been submitted to the consideration of all the members, and several alterations having been suggested, they will have now to be settled, in order that the table may be published under the sanction of the general body. The committee purpose constructing a similar scale of warehouse rent, porterage, boat hire, &c., and, when prepared, it shall in like manner be circulated to all the members.

The absence of all right of appeal from the judgments of the British Superintendent of Trade in all suits between British subjects and other foreigners or Chinese, whether original or by appeal from the lower Consular Courts, has long been deemed a hardship by Her Majesty's subjects in China. The committee, therefore, regarding with favour a suggestion to raise a fund, out of which pecuniary aid might be given to parties engaged in combating such restriction of appeal, or in suits involving the assertion of principles of general importance to men engaged in trade in this country, issued the circular marked in the appendix F, and handed a copy to each member. The proposal has already obtained the approval of many of the members, and a deed of agreement has been signed by them, engaging to the extent of the amounts severally subscribed to meet calls for pro rata contributions when required. The class to which assistance may be given is subject to the discretion of the committee; but they are bound by the conditions of the deed to give full information to the subscribing parties. The Chamber of Commerce at Shanghai has raised a similar fund with the same objects.

The committee submit now to your judgment various changes and amendments in the rules of the Chamber, and in the bye-laws subordinate to them as set forth in appendix H. It remains with this meeting to adopt or reject these proposed alterations. The committee believe that they will improve the constitution of the society.

It may not be out of place here to notice an impression, more or less prevalent in Hong Kong, that this Chamber might be clothed with the attributes of a tribunal of commerce, and that by it all questions of mercantile law and usage might be cheaply and expeditiously disposed of. France is usually referred to in support of the feasibility of the scheme; but it seems to be overlooked that the conditions of success there were secured by the Revolution of 1789, through the then sweeping away of all the old landmarks of law, and by the subsequent introduction of the Code Napoleon, which directly provided for the present system. In Great Britain and its dependencies the commercial law has grown out of long custom, legalised by the decision of the Courts and by various Acts of Parliament; and root and branch changes in it would be necessary before tribunals of commerce could be made to work. The idea, however, has been a favourite one at different times; and not very long ago, for instance, in Liverpool, where an intelligent and earnest body of men probed the question deeply; but every attempt to engraft these courts on the commercial system of Great Britain has only brought into strong light the almost insuperable difficulties that bar success. That fact seems now so generally recognised, that the question, the committee believe, has died out at home, and in their opinion it is only as a court of arbitration that this Chamber can be presently and practically useful to the commercial community in the adjustment of differences.

The committee have remitted to London in the sum of £290. 5s. 5d. the contribution received from the Portuguese community of this colony to the fund for the relief of the distressed operatives of Lancashire, referred to in the minutes of the proceedings of the general meeting held on May 26th, 1863. Its receipt has been acknowledged with sincere thanks by the Secretary to the Mansion House Committee.

The accounts for half-year ending 31st October have been audited by Messrs. Ormiston and Lemann, and are now submitted to the meeting. (Appendix G.) The balance at credit of the Society with the Oriental Bank is $4,455.28 and the deposit $5,000—previously made with the Chartered Mercantile Bank of India, &c.—remains untouched. Some small expense must be incurred for additional furniture to the rooms now occupied by the Chamber, and which are leased from Mr. Douglas Lapraik, at a monthly rental of $65; but apart from that, and notwithstanding the list of members having been increased by four during the half year, the cash balance is less than last reported by $44,449; and the committee do not therefore as yet feel themselves in a position to recommend any reduction in the rates of subscription. In increased support alone from the mercantile body lie the means of lowering the scale.

JAS. J. MACKENZIE, Chairman.

The following programme of rejoicings at Macao on account of the birth of a young Prince of Portugal is furnished :—

On January 3rd, 1864 (Sunday), a *Te Deum* will be sung in the churches at noon, and, an hour after divine service, his Excellency the Governor will receive visitors. In the evening amateur theatricals will be given in the theatre, both by male and female performers, no less than four young ladies having agreed to perform.

On January 4th there will be a dinner at the Governor's house.

On January 5th there will be an exhibition both of Chinese and European-made fireworks.

On January 6th there will be a ball and supper at the Baron de Cercal's house.

THE FALL OF SOOCHOW.

On this subject the *China Mail* says:—"A man named Jones stated, on oath, that one of the reasons for his own and his companions' deserting the rebel cause was their knowledge of the fact that General Brown was giving Major Gordon his support. Such support, it is true, simply consisted in stationing British soldiers at a short distance from the scene of Gordon's operations. Small as this support would seem, it was quite sufficient to turn the scale in the major's favour; the defection of the rowdies was only the first fruits of this policy; its mature results are to be found in the surrender to Imperial authority of the leading men in the Soochow city. Only one of the Taiping chiefs—viz., the Mo-Wang, was adverse to giving up the city; and at a general meeting of the Wangs which was held in Mo-Wang's 'palace' on the fourth ultimo, that prince still proving obstinate in his desire to continue hostilities, the other princes solved the difficulty by assassinating him and surrendering themselves to General Ching."

"This they did upon the understanding that their lives should be spared. Gordon himself had received the General's assurance that such should be the case, and there is no doubt that this method of disarming hostility would rapidly have led to the extinction of the Taiping rebellion, and that in a manner highly consistent with the principles of justice and humanity. But General Ching defeated this policy by a disgraceful act of perfidy, which, unless disavowed and punished by the authorities of Peking, must permanently lower the Imperialists in the eyes of foreign nations. Notwithstanding the promise given to the Taiping leaders, and on the strength of which they shaved their heads and marched submissively through Futai's camp to go through the form of surrendering the city, they were all seized and executed, while Major Gordon was absent in the city, calling at the house of one of the chiefs. Such a revolting act of treachery affected the gallant major so painfully that he refused to co-operate further with Futai's forces, and even declined to accept the surrender of three hundred Taipings who desired to submit to him. The whole affair has been reported to Peking, and its enormity in European eyes will be forcibly set before Prince Kung if Sir Frederick Bruce does his duty.

"In the meantime, Gordon remains at Quinsan with his forces, independent, but inactive. His position at Quinsan will serve the purpose of covering Shanghai, a circumstance to which the wealthy inhabitants of that city are by no means indifferent. General Brown, before leaving Shanghai for Hong Kong, which he has made his head-quarters, had an interview with the general body of foreign Consuls, who unanimously empowered him to take what steps he considered best for the safety of Shanghai. In this manner all difficulties which might arise from the death of foreigners in rebel employ or in command of marauding parties are effectually obviated. The General, or any officer to whom he may delegate the command of Shanghai, will not be called upon by any of the foreign Consuls to answer for injuries sustained by rowdies who should be discovered disturbing the peace of the province. Had it been otherwise, the General would have been liable to be hampered at every turn."

The quantity of cotton shipped from all ports in China, from the 1st of June to the 23rd of December, was 243,180 piculs.

SIAM.

The American barque *Agnes* has been sold for $16,000. The American ship *Silas Freeman*, has also been sold. The British barque *Tell* and the Hambro' barque *Hertha* were offered for sale, but as they could not realise the price demanded they have since been chartered, and are now loading—the former for Hong Kong, the latter for Singapore.

The steamer *Enemy Chaser* is undergoing repairs, with a view to enable her to replace the *Chow Phya*, and the far-famed *Alligator*, of Tringanu notoriety, has gone into dock, and it is said she also will run the mails during the *Chow Phya's* absence.

JAVA.

On the arrival of the *Batavia* from Singapore, it was rumoured that she had seen the *Alabama* being chased by the *Wyoming*, and the *Java* reported that she had arrived at your port.

Our produce market has been very excited since the arrival of last mail steamer. The Sultan of Soerakerta has prohibited the use of opium by his employes, on pain of dismissal from from the service. No other news.

STRAITS OF MALACCA.

SINGAPORE.

When the present mail left, on the 8th of January, the London mail of November 26 had not arrived. In our issue of the 3rd inst. we reported its arrival at Galle on the 1st of January. The detention was owing to the accident to the *Bengal* in the Red Sea.

In our issue of the 3rd inst. we gave a full account of the captures made by the *Alabama*. We now append some comments from the *Straits Times*:—"Various reports are current as to the whereabouts of the *Alabama* and the Federal steamer *Vanderbilt*. One report states that the *Alabama* passed to the eastward, through Durian Straits, another that she has burnt the whaler *Atlantic* in Rhio Straits, and a third that she had been spoken on the Gulf of Siam by an English brig. To none of these, however, can we attach any positive reliance, though any or all are probable. With regard to the *Vanderbilt*, the report that she is at present in Penang is in every probability true, though how it can have reached this we are at a loss to understand. In the Calcutta papers of the 23rd of December it is stated that the *Vanderbilt* was spoken by the *Persia* somewhere between Moulmein and Penang steering for the latter port; also that another Federal ship-of-war, the *Onward*, had been spoken in the Bay of Bengal."

Our Christmas season passed off with more than ordinary joviality. The *Corps Dramatique* gave a performance in the Theatre Royal on the evening of the 29th, a full account of which appears in the body of our Journal. On New Year's-day the sports on the Esplanade were kept up with great spirit. In addition to the standard sports of leaping, foot-racing, sack-racing and wheel-barrow racing, there were a great many others peculiar to the place, and intended chiefly for the natives. Lewis' Australian Hippodrome is also here just now for a week or so; the first performance came off last night and was a very good display. Some second Barnum has also advertised a mermaid to be exhibited, caught, he says, in the inland Japan sea.

The Singapore Gas Works at Rochore are now, by the energy of Mr. Wells, the engineer, so far completed as to illuminate with gas the buildings and premises occupied by the company. Christmas eve was the first occasion of coal gas illumination in Singapore, and this works a bright era in the history of this central depot. There is perhaps scarcely a town of its size and number of inhabitants, now about 100,000, which presents, especially throughout its outskirts, a more gloomy, dreary, deserted, and disconsolate appearance than Singapore when the evening shades prevail.

So that gas-light is here as desirable for its bestowal of comfort, and inspiring cheerfulness, as for its usefulness as a guide and companion, and its security as a protection to life and property. The benefit and safeguard conferred by efficient gas-light, is quite equal to that of a greatly enlarged police, and the pleasure and safety of a visit to town by night is greatly enhanced.

The company's building is now entirely lighted by gas, and the cheerful brilliance so pleasingly diffused throughout its apartments is a delightful contrast to the murky duskiness of the surrounding neighbourhood. The whole of the building operations of the company are completed, and there remain but the iron roof now discharging from the *Early Dawn* to be placed over the large brick works, and the retorts, &c., the plant as it is technically termed, to be put up. All the iron work is now in progress and partly finished. The gas holder it is estimated will contain about 70,000 cubic feet, and requires six tons of rivets for its fastenings. The scrubber, the purifyer, the engine exhauster and condenser will shortly be in operation, and the completion of the works will be pushed rapidly forward.

His Honour, the Governor, has been pleased to extend the exemption authorised under the provisions of notification No. [illegible], dated 15th instant, to all exportations of arms to places to the westward of the Straits of Malacca.

The following are the returns of the Stamp Office for the last eight months, that is, from the date at which the last Government Administration Report was made up:—

April,	1863.....	Rs.	15,398.8
May	„	„	16,724.13.7
June	„	„	13,221.12.5
July	„	„	16,793. 1.8
August	„	„	16,357. 8.8
Sept.	„	„	19,716. 1.5
Oct.	„	„	15,831. 8.3
Nov.	„	„	15,266. 4

We extract the following from the *Government Gazette* of the 25th of December:—

Some anxiety is felt on account of the non-appearance of the Siamese steamer *Enemy Chaser* here. The *Enemy Chaser* was sent out to take the place of the *Chow Phya* on the line between this and Siam. The brig *Antelope*, which had left Bangkok five days after the steamer, has already arrived here.

On the transfer question we have the following news:—"Colonel Freeth, from Ceylon, who is wanting to complete the transfer commission, has not yet made his appearance, and nothing definite can of course be done. It is probable, however, that when he does arrive the business will be short, as Colonel Cavenagh and Sir Hercules Robinson have been busy collecting all the information that is likely to be required. The condition of the revenue promises to be most satisfactory, and a considerable surplus over the expenditure will be at the disposal of the new government. The stamp tax during the year that has just finished shows the receipts to be £21,000, for Singapore alone; this is a little over our most sanguine conjectures, and is the more satisfactory as it is certain. The committee appointed at the public meeting held three weeks age in the Town Hall, are, it is believed, drawing up a report upon the condition of the settlement.

Intelligence has been received from Labuan that the United States steamer *Wyoming* had been there and taken in 150 tons of coal.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ADAMSON—On the 28th Dec., at Dinder, the wife of W. Adamson, of a son.

CUTHBERTSON—On the 29th Nov., at Shanghai, Mrs. W. G. Cuthbertson, of a son.

DEACON—On the 27th Jan., at Ditchleys, South Weald, Essex, the wife of Albert Deacon, late of China, of a daughter.

DILL—On the 21st Jan., at 19, Regency-square, Brighton, the wife of Dr. Dill, of a daughter.

HEAD—On the 4th Feb., at Ashurst Lodge, Lankton, Kent, the wife of Charles Head, Esq., of a son.

LANCASTER—On the 1st Feb., at St. Aubin's Lodge, Hackney-downs, the wife of William Locke Lancaster, Esq., of a son.

THOMPSON—On the 31st Jan., at Tooting-common, the wife of Wm. Jas. Thompson, Esq., of a daughter.

WITHOP—On the 27th Dec., at Singapore, the wife of Capt. G. C. H. Withop, of the Dutch barque Gebroeders Houtman, of a daughter.

WORTHINGTON—On the 31st Jan., at Greenbank, Cheetham-hill, Manchester, the wife of Tom Worthington, Esq., of a son.

WULFF—On the 8th inst., at Walthamstow, Mrs. G. H. Wulff, of a daughter.

MARRIAGES.

HANKEY—SOUTHEY.—On the 4th Feb, at the Parish-church, Clapham, by the Rev. W. H. Howard, M.A, vicar of St. Thomas's, Exeter, uncle of the bride, assisted by the Rev. Wodehouse Raven, M.A., incumbent of Christchurch, Streatham, Ernest, youngest son of John Alers Hankey, Esq., of 10, Park-crescent, Portland-place, to Henrietta Maria, eldest daughter of Thomas Southey, Esq., of Clarence-house Clapham-park. No cards.

JACKSON—PATRIDGE.—On the 9th inst., at the New Wesleyan Church, Plumstead-common, Woolwich, by the Rev. Samuel Tindall, of Stockton-on-Tees, assisted by the Rev. James Smith, of King's Lynn, Mr. Thos. A. Jackson, of the firm of John Jackson and Sons, King's Lynn, to Martha, second daughter of David Patridge, Esq., Chief Engineer in Her Majesty's Dockyard, Woolwich.

ROBERTSON—CARRUTHERS.—On the 26th Jan., at St. Peter's, Eaton-square, Russell Robertson, Esq., Consular Service, Japan, to Annie, youngest daughter of the late Jacob Carruthers, Esq., of Glasgow.

TRAUTMANN—GRANT.—On the 4th Feb., at St. Paul's Church, Hooton, Cheshire, Johann Friedrich Heinrich Trautmann, Esq., of London, late of China, eldest son of Friedrich Trautmann, Esq., of Hamburg, to Ellen, daughter of the late Frederick Grant, Esq., of Gorst Hills, Cheshire. No cards.

DEATHS.

BOONE—On the 20th Jan., at Suez, Egypt, Phœbe, the beloved wife of the Right Rev. W. J. Boone, D.D., Bishop of the American Episcopalian Mission at Shanghai, China, and a native of South Carolina.

CLARK-KENNEDY—On the 30th Jan., at 69, Oxford-terrace, Hyde-park, Lieutenant-General Sir Alexander Kennedy Clark-Kennedy, K.C.B. and K.H., of Knockgray, Kirkcudbrightshire, Colonel of the Scots Greys, in his 82nd year.

CRIBB—On the 16th Dec., at Hong Kong, on board H.M.S. Melville, John Cribb, Quarter-master H.M.S. Racehorse.

DOWN—On the 22nd Jan., greatly esteemed by all who knew him, Henry Down, Esq., Commander in the P. and O. Service, in the 44th year of his age. Friends at a distance will please receive this intimation.

FRANKS—On the 30th Jan., at the residence of her father, Upper Norwood, Ross, the beloved wife of Mr. E. A. Franks, of Thornton-heath, Croydon, in her 33rd year.

HORAN—On the 14th Dec., at the General Hospital, Hong Kong, Michael Horan, Private H.M. 99th Regt., aged 24 years.

JOHNSTON—On the 5th Feb., at 74, Gloucester-terrace, Hyde-park, Wilkinson Dent, infant son of Colonel Charles Cornwallis Johnston, Royal Engineers, aged 13 months.

LINSTEAD—On the 21st Jan., at Adelaide-villa, Camberwell, Constance Elizabeth Rose, aged four years; and, on the 24th Jan., Ernest Theophilus, aged six years—the two eldest and beloved children of Theophilus Gee Linstead, Esq., of Hong Kong.

MEDHURST—On the 31st Jan., at Chesterfield-house, Bath-road, Peckham, Capt John W. Medhurst, late of H.M.'s 99th Regiment, and Town Major of Hong Kong, in his 42nd year. Friends will please accept this intimation.

MONCREIFF—On the 22nd Dec., 1863, at Singapore, while on his passage from Shanghai Thomas Moncreiff, Esq.

SHORT—On the 14th Dec., at Hong Kong, on board H.M.S. Melville, John Short, Stoker of H.M.S. Centaur.

SMITH—On the ——, while on his passage from Shanghai to England, H. Smith, late of Astor House, Shanghai.

WELLS—On the 14th Dec., at the Detachment Hospital, Kowloong, Joseph Wells, Private H.M. 99th Regt., aged 27 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

SHANGHAI.

BLACK TEAS.—A dull market is again reported, but since the advices by the last mail holders are becoming firmer, and teas of this description are beginning to meet with more inquiry. The settlements reported are: 11 chops, 5,766 chests, and 10 chops, 5,277 chests, re-shipped of Oopacks, Oonams, Ningchows, and Hohows. Stock, 27 chops of which 5 are for reshipment. Oopacks and Ningchows are quoted at 24 to 29 taels; Oonams, 19 to 24 taels; Hohows, 17 to 20 taels per picul. Green: Prices have advanced fully from 2 to 3 taels, and the demand has been quite active during the fortnight, with only small quantities offering in the market. Settlements and reshipments are 39,711 half-chests Fychow, 7,106 half-chests Pingsuey, 3,700 half-chests Japan. Fychows have been settled at 37 to 38 taels, and Pingsuey at 31 to 35 taels per picul. Stock estimated at 31,000 half-chests Fychows, 780 half-chests Japan, and 4,000 half-chests Pingsuey.

SILK.—The high prices last quoted have been sustained during the fortnight, and owing to the small stocks, holders are very firm, feeling confident that high figures will be maintained. The settlements amount to 1,650 bales, leaving a stock of 6,000 bales.

COTTON.—Good quality is in much demand, and a really good article being scarce, holders are firm at 26 taels per picul, and every probability of higher rates being yet obtained.

FOOCHOW.

TEAS.—There has been a large business done, but arrivals having almost ceased, good flavory teas have advanced five mace. Lower grades are less inquired for. Settlements reported: Congou, 25,500 chests at from 6½ to 22 taels; Souchong, common to fine, 2,000 chests at 18 to 32 taels; Pekoe, 325 chests, at 20 to 21.5 taels; Oolong, common to good, 25,500 half-chests, at 12½ to 20 taels; scented tea, 1,900 chests, at 18 to 21 taels. Estimated stocks—Congou, 45,000 chests; Souchong, 3,500 chests; Oolong, 22,000 chests; flowery Pekoe, 450 chests; scented teas, 5,000 chests.

CHINA IMPORTS.

COTTON YARN.—The quotations for this article are those at which the dealers would now be willing to make moderate purchases for the supply of their more immediate wants, but they must, in a measure, be regarded as nominal in the absence of any disposition on the part of holders to realise.

GREY SHIRTINGS do not show any material change in price in this colony, and the transactions which have actually taken place are confined almost entirely to purchases made on foreign account. The estimated settlements of the fortnight are put at 32,000 pieces for goods here and to arrive.

WHITE SHIRTINGS have found purchasers amongst native dealers to the extent of 7,000 pieces, and the value of these fabrics shows no material alteration.

T-CLOTHS.—The sales of these goods, which show a material advance in price, although they are still relatively cheaper than Long Cloths, amount to about 6,000 pieces for the fortnight. From Canton, although the nominal value of all the above named articles of import has advanced, there are not any sales to advise.

AMERICAN DRILLS.—Sales of about 5,000 pieces have been effected during the past fortnight.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The value of the above goods, with the exception of coloured Brocades which show an improvement of about 40 cents, and in which alone any transactions have to be reported remains, as before quoted. The sales of assorted Brocades in this colony are put at 1,000 pieces, and in Canton 800 pieces. White Spotted Shirtings have changed hands.

DAMASKS continue to be without any demand.

CHINTZES AND HANDKERCHIEFS.—These goods have not met with any inquiry during the past fortnight.

RAW COTTON.—Considerable quantities of very inferior and damaged staple which have recently arrived from the ports of Shanghai and Ningpo have weakened the tone of the market, and the value of good cotton is not at present quite equal to that quoted in last circular, while the decline from the highest point of the market, which was reached a few days after the departure of the last mail steamer may be considered about $2 to $3 per picul. At the present moment the market is rather flat, and the transactions of the fortnight are estimated at about 23,000 bales; 1,800 of which exclusive of about 1,000 damaged and inferior have sufficed to supply the requirements of the native dealers.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—The first-mentioned goods have met with a fair amount of inquiry during the fortnight, but there is not any alteration to notice in prices, and the sales effected amount to about 960 pieces.

LONG ELLS.—The quotations for this description of Woollens remain as given in last circular, with a good business doing. Sales of 940 pieces have been made.

CAMLETS also remain at the same figures as before, with sales of 500 pieces for the fortnight.

LASTINGS show a trifling advance in value, as compared with the rates previously current, and the settlements of the past fortnight are put at 200 pieces.

BLANKETS.—100 pairs sold at about former rates. In Canton the value of almost all kinds of Woollen goods is quoted higher, but in the absence of any transactions, the prices given must be regarded as nearly nominal.

METALS.—Iron, Flat, &c.—The prices of the various descriptions of Iron in this colony show no change when compared with the rates current in the middle of the month, but in Canton the advance established in the different kinds amounts to from 10 to 20 cents, and in the case of Iron Wire to 50 cents per picul. The sales reported in Hong Kong amount to about 1,200 piculs of Nail Rod, 445 piculs of Round Rod, and 70 piculs of Square Flat Bar. In Canton the sales are put at 850 piculs of Nail Rod.

LEAD has declined somewhat both here and in Canton, and the transactions in the article are estimated at 480 piculs, and 1,200 piculs for each port respectively.

TIN.—No sales of this article have been reported.

TIN-PLATES.—Are without change in price in Hong Kong, but they have declined in value in the Canton market.

STEEL.—Nothing doing.

OPIUM.

PATNA.—Has fluctuated between $565 to $580, and during the first week after the mail's departure very large clearances were made at medium rates by Chinese; latterly the market has become dull, and quotations are now $562.50 (cash) and $555 per chest; 12th sale to arrive.

BENARES.—Remain, as usual, subject to the market rate of Patna, and is now quoted at $10 less than Patna. The demand has been an average, as usual.

MALWA.—It is difficult to find out the true state of the market. Much latitude is allowed the Chinese in clearing the opium, and though the quotations by them have been bordering on $650 per chest, I hear of transactions at $630, cash, effected to Europeans.

TURKEY.—Chinese seem to inquire after inferior descriptions, and those rule firm at $520 to $530. There appears to be very little first-class in the market, none having been imported per last two mails.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 6d. to 6s. 6¼d.	6s. 6d. to 6s. 7d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 10d. to 4s. 10½d.	4s. 11d. to 5s. 0d.
At Singapore	6	ditto	4s. 10d. to 4s. 10½d.	4s. 10½d. to 4s. 11d.
At Manila	6	ditto	4s. 7½d.	4s. 8d. to 4s. 9d.
At Batavia (guilders.)	6	ditto	..	..

The Exchange on India at Shanghai was 312 to 314 rupees per 100 taels and at Hong Kong 228 to 229 per 100. Bar silver at Shanghai 111 per 100 tls., and Hong Kong 4 per cent. prem. The current quotations at Shanghai for Mexican dollars was 79 tls. per $100, and the rate of exchange on Hong Kong was 25 to 26 per cent. discount.

The following is from Messrs. Sharp and Co.'s Circular of Dec. 31:—

GOLD.—This bullion, on account of the state of matters in Bombay, has been much neglected, and had any arrivals of importance come to hand it must have declined considerably. The total imported during the fortnight, including a sum omitted in our last account, is one lakh, the amount sent hence, including the shipments per *Orissa* on the 15th, and excluding those by the *Singapore* to-morrow, is rather more than three lakhs.

SILVER.—The amounts received are under one lakh of dollars, the amounts sent away are equal to two; this is exclusive of the shipments (if any) to be made to-morrow by the *Singapore*, which will, however, probably be small. Bar silver at the moment may be quoted scarce in the colony.

DOLLAR CURRENCY.—Three lakhs and a half have been imported, mostly from the Coast, and six lakhs have been exported. New coin remain very much the same as previously quoted.

DISCOUNTS AND MORTGAGES.—Money has been somewhat in demand during the fortnight, and mortgages have been done at 12 per cent. for a term. Discounts of Bank's own acceptances short at 9 per cent., and of first chop bills short at 10 per cent.

SHIPPING INTELLGENCE.

ARRIVALS.

At SHANGHAI.—From London, Dec. 14, Medusa; 22, Aurora Australia. From Folkestone: Powerful (str.). From Swansea: 12, Atila. From Newport: 20, Kate. From Liverpool: 21, Elfin. From Newcastle 22, Lettire Catherier.

At FOOCHOW.—None.

At HONG KONG.—From Glasgow: Dec. 25, Bonara.

At SINGAPORE.—From London: Dec. 27, Couranto. From Cardiff: 29, Ferris; Jan 1, Henriette; 5, Anna Decator. From Glasgow: 3, Roslin Castle; 6, Frederica. From Rotterdam: 1, Marie Godard; 3, J. C. Simony.

DEPARTURES.

From JAPAN.—For London: Dec. 7, Confidence.

From SHANGHAI.—For Liverpool: Dec. 18, Young England; 19, Nonpariel; 22, Royal George, General Putnam; 24, Solway. For New York: 23, St. Paul, Guiding Star.

From NINGPO.—For Liverpool: Dec. 9, Merry England.

From FOO-CHOW.—For London: Dec. 8, Standard; 14, Isabella Ridley, Bankside. For New York: 10th, Queen of the Seas; 19, Peep o' Day.

From HONG KONG.—For London: Dec. 29, Ocean Bride. For Liverpool, 20th, Offor.

From MACAO.—For London: Dec. 20, Mary Ann Wilson; 26, Agra.

From MANILA.—For Denmark: Emma. For Rotterdam: Zanzibar.

From SINGAPORE.—For London: Jan. 6, The Brodre, Confiance.

From PENANG.—For London: Jan. 7, Rockcliff.

LOADING.

At JAPAN.—For London: Alexandra, Forerunner, Louis Kniffler, Governor. V. Swieton.

At SHANGHAI.—For London: Island Queen, Egmont, Sir Harry Parkes, Strathallan, Lansdown, Marquis of Argyle, Fairleader, Oliver Cromwell, Oithona, Sappho. For Liverpool: Spirit of the Times, Lodore, Alice Tainter Mountmorency, Ralston Veloz, Antelope, Solway, Thomas Royden. For New York: Silvercraig, Hermoine, Johanna, Thetis, Anne Wood, Capella.

At FOOCHOW.—For London: Weymouth, Albrecht Oswald, Glaramara, Stuart Wortley, Kahlamba.

Digitized by Google

At HONG KONG and CANTON.—For London: Tamerlane, Norwood. For Liverpool: Koh-i-noor, Junapore, Orient, Argonaut, Ceres, Creole, Hamilla Mitchell.

At SINGAPORE.—For London: Early dawn, Spanker. For Liverpool: Crusader. For Bordeaux: Hooghly, St. Michael.

At PENANG.—Etoile for Bordeaux, Edinburgh Castle for London.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton, £4; Tea, £4 to £5; Silk, £4 to £5.

SHANGHAI.—Excepting Cotton, for which the rate has advanced, very little is doing. £3. 17s. 6d. to £4. is given for Liverpool and London.

FOO-CHOW.—To London: £4 per ton of 50 cubic feet. To America: £4 per ton of 40 cubic feet.

HONG KONG.—For coasting purposes there is some activity, but little doing for England. To Liverpool and London, for cotton, the rate is £3. 15s. to £4, and £4 to £4. 10s. to New York; to Ningpo and Shanghai, 35 to 40 cents per picul; to Banghok and back, 60 cents per picul.

MANILA.—Tonnage is required, and freights have advanced, viz.. clayed sugar, £3; unclaoed, £5. 10s.; tobacco, £6; for. hemp, £6 To New York: Slightly higher.

SINGAPORE.—Tonnage is in demand; the rates for coasting are good. No fresh vessels are an the berth for England or Continent.

CASULTIES.

JAPAN.

STRANDING OF THE ORIENTAL

News of thh Oriental, late under the American, now under the Prussian, flag—having been stranded on Saragota Spit, not far from this port reached here on Sunday last, and three of the British gun-boats went down at once to see if the report was true. On their return, it was ascertained that the report was true, and that the vessel could not be got off, and that there was seven feet of water in the hold. The Prussian man-of-war, the Gazelee, went to assist her, but from all we have since heard the Oriental will be considered a total wreck. We hear that the vessel is not insured. She is reported to have a general cargo, but we have not learnt the exact description of the goods in her. She is said to have saiied from Macao, via Hong Kong, for this place.

SHANGHAI.

LOSS OF THE "TROY."

The British ship *Troy*, from Shanghai to Ningpo, parted her cables in a gale outside Chinhai, drove on the rocks, and became a total wreck. Crew all saved with loss of everything.

Steamer *Governor General*, Captain Bell, from Ningpo, December 12, experienced very strong N. E. winds; she reports the total loss of a Danish brig name not known; the vessel was at anchor when during a violent gale she went down, nothing but the heads of her lower mast being above water; the crew are all safe.

COMMERCIAL POSTSCRIPT.

SILK.—We have no improvement to notice in the silk market; the little business done since last mail has been at lower prices, the firmness of some of the leading importers alone preventing a more serious decline. In Japan silk there has been more disposition to do business the last few days, buyers being attracted by the comparatively moderate rates now ruling. Deliveries from 1st to 8th inclusive: China, 765 bales, Japan, 493 bales; total, 1,258 bales.

SUGAR.—Prices for common and middling qualities have advanced 6d. to 1s. per cwt.; 4,500 bags Manila clayed sold yesterday at 40s.

MISCELLANEOUS.—Cutch: Steady: at auction yesterday, 99 boxes, 1,296 bags Pegue sold at 25s. 6d. to 26s.; first-class, 24s. 6d. Turmeric: Steady; 112 bags Bengal, part sold at 27s. 6d. to 28s. for fair. Sapan Wood: 19 tons Singapore, damaged, sold at £7. 15s. to £9.

ARRIVALS NOT INCLUDED IN THE TABLES.—Feb. 10, off the Wight, from Hong Kong, Queen of the Age; 9, off Plymouth, from Shanghai, Jubilee.

DEPARTURES NOT INCLUDED IN THE TABLES.—Feb. 6, from Shields for Singapore, Volunteer; from Sunderland for Hong Kong, Trafalgar; 5, from Lamlash for Hong Kong, Figaro; 10, from Glasgow for Batavia and Singapore, Glenisla; 10, fram London, for Shanghai, City of Quebec; 9, from Cardiff for Hong Kong, Clara; 10, from Portsmouth for Hong Kong, Maggie Leslie; Jan. 26, from Madeira for China, Fun Sing, str.; Feb. 11, from Liverpool for Singapore, Brami.

SPOKEN.—Gondola (ship), steering S.E. (supposed New York to Shanghai), Dec. 26, 1 S., 29 W.; Canadian, Hong Kong to London, Nov. 22, 23 S., 61 E.; Jubilee, Shanghai to London, Oct. 28, just out of Sunda Straits; Robin Hood, from Liverpool for Hong Kong, Jan. 1, 2 N., 24 W.—had experienced very heavy weather after leaving the channel; Jonge Zusters (?), Batavia to Amsterdam, Nov. 3, 11 S., 100 E.; Anna, Batavia to Amsterdam, Dec. 7, 32 S., 29 E.; John Currie (?), Kondon to Hong Kong, Jan. 2, 2 N., 24 W.

The Robin Hood, from London to Hong Kong, which was spoken Jan. 1 in lat. 2 N., lon. 24 W., had lost her sails and main yard.

LAID ON.—At London, for Hong Kong and Canton, Gauntlet; at Glasgow, for Batavia, Samarang, and Sourabaya, Thomas Mitchell.

In the Manchester markets of this week there was more inquiry. Grey shirtings, 7 lbs., 17s. 3d. to 17s. 6d.; 9 lbs., 24s. 3d. Long cloths, 19s. 9d.; T-cloths, 14s. Maddapollams, 7s. 6d. to 7s. 7d.

LAST NIGHT'S PARLIAMENT.

THE DEATH OF LIEUTENANT TINLING AND CAPTAIN DEW.

Lord CHELMSFORD called the attention of the First Lord of the Admiralty to the particulars of the death of Lieutenant Tinling, of Her Majesty's ship *Encounter*, at Shoushing, on the 5th of March, 1863, and asked for explanations of the statements made by the Secretary of the Admiralty with respect to them, by which the family of the young officer had felt themselves aggrieved.

The Duke of SOMERSET read a letter from Captain Dew, of the *Encounter*, describing the circumstances under which Lieutenant Tinling was killed. He was not on duty or acting under orders, but, at his own urgent request, had accompanied Captain Dew to the scene of action. The commander had told the officers volunteering that they were considered on leave; he had also cautioned them not to expose themselves, as he considered himself responsible for their safety.

Lord GREY believed that Lieutenant Tinling was virtually acting under orders, though he was represented as only an amateur. The question had an important public bearing, as illustrating the manner in which this country was being involved in the affairs of China. Our policy was neither neutral as between the Imperialists and the Taipings, nor effective in support of the established Government. He contended that England ought either to be neutral, or to intervene in a manner worthy of the nation.—Lord HARDWICKE said that a junior officer volunteering to accompany his commander on any service must be considered as still acting under orders.—The Duke of SOMERSET, in reply to Lord Grey, defended the policy of the Government as to China. That they could attempt to assume the whole administration of the Empire was out of the question, nor could they abandon Shanghai to the rebels.—Lord RUSSELL said the Government had taken the only practical course, and it had been successful. Wherever our authority had extended, there had been a revival of trade and prosperity.—Lord GRANVILLE thought the past services of Lieutenant Tinling had been fully recognised. It was admitted that he possessed every quality of a naval officer.—Lord CHELMSFORD contended that as Captain Drew was engaged in hostile operations, and Lieutenant Tinling was acting under his orders, that officer must be considered as having died in the discharge of his duty. After a few words from Lord ELLENBOROUGH and Lord HARDWICKE the subject dropped.

POLICY OF THE GOVERNMENT IN CHINA, &c.

Mr. FERRAND gave notice that he would, on the motion for going into Committee of Supply, move the following resolutions:—

"That the Eastern policy of Her Majesty's Government, begun by the present Prime Minister in China thirty years ago, and from that time enforced by every Whig Government, has led to constant little wars, which have culminated in the deeply deplored burning of Kagosima and the massacres of Soochow.

"That the Government have admitted that these little wars were the result of the pressure put on them by merchants to extend their trade.

"That our military and naval armaments required to carry out this Eastern policy have greatly increased the heavy taxation of the country.

"That it is a flagrant injustice and a violation of the principles of free trade to tax the agricultural and other trades of Great Britain, and especially of Ireland, for commercial wars waged to open fresh markets for manufactures in which they are not engaged, and have no pecuniary interest."

BURNING OF KAGOSIMA.—DIVISION IN HOUSE OF COMMONS.

Motion made, and question proposed, "That this House, while only imputing to Admiral Kuper a misconception of the duty imposed on him, deeply regrets the burning of the town of Kagosima, as being contrary to those usages of war which prevail among civilised nations, and to which it is the duty and policy of this country to adhere" (Mr. Buxton). Amendment proposed, "To leave out the words 'while only imputing to Admiral Kuper a misconception of the duty imposed on him'" (Mr. Longfield). Question, "That the words proposed to be left out stand part of the question," put and negatived. Amendment made. Main question, as amended, proposed. Whereupon previous question put, "That that question be now put" (Viscount Palmerston). The House divided—Ayes, 85; Noes, 164.

THE DEBATE ON KAGOSIMA.

(THE TIMES.)

Mr. Buxton did but speak last night the universal mind of the country when he deplored the disastrous conflagration of the city of Kagosima, and called upon the Government to clear our fair national fame from the imputation of having wilfully caused it. Nor can Admiral Kuper very fairly complain that his conduct upon that occasion has undergone close criticism. The destruction of the unarmed portion of a city is a fact which upon the face of it carries heavy responsibility and cause for censure. It is to a British officer like the loss of his ship. It may be proved to have been unavoidable; but the burden of apology and excuse is upon the officer in command. There is no more wholesome restraint upon the conduct of an Englishman serving abroad than the knowledge that the eyes of his countrymen are upon him in every act he performs, and in every spot of the globe where he may be commanding. If no act of gallantry misses its applause, no heroism can repress the cries of shame that will follow upon a cruel or an unnecessary violence. No naval or military commander, and no colonial governor will ever wisely forget that the critics who are observing him from afar are regarding his conduct from opposite points of view. While the general acclaim urges him on to decisive and famous deeds, there are cold and unsympathising critics who like not his trade, and are not very well affected to his cause; who think the policy he is sent to force through little better than a wickedness; and who are on the watch for any excess he may commit, and ready to call him to account even for the laurels he may have won. After a success, moreover, we are rather accustomed to store up the gains as an acquisition which is secure, and to turn aside from the cost, whether this be counted against our purses or our sympathies. Other causes also are at work. Party spirit sometimes steps in with ungenerous comments upon achievements which have a party effect; or mere notoriety-hunters sometimes seek occasion for a popular display of indignation. But do what an officer may, if his acts are in any way questionable, he may be sure they will be questioned; and even if he may, as Admiral Kuper has in the case of Mr. Buxton, meet with a reasonable critic, who would impute to him only "a misconception of the duty imposed upon him," he will be certain to find some more savage foe pushing to the front, who, like Mr. Longfield, moves to make the censure upon him short, sharp, and unconditional.

We must, of course, accord that we should have liked Admiral Kuper's achievement much better if Kagosima had been left unharmed; and we will also confess that, failing this, we should have liked his despatch much better if it had dwelt more pointedly on the fact that the burning of the city was an unavoidable accident, and if he had bestowed a few words of regret upon the occurrence. That is to say, we should have liked this sailor's despatch better if it had been more carefully and considerately written. There can be no doubt that in recording the destruction of the city without any expression of regret he may enable some persons to infer, if they please, that he rather exulted in the catastrophe; and he may offer an excuse to others who may believe that he contrived it. But the facts themselves are sufficiently stated. He tells us plainly enough that the ships under his command did not fire until fired upon with shot and shell from all the batteries; that they then engaged those batteries, and were caught by a typhoon while firing into them. He tells us also that he was obliged to take his ships out of action on account of the irresistible force of the wind, and that the tempest, lasting as it did all night and part of the next day, blew the flames all over the town. One would think that these were facts sufficient to reduce the discussion to the simple issue whether Admiral Kuper was or was not justified in returning the fire of the batteries. Lord Russell took this view of the case in the despatch in which he approved the conduct of Colonel Neale. Mr. Buxton has criticised the statements in the despatches, but he has not answered, or refuted, or even varied them. In the whole of his long speech he never once alluded to the tempest which was the immediate cause of the fire, and the evidence of "eye-witnesses" which he brought forward failed to substantiate what he undertook to substantiate — that "Admiral Kuper shelled Kagosima on purpose." After all that has been said, the case still substantially rests upon the despatches, and the only fair inference which can be drawn from the wording of those despatches is that the Admiral was at the time too impressed with what he saw on board his own ships, and too concerned for the death and wounds of his own sailors, to be able to bestow a fair amount of sympathy for sufferings which were not immediately under his eye, and for a catastrophe which he probably regarded as the necessary consequence of an imperative act of duty.

No one will be found now-a-days to question the position that "it is the duty and policy of this country to adhere to those usages of war which prevail among civilised nations." The best and the most humane of these usages have originated with ourselves, and we have never departed from them. Nor will any one think it necessary that Mr. Buxton should adduce to the House of Commons a long array of authorities from Lord Bacon to General Halleck, in order to prove that to burn down the private dwellings of non-combatants is, if done wilfully, a breach of the usages of war, as well as a crime against humanity. But the question in dispute last night was simply a question of fact, not of opinion. This issue of fact was not very fairly treated by Mr. Buxton when he placed the loose phrases of eye-witnesses, who wrote under no responsibility, and who were not shown to have been in a position to know what shots were directed against hostile batteries and what shells were cast into the town, against the deliberate statements of the Admiral and the Consul. It was not candid in any of the Opposition speakers to leave out the all-important circumstance of the storm, and to assume that a British Admiral was trying to burn a city when all his efforts were required to silence the batteries of the fortifications. We must say even to Lord Stanley, that a party advantage is too recklessly sought when to obtain that advantage it is necessary to tarnish the reputation of our common country, and to put invidious constructions upon some doubtful words in the despatches of an absent Admiral. Mr. Buxton fairly admitted that to attempt to fix upon Lord Russell an approval of any such act of wanton destruction as is now suggested would be, "not censure, but calumny." If this be so, it is conceded that Lord Russell could not have read these despatches as Mr. Buxton and his much more fierce allies now read them, and there is nothing in their language which compels this construction. Still, we must cordially agree that the House of Commons is usefully and honourably employed in investigating such a catastrophe as this. The time employed upon it will certainly not have been misapplied if it shall tend to convince not only our soldiers and sailors, but also those engaged in civil pursuits in the East, that any act of wrong or oppression committed upon the people whom they are perhaps too much inclined to consider as barbarians will be closely examined and severely criticised in this country.

CONSULAR CHARGES AT AMOY.

(MITCHELL'S MARITIME REGISTER.)

"A British Shipmaster" writes us a letter respecting certain charges which he has been obliged to meet in the ports of Amoy and Chif-Au, incurred by bringing two seamen before the British Consul at those places. It appears from our correspondent's statement, that while at Amoy, in October last, one of his crew, an able seaman, refused duty. For this offence, the man, having been brought before the Consul, was sentenced to pay a fine of five dollars, and to be kept in confinement till the ship sailed from Amoy, the cost and expenses of his imprisonment to be deducted from his wages. On a subsequent occasion, while the ship was at Chif-Au, this man was detected broaching the ship's cargo. For this offence, aggravated by insolent language, the delinquent was sentenced to three months' hard labour. "I have been debited by the Consul," says our correspondent, "and have paid for the man's support, under heading of gaol expenses, the sum of 3 dollars 60 cents for fourteen days, at the rate of 1s. per day, which would amount to 2 dollars 9 cents only, the dollar, by the Consul's rate of exchange, being 4s. 10d." "I am at a loss to find out (he adds) what the balance of 70 cents is for, or why I should debit the ship with his keep, as he had no wages due to him the first time he was locked up, all the wages being swallowed up in a fine and court costs in the Consulate." In the second case referred to by our correspondent, a seaman was brought before the Consul for using abusive language, for which he was sentenced to two months with hard labour. In this case, also, a demand was made by the Consul for eleven days' "diet money," which sum was paid, like the former charges, on account of the ship, no wages being due to the man. Our correspondent is at a loss to understand why these charges should fall upon the ship. He states that, though familiar with the mode of dealing with delinquents by our consular officers in various parts of the world, he has never before heard of such demands, and has always understood that the labour performed by prisoners under sentence in such cases is taken as a set-off against the cost of maintenance.

The criminal jurisdiction conferred upon her Majesty's Consuls in China is founded upon the Treaty of 1842, under which the five ports of Canton, Amoy, Foo-choo-foo, Ningpo, and Shanghai, were opened to British trade, and is regulated by a commission appointed in 1843, and by subsequent ordinances issued by the Queen in Council. In cases of murder, piracy, slave-trading, manslaughter, aggravated assault, wilful destruction of the ship, deliberate and concerted mutiny, or other offences of a "very serious nature, involving risk to the life or welfare of others," the offender is sent home at the public expense, or remitted to the jurisdiction of the Court at Hong Kong; but "in cases of petty theft, and also in cases of insubordination (we quote from the instructions to Consuls issued by the Board of Trade), and of other crimes of that description, the "Consul will, in no case, send the offender for trial, unless the master or agent of the ship, or some other person against whom the offence has been committed, undertakes to prosecute, and to pay the expenses of sending home the offender and witnesses. This undertaking must be such as to be satisfactory to the Consul, and must be "forwarded by him to the Board of Trade." By this, therefore, it would seem, our Consuls are invested with a summary jurisdiction in all cases when the offence charged does not fall within the category of offences "involving risk to the life or welfare of others." In the table of Consular fees as

Digitized by Google

settled by Order in Council, and appended to the instructions referred to, there is no provision made for the exercise of this jurisdiction, and no authority for the exaction of any charges connected with the punishment of offenders. We are, therefore, as much at a loss as our Correspondent to understand by what authority the Consuls at Amoy and Chif-Au levied the charges referred to in his letter. Offences against discipline committed by seamen, whether at home or abroad, are punishable, according to the Merchant Shipping Act, by imprisonment, and by certain forfeitures of the offender's wages, at the discretion of the Court, while similar punishments may be awarded in cases of wilful damage to the sihp, or embezzlement of her stores or cargo. But we are not aware of any law by which the ship can be fixed with the cost of punishing offenders of this class, or of maintaining them while undergoing sentence. Offences against the criminal law committed at home are punished at the public cost, and it would be a strange and most unfortunate policy which would reverse this arrangement within the jurisdiction of the Consular establishment, and make the expense of punishing offenders fall upon the parties prosecuting. Our correspondent would do well to address himself to the Board of Trade upon this subject. That department is, we believe, ready at all times to act upon representations respecting unauthorised charges made by our Consuls, and is sincerely desirous to put a stop to all such exactions. We have said that our Consuls in China possess a somewhat extensive, and, in some respects, an exceptional jurisdiction, but we shall be more than surprised to learn that they are justified in making charges upon a ship, for the punishment of the refractory, or otherwise delinquent, members of that ship's company. Such an authorisation would lead manifestly to very grave abuses, and would be subversive of the very object with which the jurisdiction in question has been conferred.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Feb. 6.

The First Chamber of the States-General, to the surprise of the whole country, after having caused a deal of trouble and annoyance to the Government by rejecting the Budget for the Foreign Department, have now changed their minds, and instead of confirming the provisional credit for that department, have actually accepted and passed the whole Budget as originally laid before them by Government, and which they thought proper to throw overboard. After this feat of heroism and patriotic spirit they have adjourned to their firesides till they are again summoned from their repose to deliberate further on the interests of the nation.

The elections are now beginning. At Almelo the two Liberal candidates have been returned—Mr. G. M. van der Linden, the former member, by 1,346 out of 1,468 votes, and Mr. van Limburg-Brouwer (vice H. van Loghem), by 767 out of 1,465. Mr. Stieltjes is, therefore, not elected.

Public notice is given to parents and guardians by the Colonial Minister that on the 1st of September next five young gentlemen will be elected by competitive examination, before Professor G. J. Mulder, of the University of Utrecht, for the service of military apothecaries in Netherlands India. Applications, with testimonials, to be sent in on or before the 6th June next.

The Colonial Department publishes a communication received from the Spanish Government, containing particulars of the new lighthouses erected on the Island of Burias, in the Philippine group. They comprise the following:—A. Port of Busin: 1. A stationary white light on the north entrance to the harbour, 10 metres above the level of the sea. The tower is square, and stands on a rock 5 English miles S.S.W. of the Anima Sola shoal. 2. A stationary white light on the western entrance, 8½ metres high; tower also square, and built on an eminence on the N.W. point of the island, 2 miles S.E. of Temple Island. 3. Another stationary white light near the end of the pier, erected on a house with a dome-shaped roof, N.E. of the channel forming the inner harbour. B. Port of Bu sainga: A stationary blue light at the entrance of the harbour, on the N.E. coast of the island, 8½ metres above the sea; square tower, about 8 miles S. of the Anima Sola shoal. C. Port of Malaguing-Gilog: Stationary blue light at the entrance of the harbour, 8½ metres above the sea; tower square, N.N.E. of entrance, and N.E. of Sibuyon Island. D. Port of Boca Engano: Stationary white light at the entrance of the harbour, 8½ metres above the sea; tower square, standing on a promontory S. of Point Macoto, W.N.W. of Ticao Island, and W.S.W. of Dousol.

A treaty has been signed between this kingdom and the Grand Duchy of Hesse-Darmstadt, empowering the latter State to appoint Consuls, Vice-Consuls, and Consular Agents in ports and places of Netherlands India. The ratifications of the treaty have already been exchanged.

According to an official return the number of officers in the army of Netherlands India on the 1st of January this year was as follows:—1 lieutenant-general, 4 major-generals, 11 colonels, 30 lieutenant-colonels, 58 majors, 308 captains, 489 lieutenants, and 495 sub-lieutenants. The medical department of the same army consists of 185 officers, of whom 1 has the rank of major-general, 4 of lieutenant-colonels (directing medical officers of the first class), 8 of majors (directing medical officers of the second class), 24 of captains (medical officers of the first class), 70 medical officers of the second class, and 78 of the third class. Amongst these gentlemen 29 are decorated with different orders, 17 being knights of the military order of Willem.

Another well deserved tribute of praise to the laudable exertions of Admiral Fitzroy in the cause of humanity is the introduction in this country of that gallant officer's storm signals for the benefit of the shipping interests. The Minister for the Naval Department gives public notice for the benefit of those concerned that the signals will be hoisted when bad weather may be expected, but confined for the present to the ports of Nieuwe Deep, Helvoetsluys, and Vlissengen. The signals differ but slightly from those in use along the English coast, and consist of a cone, a drum, and a ball. The cone or triangle with the point upwards (when placed over the drum or square) signifies bad weather from the north-west. The cone with the point downwards and under the drum means an approaching storm from S.W. or S. The triangle hoisted alone signifies "pay attention to barometer and look out for a storm." The ball when exhibited alone means that westerly winds may be expected. The signals are to remain exposed the whole day unless the arrival of fresh telegrams require an alteration to be made. At night the storm signals will be given by three lanterns, in which case a triangle with the point uppermost means a storm from the westward, and with the point downwards from S. or S.W. It is understood that measures are being taken for the extension of the system of storm signals, as above indicated, all round the coast of Holland and the adjoining islands in the North Sea, where they cannot but prove extremely useful.

Captain Buschman, of the ship *Etha*, from Passaroean to this port, reports having seen on the 19th November last in 29° S. lat., and 49° E. lon., the ship *Java* from Batavia to Falmouth, which had lost her bulwarks in a heavy gale, but otherwise all well on board.

Intelligence has been received from Lisbon that the Dutch barque *Peter Schoemmakers*, Captain van Varelen, from Java to Rotterdam, had put in to the first named port short of hands, having lost twenty-one men of her crew of Malays by death, and having nine more on the sick list.

Orders have been given to fit out for immediate service H.N.M. steam frigate *Admiral van Wassenaar*, of 45 guns, now lying in ordinary at Nieuwe Deep. She is to reinforce the squadron in Japan, and when reported ready for sea the crew of the steamer-frigate *Zealand* will be turned over to her in a body.

The following appointments by the Governor-General have been confirmed by the King:—Mr. W. T. Yssel de Schepper to be head of the Statistical Department; Mr. A. J. Wattendorff to be Secretary-General of the Government in Netherlands India; Mr. D. W. Rost van Toningen to be Assistant Resident of Soemedang and Limbangan; Mr. J. F. Schultze to be Assistant Resident of Madjalengka; Mr. J. B. van Dyk to be head of the police at Sourabaya; Mr. F. C. Geselschap to be Secretary of the Residency of Tagal; Mr. E. K. de Neve to be Assistant Resident of Sintang, in the Western District of Borneo; Mr. W. Broers to be Civil Governor of the South District of Borneo; Mr. C. A. Niesen to be harbour master of Riouw; Mr. W. F. Buschkens to be Assistant Resident and Magistrate at Batavia; and Mr. C. W. Frederikz to be Inspector of the tea cultivation.

The following gentlemen have been gazetted as members of the Chamber of Commerce:—A. H. Cramerus, C. F. Deeleman, A. J. W. van Delden, F. H. Heineken, J. A. Krayenbrink, J. F. van Leeuwen, and R. P. Tolsen, for the Chamber at Batavia; A. T. Couvreur, G. L. Dorrepaal, J. P. von Hemert, H. H. Misegaes, A. W. Remmert, H. Salomonson, and J. H. Veekens, for that at Samarang; and A. J. Anamaet, A. J. Bake, E. ten Brinck, W. F. A. Cores de Vriese, J. J. H. Kervel, O. C. Matzen, and R. Sehlmacher, at Sourabaya.

PASSENGERS ARRIVED.

Per *Hendrika*, Capt. de Groot Stiffry, at the Texel from Batavia.—Mr. Abold and family, Mr. T. van Gheel-Gildemeester, and Mr. R. J. Reul.

Per *Landbouw*, Capt. Kleynenberg, at Brouwershaven from Batavia.—Mr. Koelman, Secretary of the Residency of Tagal, wife, and five children; a non-commisssoned officer of the navy.

COMMERCIAL.

COFFEE.—Nothing of importance has been done since last mail, but many small purchases of Java are made every day for consumption, and full prices easily obtained. Pale and bright sorts are most in request. The *Knight* has arrived from Padang bringing 7,000 bags for the private trade. The stock of coffee on company's warrants is only 128,888 bags. The deliveries in January amounted to 22,893 bags.

SUGAR.—The market both for raw and refined is in a complete state of stagnation, and quotations are purely nominal. Refiners are stiff in their demands for the prices previously paid, but there are no purchasers.

RICE.—The only sale reported was 4,850 bags of uncleaned Necransie (being the remainder of cargo per *Harvest*), which was sold at 6⅝ fl. There is some inquiry for Rangoon, but the high prices asked check business.

SPICES.—Great animation has prevailed this week. Nutmegs, No. 1, 1863, were purchased at 75 cents, and 67 given for No. 2; but since then the prices have somewhat receded, and the former might now be had at 72, and the latter at 62. Cloves were also in great favour, and a large business was done with a considerable rise in values, owing to the report that the forced deliveries of this spice to the Resident of Amboyna are to be discontinued. No. 1 has been paid for at 30 cents, No. 2 with 29, and No. 3 with 28. Mace has also risen and fetches 5 cents above sale prices. Pepper rather firmer. Java cinnamon calm, and values unaltered.

METALS.—Company's copper is weaker, and may be had at 61 fl. Banca tin has rather improved since last mail, and been sold in small

Digitized by Google

quantities at 71½ fl., at which figure there are sellers. The deliveries in January were 5,165 blocks. Stock on warrants, 70,373 blocks; unsold in company's warehouses, 75,338 blocks.

INDIGO AND COCHENILLE.—No alterations to report. Market steady, but little business done.

RATTANS.—No sales reported; prices firm.

HIDES.—Quiet. The following are advertised for sale by auction on the 27th inst.:—1,000 Samarang cowhides, ex *Catherina Maria*; 2,000 do. do., ex *Princess Sophia*; and 1,056 do. do., ex *Cornelia Mathilde*; 1,000 Java buffalo, ex *Fanny*; and 550 buffalo, and 500 ox, ex *Ocean*, have been taken for exportation.

JAVA TOBACCO.—3,696 bales were sold last week for export. The company have advertised for public sale on the 19th inst., 1,198 bales in warehouse here, and 818 do. at Rotterdam. This week no transactions are reported. Stock 4,717 bales.

CIGARS.—A public sale of Manila went off as follows:—177,000 Secunde Habana, 1861, the sound sold at 30½ to 32½ fl., the damaged at 23 to 26 fl.; 160,000 Secunda Cortados, 1863, all sound, found purchasers at from 32 to 33½ fl.

WARFARE IN CHINA.—The *Scotsman* has the following account from a correspondent in Hong Kong. We must confess it has not come to our knowledge before:—Last summer a British merchant, Mr. A. S. of Canton and Hong Kong, took a steamboat trip to what is there called the West Coast of China—that is, the shores of Tonquin Bay. He found a bloody war raging between two native tribes—the Poontees, who occupy the interior, and the Hakkas, who hold the coast line—corresponding to the Germans and Danes, the subject of the dispute also being the same, the possession of the seaboard. The war had raged for ten years, and was carried on with great ferocity. Mr. S., having some knowledge of Chinese, had a conference with the chiefs of the Hakkas, whom he found heartily tired of the conflict, and desirous of peace. They entreated him to use his influence to procure foreign intervention. He showed them that this was out of the question, as both parties professed to be loyal subjects of the Emperor, and that their proper course was to petition him to interpose his authority to put a stop to the civil war. This was agreed to, and the chiefs, with Mr. S.'s help, drew up a petition, which he forwarded to the Governor-General of Quantung. No notice was taken of this petition, and the war continued to be carried on with increasing bitterness. The Pontees, the landward tribe, got the upper hand, and seemed bent on exterminating the unfortunate Hakkas, whom they drove from refuge to refuge, till they had only one town left. They had again petitioned the Chinese Government to help them to emigrate; but their second petition met with no more success than their first. When their last refuge was attacked, Mr. S. happened to have two vessels there taking in cargo, and they interposed, to prevent a general massacre. Happily the owner, suspecting that the Hakkas might be in extremity, had despatched two other vessels—one a steamer—to their assistance, which arrived just as the town was set on fire, and the inhabitants were being driven into the sea. These four vessels, by loading to the utmost of their capacity, and even above it, carried off 2,800 souls—men, women, and children, the last remnant of an industrious and enterprising race—three-fourths of whom have been slaughtered through the tender care of a paternal Government. The people were most grateful to their deliverer, and the chiefs have presented him with the title-deeds of their lands, including several townships and a gold mine. These are, perhaps, not of much value, but a man who has the consciousness of having saved 2,800 lives does not need much further reward. These exiles have been landed in Hong Kong; and it is to be hoped that as they are grouped in families they may be welcomed as immigrants in Queensland or some other of our Australian colonies.

THE FRENCH IN COCHIN-CHINA.—The following is from a Paris paper:—Admiral de la Grandiere, Governor of Cochin-China, has founded a newspaper at Saigon, the capital, by a decree, in which he says that, considering French Cochin-China is little or erroneously known in France and in the neighbouring colonies; that inaccurate information given by ill-informed newspapers may injure the true interests and the development of the colony, the best mode of inspiring merchants and manufacturers with confidence is to inform them of the numerous resources possessed by Lower Cochin-China. The Governor further announces that an official, political, and commercial newspaper shall appear on the 10th and 25th of each month from the 1st of January, 1864. It is to publish official announcements, leading articles on the resources of the country, on the commercial and agricultural questions connected with them, and the price of articles to be exported. The editor will thankfully receive all articles signed by the contributor, which shall appear to be of advantage to the paper, and all other useful communications addressed to him. The decree founding the paper is followed by three additional decrees, and three notes emanating from the administration of the colony. The first decree fixes he indemnity to be paid to Asiatics summoned to give evidence. The second opens an annual credit of 5,000 fr., granted to the Governor for secret service money, and the third permits the exportation of rice from the 1st of January. The first two administrative notes refer to the perpetual rent representing the part of the land tax to be paid by the purchasers of lands and the formalities to be fulfilled by those who propose to build on their land. The third note states that the Treasury had received a sum or 277f. 50c. restitution money of which it had been robbed. It was restored through Consignor Lefebre, Vicar-General of Cochin-China. The leading article explains the object of the publication, and proposes to make known to France a country of which it is ignorant, and further to explain to the colonists themselves the resources of the soil, which have never been developed; to contradict the assertion of insalubrity, greatly exaggerated; to enlighten the native population as to the intentions of the French in coming to the remote East; to explain the Emperor's views, and thus to reassure capitalists by demanding their co-operation. This article is followed by another on the rice trade; next, a notice to navigators on a shoal situated between Manilla and Saigon; on the postage payable on letters, the price of merchandise, exchange on London, Hong Kong, and Singapore. The first number of the newspaper was published on the 1st of January last.

A NOVEL SCIENTIFIC VOYAGE.—A letter from Toulon gives some curious details relative to a scientific voyage about to be undertaken by the Duke de Luynes. Lieutenant Vignes, of the Imperial navy, has been appointed to the command of a steam gun-boat belonging to the Duke, which is to sail towards the end of the month on this voyage of discovery. After having visited the most interesting places in the Mediterranean, and particularly the coast of Syria, the boat is to be carried on the backs of mules across the mountains of Judeah, to be launched on the Dead Sea, of which the waters are to be analysed, as chemists are not agreed as to their quality. The gun-boat is to be again carried to the Mediterranean, whence it will proceed to the Black Sea, ascend the Don, cross the Steppes of Dolgo in a waggon to reach the Wolga, which it will descend to the Caspian Sea, that immense conglomeration of water and of oil of petroleum, continually agitated with storms. After having carefully studied these phenomena, as well as the various inhabitants of that little-known region, the travellers will cross, on camels, the deserts of Asia Minor to the town of Mossoul, where they will explore the course of the Tiger and the Euphrates, and examine the ruins of the great cities which flourished on their banks. After having accomplished that prodigious journey across seas, rivers, mountains, and deserts, the gun-boat will return to France by the Persian Gulf and the Red Sea. All the difficulties attending such a dangerous journey have been well considered and carefully anticipated. Even the construction of the boat is a *chef-d'œuvre* of naval architecture and of comfort. All the pieces into which the boat is divided when taken asunder are actually numbered, so that it may easily be put together in twenty-four hours. It will be for the first time that a steam-boat shall have been carried across the precipices of Daghestan and the scorching sands of Mesopotamia. A picked crew have been placed under the command of Lieutenant Vignes by the French Government, for the navigation and transport of the gun-boat. The Duke de Luynes is to be accompanied by several friends, as well as by savans and artists of the greatest merit, who have solicited the honour to share with him the dangers of this hazardous enterprise.

THE PIRACY ON THE "FLOWERY LAND" TO SINGAPORE.—Seven of the prisoners in this case were found guilty and condemned to death, The seaman Carlos was acquitted of murder, but found guilty of scuttling the ship, and sentenced to ten years' imprisonment with hard labour. On being asked, through interpreters, what they had to say why sentence of death should not be pronounced upon them, some of the prisoners, especially Blanco, Duranno, Santos, and Lopez, made statements incriminating each other, the witnesses Powell and Williams, and to some extent the second mate, but most of them agreed in absolving the carpenter Anderson and the boy Early. According to Santos, Duranno and Lyons killed the mate. Lopez declared that some of the prisoners were innocent; that there were four who committed the three murders; and that the two men who had been discharged were the most guilty of all. Lyons made no statement, nor did Marsolino. Blanco particularly complained of ill-treatment and of the way in which the ship was victualled, leaving it to be inferred that those were the exciting causes of the mutiny. He also stated that Carlos, with others, was concerned in killing the captain's brother. Mr. Baron Bramwell, having assumed the black cap, said, addressing the convicts,—You have been found guilty of the crime of wilful murder, and it is now my duty to pass upon you the sentence of the law. After some experience and very much reflection, I have come to the conclusion that I shall best discharge that duty by adding to the form of words prescribed by law no observation of mine of any sort or kind. The learned judge then pronounced the sentence of death in the usual form, and it was afterwards interpreted to them in their own languages. Lopez was the only man among them who betrayed any emotion, and that he struggled to suppress. Some of them, including Watto and Lyons, even laughed at a lapse of memory by Duranno, in repeating a statement he appeared to have prepared in his own mind, and this they did just as the awful sentence of the law was about to be pronounced upon them.

ADMIRAL JOHN THOMPSON.—Admiral John Thompson, the senior retired admiral, died on the 30th of January. The gallant deceased, who had attained the advanced age of 88 years, entered the navy in December, 1787, and after serving on the home stations accompanied Lord Macartney to China, and was promoted to lieutenant December 18, 1794. As lieutenant he served at the blockade of Toulon, took part in Hotham's action, July 13, 1795, and in December, 1796, was wrecked in the River Tagus. He was advanced to post rank Oct. 21, 1810, accepted the rank of retired rear admiral Oct. 1, 1846, became vice admiral May 27, 1854, and admiral June 9, 1860.

MR. OLYPHANT'S CHALLENGE.—It has so often been charged upon Mr. Welles, the Secretary of the Navy, that he has not a vessel in the navy that our merchant steamers cannot sail round, that his blood has got up, and he has challenged the fastest steamer in New York city, the *Kinkang*, to run a race with his United States steamer *Eutau*. Mr. Olyphant, an East India and China merchant, says that mercantile houses cannot afford to incur the expense of racing, but that if Secretary Welles will pay the expenses he will run his steamer. Of course Welles has to pay for the delay of the steamer. I presume the race will be run, and I feel certain that the Secretary will be disgraced by a defeat.

THE COLLECTION OF ROBERT FORTUNE.—Messrs. Christie, Manson, and Woods will sell by auction, on the 3rd of March, a very beautiful collection of Chinese and Japanese curiosities, collected by Mr. Fortune. We doubt not but that this well-selected assortment will meet with good competition; but we must caution our readers against sending any ordinary goods to this market, which is inundated with such, and leave a heavy loss to the owners.

APPOINTMENTS.—The Queen has been pleased to appoint James Hay Erskine Wemyss, Esq., to be Lieutenant and Sheriff Principal of the Shire of Fife, in the room of the Earl of Elgin, deceased. The Queen has been pleased to appoint John G. Austin, Esq., lately conducting the Emigration from China to Demerara to be Lieutenant-Governor of the colony of British Honduras.

MAJOR GORDON, who is commanding a force in the Chinese service, is a son of Major-General Gordon, of Southampton.

The London & China Telegraph.

LONDON, FRIDAY, FEB. 12, 1864.

SATSUMA'S INDEMNITY PAID.

THE intimation we were enabled to convey, in our issue of the 27th ult., has been completely verified by the later intelligence just received. We stated then that the indemnity demanded for the murder of Mr. RICHARDSON was ready, and close at hand, for that SATSUMA'S people had junks not far from Yokohama with cargoes of specie or of goods, or both, to the value of upwards of $2,000,000. As will be seen from the account given in another column, after some further interchange of communications—which would be more fitly designated as *pourparlers* than as negotiations—the $100,000 agreed on were paid on the 11th December. The conference immediately preceding was signalised by a display of refined courtesy and sensitive appreciation of what is supposed to be due to the greatness and dignity of another, which is eminently the distinction of Eastern diplomacy and etiquette in its best phases. SATSUMA, whose noble character and political abilities shine with greater brilliancy at every fresh appearance on the scene, retired for the moment from the arena, and let his father, who was the real offender, come forward, by his representatives, to make, as it were, his own personal *amende*. The envoys of SHIMADZU SABOOLO (or SABRO, for these Japanese names scarcely ever appear twice spelt in the same way) took the management of the final arrangement on themselves, and, we shall see when we have the official account, expressed their regret for the outrage which led to the demand for reparation. In addition to the payment of the money, a promise was made that the actual perpetrators of Mr. RICHARDSON'S death should be sought out and punished, if they could be found. This may turn out to be impracticable. A strange picture of the interior life of Japan in this respect is opened to us in the correspondence lately laid before Parliament, where we have SATSUMA'S Minister writing to Colonel NEALE that endeavours had been made to secure the murderers; but, he says, "it is "impossible for us to do so owing to the political differences "at present existing between the Daimios, some of whom even "hide and protect such people;" and he guards himself against the supposition that SATSUMA would resort to a trick said to be not unusual among the Chinese; for he adds, "If we were "to execute criminals condemned for other offences, and told "you they were the offenders, you would not be able to recog- "nise them; and this would be deceiving you, and not acting "in accordance with the spirit of our ancestors." We can well afford now to let that part of the matter lie. The demands made have been acceded to, as far as we can assert them to be within the power of either the Daimio or the TYCOON. The latter has written a congratulatory letter to the British Minister, to express his delight at the settlement of affairs, and his hope that a lasting peace between Great Britain and Japan is now inaugurated.

The above is the best possible comment on the motion brought forward by Mr. BUXTON in the House of Commons on Tuesday night, which, to the credit of our representatives, was negatived by a large majority; the House marking its sense of the folly and indecency of the proposition offered to its consideration by refusing to allow the motion to be withdrawn, and insisting on proclaiming to the nation and to the world its judgment on the point at issue by the unmistakable verdict recorded in the Division-list. The special antipathy borne to Earl RUSSELL by the Opposition enabled Mr. BUXTON to rally round him a larger number of supporters than he could have hoped; for it became quite clear early in the debate that the acquittal of Admiral KUPER from any blame was resolved on by all parties, and that a desire to damage the SECRETARY for FOREIGN AFFAIRS was the sole incentive to the speeches that emanated from the followers of Mr. DISRAELI, who himself had the good sense to take no part in the debate, though voting for Mr. LONGFIELD'S amendment.

The harmony that, from the accounts now come to hand, would appear to prevail between SATSUMA and the TYCOON, may have had its effect in quieting the rebellious Prince of NAGATO, who, it may be necessary to apprise the reader, is the personage referred to both as MATS'-DAIRA-DAIZED-NO-DAIBU and TSIOSIU; so we judge from the Parliamentary papers, where the province of Nagato is spoken of as "governed by the Prince of TCHU-SHU." It may be well to recollect that this Daimio also has had a taste of the punishment sure to be inflicted for outrages on foreign commerce. The United States steamer *Wyoming* blew up a steamer of his and sank a brig, on which occasion we note, for Mr. BUXTON'S information, "considerable damage was done to the town." The Americans, like ourselves, find it impossible to lay down beforehand the precise quantity of mischief shot and shell may do.

HER MAJESTY'S SPEECH *QUOAD* CHINA.

LOGICIANS are familiar with the mode of argument which is based upon a negation. Given, such and such premises, certain conclusions must be drawn, and if they are not drawn, it must be because they lead to results which either invalidate the premises, or are distasteful to the studious inquirer into verity. Her MAJESTY'S Ministry, in the singular production which was minced out by Lord WESTBURY on Thursday last to an indifferent audience of fifty peers and four ladies, and "Her MAJESTY'S faithful Commons" (without one single notability among them), have certainly carried the art of saying nothing to its highest perfection. Like SAM WELLER, when asked if he saw his father in court, in order that the venerable TONY might be committed for contempt in giving vent to his feelings, they have looked everywhere but in the right direction. The traditional half column of small type in the pages of the leading journal has been filled up, yet not one word appears relative to subjects which are pressing close upon thousands of persons engaged in far the most lucrative of all the foreign trades of this trading country; one which is capable of almost illimitable expansion; and which is destined yet to concentrate upon itself the attention of all who profess an earnest interest in the welfare of their fellow men.

The entire omission from Her MAJESTY'S Speech at such a crisis as the present of all mention of China betrays a conscious weakness, which is certain, ere long, to lead to serious interpellations being addressed in the House to the FOREIGN SECRETARY. Are we to attribute to the same cause the fact that the American question in like manner receives the "go by" at the hands of Her MAJESTY'S Government? Rumours, more or less definite, have, as all the world knows, been rife of dissensions in the Cabinet. Such divergences of opinion are part and parcel of the Constitution, and rightly used, act as safeguards against enthusiasm, or are beneficial, as compelling attention to grave questions of public policy. Reticence accordingly must result from one of two causes; either it indicates that the minds of the Cabinet are divided, or else it is a confession of utter defeat. If the latter, then we may expect that Mr. LIDDELL'S notice of inquiry is but the forerunner of a debate that may once again unseat Lord PALMERSTON. If the former, then we unhesitatingly declare that China cannot be left an "open question" in any Cabinet representing the public feeling and intelligence of the country. If only in the name of humanity, it is absolutely necessary that our relations with China be placed upon such a footing as shall prevent the national name from being defiled, by even momentary complicity, with the shame of such atrocities as those which accompanied the capture by Major GORDON of Soochow. And it is hardly possible to fall into a more lamentable error than to suppose that we can withdraw our countenance from the merchants and adventurers who have made China the scene of their efforts. Rightly or wrongly, Lord PALMERSTON, two years ago, pledged this country to a definite policy with regard to China which no amount of recalcitration on the part of Mr. LIDDELL or Mr. BUXTON can undo. The man who puts his hand to the plough durst not look behind him. It is somewhat new to us, to imagine Lord PALMERSTON inaugurating a policy which he so dreads carrying out that he seeks to shirk responsibility by ignoring his own work.

In good sooth any ordinary thinker, in view of the actual situation of affairs in China, would have supposed that a Constitutional Ministry, itself in great measure responsible for the

Digitized by Google

state of affairs there, would have been glad of the opportunity of inviting attention to the subject by giving it at least one paragraph. Granted that the QUEEN's Speech was traditionally and designedly bald in style, and non-committal in intent; still it is a confession of weakness to omit all notice of a country where civil war, on a scale only second to that ravaging the New World (itself doomed to similar non-recognition), has so long been prevalent. It was a duty to have noticed it, if only that the Chinese Government had hoped to profit by the semi-official assistance vouchsafed by this country, but which it has with true barbarian short-sighted cunning contemptuously rejected, so soon as it thought itself independent of extraneous aid. The whole history of the LAY-OSBORN flotilla is a severe blow to our *prestige*, followed up, as it has been, by such a tacit confession of weakness as is involved in the Ministry slurring over the entire subject in their opening address.

MR. CONSUL MORRISON ON JAPAN.

Two small pamphlets, entitled the "Bombardment of Kagosima," and "Our Position and Policy in Japan," have been forwarded to us, the author being Mr. G. S. MORRISON, late Consul at Nagasaki. The first mentioned is a sharp criticism on Mr. COBDEN's letter to the Mayor of Rochdale, which appeared in the journals of November last, in which the hon. member is shown to have misapprehended the facts on which he bases his charge of reckless cruelty against Admiral KUPER and Colonel NEALE. The former of those officers, according to the pamphlet before us, had publicly stated that it would be no light cause which should induce him to fire a single shot; and so little was he meditating a bombardment, that "the ship's "crews were at their dinner, and *not a gun shotted*, when—a "hurricane raging at sea, and a blinding rain pouring upon the "decks—the guns from the batteries suddenly showered their "iron hail upon the unprepared vessels." The other of these *brochures*, that on "Our Position and Policy in Japan," is of the greater interest at the present moment, when we have received intelligence that Prince SATSUMA has made the atonement demanded for his past outrages, and the point that presses is to determine on the attitude we are to maintain for the future. On this head we are glad to find Mr. MORRISON stating in clear and unmistakeable language views entirely coinciding with those that have been upheld from the first by the *London and China Telegraph*. He says:—

Our only safe and wise course is in a firm stand upon the rights which we have fairly acquired by treaty, and in making it clearly understood that, though we prefer to remain at peace, we are able and determined to repel and punish all aggression and outrage from whatever quarter. It is mere foolishness to talk of conciliating the goodwill of those opposed to us. Asiatics do not understand conciliation as anything but weakness. It is first necessary to give them an evidence of power; it is the only quality which they respect. But even were it otherwise—if conciliation were possible—to what end should it be employed? The people, properly so called, need no conciliation; they have no animosity towards us; our presence is their gain; to what end conciliate the nobles? That they may voluntarily see established in the country institutions which must destroy their own power. The only measure of conciliation which could secure their approbation would be our withdrawal from Japan, to leave them, as heretofore, despotic masters of the land. When liberty and despotism meet, there must be collision, and the weaker must succumb. No temporising can prevent the consequences, but, by encouraging arrogance may increase the eventual difficulties. If conciliation means a humiliating, submission, those who recommend it can have learnt little from our own experience in China, or that of the Dutch in their prison at Desima.

It would be well if Messrs. COBDEN and BRIGHT, and their school of politicians, would bear in mind that in upholding the supposed "sacred right" of the Japanese not to be interfered with, they are in reality labouring, not for the benefit of the nation—if by that term we are to understand "the people"—but simply and solely to fortify and consolidate a system of the most crafty and despotic feudalism the world has ever beheld: the nobles are everything, the masses nothing. The school in question have the unfortunate and disagreeable peculiarity of always believing a foreigner in preference to an Englishman. With the hope of at length convincing them of the real position of things in Japan, we will translate for their benefit an extract, furnished us by Mr. MORRISON, from M. RODOLPHE LINDAU'S "Voyage Autour du Japon":—

In reality the people of Japan love foreigners. They do not contest their superiority, and seem instinctively to recognise in them liberators, destined to break the yoke which the feudal aristocracy press upon them. The relations between the Japanese and European traders have generally been agreeable, and have had no other inconveniences than the twists and turns common to all commercial transactions. We have encountered ill will an daystematic opposition solely from the class of nobles, who foresee clearly in the introduction of the foreign element a revolution entirely to the advantage of the democracy, and who, in resisting with all their power the movement by which they feel themselves carried away, stand, as it were, legitimately on the defensive. Their opposition will not cease till the hour when the liberal party shall issue triumphantly out of the struggle that now divides the empire into two hostile factions.

NEW STEAMERS FOR CHINA.

The paddle-wheel steamers *Teen-Chang* and *Vulcan*, which have been under despatch by the China and Japan Steam Company for Shanghai, will, we understand, leave in about three weeks, from the Clyde.

The paddle-wheel steamer *Prince Kung*, despatched by Messrs. Elliot and Co., of Austin Friars, for Shanghai, left Dartmouth on the 4th inst. This vessel, commanded by Captain Carr, is intended for towing purposes, and is of the following dimension:—Length, 112 feet; beam, 21 feet; depth, 11 feet 7 inches; and her engines are of 100-horse power nominal; builders' tonnage, 245 tons. She was built at Limehouse, by Messrs. Young and Co.

Messrs. George and John Mills, Southwick, have launched a barque of 398 tons register, named the *Ringdove*, to be engaged in the China trade. She is classed for thirteen years, and is the property of Messrs Robinson and Foster, of Liverpool.

CORRESPONDENCE RESPECTING AFFAIRS IN JAPAN.

SUCH is the title of a collection of the despatches interchanged between Earl RUSSELL and Colonel NEALE, just laid before Parliament, in continuation of Correspondence presented in February, 1863. The paper of the earliest date is a letter from Colonel NEALE of the 12th Nov., 1862, and that of the latest is a despatch from Earl RUSSELL, of the 11th Jan. in the present year, expressing the satisfaction of the British Government at the termination of the pressing difficulties with Japan, and their approval of Colonel NEALE's conduct throughout the matter. The collection opens with Earl RUSSELL's letter, ordering a demand for reparation for the murder of Mr. RICHARDSON, and the whole of the rest of the correspondence arises entirely out of the negotiations and events that were consequent thereon. Our readers were kept so well acquainted with everything relative thereto immediately it transpired, that we find nothing in these papers which it is necessary to reprint in reference to Colonel NEALE's demand on the Japanese Government and the attack made by the forts in Kagosima Bay on Admiral KUPER's squadron. But incidentally occurring in the correspondence are passages that give us some degree of insight into the policy of the different parties that constitute the political world of Japan. We use the word "some" advisedly, for so late as the 29th July last we find Colonel NEALE writing—"In common with my colleagues, I feel "utterly unable satisfactorily to penetrate the mysterious "policy and proceedings of the TYCOON's Government, if, in-"deed, any defined policy with regard to foreigners is deter-"mined upon. * * * In general, all confidence with "foreign representatives is withheld." On the other hand, the attitude of SATSUMA and the party opposed to the TYCOON is made very intelligible, their jealousy of that official being mainly caused by the fact, as we ourselves have stated, that he gets almost the entire benefit derived from the opening of the ports to trade.

In a representation addressed to the MIKADO, the hostile Daimios dubs the TYCOON Mayor of Kuanton (the eastern district of Yedo), and threaten to renounce their allegiance to him. The Prince of MORI says:—"The TYCOON is young, and unable to "govern. Everybody laughs at him. The Daimio of SATSUMA "has acted rightly in demanding the reins of Government, and "this would, perhaps, be a remedy for every evil." The joint petition of the Daimios names distinctly the grievances alleged against the TYCOON. And here, curiously enough, we detect the civil war in the United States as near being the cause of a similar internecine conflict in Japan; for it falsified that personage's promise of plenty and abundance, and he is thus taunted with his breach of faith:—"Both you and HARRISOOH (Mr. HARRIS, "the American Minister), said that cotton would be sold for a "mere nothing, and that silk and manufactured goods would not "cost us anything. The daily necessities of life would be "brought to our country from all the quarters of the globe, and "our farmers would not be required to sow and reap. We "anxiously expect these miracles, and at present enjoy advan-"tages which you never mentioned, namely, that those articles "which you and HARRISOOH promised to give at very low "prices, are now three times as expensive as they formerly "were." Then follow positive charges of gross malversation against the TYCOON and his officers, who shroud their crimes by the assassination of any persons who might dare to complain:—

Digitized by Google

You monopolise the import and export duties completely, and we had a right to suppose that those duties which, according to your statements and those of your financier, Harisooh, would enrich the Japanese nation, ought to cover expenses, such as building fortifications and buying men-of-war, which you say must inspire the barbarians with the respect due to our great country. But what have you done for the last three years? What has been the tenour of all your despatches? "Japan must be fortified, fortifications must be built, the artillery and navy increased. Money is required. The presence of foreigners occasioned great expenses: entertainments must be given to the ministers, the petty consuros cannot be forgotten, and foreigners must be made to respect and fear our great nation by witnessing the boundless resources of the country and the majesty of its ruler." If we could only see those fortifications, those men-of-war, we would complain less about the expense; but everything is proposed, and nothing executed. You think that drawings and plans will scare foreigners and cause them to flee from our country, but we doubt it, for they nearly equal us in this art. You sometimes talk to us about political economy, and we candidly own you give us excellent advice; unfortunately we have numerous proofs that you do not follow the precepts you give us. Why was such an incredible sum of money spent for all the vain and useless pomp which accompanied the sister of the Mikado on her journey to Yedo preparatory to her marriage with the Tycoon? Why was so much money expended in rebuilding the palace of the Tycoon? We shall not mention the various ways in which public money is wasted, as this would cause our nation to blush, and the Mikado to mourn. Public rumour, however, says that numerous thefts have been committed by the highest officers of the Tycoon; if any protest against the course which is now pursued, they are instantly and mysteriously silenced for ever. As you always remind us of the great principles of political economy when you demand pecuniary supplies, pardon us for making the following remarks:—Owing to the troubled state of the country, the presence of the Daimios at Yeddo was formerly highly necessary. This is not the case at present, and still our lords are travelling to and from the capital. The personal fatigue, vexation, and the expense of the immense retinue which always accompanies them, can no longer be supported. The time has come that these ruinous journeys should cease, and that the lords of Japan declare themselves unable to defray the expenses which you impose upon them.

As foreign trade has nearly ruined us, and as fortifications and numerous other unforeseen expenses are deemed necessary in all the ports which have been opened to the barbarians, we not only demand that the new ports, Osaka, Neegata, and Yedo, shall not be opened, but that Kanagawa be closed. You always assert that we are opposed to friendly intercourse with foreign nations; but this is utterly false. We willingly consent to open the whole of Japan if this step does not occasion expenses which surpass our means. We have not murdered our adherents who were favourably inclined towards the opening of Japan to foreigners.

You teach the young to despise and insult foreigners; and although you always tell us that the foreign nations are powerful, and greatly to be feared, a high functionary of the "Tori" lately said that, with the exception of the Russians, all the foreigners could be insulted with impunity.

The ill-feeling of the Daimios is of course reciprocated by the TYCOON, and it may well be doubted whether SATSUMA had fair play, and whether the determination of the British Government to exact reparation was honestly impressed upon him by the Yedo officials; for Colonel NEALE writes on the 2nd of March:—"There are strong reasons to entertain the belief that the "TYCOON and his Government would view with passive satisfac-"tion SATSUMA, NAGATO and TOSA, (the three powerful Daimios "who are hostile alike to the TYCOON's dynasty and to foreign "intercourse) made aware of the contingency of Her MAJESTY's "Government exacting redress, if needs be, at the port of their "own seaboard possessions." In that regard there may have been a double game of tortuous policy on foot; for it has been stated to us that the murder of Mr. RICHARDSON by SATSUMA's retainers was perpetrated with the hope of bringing about a rupture between the TYCOON and the Europeans. If so, the Yedo Emperor caught SATSUMA in his own snare, and heard of the burning of Kagosima with grim delight. Indeed SATSUMA's Minister positively asserts to Colonel Neale—. "We have not received from the TYCOON any orders "or communications by steamer that your men of war "are coming here." Even the Prince of NEGATO, the personage designated by the Daimio of MORI as "the learned NAGAOOTA," who has carried his apparent hostility to foreigners to the extent of firing on ships of war penetrating into the Inland Sea—which act, by-the-bye, does not necessarily involve dislike to foreign commerce—expresses himself very sensible of how much Japan has to gain by intercourse with Europe In a letter to the Gorogio, or Great Council of State, advising a solid union between the MIKADO and the TYCOON, he says:—

After our independence has been restored it is urgent and pressing that we reform our military institutions, the naval sciences, as well as all branches of industry; we should find out the great advancements and developments of arts and sciences in other countries. The whole nation must devote life and soul to the benefit of our State, and we must learn and study the interior arrangements of foreign lands, in order that the commerce of our country may flourish in this important age. I think all this ought to have been done long since, but nothing, however, of the kind is to be found in the edicts which have appeared so often during the last seven years. Inventions and improvements press on with rapidity, and the time is now come to make all these changes and improvements; but if our attachment to old customs causes us to postpone these measures of such great importance, if these changes are later suddenly forced by circumstances upon the inhabitants, a very bad impression will be produced, creating disorder and confusion. These are the reasons why they should be effected now, calmly and gradually. I think that the Mikado will not be disinclined to this, and therefore I wish that the Sjogoon (Tycoon) should act under the orders of the Mikado, and not conclude matters by his own authority. He ought to let these designs be known to all the Daimios in the name of the Mikado; then there will be a general quiet restored, then the dormant soul of the whole nation will awake, and will be united in power and in independence, and finally then it will display our force and strength to the other five portions of the universe, without anxiety and fear for our own country.

The TYCOON's Government appear to have wavered to the last between a desire to satisfy the representations of the Daimios, and a still greater anxiety to retain all the profits of trade in their own hands. They would evidently have consented to close Yokohama to foreigners if that would have contented the Japanese nobles, trusting to have continued their monopoly of gain at Nagasaki and Hakodadi. But this was not what the Daimios wanted; we shall probably find their inmost wishes to be—"Close all the ports, or open all." At last, however, the TYCOON's Ministers see their way to a decided course, and they announced, in November last, that the Government had for the present changed its policy, and requested a return of the despatch regarding the closing of Yokohama. The correspondence winds up with the letter from Earl RUSSELL to Colonel NEALE, stating the satisfaction of Her MAJESTY'S Government with himself and the result produced in the following terms:—

Foreign-office, January 11, 1864.

Sir,—I have received your despatches of the 16th and 17th of November, the one reporting the withdrawal by the Government of the Tycoon of the order for the expulsion of foreigners, the other giving an account of your communications with the agents of the Prince of Satsuma, which terminated in an agreement that the Prince should pay the indemnity demanded of him for the sufferers on the 14th of September, 1862, and should endeavour to the utmost to discover the murderers of Mr. Richardson, and should cause them, when discovered, to be executed in the presence of British officers as witnesses of the execution.

Her Majesty's Government have received with the greatest satisfaction this intelligence of the termination of the pressing difficulties with Japan, and I have to convey to you their entire approval of the conciliatory and judicious manner in which you have conducted yourself generally in these matters.

Her Majesty's Government trust that they may now look forward to British intercourse with Japan being carried on without giving occasion for future collision. It is their earnest desire that nothing should occur to interfere with peaceful commerce, and they are prepared to make full allowance for the peculiar character of the Japanese Government. In short, the employment of measures of coercion or retaliation could only be warranted, in their opinion, by the necessity of prompt interference for the protection of the lives and properties of British subjects, or for the vindication of the honour of the British flag if assailed by wanton attacks on the part of the Government or influential nobles.

Her Majesty's Government are glad to find that the return of friendly relations has been quickly followed by an increased trade; but Her Majesty's Government approve your interference with the Japanese Government, as reported in your despatch of the 16th of November, to prevent the erection of batteries which would have placed foreign shipping at Yokohama in a disadvantageous position in case of any difference with the Japanese Government. I am, &c., RUSSELL.

Tables of the British trade with Kanagawa are given by Colonel NEALE, which have been reprinted by some of our contemporaries as novelties; but they made their appearance three months back in the *London Gazette*, and were reproduced in the *London and China Telegraph* of the 27th November last.

Naval and Military.

Princess Royal, 73, screw, at Devonport, named for commission as the flag-ship for the Cape of Good Hope, will not hoist the pennant till about the 14th.

Rear-Admiral the Hon. J. R. Drummond, it is reported, succeeds Rear-Admiral Kingcome in command in chief of the Pacific.

The *Army and Navy Gazette* says:—Our troops as a body were never in better condition to take the field; and the locality is—as Lord Grey pointed out—so well suited to them that it almost tempts one to wish for war. We have now in the United Kingdom, in addition to the household brigade and depots, 17 regiments of cavalry, 50 batteries of artillery, 10 troops of horse artillery, and 38 battalions of infantry. In the aggregate the strength of the artillery may be roughly put down as 12,000 men, the cavalry 9,000, and the infantry 32,000, or 53,000 altogether. One half of this force placed beside the Danes would see the Austro-Prussian army on the south side of the Dannewerke for a period far outlasting the patience of their compatriots. The household troops at home number nearly 5,000 men, and after sending out 25,000 men of all arms we should have a good reserve in them, in the 28,000 now forming regiments, and in the 152 regimental depots.

By the death of Lieutenant-General Sir A. K. Clark Kennedy, colonel of the Scots Greys, the following promotions will take place:—Major-General T. H. Johnston to be Lieutenant-General; Colonel Charles Crutchley, Commandant of the Royal Military Asylum, to be Major-General; Major William Fulton, 15th Regiment, to be Lieutenant-Colonel. The colonelcy will, it is expected, be conferred on Lieutenant-General Bloomfield Gough, C.B.

Literature.

Some Glimpses into Life in the Far East, published by Richardson and Co., of Cornhill, is a series of sketches of places, persons, and things, as observed by the writer during a residence at the British settlements in the Straits of Malacca some thirty years ago. They are written in a style that will make them greater favourites with those who have a personal knowledge of the subjects than with strangers to them. The sketches of persons in particular will be eagerly read, and pleasant reminiscences of many an agreeable dinner party be revived by the author's minute and yet lively manner of relating the incidents that occurred. The writer was long a resident at Penang, and while in charge of a plantation away from the town mixed more freely with the natives than is usually done by Europeans, and appears to have lost no opportunity of acquiring information as to their customs, superstitions, and modes of thinking. The book has therefore the charm of laying before us scenes and characters that have not been "used up" before by successive narrators—no slight recommendation even for a volume devoted to the Far East. With the exception of a chapter allotted to Batavia, and another to Whampoa, Singapore and the Straits occupy the entire book, so that we get a very complete notion of the life led there in the days of the East India Company. That great defunct can now be freely spoken of, and the writer pictures the doings of the high officials appointed under the old *regime* as of a kind that must make both Englishmen and natives rejoice that its reign is over. Here is a Malay account of the way in which justice was administered by the Company's Resident in the Province of Wellesley:—

> The Government of the English is *odil* (just), their judges will neither take bribes nor flattery; but here it is only an English Government in name. The nonia (the official's native mistress) is the real rajah. All the law suits are carried on in the back rooms of the East India Company's official's house; and the man that can make the nonia the largest present is sure to gain his cause when it comes to be tried. Before court day I have seen dozens of Chinese and twenties of Klings carrying up ducks and fowls, fruits and dollars, as presents to the nonia; so what justice can there be when this is allowed? All the *anyia* and *fetina* (oppression and defamation) that takes place comes from these back rooms; for there the nonia can have her say when no one else can.

Governors Bonham (Sir George) and Butterworth sit for their portraits, which are perhaps tinted by the dislike the author evidently imbibed for the Leadenhall-street authorities, and whatever emanated from them. Other whole-lengths are those of Captains Congalton and W. Scott, who are unquestionably favourites, and seem to have gained a warmer hold on the sympathies of the limner, from the fact of their being ill-treated by the Company's grandees. There cannot be a single character mentioned, or spot described, that will not be immediately recognised as an old acquaintance by all who knew them as they then appeared; and that qualification will gain for these "glimpses" so hearty a welcome that there can be no doubt of the promised second volume being enquired after by a host of those who have enjoyed the first.

The Chinese Commercial Guide, by S. WELLS WILLIAMS, LL.D. Hong Kong, A. Shortrede and Co., and F. Algar, Clement's-lane, London. The fact that the present is the *fifth* edition of this most useful volume is a sufficient guarantee for its value. The last edition was published at Canton in 1856, and such has been the extension of our trade in Chinese and Japanese waters, and such the alterations introduced by later treaties, that the present edition is almost a new work. The titles of the chapters give at once an idea of the contents of the book, and show how indispensable it is to the merchant and the ship-master. The fullest information is afforded as to the treaties with China; the articles of import and export; the laws and practices of the different ports, with the forms in use at each, in the English and Chinese languages; moneys, weights, and measures, not only for China and Japan, but for countries in the Eastern Seas generally; with tables of prices and exchanges. A separate chapter does the same for Japan. And lastly, there are 259 pages of Sailing Directions for all the seas and coasts of both those mighty empires. A very great merit in such a book is the addition of a very excellent index to each part—that is, one for the purposes of the merchant, and another for those of the navigator. In fact, the author is entirely justified in stating that "the present edition of the *Chinese Commercial Guide* has been made as complete as the nature of the subjects treated of would permit." This is indeed but modest praise, and is inadequate to the multiplicity of its contents and the care and judgment evinced in putting them together. No counting-house interested in the trade with China or Japan, or with any port eastwards of India, should be without a volume so necessary for reference. To complete the whole, a very useful map is appended. A meed of praise is due to the printing and publishing office also, for if we mistake not it is the thickest and most elaborate book yet produced in Hong Kong

The *Chinese and Japanese Repository* for February has the continuation of Sir J. F. Davis's article on the "Poetry of the Chinese," which the reader will be sorry to see brings the subject to a close. The present paper contains a translation of "London: in Ten Stanzas," a poem written by a Chinese who accompanied an English gentleman home in 1813, as his instructor in the language. A most pleasant prospect the reader has, however, in the interest that will be afforded him by the translation of the "Story of Han-wan and the White Serpent," very spiritedly put into English by H. C., interpreter in Her Majesty's Civil Service in China. The story is as full of adventure and enchantment as one of our old favourites of *The Arabian Nights*. We think the readers of the *Repository* look for these translations of Chinese literature, of which little is known, more than for comments and reprints on current events, which are fully attended to in our daily, weekly, and special Eastern journals.

The Statesman's Year-book: a Statistical, Genealogical, and Historical Account of the States and Sovereigns of the Civilised World for the Year 1864; by FREDERICK MARTIN: Macmillan and Co. This being the first issue of a book which has every claim to establish itself as a regular annual, we have given the title at full length; and further, will let the compiler give his own account of a performance that has been often contemplated but never hitherto achieved. He says in his preface:—"The *Statesman's Year-book* is intended to supply a want in English literature—a want noticed and commented upon more than fifteen years ago by the late Sir Robert Peel. All readers of newspapers—in other words, all educated men of the present day, must have frequently felt the need of a book of reference, giving an account, or, so to speak, a portrait of countries and states, in the same manner as a good biographical dictionary would give a sketch of individuals." The volume contains a full account of all the States of Europe, and of the principal States of Asia, America, and Australasia, considered under their political, social, and commercial aspects, each being described in the following particulars:—Reigning Sovereign and family; constitution and government; church and education; revenue and expenditure; army and navy; population; and trade and commerce. We can only add by way of comment that the quantity of facts brought together is really surprising, and reflects great credit on the industry and knowledge of Mr. Martin, who has conscientiously done his best to carry out the programme laid down. If there be any defect in the book it is, perhaps, that there is a tendency to give columns of figures instead of half-a-dozen lines of results, by which unlucky *penchant* the book is swollen to a size and price that may endanger the large sale it ought to reach, and inevitably will reach, in future years. For instance, with regard to China, we have a page of tables containing the budget of 1843, and the census of 1812: possibly, nothing later was to be had; but are these worth any man's paying for? Japan has eleven pages devoted to it, six of which are taken up with columns of hard unpronounceable names, when all the real information to be derived from them might have been given in as many lines. Again, of the colonies of Great Britain, Canada and the Australian territories have a fair space allotted to them; whilst all the other dependencies owning the sway of Queen Victoria—including the Cape of Good Hope, Ceylon, Mauritius, Hong Kong, and the West India Islands—are jammed into ten pages crammed with figures. The kind of government subsisting in each colony ought surely to be given. Every petty German State has a couple of pages consecrated to it, with separate headings for "constitution, revenue, and population," and paragraphs acquaint us that Reuss-Greiz contributes 334 men to the army of the Confederation, and that in Schaumburg-Lippe only about 100 men are kept under arms. On the other hand, all that we can learn about the Cape of Good Hope is the area and population, with the Imperial expenditure for the colony. About its Government, whether representative or not, and the revenue raised within it, we are left entirely in the dark; but, on the other hand, the tables giving information on the first-named points are very unnecessarily printed twice over. We candidly mention these defects, because the book is destined to make its way, and the sooner faults are corrected the sooner will the compiler gain the thanks and the reputation he has well earned.

Macmillan's Magazine continues Henry Kingsley's tale of "The Hillyars and the Burtons," which he who has once begun will not be content to let drop. The letter of the month, from the Competition Wallah, is on "British Temper Towards India, Before, During, and Since the Rebellion," which Mr. Broughton stigmatises as abominable. *The Rose, the Shamrock, and the Thistle* has a capital mixture of the grave and gay. Mr. Serjeant Burke's fourth paper of the series on "Women of Merit connected with Criminal Trials" is a narrative of the little that is known of the wife of one Bernardi, who died in Newgate in September 1736, "having been a State prisoner about forty years, without trial or any allowance from Government." The Speaking Minister of Napoleon III. was surely not wrong in saying that our judicial practices were arbitrary enough as long as there was any question of dynastic rivalry. *The Journal of the Royal Asiatic Society*, Parts 3 and 4 of Vol. XX., has no article immediately referring to China or Japan, but the whole of its contents are of more than average importance. *The Illustrated Arabian Night's Entertainments*, issued by Ward and Lock, is, we fear, a mistake. The best illustrations for those tales would be engravings of costumes, weapons, implements, and places referred to. The being must be dull indeed who, while reading these unsurpassed creations of inventive fancy, needs a picture of the story to give a fillip to his imagination. Besides, such cartoon-like designs dwarf the letter-press, and put it out of countenance.

The most notable book which has appeared during the past fortnight is thus noticed :—Mr. HENRY MORLEY, the author of the "Biography of Bernard Palissy," publishes a massive octavo volume entitled *English Writers*, comprising the writers before Chaucer, with an "Introductory Sketch of the Four Periods of English Literature." Though complete in itself, and closed with a copious index, the work, evidently the result of great labour and research, forms the first of a series of three volumes.

Parliamentary Intelligence.

HOUSE OF COMMONS.

ATTACK ON KAGOSIMA.

(Feb. 5.) Mr. WHITE desired to make one or two remarks on the paragraph in the Royal Speech with reference to Kagosima. It was there stated that the injury inflicted on that town arose accidentally and inadvertently, but he could not understand how any one who had read Admiral Kuper's despatches could come to that conclusion. The hon. member for Maidstone had given notice of a motion on this question, but it was of so harmless and innocuous a character that he preferred expressing his views on it at once. For his own part, he owned that when he read Admiral Kuper's despatches he trembled for the safety of a son resident in that quarter of the world. One of the gentlemen who was murdered by the Japanese was a personal friend of his own. He had, therefore, every interest in desiring that due protection should be afforded to Her Majesty's subjects in those parts; but, at the same time, he could not believe that their safety or the security of British property would be attained by such high-handed proceedings as had taken place on this occasion —(hear, hear). He did not wish to throw any reflection on the Admiral. His experience of foreign stations convinced him that the men whose profession was fighting were least disposed to resort to violence, unless it was absolutely necessary. It was generally the non-combatants who urged on such measures; and in the present instance, if any one was to blame, he had no doubt it was, not the Admiral, but Colonel Neale or the Minister who gave him the instructions on which he acted—(hear, hear). He was sorry, however, that Admiral Kuper did not express regret at being the instrument of so great a disaster. He wished he had followed the example of Sir Michael Seymour, who, when compelled to resort to coercive measures against the Chinese, regarded it as a calamity, and performed his harsh duty with the utmost possible leniency—(hear, hear).

THE TAKING OF SOOCHOW.

(8th.) Mr. W. E. FORSTER asked the Under-Secretary for Foreign Affairs whether it was true that the town of Soochow, in China, had been taken from the Taipings by help of Her Majesty's officers, employed by the Imperialists with the sanction of Her Majesty's Government; whether, also, the Imperialists were aided by supplies from Her Majesty's arsenals; and whether the town thus taken was delivered over to pillage and massacre by the Imperialist troops, notwithstanding the protest, and contrary to the pledge of the British officer in command; and, if so, whether any and what steps had been taken by Her Majesty's Government to withdraw their assistance to the Peking Government.—Mr. LAYARD said that he could not give his hon. friend a very definite answer. The Government had received information that Soochow had been taken, and that an act of treachery had been committed, but of the exact nature of that act he was unable to inform his hon. friend, as he had seen nothing but the accounts in the newspapers. According to the last advices from from Shanghai, General Brown had delayed his departure for Hong Kong to make full inquiry into what had taken place. In the absence of definite information her Majesty's Government had, of course, taken no steps in the matter.—Mr. FORSTER reminded his hon. friend that he had not told him whether the town was taken with the assistance of her Majesty's officers, and with the assistance of supplies from her Majesty's arsenals.—(Hear.)—Mr. LAYARD said that, as was well known, Major Gordon was an officer in her Majesty's service, who had been authorised to command Chinese troops. As to the supplies he could give no answer.

MAJOR GORDON AND CAPTAIN OSBORN.

(8th.) Lord NAAS inquired of the Under-Secretary for Foreign Affairs whether any despatches had been received during the recess from Sir Frederick Bruce relative to the state of affairs in China; and whether the Government had received any official accounts of the proceedings of the Chinese force under the command of Major Gordon, of the Royal Engineers; and, if so, whether he would lay them upon the table of the House; also, whether he would lay upon the table all the documents in possession of the Government relative to the dismissal of Mr. Lay from the service of the Emperor of China and the withdrawal from the Chinese waters of the fleet lately under the command of Captain Sherard Osborn, of the Royal Navy.—Mr. LAYARD said that papers on the affairs of China, in continuation of those laid on the table last year, would shortly be produced. The Government had no official information of the dismissal of Mr. Lay, and consequently no papers upon the subject. There would be no objection to produce the documents relating to the withdrawal of Captain Osborn's fleet.

THE TAKING OF SOOCHOW, ETC.

(8th.) Colonel SYKES gave notice that, on going into Committee of Supply, he would call attention to a resolution passed by the Consuls at Shanghai upon the subject of the capture of Soochow; and would ask the First Lord of the Treasury whether Her Majesty's Government intended to pass without notice further violations of the instructions addressed by the Foreign-office to the British authorities in China, directing them to observe a strict neutrality in the civil war now raging in that country.

KAGOSIMA.

(9th.) Mr. BUXTON moved the following resolution :—"That this House while only imputing to Admiral Kuper a misconception of the duty imposed on him, deeply regrets the burning of the town of Kagosima, as being contrary to those usages of war which prevail among civilised nations, and to which it is the duty and policy of this country to adhere." In stating the reasons which had induced him to propose this resolution, he observed that the character of the country had suffered in the eyes of other nations by the burning of Kagosima, and that if the act passed without notice it might become a precedent. It was not his purpose, he said, to assail Admiral Kuper; he only imputed to him a mistake and misconception of his duty. That the town was burnt not by accident, but purposely, and as an achievement, as part of the operations against the Prince of Satsuma, he showed from the despatches of Colonel Neale and Admiral Kuper, as well as from other testimony; and he contended, upon the authority of writers on international law, that this act was a direct breach of the usages of war as recognised among civilised nations, and referred to cases in which similar acts had been denounced. He examined the nature of the demands made upon the Prince, and urged that in the early days of our intercourse with the Japanese, a civilised and interesting people, we ought to have acted with the greatest possible forbearance, instead of employing a severity as inconsistent with policy as with humanity, and which must have inflicted intense suffering upon the inhabitants of Kagosima.

The motion was seconded by Mr. AYTOUN, who adverted to what he considered a want of moderation and of a respect for the feelings of the natives evinced by the foreign merchants in Japan, and the arrogant spirit shown by the British residents. Mr. Buxton, he observed, had exempted Lord Russell from blame in the horrible outrage, the burning of Kagosima; but it appeared to him that Lord Russell had justified the act, and upon indefensible grounds.

Mr. LONGFIELD moved, as an amendment to the resolution, the omission of the words, "while only imputing to Admiral Kuper a misconception of the duty imposed on him." He denied that there was any misconception of his orders on the part of Admiral Kuper, or that the slightest blame was attributable to him. On the contrary, he contended that the Admiral had only obeyed the orders he had received from Colonel Neale, whom he was bound to obey, and had executed them in their letter and in their spirit, though he had no doubt they were repugnant to him. He read extracts from the papers to establish his position, and showed that it was not to be tolerated that the gallant officer should be made the scapegoat of others. This amendment was seconded by Sir J. HAY, who insisted that the transaction was the necessary consequence of the orders of the Foreign-office, and that Lord Russell was responsible for the burning of the town of Kagosima. He thought that Admiral Kuper had been most unjustly treated by the Government.

Admiral WALCOT defended Admiral Kuper, contending that the authorities of the Prince of Satsuma were the real culprits in this matter.

Lord STANLEY called the attention of the House to one or two points which he thought required explanation. He could not understand, he said, the justification of the double demand upon the Tycoon and upon the Prince of Satsuma. Then it appeared to him that the amount of the demand was exorbitant. The policy of the act of burning the town was very questionable, considering the peculiar state of Japanese society; it would be a long while before the effect of the act would be forgotten.

Lord R. MONTAGU referred to the original cause of the quarrel with Japan—the murder of Mr. Richardson by the retainers of a Daimio, which was only one of many murders committed in the country year by year. The Tycoon had complied with all the articles of the demand but one, the punishment of the offender, which he refused on the plea that he had no power to enforce that demand. We were therefore forced to resort to the Prince Satsuma, and to compel compliance. In his opinion we were bound to put a stop to the state of things in Japan, or their haughty nobles would become still more intractable; and he denied that the course taken, in the destruction of Kagosima, was contrary to the usage of nations.

Sir F. CROSSLEY condemned the severity exhibited in the bombarding of the town, and suggested that in the instructions to officers abroad it should be impressed upon them that human life was not to be sacrificed when it could possibly be avoided.

Mr. LIDDELL observed that, if this question were looked at from the Japanese side, much was to be said. He considered that the hasty treaty with Japan ought to be revised, and that we ought to acquaint ourselves better with the state of things in that country before we enforced the conditions of the treaty in an arbitrary manner.

Mr. KINGLAKE agreed that, in the present state of our information, it would be unjust to cast blame upon Admiral Kuper; but he did not agree

Digitized by Google

that the instructions of Lord Russell were so cogent that the Admiral was bound to shell the Prince's Palace wherever he found it. He discussed the policy, which had culminated, he said, in this act, and which, he added, was not an old, but a new policy. Among other oppressive results of this policy, the British authorities had distinctly interfered with the sovereignty of the Japanese Government, disputing their right to erect batteries on their coast.

Mr. LAYARD, after remarking that he was not inclined to disagree with much of what had fallen from Mr. Buxton, called the attention of the House to the state of our previous relations with Japan, and to the causes which had led to the treaty with Japan—a treaty which, he contended, the British Government was bound to make, but which had not been forced upon the Japanese. He described the state of the country at that time, and the parties into which the ruling powers were divided. Our policy, he said, had been a peaceful and conciliatory policy. Nevertheless, in spite of concessions on our part, outrages were committed upon British subjects, and he detailed the circumstances attending the deliberate and unprovoked murder of Mr. Richardson on the high road in open day. Could the British Government have suffered this outrage to remain unredressed? Our demand for the surrender of the retainer who had committed the act it was our duty to make from both the Tycoon and the Daimio. Mr. Layard then gave a minute description of the operations against the Prince of Satsuma, justifying the conduct of Colonel Neale and Admiral Kuper, and expressing his belief that the loss of life among the inhabitants of the city was very small. In pointing out objections to the resolution he contended that the burning of the town was not, as alleged in the resolution, contrary to the usages of war, and he read a list of cases in which towns had been destroyed (insisting particularly upon Charleston), and the act had been justified by the laws of war. We had no political object in Japan, he said; our objects were commercial only; but he complained of the difficulties thrown in the way of the Government by a certain class of British traders. If the resolution were pressed he should move the previous question.

Sir J. ELPHINSTONE defended Admiral Kuper, who, he thought, had been treated with injustice.

Mr. W. E. FORSTER observed that they were all agreed the burning of the town was a deplorable occurrence. The only question was whether it was a matter not only of regret but of blame. If of blame, on whom? That depended upon whether the destruction of the houses was intentional. He believed, on the evidence referred to by Mr. Buxton, that it was intentional. Then on whom did the blame rest? It could only fall upon three persons—Admiral Kuper, Colonel Neale, and Earl Russell. The two former were in a difficult position, and great allowance must be made for them. It was clear to him, he said, that the idea of shelling the houses was suggested in the despatch of Lord Russell, though he was sure that the result was regretted by him. But he had not expressed that regret, and it became, therefore, the duty of that House to signify its opinion by adopting the resolution as amended.

The ATTORNEY-GENERAL, confining himself to the motion, without entering into the general policy of this country towards Japan, observed that it contained three propositions—the first, that the House should express its deep regret at the burning of the town of Kagosima; and this House had already done so in its Address to the Crown; the second, that it is the duty and policy of this country to adhere to the usages of war; and there could be no difference of opinion upon this proposition. The third proposition was that the burning of the town was contrary to those usages of war which prevail among civilised nations. This proposition was true only when the act was wilful, wanton, and unnecessary, and he put it to the House that it could not affirm this proposition without attributing to Earl Russell, Colonel Neale, or Admiral Kuper, one or all, a wilful and deliberate intention of destroying the town. Now, no one could pretend or suppose that Lord Russell had such intention. As to Colonel Neale, he handed over to Admiral Kuper the conduct of the operations, and the Admiral took precautions to prevent unnecessary bloodshed or damage to the town. There was not the smallest evidence from which an inference could be drawn that Admiral Kuper wilfully, wantonly, and unnecessarily shelled and fired the town; and was the House to resolve, nevertheless, that he did; and was the nation falsely to accuse itself in the eyes of the world.

Mr. WHITESIDE insisted that the construction put upon the instructions of Earl Russell by Colonel Neale and Admiral Kuper was that the town was to be destroyed. The thing, therefore, was intended to be done, and the Attorney-General had put the question upon that issue.

Lord PALMERSTON observed that the treaty with Japan, a wise and useful measure, had been entered into with the treaty-making Power of the country, the Tycoon, the assent of the Mikado not being required. No man could doubt that when British subjects were exposed to repeated acts of outrage it would be unbecoming and criminal on the part of their Government to suffer those outrages to pass unnoticed. A demand was accordingly made for redress and satisfaction. It had been asked why there should have been a double demand. Because there had been a double default. Satisfaction was given by the Tycoon, but the Prince of Satsuma refused. Were we to submit to this refusal, or to compel a compliance? It was necessary that he and the other Daimios should be taught that they could not commit outrages upon British subjects with impunity. He justified the course taken by Earl Russell, who did not say, "Go and burn the town;" and he vindicated likewise the proceedings of the Admiral. He maintained that the burning of towns during war was not contrary to the usages of war; to affirm the contrary, therefore, would be at variance with the fact. He thought Mr. Buxton might be satisfied with what had been said in the debate; but if the motion was pressed he should move the previous question.

Mr. LONGFIELD's amendment having been agreed to,

Mr. BUXTON offered to withdraw his resolution; but this course being objected to, the previous question was moved, and the House divided upon the question that the original question on the resolution be now put, which was negatived by 164 to 85.

The question, therefore, was not put.

PARLIAMENTARY NOTICES.—Mr. Liddell to call attention to the reported disbandment of the expeditionary force recently raised for service in China, and address questions to the Government as to their future policy in China—(hear). He should also move for further correspondence on the subject, and that "it is the opinion of this House that further interference on the part of this country in the civil war in China is impolitic and unnecessary." Colonel Sykes.—Copies of a letter from the Admiralty to Admiral Kuper respecting the death of Lieutenant Tinling; and of reply of Captain Dew.

Monetary and Commercial.

The biddings for £400,000 in bills on India took place at the Bank of England. The proportions allotted were to Calcutta £220,000, to Bombay £160,000, and to Madras £20,000. The *minimum* price declared was, as before, 1s. 11¼d. per rupee on Calcutta and Madras, and 1s. 11⅛d. on Bombay. The applications within the limits amounted to £1,400,000. Tenders at 2s. 0⅛d. will receive on Calcutta about 65 per cent.; on Bombay about 8 per cent.; on Madras about 75 per cent.; and all above that price in full.

Owing to the important decline in the Bombay exchange, the diminution in the applications on last occasion is more than £1,000,000. These changes are suggestive of relief to our money market. It is stated that the orders to purchase cotton in India are now upon a considerably reduced scale.

The directors of the Singapore Gas Company have made a call of £1 per share, payable on the 19th inst.

The Labuan Coal Company have issued a notice that they are prepared to supply steamers with coal at $5½ per ton.

The report to be presented at the meeting of the Bank of Egypt on the 12th of February states that the profits, including a balance of £5,145 brought from the previous half-year, to be £15,970, of which £8,750 is recommended to be applied to the payment of the usual dividend at the rate of 7 per cent. per annum, leaving £7,220 to be carried forward.

At the half-yearly meeting of the Consolidated Bank (founded last year by a junction of the Bank of Manchester with the London Banks of Heywood, Kennards, and Co., and Hankey and Co.), Mr. T. A. Hankey in the chair, the report stated the profits at £49,842, which, with a previous balance of £7,368 and a sum of £1,217 derived from premiums on shares, made an available total of £58,427. A dividend at the rate of 10 per cent. per annum and a bonus of 1s. per share (being an additional 2½ per cent. per annum) were declared, £20,000 was placed to the reserve fund, and £1,076 was carried forward. The paid up capital is now £597,628, and the deposits held amount to £4,006,558.

The intelligence of hostilities between Germany and Denmark will have a serious effect on the employment of vessels now out in the Eastern seas, more especially if the Danes fit out, as is rumoured, a few *Alabama's* to snap up the German flags. British shipowners will see nothing to regret in this game, and, of course, will make hay while the sun shines; indeed, if the American vessels continue to be blockaded as at present, the palmy days of 1853-4 may again be enjoyed by shipowners.

The following letter appeared in *The Times* from the Chartered Mercantile Bank of India:—

"52, Threadneedle-street, Feb. 3.

"Sir,—With reference to the statement in *The Times* of to-day, under the heading of 'Court of Bankruptcy,' to the effect that this bank is a creditor upon the estate of James Crossley for £65,038, I beg to say that the acceptances of Crossley which the bank holds are fully provided for by friends of the drawers of the bills in this country.—I am, Sir, yours faithfully, "D. T. ROBERTSON, Chief Manager."

Insurances have been effected on the British ship *Edinburgh*, which left Shanghai for London on the 22nd August last, at the rate of 12 per cent.

The report of the British and Foreign Marine Insurance Company (for which Messrs. Lyall, Still, and Co. are agents at Hong Kong), to be presented at the meeting at Liverpool on the 25th inst., states the net premiums to have been £329,526 out of which £101,356 has been paid for losses, while the premiums on the risks run off are stated £187,072. The sum of £5,856 has accrued as interest on invested capital, and out of this a payment of 2s. per share, or at the rate of 5 per cent., is recommended, the preliminary expenses of £6,432 being at the same time written off.

The following is from the report to be submitted by the directors of the Universal Marine Insurance Company to the fourth annual meeting, which will be held on the 11th of February:—

The directors have to submit to the shareholders the accompanying annual statement of the accounts of this company, closed on the 31st of December, 1863, and embracing all the company's transactions to that date. It is shown by these accounts that the net receipts of the past year for premium, after deduction of all brokerage, discounts, and returns of premium, and of the expense of reinsurances effected by the company, amounted to £252,762. 18s. 7d.; while, on the other hand, the sum that

Digitized by Google

during that period became due and has been paid out of the company's funds, for the adjustment of claims, was £169,200. 1s. £83,562. 7s. 7d. remained therefore as net balance on the underwriting account in favour of the company on the 31st of December last, and a further sum of £4,403. 8s. 7d., for interest to that date, has also been received. From these sources of revenue the investments of the company, which were shown by the previous year's accounts, laid before the shareholders, to have been on the 31st of December, 1862, £91,932. 9s. 10d., have in the interval gradually increased to £162,608. 1s. 10d., while also the large amount of £127,304. 9s. 2d., then at the charge of income and expenditure account, has now diminished to £53,715. 2s. 10d. In offering to their fellow-shareholders their congratulations upon these gratifying results of the business of the past year, and the improvement that has taken place in the general position of the company, the directors point with unqualified satisfaction to the testimony borne by the accounts which they now present to the uninterrupted and large amount of confidence reposed in the company.

The exports as per Sam Mendel's Circular are, from London, Liverpool, and the Clyde, from Jan. 1 to Feb. 1 1864 as follows:—

To SHANGHAI.—Plain cottons, 114,000 yards; coloured cottons, 103,035 yards; printed cottons, 3,360 yds.; twist, 138 lbs.

To HONG KONG and CANTON.—Plain cottons, 472,860 yds.; coloured cottons, 52,519.

To SINGAPORE.—Plain cottons, 293,490 yds.; coloured cottons, 49,850 yds.; printed cottons, 38,000 yds.

To BATAVIA.—Plain cottons, 130,260 yds.; coloured cottons, 76,100 yds.; printed cottons, 88,750 yds.; twist, 21,550 lbs.

To MANILA.—Plain cottons, 70,250 yds.; coloured cotto ns, 333, printed cottons, 7,500.

The new companies formed during the fortnight are as follows:—

The Great Eastern Northern Junction Railway. This railway will be 108¾ miles long, with 21¼ miles of connections and branches. Its total cost is to be £1,500,000. It will start from a junction with the Great Eastern, at a point near St. Ives, above Cambridge, and run through Peterborough, Bourne, Sleaford, Lincoln, and Gainsborough, to Askern, near Doncaster, where existing lines connect it with the Great Northern coalfields, and the manufacturing districts of Yorkshire and Lancashire.

The Credit Foncier (Limited) has for its object the application of the land credit system to Great Britain and Ireland. The capital is £3,000,000, in 30,000 shares of £100 each.

The Wallachian Petroleum Company (Limited) is intended to import petroleum from an entirely new source, in the province of Wallachia, proved by analysis to be equal to the Pennsylvanian. The capital is fixed at £120,000, in 12,000 shares of £10 each. The first cargo has just arrived, and on the reopening of the navigation of the Danube 1,500 tons now at Ibraila, and in course of delivery, will come forward.

The Mexican Bank, capital £2,000,000, for banking operations in Mexico.

The Titanic Steel Company. It is mentioned that the processes of Mr. Mushet, especially when in combination with the Bessemer process, will produce, from materials which will cost about £6 per ton, steel in no way inferior to that produced from the best Swedish iron.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 4th inst., was:—In gold, to Alexandria, £25,500; to Galle, £11,000; to Madras, £3,669. In silver, to Hong Kong, £6,918; to Madras, £65,000; to Calcutta, £208,936. Total, in gold, £40,169; in silver, £210,854.

SHIPPING STATISTICS.

According to the statistics of vessels entered inwards at the port of London, there is an increase of 73 vessels with a capacity of 43,743 tons. From 1st January to 31st December, 1863, the difference between 824 vessels and 576,096 tons in 1862, and 897 vessels and 619,839 tons in 1863. The Port of Liverpool also exhibit an increase of 89 vessels with a capacity of 71,540 tons, the arrivals in 1862 having been 329, and 308,270 tons, and in 1863, 418 vessels, and 379,810 tons. The port of Bristol shows an increase of 9 vessels with a capacity of 5,483 tons, the difference between 10 vessels and 4,084 tons in 1862, and 19 vessels, and 9,567 tons in 1863. In the Clyde there is a decrease of 8 ships and with a capacity of 2,156 tons, the arrivals in 1862 having been 28 vessels with a capacity of 11,924 tons, and in 1863 only 20 vessels and 1,968 tons. The net increase has been 169 vessels with a capacity of 118,610 tons, the difference between 1,191 vessels and 899,774 tons in 1862 and 1,354 vessels and 1,018,384 tons in 1863.

The vessels from China into London, Liverpool, and outports, total up (in the six months) 234 against 151 in 1862. From Singapore and Penang, 48 against 54 in 1862. From Philippine Islands 59 against 28 in 1862. From Java and Sumatra 5 against 6 in 1862.

The clearances for China in the same period are 166 against 154. From Singapore and Penang 60 against 53. From Philippine Islands 13 against 11; and from Java and Sumatra 21 against 20.

ARTICLES OF IMPORT.

TEA.—Low and dusty kinds of Congou have sold at about previous prices, as also fair common with leaf; in good common, transactions have been few, and prices remain unaltered. Flavory kinds, below 1s. 2d., have sold rather lower, those up to 1s. 6d. per lb. continue very difficult of sale. Good Kaisow kinds from 1s. 7d. to 1s. 10d., have given way from ½d. to 1d. per lb. Common to fair black-leaf kinds show no improvement. Good qualities, of old season, have met with a moderate inquiry. Prices for second-class Monings and Wopaks of this season, show no material change. Fine to finest maintain former value; also similar grades of Kaisow. Tayshans have sold ½d. per lb. lower. Common Oolongs have been in demand for export, and quantities suitable are now difficult to meet with, at 1s. per lb.; medium kinds are difficult of sale, but fine in better request. Souchongs remain without alteration. Flowery Pekoes continues to be sold at public sale at low rates. Common scented Capers have been inquired for for price, fair qualities are difficult of sale, but good to fine have been taken at former rates. Foo Chow kinds show no alteration. Fair to good Canton make Orange Pekoes remain difficult of sale at rather lower prices; fine to finest have been better supported. Foo Chow kind are comparatively scarce, and have sold at fully former prices. Uncolored Japans have realised ½d. to 1d. per lb. higher prices. Indian teas continue to command full rates. Green teas scarce in first hands, and sales made principally from speculative holders. Young Hysons have changed hands freely at 1d. to 2d. per lb. higher prices. Hysons, Imperials, and Gunpowders have sold at extreme rates. Canton-made Greens show no improvement. 22,289 packages were brought forward at public sale on the 3rd inst., of which 10,900 packages were sold, 9,062 packages being without reserve. The stock in the United Kingdom on the 30th ult. was estimated at 89,900,000 lbs., against 81,600,000 lbs. last year, and the quantity afloat at 46,934,590 lbs., against 38,440,000 lbs.

SILK.—We have no favourable report to give of silk. The market since the commencement of the year has been excessively quiet. Various attempts have been made to produce business by slight reductions in price, but all without the desired effect. The deliveries continue upon the most limited scale, marking that Asiatic silk no longer forms the staple article of consumption; still, in the face of repeated reports of short settlements and confident assurances of limited supply, importers are little disposed to submit to serious reduction in prices. A certain speculative disposition, too, is not wanting, which seems ready for action in case of any decidedly lower range. The finer sizes of Japan silk are the only class in which any important change of prices can be quoted. These seem especially to feel the influence of the competition of European silk, as being most nearly allied to them in size and character, and in these we may trace a reduction of 7½ to 10 per cent. upon the prices of the early part of November.

SUGAR.—The market was again cheaper in the earlier part of last week, but on the 5th inst. there was an improved feeling, and on that day, 483 bags Mauritius were realised at 38s. to 41s. 8d., (duty 12s. 6d.) for middling brown to low middling brown. Madras: 1,936 bags Jaggery were brought in, but 198 brown and yellow date, sold at 32s. to 33s.

COFFEE.—Plantation Ceylon, 72s. to 108s.; common, 66s. to 72s.; market well supplied; the better class of plantation well maintain their value, the lower are rather cheaper: so also with Native; superior realises fully former terms; common neglected, and difficult to sell. Mocha: market well supplied, and prices again the turn in favour of buyers. Of 1,710 bales and half bales at auction about half sold at 94s. per cwt. for good clean long berry, and 86s. 6d. to 89s. ordinary to middling short.

COTTON.—The market was much depressed till within the last day or two, and with a considerable reduction in rates, and difficulty in selling; quite recently confidence has returned, demand revived, and value partially restored. The total business small, and the latest quotations are:—Surat: Oomrawuttee and Dhollera, 1s. 5d. to 1s. 11½d.; Mangarole, 1s. 4½d.

Digitized by Google

to 1s. 10¾d.; and Compta, 1s. 4½d. to 1s. 10½d. per lb. Madras: Tinnevelli, 1s. 6d. to 1s. 9½d. per lb.; Northern and Western, 1s. 7d. to 1s. 9d.

RICE.—Prices are again rather lower; business to a fair extent accomplished at 9s. 6d. to 10s. per cwt. for middling to good pinky. Not any business of consequence doing in Java.

CAMPHOR.—Firm, at £5. 5s. per cwt. for good China, at which moderate sales have been effected. 84 chests inferior dark at auction, partly sold at £5.

CASSIA LIGNEA.—84s. to 92s.; very quiet, with most limited business on former terms. Buds: £16 to £17; nothing doing.

DRUGS.—Cubebs: Have not suffered any further reduction, and of 293 bags at auction, two-thirds sold at 90s. per cwt. for fair to stalky. Dragon's Blood: In reeds, £10 to £14; in lumps, £4 to £11; flat; 8 cases at auction retired. Rhubarb: 1s. 9d. to 4s. 6d. and 6s. Little offering; only 18 cases at auction, mostly retired.

GUMS.—Benjamin: Of 174 cases at auction, only one-sixth sold at £8. 15s. to £9. 2s. 6d. per cwt. for false packed, second quality being very cheap; and £5. 15s. to £6 middling third. Damer: Of 655 cases at auction, half sold at a slight concession—40s. to 41s. per cwt. for fair picked, but small and rather yellow. Gamboge: Nothing of any consequence doing.

GUTTA PERCHA.—Good Natural has sold with some irregularity, reboiled has realised former terms. Of 47 tons at auction half sold at 2s. 2½d. to 2s. 3½d. per lb. for good to fine, and 8d. to 1s. 6d. reboiled. India Rubber: Very flat and inactive; 96 baskets Java sold at auction at 1s. 4½d. per lb. for good, being cheap; and 280 baskets Java, 165 baskets Singapore, 150 baskets Penang, and 988 baskets Assam, all retired.

HEMP.—Manila: The recent advance has been well maintained, but without any great animation in the market; business to a tolerable extent concluded on the spot, and for arrival, at £34. 10s. to £35 for fair current quality, and up to £36. 10s. for fine Sorsogan. 2,109 bales at auction, mostly retired.

HORNS.—Buffalo: Have realised fully former prices, and 51 tons Bombay, 25 tons Madras, and 13 tons Singapore sold at auction at 40s. to 41s. 3 lb. average, 28s. 6d. to 31s. 2 to 2¼ lbs., and 21s. to 26s. 6d. 1¼ to 1¾ lb. Deer: Steady; and 133 tons Madras, 7 tons Ceylon, 4½ tons Calcutta, and ½ ton Singapore, sold at auction at 45s. to 47s. per cwt. for 1¼ to 1½, and 36s. to 43s. 2 to 1¼ lbs.

JAPAN WAX.—58s. to 70s. Very quiet, and only 30 cases at auction, and those retired.

OILS.—Anniseed: Quiet at the quotation 6s. 4d. to 6s. 5d., with very little business. Cassia: Very flat; 44 cases at auction, all retired. Cinnamon: Steady; only 1 case at auction, sold at 2s. per oz. for fair. Mace and Nutmegs: Nothing doing; nutmeg paste cheap; small sales at 1½d. per oz.

SPICES.—Cloves: Penang firm; of 56 chests, half sold at 1s. 3d. to 1s. 3½d. per lb. for good. Zanzibar again the turn in favour of the seller, and 2,467 bags sold at 2⅝d. to 3¼d. for ordinary dark to good. Ginger: Steady; of 90 cases at auction, one-third sold at 70s. per cwt. for middling. Mace: 1s. 1d. to 1s. 2d. per lb. dearer; 7 bags Penang only at auction, sold at 1s. 2d. to 1s. 6d. per lb for fair reddish to middling dull palish. Nutmegs: The bold and medium classes are 3d. to 4d. per lb. dearer, the small 1d. Of 169 cases Penang, and 11 cases Singapore, at auction, three-fourths sold at 3s. to 4s. 2d. for middling to fine bold, and 1s. 2d. to 2s. 3d. middling small to fine medium. Pepper: Black in good demand, at ⅛d. per lb. advance; and of 6,409 bags Singapore at auction, two-thirds sold at 3⅝d. to 3¾d. per lb., and 785 bags Penang sold at 3½d. White: Is ¼d. per lb. dearer; and of 844 bags Singapore at auction, three-fourths sold at 5½d. to 5¾d. per lb. for middling to fair.

SAGO.—Pearl: Quiet, without any quotable alteration in terms; and of 3,057 bags at auction, a few only found buyers at 21s. 6d. per cwt. for middling small. Flour: Also quiet, 620 bags at auction, all retired, and very little doing privately.

TIN.—Prices had improved about £1 per ton; limited business being done in Banca up to £122 per ton, and in Straits at £117. 10s. to £119 cash, and £121 full prompt: quite recently the advance appears to have been lost; the latest transactions being at £118 cash, for Banca as well as Straits.

TERRA JAPONICA.—Cutch, Pegue: Very dull: not any brought to action, and scarcely anything doing privately. Gambier: Of 750 bales at auction, a small portion only sold at 22s. 6d. per cwt. for cubes in mass; a fair amount of business done privately, but upon rather easier terms.

TOBACCO.—Manila Leaf: None here. Java: Sold very freely, and prices firm. Japan: Quality of the late arrivals inferior to those previously received. Quotations. Java, 6d. to 1s. 1d.; Japan, 4d. to 8d. Manila Cheroots and Cigars; firm in price, and stock much reduced; 7s. 3d. to 7s. 9d.

MISCELLANEOUS.—Black Lead: Very quiet; and of 391 barrels at auction, only one-third sold at 8s. to 11s. per cwt. for ordinary lump, and 8s. 6d. dusty. Galls: All kinds—Bussorah, China, and Japan—very scarce and much wanted. None at auction. We quote Japan and China 50s. to 70s. per cwt. Musk: Has again experienced a good demand, and quite maintained the previons rule; 46 caddies sold at auction, at 27s. to 31s. per oz. for middling to good Tonquin, and 23s. 6d. to 24s. pickings; 10 tins Grain sold at 31s. to 51s. for ordinary to good. Rattans: 8s. to 12s.; firm, and wanted; none brought to auction. Sapanwood: Brings barely previous terms, and 24 tons Manila at auction sold at £8. 12s. 6d. to £9 per ton; 6 tons Batavia sold at £8. 17s. 6d. to £10; 5 tons Ceylon sold at £8. to £10. 17s. 6d., and 7½ tons Bombay retired. Mother o'Pearl Shells: No auctions held: sales of Singapore effected privately at 150s. to 152s. 6d. per cwt. Soy: Firm, with moderate business within our quotations, 2s. 3d. to 2s. 7d. Star Anniseed: Remain very scarce, and much wanted. Sticklac (Siam): Is a little better; and 300 cases at auction chiefly sold at 45s. to 60s. 6d. per cwt. for very small to very good bold, and 51s. to 53s. blocky. Ivory: Siam is in demand, and very scarce. Tortoiseshell: Auction confined to 2 cases Singapore, one of which sold at the previous value, 15s. per lb. Turmeric: Nothing doing; China scarce and wanted; Java neglected, 155 bags offered at auction, not any placed. Vermilion: Has at length realised some advance, the higher quotation, 2s. 8d., having been realised for a few cases privately.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod, £9. 10s. to £10; hoops, £11; sheets, single, £12; Staffordshire bars, £10. 10s.; rails, £8.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £120 per ton; yellow metal, 10d. to 10½d. per lb.

TIN.—116s. for block; 117s. for bar. Tin plates, best charcoal, I.C., 31s. to 32s per box.

LEAD, &c. — English Pig, £21. 5s. to £21. 12s. 6d.; W.B., £22. 5s.; shot, patent, £24; sheet, £21. 15s.; spelter, £21. 5s.; zinc, English sheet, £26. 10s. to £27.; quicksilver, £7. 10s. per bottle.

The following is from the Circular of Messrs. French and Smith:—The operations in Metal have been steady, the last few days trade has been more quiet. Iron: Manufactured of all descriptions continues firm. Scotch Pig is depressed, no doubt attributable to the state of the money market. Copper: Some second hand parcels of both Copper and Yellow Metal are to be obtained under Smelter quotations, but the Smelters themselves are firm. The Ore Market continues stiff. Tin: English is in good demand, and price well maintained. Tin Plates: The inquiry is excessive, and manufacturers now generally ask from 1s. to 2s. per box advance. The shipments last month were about 78,000 boxes, against 60,000 boxes in Jan., 1863 and 49,000 boxes in 1862. Lead continues in good demand here and prices are well maintained. Spelter: The market is rather excited in consequence of the hostilities between Denmark and Germany, and the probable check to shipments. The stock here is 6,177 tons, against 4,752 tons in January last year. Quicksilver is now £7. 10s. per bottle, immediate delivery.

From PENANG.—At LONDON: John Masterman, Daylight, Nipisiquit, Teesdale. At FALMOUTH: Schlosser.

CASUALTIES.

The Landbouw, Kleynenberg, from Batavia, which arrived at Brouwershaven Jan. 21, is leaky, and has lost sails and boat, having experienced heavy gales.

The Eliza Stewart, Osborne, from Hong Kong for Liverpool, put into Algoa Bay Dec. 16, short of water, and with crew sick.

LIVERPOOL, Jan. 25.—The Hidalgo, Roberts, arrived here reports having spoken, Jan. 12, in lat. 37 N., long. 24 W., the Pieter Schoenmakers, Kers, 128 days out, from Batavia for Amsterdam, with crew sick; Europeans all well. Advices from Lisbon since received report the arrival there, on the 28th Jan., of the Pieter Schoenmakers, with twenty Lascars dead, and the rest of the crew sick.

The Antonio Terry, Luces, which arrived at New York Jan. 15, from Manila, had experienced very heavy weather, and had sprung mainmast.

AMSTERDAM, Jan. 28.—The Schoonderloo, Otto, from Batavia, lying aground in the Great North Holland Canal, was run into by the Odin or Idun, Jacobsen, from Dram to this port, and sustained considerable damage in her stern post.

The Maggie Leslie, Stephen, from Shields for Hong Kong, put into Portsmouth Jan. 30 with windlass broken.

The Java, from Batavia to Falmouth, which was spoken on December 11, in lat. 35 S., lon. 19. E., had lost bulwarks in a gale, on November 19, in lat. 29 S., lon. 49 E.

The Sir W. F. Williams, from Shanghai, which was spoken on January 7, in 3 N., 22 W., reported that her master had died in the China seas.

LIVERPOOL, Feb. 5.—The Morning Star, from Singapore, has been ashore on Pluckington Bank, but was towed off to an anchor after remaining a short time.

FREIGHTS AND CHARTERS.

Outward freights have experienced no improvement, there being but little animation in shipments, and the tonnage on the berth for the different eastern ports having increased. Vessels are still required for homeward charters from all the principal ports, except for rice, the season for which is now too far advanced.

The Admiralty have engaged freight in the Corea for the conveyance of twenty-five tons, and in the Southern Belle for 27 tons (including a few combustibles), light government stores from the River Thames to Hong Kong.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author,
12 stamps; sealed ends, 20.
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored, one application per month will keep it in perfect colour. Price One Guinea per Bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

PROSPECTUS.

MACAO DOCK COMPANY.

CAPITAL,—150,000 dols., in 150 Shares of 1,000 dols. each.

As soon as the Capital is subscribed for, and a Meeting called to frame laws and appoint Directors, &c., and sign a deed of settlement similar to the "Hong Kong and Whampoa Dock Company's Deed," it is proposed to buy from Mr. B. E. Carneiro that property in the Inner Harbour of Macao, situated on the Praya Manduco, and now known as "Gude de Carneiro."

Together with the Four Large Houses and Twelve Godowns, strongly built, and ground appertaining, measuring in all 70,575 superficial feet for the sum of... ... ... Dols. 45,000

(The above Houses and Godowns are at present partially insured in Hong Kong for 20,000 dols., at a premium of 1½ per cent.)

A contract was made to build a Dock capable of taking in a ship with 205 feet keel and 260 over all, and entrance at the gate of 55 feet, a breadth on the inside on the top 66½ feet, and bottom 35 feet, now partially constructed, and can be finished in three or four months' time, and with a depth of water at spring tides of 14½ to 15 feet, at neap tides 11½ to 12 feet, for the sum of 24,000
Machine and Pumps and for putting up 5,000
Extra wages and other expenses 1,700

Total cost of Granite Dock and building, &c., 75,700

If the Proprietors think desirable, the Portuguese Government have granted permission to extend the Dock 31 feet longer, and have also granted permission to fill up a space that can be used as a timber yard and for other purposes—205 feet by 90 feet. The extra contract for this work would be:—

To lengthen the Dock 31 feet 5,400
To lengthen the Keel 20 feet 3,500
To filling up the space 205 by 90 feet 10,300

Total Amount ... 19,200

This would still leave an available sum of 55,100 dols. which could be partially used to purchase ship stores, machinery, and to send for Engineers, &c., and the balance kept as a reserve fund. Mr. S. B. RAWLING has consented to act as Engineer to the Company, upon a payment of 5 per cent. on the cost, for his services, the Company paying his travelling expenses.

Application for Shares can be made to Mr. S. B. RAWLING; Messrs. PHILLPS, MOORE and Co., of Hong Kong, and B. E. CARNEIRO, of Macao, and every information can be obtained from the same sources.

Macao, 21st December, 1863.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all, with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 ,,

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 13 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar, Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

HOLLOWAY'S PILLS.—The Body's Bulwark.—Nine-tenths of the maladies afflicting adults depend upon a disordered state of the stomach. Holloway's Pills correct the first symptoms of indigestion by acting healthily on the gastric juice, and wholesomely exciting the liver. They dispel flatulency in incipient indigestion, and overcome heat, distention, and pain, attending more advanced or neglected cases. These Pills invigorate and soon restore the dyspeptic from the great and sudden depression of strength always accompanying stomachic disorders or billiary derangement. They beget cheerfulness, vigour, and happiness. In rectifying disorders of the digestive apparatus, these Pills prove themselves the promptest preventives of disease. They raise a bulwark against all approaching maladies, and preserve freshness, health, and life.

TERMS OF BUSINESS AT THE HEAD OFFICE IN LONDON.

The Bank receives deposits at ten days' notice of withdrawal, on which interest is allowed at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith, but not exceeding 5 per cent. The rates of interest allowed on deposits for fixed periods vary according to amount and the length of time for which they are made.

By special agreement quarterly or half-yearly payment of interest is allowed on deposits for six, nine, or twelve months.

The Bank issues drafts on its branches in India and China, and circular notes and letters of credit, payable throughout Europe, for the convenience of travellers per Overland route.

The Bank purchases approved bills on India and China, and also receives the same for collection on private account.

The Bank undertakes the purchase and sale of Indian and other securities, and receives the same for safe custody.

The Bank realises interest, pay, dividends, pensions, or other moneys for remittance through the Bank or otherwise. On remittances through the Bank no commission will be charged.

The Bank effects the registry of Indian Government loan notes, so that the interest may be paid in England.

The Bank grants credits in favour of parties abroad. Applications for such credits must be sent in at least three days before despatch of the mails, otherwise they will be deferred until the following mail.

Applications for drafts, bills for collection, and all matters involving correspondence by the mail, must be sent in one clear day before its despatch.

Every other description of Indian banking and money agency business conducted, and the utmost possible facilities given to parties in their transactions with India, China, &c.

Forms and powers of attorney furnished at this office.

Office hours, 10 A.M. to 3 P.M.; Saturdays, from 10 to 2.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £500,000. Reserve Fund, £100,000.

The Bank negotiates and collects bills and grants drafts, payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

LABUAN COAL COMPANY (Limited)

The Directors of the Labuan Coal Company (Limited) beg to intimate to shipowners that they are prepared to deliver STEAM COAL of excellent quality at PORT RAFFLES, in the Island of Labuan, at the rate of five-and-a-half dollars (5½ dols.) per ton, inclusive of lighterage and all other shipping charges. Vessels to comply with the Manager's regulations as to anchorage.
Most favourable reports upon the fitness of the coal for steam and gas purposes have been received, and orders from several large consumers are now in the course of being carried out.
Her Majesty's Government and the Peninsular and Oriental Steam Navigation Company have contracted for considerable quantities deliverable at Singapore and Hong Kong, and Her Majesty's ships on the China station have orders from the Admiralty to coal as much as possible at Labuan.
The island is situate on the north-west coast of Borneo, near the best route for shipping from the Straits of Singapore to China, and is distant about 700 miles from Singapore, 1,000 miles from Hong Kong, and 550 miles from Saigon.
By order of the Board, J. C. LANGLEY, Sec.
No. 41, Threadneedle-street, London, Feb., 1864.

SIR WM. BURNETT'S DISINFECTING FLUID is the cheapest and best for the destruction of Offensive Smells in Houses, on board ships, and for the Prevention of Cholera; it has now become so valuable that none should be without it. It is the only Disinfectant used on board her Majesty's ships and in the hospitals. Sold by all Chemists. Quarts, 2s.; Pints, 1s.; Half Pints, 6d. Glass stoppered Imperial Pints, capsuled extra strength, 2s.; and in bulk at 5s. per gallon. White ants and other insects will not touch articles steeped in this fluid. CAUTION.—The only Genuine Solution for preserving or disinfecting is sealed or capsuled over the cork with Sir Wm. Burnett's name. Sir WM. BURNETT and CO., 18, Cannon-street, London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per Euxine, arrived Feb. 24.—From Shanghai: Mrs. Alisch, infant, and servant. Announced in Hong Kong papers.—Capt. H. D. Brown, wife, and servant, and Mrs. Courset.

To Southampton, per Ceylon, expected to arrive March 2.—From Hong Kong: Ensign Spence, J. Brown, W. Clark.—From Singapore: Capt. and Mrs. Salter and two children.

By last Bombay mail, to Marseilles, per Vectis, arrived Feb. 19.—From Hong Kong: Mr. P. G. Lawrie.

To Southampton, per Poonah, arrived Feb. 25.—From Hong Kong: Mr. T. Platt.

PASSENGERS OUTWARD.

By last mail, per P. and O. steamer Pera, Feb. 20, from Southampton.—To Hong Kong: Messrs. V. F. Maddock, R.N., D. Wakeham, R.N., H. A. Searle, R.N., and H. Chum, R.N., Miss Phillips, Messrs. G. E. Stokes, H. Birch, R.N., J. Ellis, R.N., A. Pritchard, R.N., J. Butchart, R.N., J. Galbraith, R.N., D. Crichton, R.N., and L. Simmons.—To Shanghai: Mr. E. Nichol, Mr. H. Evans, Mr. O. Eyles, and nineteen second-class passengers.—To Penang: Mr. B. Rodyk.—To Singapore: Miss Buyers.—To Calcutta: Capt. R. N. and Miss Chambers, Capt. and Mrs. Dundas and infant. Mr. and Mrs. Lambert, Mrs. Davidge, Mrs. Scott and child, Mr. Gowan, Mr. A. P. Corbett, Ensign Norman, Mr. Newbett, and nine second-class passengers.—To Madras: Capt. G. Radcliffe, Messrs. J. K. Winter, D. Rasbotham, and B. Scott, Mr. and Mrs. R. Smith, Miss Smith, Mr. Walls, and four second class passengers.—To Ceylon: Mrs. Higgs and infant, Mrs. Forbes and infant, Messrs. Forbes, Oxlee, F. Herring, L. Kelly, and Weir.—To Alexandria: Miss Trulove, Messrs. Walker and Overman. From Alexandria.—To Ceylon: Miss Kelly.

From Marseilles, per Vectis, to leave Feb. 28.—To Hong Kong: Mr. and Mrs. Odell, Messrs. E. H. How, A. J. How, Fearon, and B. A. Clarke.—To Shanghai: Mr. Mackintosh, Mr. and Mrs. Henderson.—To Calcutta: Mrs. Paul, Surg. and Mrs. M. Smith, infant, and European female servant, Mr. L. Berkeley, Mr. and Mrs. C. J. Conner, Mr. and Mrs. Purcell, Mr. and Mrs. Leeds, Major and Mrs. Ross, Messrs. J. B. Finch, H. J. Becher, and R. Merington, Staff.-Surg. Major H. Downes, Capt. W. J. Randall, Messrs. H. B. Goodwin, and C. B. Stewart.—To Madras: Messrs. W. B. Cross, J. Beaumont, and Oakes, Major Drury.—To Ceylon: Mr. and Mrs. Northway.—To Alexandria: Mr. and Mrs. Larkins, Miss Larkins, Miss Burrows and female servant, Messrs. Phillips and Freeland, Mr. and Mrs. Amhurst, Miss Amhurst, and Miss Paton

Per P. and O. steamer, March 4, from Southampton.—To Hong Kong: Mr. G. Williams, R.N., Mr. J. Gittings, Commander J. W. Webb, R.N.—To Singapore: Mr. Wyon. From Gibraltar.—To Hong Kong: Messrs. Manuel Pereira and Edward Pereira. From Marseilles, March 12.—To Singapore: Mr. and Mrs. Schwabe, infant, and two children.—To Hong Kong: Messrs. T. M. Drysdale, H. Marshall, Jas. Deacon, E. Cubbett, Edward Mellish, Mr. and Mrs. J. H. Wright, Mr. Fearon.—To Shanghai: Mr. L. S. Dunlop.

Per P. and O. steamer of March 12, from Southampton.—From Suez.—To Shanghai, via Bombay: Mr. Cornes.

Per Far East steamer, for Shanghai and Hong Kong, from London, sailed Feb. 24.—Mrs. Boyle, daughter, and servant, Mr. and Mrs. Russell Robertson, Mr. and Mrs. Langan, Mrs. Atkins, Mrs. Harry Jones, family, and servant, Miss Patridge, and Miss Henry, Messrs. Finnis, Morgan, Hay, Egan, Peyton, Goddard, Church, Limber, Grosser, Gidley, Jones, McKenzie, Abell, two Japanese, and ten second-class passengers.

ADDITIONAL PASSENGERS OUTWARD.

By last mail, from Marseilles, per Vectis, to leave Feb. 28.—To Singapore: Mr. Macfarlane.—To Ceylon: Commander C. F. B. Robinson.

Per P. and O. steamer, March 12, from Southampton.—To Shanghai, via Bombay: Messrs. Nimmo and Stevenson.

Per P. and O. steamer, March 20, from Southampton.—To Kong Kong: Mr. Henry Parke. From Marseilles, March 28.—To Hong Kong: Mr. and Mrs. Odell.

Summary of News from the Far East.

JAPAN.

By the present mail we have no intelligence from Yokohama or Nagasaki of a later date than what appeared in our issue of the 12th instant. We have further news down to the 11th of December from

HAKODADI.

The *Osborne* and *Dove* leaving this evening or to-morrow morning, clear this harbour of foreign shipping;—the combu, or sea-weed season is finished, and Hakodadi will resolve itself into that usual winter state of tranquillity and congelation which may be daily exemplified by grouse, hares, and vension for the table, sleighing as amusement, and business at a standstill. To talk of sleighing, however, is rather premature, for with the exception of the early part of November, the weather has been exceedingly mild, and we cannot say that winter has commenced.

Exchange is as low as ever, dollars at the present being down to 210. We have had a report that for the representatives of America and Portugal no more exchange will be received. Should this prove true, it is the step I advocated in my last letter, and one, without doubt, in the right direction. I reiterate that so long as Consuls and other Government officers draw exchange from the Japanese Government, so long will the dollars rema in at depreciated value, and trade with Japan be muffled, as it were, and prevented from gaining its full tone. A business, to be successful, should be superintended by persons interested in its success; but with trade in Japan the reverse is the rule, and the employes of foreign Governments are really interested against its furtherance. If Consuls find a difficulty in existing in Japan on their present small (?) salaries, let their salaries be increased when their exchange is stopped, but by all means let the present wholesale trading in coin by Government officers be put an end to.

Wars and rumours of wars have no existence here, and we are as quiet—and likely to continue so, I think—as if there was not the slightest hitch between our respective Governments and that of Japan. This has hitherto been a favourite wintering station of Russian vessels of war, but we have not seen one for a long time, although now their more northern ports must be closed. The question then is—where are the Russians, and why do they make themselves so scarce in these parts?

CHINA.

SHANGHAI.

The dates are down the 9th January. The English mail of 10th Nov., and French mail of 17th, had arrived out. The following is the position of the Anglo-Chinese force according to the *Commercial Record*:—

At Soochow and Quinsan matters have remained in *statu quo*, if we except an additional little piece of outrage committed by the Futai on a French priest, who, under the authority of a pass from the Imperial Government of Peking, and by permission of the Mandarin then in charge of the city, entered Soochow and took up his residence at the former property of the French

Digitized by Google

Roman Catholic Mission. The Futai on learning this ordered his removal, which was forcibly carried out, the priest beaten and caused to kneel and made to undergo other indignities; the matter is now in the hands of the French Consular authorities.

The Imperialists, under Ching and Major Bayley, have taken Ping-wang after some sharp fighting, losing about 150 men and inflicting a loss on the rebels of about 500, besides 300 prisoners subsequently slaughtered, together with one European inside the stockade, subsequent to the capture. The sum of 10,000 taels, together with some other presents, were sent from the Imperial Government at Peking to Major Gordon, upon the bare news of the fall of Soochow reaching the seat of Government, and before the delicate position in which the gallant officer stood towards the Futai was known in those quarters. This kumshaw reached the Major through the Futai, and was immediately rejected and returned as being altogether unacceptable. The rumour is that the Futai (who has received the yellow jacket of honour!) has written to humble himself to the Government and acknowledge that he was to blame in the matter of the Soochow butchery, praying that he may be punished accordingly; should this prove true he will probably be degraded one week, to be reinstated with honour and promotion; but such a proceeding will not for a moment we hope be tolerated or acknowledged.

The *North China Herald* says:—

The city of Soochow appears to be in a state of perfect tranquillity. For the services rendered by the Futai (?) in the capture of the place, the Emperor has been pleased to elevate him to the rank of Kung-paou, a distinction which gives the recipient the privilege of wearing yellow robes when in the Emperor's presence. The following ordinances issued by the throne will exhibit clearly the light in which the respective services of the Futai and of Gordon have been represented by the former.

On December 24, 1863, the following decree was issued to the Inner Council:—

"Li memorialises announcing that, having led his forces to the attack of Soochow, he has retaken the city. The perusal of his report has afforded us joy and satisfaction indeed. Gordon, as a tsung ping of the province of Kiang-soot in command of his auxiliary force, has displayed thorough strategy and skill, and has put forth most distinguished exertions. We ordain that a medal of distinction of the highest class be conferred upon him, and, further, that he receive a donation of ten thousand taels in token of our approbation. Respect this!"

On the same day was issued the following private decree of approval to Gordon for the great bravery and exertions (which attended) the recapture of Soochow. The donation of ten thousand taels is to be provided and sent to him by Li. "Foreign nations already possess orders of merit under the name of 'stars;' let therefore the decoration of the first class which we have conferred upon Gordon be arranged in accordance with this system. Respect this."

The "kumshaw" of ten thousand taels mentioned above was accordingly prepared and offered for Gordon's acceptance, but was by him indignantly refused. The events which succeeded the surrender of the city seem to have disgusted Gordon with the Chinese service, and to have had the effect of making him regard a Chinese distinction as a degradation.—[Quite proper too.—ED. *L. & C. T.*]

We have been informed that for the services which the Futai has represented himself to have rendered the Imperial cause in the province of Kiang-su, he has been promoted to the yellow jacket. This distinction (the Huang Ma Kua) raises the recipient over the heads of all other mandarins, and expresses in the most unmistakable manner the approval of the Emperor. It does not, however, interfere with his subservience to the Governor-general Tsung Kun-fan, and he will, therefore, in all probability continue to act as Futai in this province.

The following notification was also issued by the Futai's friends:—

"On account of the floating rumours regarding the late affairs in Soochow, the undersigned have thought it best to publish this card and make known the real facts of the case.

"The public ought to bear in mind that it was when Le Futai had invested the city and had captured in succession twenty-three stockades in front of Lowmun, that the hearts of the rebels first began to fail them, and that it was on the departure of Chung Wang on the 23rd of 10th moon (December 3rd) for Woochow, Ne Wang and others first gave intimation of surrender. Now, if they sincerely wished to save their own lives, the question arises under what plea did they again collect an army and intrench themselves? Each of the five wangs and four headmen had under him 20,000 or 30,000 men, who continued to wear long hair, and were in possession of the three gates of the city.

"On the 25th (December 5) Né Wang sent out Mowang's head. On the 26th the Futai went to the stockade situated immediately without the wall, to receive the allegiance of the rebel wangs. The wangs and headmen, in all nine men came, but accompanied by a large body of men fully armed, and whose appearance wore an air of fierceness. They demanded of the Futai the exclusive right to garrison the Soochow city, and sole power over their own men. On the spot it would be dangerous for the Futai to refuse the demand, as well as impossible to grant it. Accordingly the Futai, having answered in a few words, left the stockade, and ordered the gates to be closed and the headmen seized and beheaded.

"The remaining 20,000 or 30,000 rebels in the city, seeing their leaders killed, at once shaved their heads and tendered allegiance, willing to return to peaceful avocations.

"Now, we find that Né Wang and the other wangs and headmen, during the three years of their possession of Soo-chow, had committed incalculable evil, and the people they killed exceeded myriads of souls. Their surrender was not made in good faith. If opportunity offered they would again raise the Taiping standard.

"If such men are not killed, though Soochow might be recaptured, the advantages resulting from the success would be less than what should be expected.

"Rebels in other places have, on surrender, been spared, and even received into services of honour; why should these be singled out as objects of punishment? It was because the Futai found it impossible to tolerate their existence, and he deserves no censure for his course of action.

"SOOCHOW COMMITTEE FOR THE PROTECTION OF THE DEFENCELESS."

The *Recorder* has the following notice of the markets:—

Our market presents a pleasant spectacle at this season of the year, and must strike a stranger with astonishment, leading him to believe that it is our own fault if we are not the best fed people in China.

In the butchers' shops, particularly that picture of cleanliness the Bucherie Francais, you see enormous joints of well fed and well grained beef, mutton, 14 and 15 lbs. to the leg, delicate home fed pork—fresh sausages in graceful festoons, &c., &c., whilst fresh fish of every description, shrimps, prawns the newly discovered Saddle Island oysters, even down to white bait and splendid soles, adorn the fish stalls. A little further on you meet with pheasants of gorgeous plumage venison, wild geese and ducks—teal, pigeon, woodcocks, snipe, hares, quail, golden plover, an occasional white swan, and hosts of smaller birds.

The fruit market keeps pace with the rest. Tientsin, grapes, oranges, amoy pumeloes, chestnuts, walnuts, apples, pears, &c., &c., displaying their tempting and luscious beauties to the purchaser. Nor are we badly off for vegetables, numbering Shantung cabbages and occasional cauliflowers, with the usual supply.

A Steam Tug and Lighter Company has also been established, which will be found in our advertising columns.

The *North China Herald* of January 2nd, contains a review of the year 1863.

In addition to the Marine Insurance Society a Fire Office has now been established. The notice of it will be found in our advertising columns.

The following mercantile notices have appeared:—

N. Latimer, A. Little, and J. Nutt, have established themselves at Shanghai, Kiukiang, and Chinkiang, as Commission Agents and Public Tea and Silk Inspectors; at Shanghai, as Nichol Latimer and Co., and Kiukiang and Chinkiang as Latimer, Little, and Co.

The business of T. W. Jackson, at Ningpo, will in future be carried on under the style of Jackson, and Co.

Mr. George Robert Davis is authorised to sign for the firm of W. R. Adamson and Co., per procuration at Yokohama.

Mr. John Andrew Maitland is admitted a partner in the firm of Thorne Brothers and Co.

Mr. C. Kraemer has been admitted a partner by Mr. Henry Drucker; style of firm, Drucker and Co.

Digitized by Google

Mr. John George Dunn has been admitted a partner by Mr. David Reid; style, Reid and Co.

Mr. William Waller has established himself as public silk inspector and commission agent, under the style of Waller and Co.

Messrs. Freiderich Adolph Joost and Mr. Emil Brunkow have been admitted partners in the firm of Siemssen and Co.

W. J. Alt and Co., of Nagasaki, notified, on the 1st of December, that the interest and responsibility of Mr. Herbert Montague Wright in their firm ceases on that day, and that from the 1st of January the business would be continued under the style of Alt and Co.

Monsieur Bertolini advertises that he is about to leave Europe, but strangely omits to say who succeeds him as agent for the *Messageries Imperiales*.

CHEFOO AND TIENTSIN.

By the *Island Queen* from Chefoo we have the following items from Taku to the 14th Dec. The *Nora Creina* had left Taku on that day, having experienced great difficulty in getting over the bar. Cold weather had set in on the 10th. The *Island Queen* attempted to get over the bar, but was obliged to return to Chefoo, where she discharged her cargo, except the opium, which she brought back to Shanghai. At Chefoo the winter had set in severely. Snow eighteen inches deep, with high winds. Quotations at Chefoo (nominal)—Bean cake, taels 0.92; Peas (very scarce), taels 4 to 4.3.; Opium (Malwa), taels 53; Cotton (more plentiful), taels 18. Opium quotations for Tientsin—Malwa, taels 630.

The Chefoo mail will be forwarded *via* Tientsin, as junks refuse to cross to Chefoo. No advices have been received from Tientsin of later date than the 9th Dec. Ice was then setting in, and there was no trade doing except in opium, which had advanced taels 630.

HANKOW.

From this place, and the other ports on the Yangtsze, we have no important advices. Our correspondents bewail the general dulness of trade induced by the approach of the Chinese New Year, but report no events of any interest. The river has fallen so considerably, that should it sink one foot further, steamers will be unable to pass Kiukiang. The shock of an earthquake was felt in Hankow on the 25th of December, and the lives of 300 Chinese lost by the consequent falling of an embankment upon which they were at work.

AMOY.

NINE PIRATICAL JUNKS DESTROYED BY H.M.S. GUNBOAT "HAUGHTY."

Piratical junks from Canton having for some time past committed all sorts of depredations along the coast, the gunboat *Haughty* went in pursuit, and on the 13th December four piratical junks were descried in Owick Bay; two were captured and destroyed, the rest escaping.

Subsequently a piratical lorcha was seen in the Hatan-shan River, and attacked and burned by boats of the *Haughty*. On the 20th the Chinese authorities pointed out to the Commander two large junks which had been captured a few days before by the pirates, who had murdered most of the crews. The pirates had hastily abandoned the two junks on hearing from Swatow that the *Haughty* had been ordered to look out for them. A day or two afterwards, in front of the piratical village of Hanchow, three junks were shelled by the *Haughty*, and when deserted by their crews two were destroyed and one retained as a prize.

On the 3rd January, the mandarins requested the capture of a large suspicious-looking junk, which was sent in as a prize, to be disposed of by the proper authorities at Swatow On the same day, in Pinghai Bay, two more pirate junks were attacked by the *Haughty*. One was destroyed in the bay; the other stood out to sea, firing with great precision into the *Haughty*, who gave chase, and destroyed the pirate after a most determined resistance on the part of the crew, who lost between 20 and 30 men killed and wounded, but a few escaping untouched by the fire of the *Haughty*, which was hulled several times, had her rigging injured, and seven of her crew wounded. Amongst the latter, the second master is seriously hurt, and one of the crew has since died.

The several junks thus destroyed between the middle of December and the 6th January are supposed to have been under the command of a European desperado.

HONG KONG.

The English mail of 26th November had not arrived. The French mail of 17th November arrived on the 1st January. The rise in the Exchange on England, which was reported by telegram to be at 7s., was exaggerated. The tightness of money was not so intense as would appear by the telegram. The rise in freights to England was owing to a scarcity of tonnage, which would not be relieved probably until the S.W. monsoon set in. The steamer *Bahama*, Captain Rowe, arrived from London (19th September) on 25th December. She was detained in Batavia for coals over a week, we believe. The *Bahama* is offered for sale in Shanghai.

The following, on the subject of the Committee of the proposed City Hall, is from the *Evening Mail*:—

(To the Editor of the *Evening Mail*.)

HONG KONG, Jan. 8, 1864.

DEAR SIR,—On reading the circular put forth by the self-constituted committee of six gentlemen, respecting the construction of a city hall, it must be obvious to anyone that the public are not adequately represented by that committee; and, in order that they may be, I would recommend that a public meeting be called of all intending subscribers, and that they choose both chairman and committee, in all thirteen, and that the choice be made as follows:—

1st. From British merchants and bankers, four members.
2nd. From other foreign merchants, four members.
3rd. From those engaged in trade, three members.
4th. That the nautical community be represented by one of our talented marine surveyors.
5th. That only one legal gentleman be chosen to take care of the public interests, as two would be quite enough to cause a commotion in heaven itself.

Here, sir, you would have thirteen gentlemen on the committee who would fairly represent the public of Hong Kong, and as the building is intended for public convenience, and not for private interest, it is but reasonable that the great body of the public should have a voice in the management.

I would suggest that any four of the committee may at any time call a public meeting, or grant permission for the use of the theatre; and I would recommend no one to subscribe who is not represented. I will not, for one.—Yours faithfully,

COSMOPOLITE.

(To the Editor of the *Evening Mail*.)

HONG KONG, 9th Jan., 1864.

SIR,—Your issue of yesterday contains a letter signed "Cosmopolite," in which objections are raised to the present provisional committee for promoting the erection of a city hall—first, as numerically insufficient, and as failing adequately to represent the community of Hong Kong, and secondly, as being self-constituted.

The first objection is merely a matter of opinion, on which it does not become me to speak. The committee are, however, quite ready to act in concert with other foreign merchants, with those engaged in trade, and with a talented marine surveyor, if the public are of opinion that the progress of the undertaking will be thereby accelerated.

The second objection involves a question of fact to which I can speak explicitly. A public meeting for the purpose of promoting the erection of a city hall was held in the Club House on the 8th October, 1861, at which Mr. Pollard, Mr. Owen, and myself were appointed a committee to obtain a site and collect funds. We had power given to us to add to our number, which we have used by associating with ourselves a merchant, a banker, and a member of Government. The charge, therefore, against the committee of being self-constituted is groundless.

So soon as the site has been procured, the purpose for which the committee was appointed will have been attained, and the whole question will then again be submitted to a general meeting.—I am, Sir, your obedient servant,

C. W. MURRAY, for the Committee.

We omitted to notice in our last a daring attack made on Mr. Foster, surgeon of the *Coquette*, while returning from Government House, in the afternoon, at broad daylight. It is almost amusing, to see how clever these miscreants are in selecting an unwary victim. The rascals made clean off with his watch, chain, &c.

In our last issue we called attention to the supplies of coal t Labuan, and in another column will be found a report of the directors, which is confirmed by the arrival at Hong Kong of the steamer *Stirling*, from Labuan, with 1,000 tons for Government.

Under the title of "Hong Kong Taxed in Downing-street," the *Mail* puts forth a growl against the colony being taxed some £24,000 a-year for the building and expenses of the Mint, and for an annual contribution towards military protec-

Digitized by Google

tion. It is contended that the Mint ought to produce a handsome annual revenue, probably £40,000 a-year, but of that sum it is not proposed that the colony shall touch a penny. It is agreed, moreover, that "it is a most unfair proceeding to make the Colonial Government of Hong Kong pay for all the mintage required for an enormous China trade. If the matter could be so modified as to give Hong Kong half the proceeds in case of success, the concern paying for its own premises, and the salaries of officers, then we might give the money for the original cost of the Mint, and guarantee the salaries for three years in case of failure. The £20,000 Ordinance should then stand over until the end of the three years, and its enactment should then depend upon the success of the Mint scheme. This would be in some measure fair; for supposing the coinage to yield £40,000 a year, half of that sum, at least, would be from sources unconnected with the trade of Hongkong, and could be allowed to go towards the maintenance of our arms in this part of the East." [Probably this is the course that will be pursued. If the Mint is to be built, and all its expenses paid out of colonial funds, it is clear it must be treated as a Colonial concern—as part and parcel of the colony—and all the profits must go into the Colonial Treasury.—ED. *London and China Telegraph*.]

The local Government have just taken over the waterworks from the engineer who undertook to construct them, upwards of two years ago. Nothing has gone wrong during the course of these works beyond the falling in of an arch in one of the tanks, which was caused by the contractor removing the wooden supports from under it before the lime was dry, which he did, Chinaman-like, on his own responsibility, as he wished to use the supports elsewhere, and wanted to save the expense of new ones. His mistake only cost him the trouble of rebuilding the wreck.

Her Majesty's Consul at Canton communicates that of the pirates charged with the destruction of the *Parana* and the murder of her crew, sixteen have been found guilty, and sentenced to be decapitated, their heads to be exposed near the place where the crime was committed; the remaining eight are to be flogged, and banished for a period of three years. All these twenty-four prisoners have been handed over to the Judicial Commissioner that their sentence may be executed. The twelve men sent from Hong Kong are still under examination.

We learn that a gentleman from Manila, whose name we know very well (says the *Mail*) was robbed of his watch and chain the other morning while walking along the Praya between Peddar's Wharf and Bosman's. The depredation was committed by two Chinamen, in broad daylight (8 A.M.), and as great resistance was offered, the gentleman in question is considerably injured. We may talk as we please about doing without the military, but this island is an asylum for scoundrels who want nothing but opportunity to raise a small Taeping rebellion in our midst. The police are of no use. The last batch from Bombay are the worst of the lot.

Miss Amelia Bailey has given her First Concert in the Exchange Rooms, Queen's-road, where Mr. R. Sipp made his first appearance as a pianoforte-player. Both vocalist and instrumental are said to be the best ever heard in Hong Kong.

CANTON.

The following gossip from the city of Rams has been sent to us (*China Mail*):—

That respectable class of Chinese styled the literati give the subjoined as generally well authenticated:—

The domestic quiet of the Governor of Canton has been sadly disturbed by a scene frequently enacted in most families of the many social grades in China. It appears that the Governor had a fair concubine presented to him by the celebrated and increasingly popular statesman, Tseng-kwo Fan; that she possessed attractions equalling those of his legal wife, and that he, to show his appreciation of her, gave her the use of his wife's chair with its eight bearers. But Mrs. Governor could not brook the insult, and her gentle ire influenced her hands, and other weapons, till the broken sedan, her old friend, was a proof of what is called the sweetness of revenge. But the husband was not to be outwitted, so he bought a new chair for his favourite, but this, jealousy or right destroyed.

Upon the principle that the Emperor is the father of the people, and all his officers an adumbration of his pure rule, this family quarrel in high life was deemed a great disgrace, and, as is the rule, several high officers were called in to settle the dispute. But arguments availed not, persuasion was powerless, and Mrs. Governor, to show her disgust of the whole, absconded. Hong Kong is the next place from which anything is heard of her, and the chagrined husband immediately sends a letter of conciliation, but, before it reaches its destination, her ladyship has again taken flight; one of the foreigner's fire steamers is steaming her away north, and soon her tale of grief will justify her unexpected appearance under the parental roof. This has its own moral.

On Tuesday evening last, an adroit plan to rob was as adroitly executed near the Great Peace Gate of Canton. It appears there is a long, very narrow passage-entrance to a bank called Sai Wing Hong, which is entered from one of the principal thoroughfares in that locality. On the evening of the 31st, about dark, several men dressed as literati of the first rank called professedly to transact most important business. While the banker was absorbed in this supposed lucrative transaction, in came six or seven men dressed as beggars, pretending to ask for a little rice. Very little notice was taken of them, as is usual in Canton. Soon the moment came for action, and swords and daggers were produced and used. The panic that followed must be imagined. Suffice to say the literati embraced this opportunity to transact their business, and composedly walked out with more than a thousand dollars. No cue to the sharpers.

JAVA.

BATAVIA.

The following items are from the *Java Times*, lately started in Batavia, and which we trust will have a prosperous career:—

The committee for the projected Zoological and Botanical Garden have advertised, that owing to their inability to procure a suitable piece of ground for the purpose, they must for the present relinquish their plan.

The Opera-house has been lighted up with gas, which is a decided improvement.

The British barque *Dolphin*, Withers, master, from Yokohama to London, put in lately at Anjer for a new fore-topmast. While there a portion of the crew mutinied. The captain obtained assistance from two vessels lying close by, and after a desperate struggle, in which pistols had to be resorted to, the mutineers were secured and placed in irons. The commandant of the fort arrived shortly after the men had been secured, and, at the request of the captain, took them on shore and placed them in confinement. The master proceeded overland to Batavia, and made arrangements for engaging new hands. The delay caused by this disturbance on board is the more unfortunate, because bets to a large amount were laid on the *Dolphin's* arriving in Europe before another vessel (the *Scawfell* probably).

A meeting of the British residents in Batavia was held on the 22nd of December, presided over by H. B. M. Consul. The proceedings consisted in the church committee handing in their report to the community, and it was gratifying to observe that, notwithstanding the large number of subscribers who had either left the place or withdrawn their subscriptions, the funds were on the whole in a flourishing condition.

STRAITS OF MALACCA.

SINGAPORE.

The London mail of the 10th of December reached Singapore on the evening of the 14th of January, and the Messageries mail, from London to the 17th, and Marseilles to the 19th of December, arrived on the morning of the 20th of January. Colonel Freeth arrived from Ceylon by the Messageries steamer, and the business of the transfer commission will, it is expected, be got so speedily through, that Sir Hercules Robinson, who has now had a long stay here, proceeds to China immediately on the arrival of the next outward mail. There appears to be no doubt whatever that the transfer will take place, unless any unforeseen obstacle should be thrown in the way by the Colonial or Indian Office. It has transpired that the present revenue, after deducting the entire expenses of Government, on the model suggested by Sir Hercules Robinson and Colonel Cavenagh, leaves a very substantial surplus. It is very creditable to our Governor, Cavenagh (says the *Straits Times*), that, though an Indian servant, his recommendations have, it is understood, always been favourable to a more independent system of Government for these settlements than can be enjoyed under the Council of India.

Brigadier General Brice C. B., and Brigadier Major Milman, of the Royal Artillery, also arrived by the Messageries steamer,

Digitized by Google

on a tour of inspection; and no doubt the forts and the manner in which they are, and ought to be, garrisoned, will be timeously considered, that the commission may embody some recommendations on the subject in their report. It is not at all improbable that some of the far-famed forts will be dismantled. It appears that there are serious objections to two of them, and these two are the largest and most expensive.

Colonel de Sausmarez, brigadier, left, per *Pluto*, on his tour of inspection, on the 11th. Colonel Warden now commands at Singapore as senior officer. Colonel Bond is making his official inspection of the two garrison batteries stationed at Fort Canning.

For the information of home readers, we give the speculations rife at Singapore at the time of the departure of the mail, Jan. 22nd, as to the whereabouts of the *Alabama*. By the last Bombay mail we learnt that this bold Confederate cruiser was off the coast of Cochin, where she had captured and burnt a vessel called the *Emma*. The *Straits Times* reports:—

Nothing whatever has been heard of the *Alabama* since the date of our last summary. The ship *Thomas Blyth*, from Liverpool which arrived here on the 15th, reports that, when off Acheen Head (at the western entrance of the Straits of Malacca), on the 31st Dec., she was boarded by the boats of a war steamer flying the American flag, and giving the name of *Wyoming*. This was doubtless the *Alabama*, as the *Wyoming* is known to have been at Manila at the time; but it is probable that the Confederate cruiser has since then left our straits, because a large American ship, laden with rice, from Bassein, arrived in harbour safely two days ago; and from the narrowness of the straits through which she had to pass, it is quite impossible that she could have escaped the notice of the *Alabama*, had she been there to watch for her. The safe arrival of the *Oxenbridge* also discredits the report that the *Alabama* had gone to cruise off the rice ports.

Frank Mahoney, Richard Humbly, and John Gready, three men belonging to the Confederate steamer *Alabama*, out of a number of others who had absconded from the said vessel, had been charged before the sitting magistrate with having, on several occasions, assaulted the petty-officers and crew of H.M.S. *Saracen* and *Rifleman*. The charge being fully borne out in one case, his Worship fined the defendants 50 rupees each, or the alternative of two months' imprisonment in the House of Correction, with hard labour, in default of payment.

The appointment of Crown Prosecutor at Singapore and Malacca has been conferred by the Government of India on T. Braddell, Esq.; and the Deputy Commissioner of Police had, by the Governor, been appointed Her Majesty's Coroner for the island of Singapore.

At a meeting of the shareholders of the Tanjong Pagar Dock, resolutions had been passed entirely favourable to the project, and it was determined to carry through the works with the least possible delay.

The *Government Gazette* of the 15th January notifies that, as the result of an inquiry before Lieutenant Burn, Master Attendant, and Mr. G. T. Wright, Marine Magistrate, into a charge of drunkenness brought against William Garland, late master of the British ship *Glen Isla* by Messrs. Cama and Co., agents of the vessel, his certificate of competency as a master had been cancelled.

The party of convicts, who are told off as tiger hunters, had exhibited before the authorities a tiger which one of their number shot in a by-path near Thomson's-road. On Sunday night, at 10 P.M., the peon in charge of the party, armed with a double-barrelled gun, charged with a bullet in each, ascended a tree and lay in wait. Shortly afterwards the tiger made its appearance, howling in search of prey, when the man fired, both shots taking effect. The bullets penetrated the back near the neck, and lodged in the ribs. The animal measured about nine feet from the mouth to the end of the tail.

In our Shipping Intelligence will be found the official notice from Lloyd's of H.M.S. *Vigilant* having touched on a rock before unknown, and of the loss of the *Surat* and *Lammermuir*. We are here enabled to furnish the particulars. The following letter from Commander Hobson appeared in the Singapore *Government Gazette* of the 8th January:—

Her Majesty's ship *Vigilant*, Singapore, Jan. 5.

Captain J. Burn, Resident Councillor, Singapore.

Sir,—Her Majesty's sloop under my command having on the 6th ult., grounded upon a hitherto unknown rock, in latitude 13·52' north, and longitude 118·36' east, I have the honour to acquaint you with the fact, and request you will be pleased to take measures for giving it publicity. The rock in question appears to be a mere pinnacle, from ten to eleven feet below the water; no soundings were obtained near it with 66 fathoms of line, nor could discoloured or broken water be perceived from the mastheads; there can, however, be no possible doubt of its existence, as the *Vigilant* lost part of her false keel upon it. Good sights having been obtained about two hours before the ship struck, the position I assign to this danger is as reliable as a hurriedly fixed position can be; it is quite in the fair way of the Manila trade, and should be given a wide berth by any ship passing it, even although, as may well happen, it be missed by the lead when sought for.—I have the honour to be, &c., WILLIAM R. OSBORN, Commander.

The following are the particulars of the loss of the *Surat* and the *Lammermuir*:—

The British barque *Surat*, J. Black, master, sailed from Liverpool on the 21st of August, bound for Hong Kong,—cargo, coals. On the 8th of January, sounded in 18 fms. among the Thousand Islands; at 2 p.m. struck on a coral reef 14 feet below water, not laid down on the chart; made all endeavours to get her off, but could not; got all ready for leaving the vessel; in 20 minutes she had 7 feet water in her hold; at 4 p.m. 10 feet water in her; arrived at Onroust 4 p.m. on the 11th. Bearings taken from the Shoal:—W. Island W. ½ S., N. Island N.N.W., N.E. Island N.E. by E. ½ E. in about lat. 5·26 S. and long. 106 34 E.

The steamer *Koningen der Nederlanden* saw on the 16th inst. the wreck still on the rock, high out of water.

Ship *Lammermuir*, Captain Joass, from Shanghai, bound to London, struck on a sunken rock in Macklesfield Straits on the 31st December, about 2.30 a.m.; entrance point S.S.W. ½ W.S.W.; point of Pulo Leat, E.S.E. The rock appeared to be a perfect pinnacle, with deep water all round; remained about 15 minutes, and then came off, and afterwards in about one hour sunk; the water on the rock at the time the vessel was on it was about 14 feet; the vessel hanging on a pivot, twisting round on her centre several times before coming off.

The crews of these two vessels had arrived at Singapore in the *Koningen*. If the bearings of the rock on which the *Lammermuir* was lost are correct, it is in a most dangerous position, being nearly midchannel in the Straits.

The P. and O. Company's steamer *Behar*, on her way from Bombay to Singapore, on the 7th of January, spoke the English ship *Alliance*, from Penang to Jeddah, with commander dead. At the request of the chief officer sent a surgeon board to view the body. The *Alliance* was returning to Penang.

H.M.S. *Centaur* arrived from Hong Kong with seventy invalids on board *en route* for England.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ALT—On the 13th Feb., at Twickenham, the wife of Lisle Bowles Alt, Esq., of a son.
APEL—On the 18th Jan., at Singapore, the wife of Mr. Jules Apel, of a daughter.
BURN—On the 19th Jan., at Mount Emily, Singapore, the wife of Capt. James Burn, Bengal Staff Corps, and Officiating Resident Councillor, Singapore, of a daughter.
CLUNIS—On the 14th Jan., at Singapore, Mrs. John Clunis, of a son.
COMPTON—On the 19th Feb., at Brunswick House, Clapham-common, Mrs. Charles Henry Compton, of a son.
COOPER—On the 18th Feb., at Whampoa House, Aldwick, West Sussex, the wife of J. C. Cooper, Esq., late of Whampoa, of a son, stillborn.
DAY—On the 1st Jan., at Murray Barracks, Hong Hong, the wife of Captain Henry J. Day, 99th Regiment, of a son.
FENNELL—On the 11th Feb., at Newlands, Regent's-park, Millbrook, Southampton, the wife of Arthur Fennell, Esq., of a son.
HORNE—On the 18th Feb., at her father's house, 10, Russell-square, the wife of Horace Horne, of Moorgate street, of a son.
KENT—On the 11th Feb., at Hazelhurst, East Moulsey, Surrey, the wife of F. J. Kent, jun., Esq., of a son.
KENNEDY—On the 18th Feb., at 39, Brook-street, Grosvenor-square, the wife of Colone Clark Kennedy, C.B., of a daughter.
MARKHAM—On the 7th Jan., at the British Consulate, Shanghai, the wife of John Markham, H.B.M.'s Consul, of a son.
MOODY—On the 8th Feb., at Bournemouth, the wife of Colonel R. C. Moody, Royal Engineers, of a son.
PURVIS—On the 11th Jan., at Glassmount, Singapore, the wife of John M. Purvis, Esq., of a son.
VANDERSPAR—On the 17th Feb., at Bath, the wife of John Louis Vanderspar, Esq., of a son.

MARRIAGES.

CRAWFORD—ROY.—On the 17th Feb., at No. 30, Richmond-street, Glasgow, Mr. D. Rae Crawford, of Hong Kong, to Lillias Leishman, eldest daughter of Mr. Archd. Roy.
EVERS—JACKSON.—On Thursday, the 11th Feb., at the parish church, Brighton, by the Rev. H. M. Wagner, vicar, Arthur Evers, Esq., of London, to Mary A. Calvert Jackson, only child of R. B. Jackson, Esq., of Castelnau, Surrey, late H.M.'s Consul at Foo-chow-Foo, China.
HAGAN—LING.—On the 7th Jan., at the Roman Catholic Chapel, Hong Kong, by the Rev. Father Raimondi, John Hagan, Inspector of Police, to Miss Jane Ling, of London.
MONGAN—HOWLETT.—On the 24th inst., at Earlham, near Norwich, by the vicar, the Rev. J. H. Payne, James Mougan, Esq., H.B.M.'s Consul, Tien-tsin, China, to Emily Mary, elder daughter of John Howlett, Esq., of Bowthorpe Hall, Norfolk.
ROBERTSON—CARRUTHERS.—In the notice of this marriage which appeared in our issue of the 12th Feb., the date given as 26th Jan. should have been 26th Dec.
WRIGHT—CHURCH.—On the 20th Feb., at Salcombe Regis, near Sidmouth, Devon, by the Rev. William Hanson, M.A., assisted by the Rev. S. M. Walker, M.A., vicar of St. Enader, Cornwall, uncle of the bride, James Hanson Wright, Esq., of Shanghai, only son of the late James Wright, Esq., of Balham, Surrey, to Eleanor Anne, only daughter of Lieut.-Colonel W. J. Church, of H.M.'s Madras Army.

DEATHS.

BRACESVIDLE—On the 7th Jan., at Hong Kong, James Bracesvidle, late chief officer barque Ettrick.
BOYLE—On the 8th Jan., at the Civil Hospital, Hong Kong, James L. Boyle, Master of the schooner Tien-tsin, aged 40 years.
BROUGHALL—On the 25th Feb., at Broadwater Down, Tunbridge Wells, Mary, the wife of William Broughall.

Digitized by Google

CLINKER—On the 16th Feb., at 1, Summit-place, Upper Clapton. David Beddime Clinker, aged 33, late agent of the Commercial Bank of India, at Calcutta, and youngest son of the late Henry Clinker, Esq.

D'OUTEIRO—On the 4th Jan., at Macao, Jose Marie D'Outeiro.

GRIFFIN—At Shanghai, China, on Dec. 4, 1863, Captain Wm. H. Griffin, a native of Baltimore, Md., for many years a pilot of San Francisco.

JANSSON—On the 6th Jan., at the Seamen's Hospital, Hong Kong, J. Jansson, seaman, ex Swedish barque Theodore Dill.

PATERSON—On the 21st Feb., at Maybole, Ayrshire, William Richard Paterson, Esq., late of Manilla and Singapore, and son of the late Lieut.-Gen. Sir William Paterson, K.C.H., of Exeter.

MAULE—In December last, killed at the capture of Soochow, H. B. Maule, Esq., Captain in the 2nd Regiment of Foot of the Chinese force, late Captain in the 4th (the King's Own) Regiment.

NISBET—On the 26th Dec., at Ningpo, Thomas Nisbet, late of Hong Kong.

TATE—On the 4th Jan., at the Shanghai Hospital, of small-pox, Patrick Tate, the Australian Rider, and a member of Professor Risley's Company of Equestrians.

TOMLINS—On the 9th Dec., on board the British barque Esk, Hong Kong, Harold J. G. Tomlins, master, aged 40 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The Foochow and Amoy mails have not arrived. The remarks made in last report may almost be repeated. The supply to the Hankow market is clearly all but exhausted, nor can any more country Congous be expected at Canton. Black teas generally tend down a little, but not on a scale to correspond with the rise of freight and exchange; they are still pitched far too high for safe investment, and it is singular how firm the teamen are. The scarcity of money and the approach of China new year, must produce their natural effect shortly. Green teas at Kewkiang have again advanced, and are now 7 taels above opening rates. At Canton, there is a small stock of country greens, but there appears no indications of the market opening.

CANTON.—The market remains very dull and inactive. The few settlements of Congous which have taken place have been on previous terms, the approach of China new year appearing to have little effect in reducing rates. The prices ruling generally are above the home values, and the difference appears likely to be further enhanced by an advance in both exchange and freight. In Scented Teas, Canton Greens, and other descriptions, a very limited business has been transacted on previous terms. The following are the transactions reported for the fortnight:—Congous, 4 chops, say black leaf on Pekoe flavour, at 27 taels; and black leaf Pekoe flavour at 31 to 31¾ taels; and 400 half-chests Tyshaans, at 20 taels. Oolong, 1,300 half-chests, at 22½ to 24 taels for medium to good. Scented Caper, 2,000 boxes, at 18 to 22 taels for fair to good. Scented Orange Pekoe, 900 boxes, at 25 taels for good medium up to 37 taels for finest. Canton Greens, 400 boxes Gunpowder, at 21 taels for good; 2,000 boxes Imperial, at 19 taels for good; and 750 half-chests Young Hyson, at 19 to 25 taels for good to fair. The stock on the market is thus reported:—Congous, 46 chops and 1,500 half-chests Tyshaan; Oolongs, 200 half-chests; Scented Capers, fair; Scented Orange Pekoe, small; Canton Greens, uncertain; Country Greens, 6,000 packages.

SHANGHAI.—Black: There has been a better demand throughout the fortnight, and 15 chops have been settled. During the last few days business has been checked in consequence of the further rise in exchange, and the difficulty in procuring tonnage. Prices have ruled unevenly, and in some instances show an advance of fully one tael on last quotations. Arrivals from Hankow have been small, and our stocks are considerably reduced. Settlements on the market, 15 chops, 7,305 chests Oopacks, Oonahms, Ningchows, and Hohows. Re-shipped on owners' account, 20 chops, 8,015 chests Oopacks, Oonahms, Ningchows and Hohows, 35 chops—15,320 chests, making total to date 374,071 chests. Stock, waiting shipment, 5 chops, and for re-sale, 11 chops—16 chops. We quote, second and third crop Oopacks and Ningchows, 25 to 29 taels; second and third crop Oonahms, 19 to 25 taels; second and third crop Hohows, 17 to 21 taels. Green: During the early part of the fortnight considerable settlements were made at a further advance on our last quotations, but during the last week the scarcity of money and the rapid advance in exchange have checked buyers, and holders seem willing to accept lower prices. Very little has been done in Pingsueys and Shanghai packed, as our market is very barely supplied, and teamen are asking extreme rates. Re-shipment and settlements, 41,408 ½-chests Fychow, &c., 3,770 chests Pingsuey, 339 ½-chests Japan—45,517 ½-chests, making total to date 203,160 ½-chests. Stock of green tea is estimated at 24,624 ½-chests Fychow, &c.,; 2,400 ½-chests Shanghai packed Japan; 3.600 chests Pingsuey—30,624 ½-chests.

HANKOW.—Little has been doing here, the market remaining very dull, and supplies from the country being very small. Three chops are reported as being settled, and one a Chinese shipment—four chops in all. Seven small chops of half chests comprise the present stock. There is no change in quotations, which are at present—Oopacks, Chongsowkyes, Leyling, and Ningchows, tls. 21 to 26 per picul, short price. Oonahms, tls. 15 to 18.

RAW SILK.—SHANGHAI.—There was little change early in the fortnight, and as the dealers continued firm, very few transactions were concluded. A scarcity of money having been severely felt latterly, the Chinamen have appeared more anxious to realise, and a decline of 10 taels per picul has been submitted to, but it has failed to induce any extensive operations, and a further considerable fall must take place before any important purchases are entered into. The further advance in the rate of exchange causes the laying-down cost to be nearly 3s. per lb. above the last home quotations. The arrivals from Japan have been about 900 bales, and the mail steamer, now due, will probably bring further supplies. The settlements of the fortnight are stated at 1,200 bales, against 2,200 bales corresponding fortnight last year, and 4,000 bales year before. The present stock is 5,500 bales, against same quantity last season, and 12,000 season before. The following are the current quotations:—Tsatlees, No. 1 chops, — to — taels per picul; 2, 440 to 450; 3, 420 to 430; Market, 3, 390 to 400; 4, 400 to 410; 5 and common, 380 to 385; Taysaams, No. 1 and 2, 380 to 420; 3 and inferior, 330 to 370; Yuenfa, No. 1 and 2, 400 to 450; 3 and inferior, 390 to 400; Hainings, 370 to 420.

CANTON.—Beyond a few bales of Loong-Kongs, which are held by the up-country dealers at exorbitant prices, there is nothing now remaining, and with the departure of this steamer the silk season terminates. Comparing the total export with that of last season, there is a falling-off of over 1,000 bales. The total shipments this season amount to 2,753 bales to Europe, and 5,574 cases to Bombay and New York. Direct to London by European houses bales 1,430, of which 1,246 are new reels, and 184 old reels. Waste silk, 560 bales.

DRUGS, &c.—Cassia Lignea, no sales reported—rate $17½, stock 1,000 pls. Cassia Oil, market still bare. Cassia Buds, no sales, rates $57½, stock 75 pls. Star Aniseed, no sales; stock 40 pls.; $25 is the asking rate. Aniseed Oil, market still bare. Rhubarb, no settlements reported, 50 pls. are on the market. Gamboge, no sales, market bare. China Root is quoted $3.75., stock 400 pls. Galangal, no sales, stock small. Galls, no sales, stock trifling.

COTTON AT SHANGHAI.

The *Recorder* has the following comments on this staple:—The almost insatiable demand for cotton, which week after week during the present season has increased, causing a corresponding increase in the quotations, has from a variety of causes received a check which in all probability will be more than temporary, and perhaps more particularly in this market than in any other. The growers of cotton here are all natives, small farmers, or planters, who will find their interest so much better served to grow for European markets than for native manufacturers or markets, that we may expect a very large increase in next season's crop. Further, as the shipment out of the country of the raw material increases, the demand for Manchester goods will also increase in proportion as the extent of their own manufactures are decreased. The cotton yet comes forward dirty and seedy, and the staple in some instances very poor, but it is nearly as capable of classification as American, and quite as much so as East Indian. Parcels have been shipped, samples of which are about equal to good middling New Orleans. We anticipate as soon as the extent of the production becomes thoroughly known in England, and a classification given to grades, that orders, on lines for execution for home speculation and trade account, dependent on the size of the crop, will be sent out. When this system prevails, the trade here will become large indeed, and we look with much satisfaction on the probable prospects opening for China on its development. The necessities of the trade beginning with an approximate estimate of the extent of the crop to come, the influx of money and manufacturers will bring us into contact with the poorer and working classes of China who cultivate the soil, and who will be enriched and consequently rise in the social scale to an extent which the tea and silk trades cannot effect from the different nature of their cultivation. A statistical table has been published by the Commissioner of the Imperial Customs here of the amount of cotton shipped from the 1st of June to the end of December last year. The quantities are given in piculs, and for the benefit of home readers we place them in lbs. English, viz.:—June, 2,115,323 lbs., average price during the month at 13 taels per picul, or 7d. per lb; July, 2,844,570 lbs., at 15 taels per picul, or 8d. per lb.; August, 4,284,277 lbs., at 14 taels per picul, or 7¾d. per lb.; September, 3,526,573 lbs., at 13 taels per picul, or 7d. per lb.; October, 7,382,457 lbs., at 15 taels per picul, or 8d. per b.; November, 10,263,615 lbs., at 20 taels per picul, or 10¼d. per lb.; December, 16,158,899 lbs., at 22 taels per picul, or 1s. per lb. The cotton arriving into Shanghai, whether from Hankow, Ningpo, other outports, or the inland districts, is sent false packed, much of it being too wet and otherwise adulterated for shipment. Holders of such would gladly sell. Sales were made in the early part of the fortnight at 26 taels per picul for up river staples, and as high as 26.80 taels for a parcel, duty paid, from Hankow. A reduction during the fortnight may be noted of 6.00 taels. Closing rates for No. 1 Shanghai, 20.00 taels; country, 21.50 to 23.00 taels; at Hankow, 22 to 23.50 taels.

CHINA IMPORTS.

COTTON YARN.—There has not been any inquiry for Cotton Yarn in this colony during the past fortnight, and the prices demanded are generally somewhat higher than the dealers feel disposed to pay.

GREY SHIRTINGS.—The advices last received from India of drooping prices for these fabrics have checked, to a great extent, the demand noticed in our last, and the annexed quotations show a material decline in value as compared with the rates then current. The sales of the past fortnight are estimated at 9,000 pieces purchased by foreigners, and 500 taken by Chinese dealers.

WHITE SHIRTINGS have not met with any inquiry, and there are not any sales to notice.

T-CLOTHS.—The transactions in these fabrics, the quotations for the heavier qualities of which are slightly higher, have been confined to purchases effected by foreigners, and amount to 2,200 pieces during the fortnight.

AMERICAN DRILLS.—There is not any stock of these goods on hand.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—Prices of all these goods remain as quoted under date of 31st ultimo, and the only sale to notice is 500 pieces of dyed spotted shirtings. Damasks 200 pieces sold during the past fortnight.

WOOLLENS, SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—These goods do not show any change in price; and the business done amounts to about 400 pieces.

LONG ELLS.—Stocks of these fabrics are now rather low, but prices remain without alteration, and the sales of the fortnight amount to 500 pieces.

CAMLETS.—Without change to notice in value, have found buyers to the extent of 650 pieces.

LASTINGS are in extremely small stock, and have been in good demand during the fortnight, sales of about 1,600 pieces having been reported.

METALS.—Iron, Flat, &c.—A fair inquiry has existed for most descriptions of iron during the past fortnight at prices which do not show any change in the quotations current at the date of last report. The sales effected are estimated at 3,696 piculs of Nail Rod, 500 piculs of Square and Flat Bar, and 420 of Hoop.

LEAD.—Again shows a decline of about 5 cents per picul, with sales of 1,500 piculs reported.

TIN.—The sales of the fortnight amount to 600 slabs.

Digitized by Google

TIN PLATES.—Owing to the small stock now in this market the value of these has advanced about $1.50 per box, and sales of 430 boxes are reported.

OPIUM.—Benares: This drug has been more inquired for than Patna; and was at the time of the arrival of the *Lightning* on a par value with it, being then saleable at $575 per chest. Since that time, however, it has given way also, and now maintains its usual relative value of $10 per chest below Patna. The demand continues good, while the closing rate is $532½ to 535 per chest. Malwa: Owing to the small supplies that have come on during the past fortnight, this drug has not suffered so much as Patna and Benares. The demand, which is entirely Chinese, continues pretty good, but then holders have to submit to having reductions even on best quality drug, which continues very scarce. Prices have ranged from $630 to 640 per picul, the latter being the closing rate. Turkey: Demand limited; quotation $520 to 525.

Per Onward, for San Francisco, despatched by Allmand and Co.:—Tea, 316 packages (4,060 lbs); rags, 1,000 bags; merchandise 142 packages; cuttle fish, 25 boxes; sundries 80 piculs. Passengers: In the Onward, for San Francisco, Capt. D. H. Lynch, Mr. Davis, Capt. Crowell, Mr. Hayle, Mr. Eusden, Mr. Hill, Mr. Newton.

In the Confiance, for London, despatched by Aspinall, Corns and Co.:—Silk, 190 bales; tea, 3,363 cases; cotton, 697 bales; bees wax, 100 boxes; sundries, 14 boxes.

ARRIVALS.

At SHANGHAI.—From London: Dec. 26, Bahama (stm.); 30, Fort William, from Liverpool; Jan. 8, Ann Adamson. From Liverpool: Dec. 31, Stornaway. From Anglesea: Sarah Newman. From New York: Jan. 7, Takee.

At HONG KONG.—From London: Jan. 14, Her Majesty. From Liverpool: Jan. 3, Constancia; 5, Belted Will. From Sunderland: 1st, Esk. From Cardiff: 4, Fidelio; 11, Sterling (str., *via* Singapore). From New York: 2, Resolute.

At BATAVIA.—From Glasgow: Jan. 7, Dolphin. From Amsterdam: Jan. 5, Susanna.

At SINGAPORE.—From London: Jan. 9, Eliza Thornton; 17, Constantine. From Sunderland: 11, Silver Cloud. From Liverpool: 15, Thomas Blyth. From Cardiff: 11, Alardus. From Glasgow: 19, Scotland. From Jersey: 12, S. Western (str.). From Rotterdam: 15, F. Hendrik.

DEPARTURES.

From SHANGHAI.—For London: Jan. 2, Island Queen; 6, Strathallan; 7, Marquis of Argyle. For Liverpool: Dec. 31, Zingra; Jan. 2, Montmorency. For New York: 8, Hermine. For Montreal: 8, H. E. Sassaune.

From FOO-CHOW.—For London: Dec. 24, Glaramaza; Kahlamba, for New York.

From AMOY.—For London: Dec. 29, Amaranth.

From HONG KONG.—For Liverpool: Dec. 31. Virginia; Jan. 3, Juanpore. For England: 11, H.M.S. Centaur.

From MANILA.—For Liverpool: Elias. For Falmouth: Helvetren. For New York: Castilian.

From SINGAPORE.—For Liverpool: Jan. 12, Crusader; 18, Spanker. For Bordeaux: 11, Hoogly; 13, Saint Mitchel.

From BATAVIA.—For Holland: Jan. 1, Jusulaneren, Princess Amalie; 3, Van Galen.

LOADING.

At SHANGHAI.—For London: Egmont, Fair Leader, Lansdowne, Sappho, T. Dryden, Oithona, O. Cromwell. For Liverpool: Antelope, Spirit of the Times, Alice Tainter, T. Roydon, Ralston, Veloz. For New York: Silver Craig, Kate Carnie, Thetis, Hermie.

At HONG KONG and CANTON.—For London: Tamerlane, Cornelia Hendrika. For Liverpool: Devonshire, J. L. Dimmock, Koh-i-noor (cleared), Norwood, Rio, Annie Duthie, Bella, Alchymist. For New York: Resolute, Orient, Creole, Solo, Hamilla Mitchell.

At MACAO.—For Hamburg: Orion.

At SINGAPORE.—For London: Rutherford, Early Dawn, Eliza Thornton. For England: H.M.S. Centaur. For Copenhagen: Emma. For Boston: Pearl.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Jan. 1, Passing Cloud, from Cardiff to Singapore; 4, Augusta Norwood, Cardiff to Singapore; Surat, Liverpool to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT. — Dec. 27, Bankok, from Bankok to London; Merrie England, Ningpo to Liverpool; 28, Chalmers, Foochow to London; Amazone, Hong Kong to Liverpool; Jeannie Joseph, Nagasaki to Havre; 29, Standard, Foochow to London; Tow Tsun, Shanghai to Liverpool; Itsamboul, Hong Kong to Liverpool; Star Queen, Shanghai to London; 30, Maria Wilhelmina, Amoy to London; Balmacarra, Shanghai to London; 30, Lord Lyndhurst, Hong Kong to Liverpool; 31, Zingra, Shanghai to Liverpool; Jan. 1, Ballarat, Shanghai to London; Nonpariel, Shanghai to Liverpool; Zouave, Canton to Demerara; 2, Glenhuntly; Shanghai to Liverpool; Young England, Shanghai to Liverpool.

From CHINA, &c., to UNITED STATES.—Jan. 1, Confucius, Amoy to New York; Apollo, Shanghai to New York; 4, Peep o'Day, Foochow to New York.

FREIGHTS AND CHARTERS.

SHANGHAI.—Tonnage is in good demand, and rates have considerably advanced, and are likely to be higher. They are as follows:—Cotton freights to Liverpool, £5 to £5. 7s. 6d.; tea, £3. 17s. 6d. to £4 per ton.

HONG KONG.—There is some activity in the market, and the prospects generally are good. The rates to London and Liverpool are: £3. 15s. to £4 per ton; to Bangkok and back, 60 cents; to Shanghai, 85 cents per ton and 40 cents per picul.

SINGAPORE.—Vessels are in active demand for China and the rice ports. The rates to Hong Kong are 55 to 60 cents per picul; to Rangoon and back, 55½ cents; to England, tin, £3; sago, in boxes, £4; sago flour, £3. 5s.; gambier, in bales, £3. 5s.: sugar, £3. 15s.; black pepper, coffee, hides and horns, gutta percha, £4; meast., £4.

CASUALTIES.

The British steamer Nankin has been totally lost coming out of Sual, with a cargo to Hong Kong.

The British barque Homer, of Singapore, has been lost in the Gulf of Shuntung; crew saved.

The British schooner, Prince of Wales, was dismasted near Chefoo, about the 22nd of December.

COMMERCIAL POSTCRIPT.

The board of directors of the Imperial Bank of China is nearly completed, and the undertaking will be formally announced in a few days.

The state of the silk trade is thus described in Messrs. Durant and Co.'s Circular:—"The periodical public sales are concluded. The quantity offered was 2,600 bales Bengal silk, 5,000 bales China, 1,500 bales Japan, and 6,000 bales Canton silk. The whole was allowed to pass without biddings, except some few damaged bales—and about 200 bales printed 'to be sold without reserve.' These were generally in small breaks and of common quality, and were sold at apparently low prices. The general market has been very quiet for the last fortnight, with continually heavy prices—the repeated accounts of short settlements and shorter shipments from China and Japan having failed to rouse attention. The continental markets seem to have been equally dull and depressed. It remains to be seen if the reduction in the Bank rate of discount produces any beneficial effect."

A deputation from the Chambers of Commerce have waited on Government to propose a division of the matters belonging to trade from the politics of the Foreign Office. They propose that the Board of Trade should take cognizance of all commercial interests.

ARRIVALS NOT INCLUDED IN THE TABLES.—Feb. 22, at Texel, from Batavia, Nicolas Witzen; 12, at New York, from Hong Kong, Agincourt; 25, off Cape Clear, from China, Beautiful Star; at Queenstown, from Shanghai, Spirit of the Sea; 23, at Bremen, from Rangoon, Schlosser; 24, from Macao, Dwina.

SPOKEN.—Volba, Manila to Havre, Dec. 22; Langdale, Foo-chow Foo to London, Dec. 21, 29 S., 40 E., and was supplied with provisions Margaretha, Bavaria to Amsterdam, Dec. 31, 32 S., 14 W.; Clarissima, Macao to London, Jan. 1, lat. 35, lon. 20; Carobel, Bristol to Singapore, Nov. 7, 10 N., 25 W.; Oriental, Cardiff to Shanghai, Nov. 22, 15 S., 29 W.

DEPARTURES.—Feb. 22, from Cardiff, for Manila, St. Fillan; 24, from Cardiff, for Hong Kong, Ocean; from Hull, for Singapore, Honigby; from Lamlash, for Singapore, Falcon.

LAID ON.—At London, for Singapore, Maggie.

At ASCENSION.—Jan. 8, Tasmania, Jonker, from Batavia, for Amsterdam; 14, Mexicana, Collins, from Amoy. Off Ascension.—Jan. 12, Ravensbourne, from Japan, for London; 13, Edinburgh, from Shanghai, for London; 24, G.D.L.J., from Shanghai, for Liverpool; 26, Sarah and Emma, from Shanghai, for Liverpool.

At ST. HELENA.—Jan. 11, Palmerston, Peters, from Shanghai, and sailed for London; 13, Robertus Hendricus, Mulder, from Batavia, and sailed 14 for Amsterdam; 14, Luconia, Admiraal, from Probolingo, and sailed for Amsterdam; 15, Theodora Machtilda, Wyck, from Patjitan, and sailed 16 for Amsterdam.

Off ST. HELENA.—Jan. 12, Melbrek, from Hong Kong.

At TABLE BAY.—Jan. 7, Mary, Silversparre, from Batavia, and sailed 11, for Falmouth; Camoens, Marques, from Macao, and sailed, 9, for Havana; 18, Jane and Isabella, Cole, sailed for Singapore; 15, Leila, Rapson, for Singapore.

At ALGOA BAY.—Jan. 16, Melrose, Huson, from Amoy, and sailed, 17 for Boston.

CASUALTY.—Teneriffe, Feb. 12. The Jane E. Williams, Young, of and from Liverpool for Shanghai, which took fire Feb. 4th ninety-three miles from this island, and was abandoned next day, was afterwards taken in tow by an inland vessel, but went down within sight of the port of Orotava.

The Julibee has been accepted by the Admiralty for the conveyance of Government stores to Hong Kong.

The Fantasie, Forbeck, from Batavia to Falmouth, which put into St. Helena Dec. 30, was leaky. Having been trimmed by the head, and the leak found and stopped, she proceeded on the 1st Jan.

The *Amberwitch* steamer from London to Bombay, with fittings, fo. the Persian gulf cable fleet, arrived in Table Bay on the 26th (December) On the 27th during a strong south east gale in Table Bay, she parted both cables, and before she could be brought up had run foul of the barque *Hastings*, carrying away her jibboom, &c.

The *London Gazette* of last night announces the appointment of Rear-Admiral Augustus Leopold Kuper, C.B., with temporary rank as Vice-Admiral, while Commander-in-Chief on the East Indian and China Station, to be an Ordinary Member of the Military Division of the Second Class, or Knights Commanders, of the Most Honourable Order of the Bath.

ADVERTISEMENTS.

SINGAPORE DOCKS.

THE Public are hereby informed, that in consequence of one of the Proprietors retiring from business, Shares to the amount of 60,000 dols. will be Sold in the SINGAPORE DOCK COMPANY, which is shortly to be registered under the Limited Liability Act.

The Company intend also at once to complete their New Dock, which has been dug out and laid dry, ready to receive the masonry. The ground is clear of springs, and therefore all engineering difficulties are at an end.

The communications between the Docks have also all been completed for now over three years, and have been found to be perfect, and answer well.

Steam Engines.—One working to 40-horse, and another to 20-horse power, are in place, and as each Dock serves as a reservoir to the other, the two Docks, when finished, can be laid dry in three hours.

The New Dock, as before stated, being ready to receive masonry, dressed granite, and other materials ready on the ground, and in sufficient quantity to complete the Piers for Caissoon, Sill, &c., the whole can be completed, it is estimated, within twelve months.

This dock will be made of sufficient dimensions to admit the largest frigate, and can be completed now for about the sum of 50,000 dollars.

The Company have also a Patent Slip on the spot, not yet made use of, that could be laid down and rendered available at a very small cost; the embankment being finished, and partly bunded in.

The dock property has over 4,000 feet of water frontage, with deep water close to; and nearly one mile of direct property in an unbroken line.

Two large Godowns, capable of holding over 5,000 tons of goods, are now erecting, and will be ready in about three months.

There are at present 560 feet of wharfage made, and accommodation for four large vessels to load or discharge at one time.

Large sheds are also now in the course of erection for storage of coals, and other goods.

The present dock, opened in 1859, is in fine working order, admitting two large vessels at one time; and has machinery worked by steam for the repairs of Engines, Boilers, Iron Vessels, &c.; appliances for sawing timber and woodwork generally are also complete.

A very large and well selected stock of Timber, Yellow Metal, Copper, and Iron on hand.

The largest portion of this ground is in perpetuity; the remainder on lease for 99 years, at the small rent of 300 dols. per year.

There are two large substantial brick dwelling and two engine houses, and blacksmith's shop; two large bungalows, about 10,000 nutmeg trees, some thousand cocoanut and fruit trees, and flower gardens in full bearing.

There are also, belonging to this estate, a heaving-down hulk, and branch establishment in Singapore.

The Singapore branch has also a good stock of teak timber, spars for masts, a quantity of native timber, &c., &c.; in fact, all that is necessary for the repairs of ships.

To give further particulars in this advertisement would be superfluous, but should information as to the desirability of the investment be required, I must recommend a perusal of the prospectus of the Tangong Pagar Dock Company (Limited), which enters largely into the profits said to be realised by this Company.

Application for shares to be made to W. W. KER, Esq., 25, Poultry, London, E.C., where a photographic view will be shown of the Docks, and all particulars given.

Singapore, 21st January, 1864. W. CLOUGHTON, Director.

CHINA FIRE INSURANCE COMPANY.

Subscribed Capital 2,000,000 taels, in 400 Shares of 5,000 taels each.
Paid up Capital 200,000 taels.

DIRECTORS.

F. B. Johnson, Esq. (Messrs. Johnson and Co.)
H. H. Wiggins, Esq., Manager Commercial Bank of India, Chairman.
H. D. Stewart, Esq. (Messrs. Turner and Co.).
F. Porter, Esq. (Messrs. Gibb, Livingston, and Co.).
J. Thorne, Esq. (Messrs. Thorne Brothers and Co.).
David Reid, Esq.

Agencies are about to be established at the several ports in China and Japan.

L. JOSEPHS, Secretary

SHANGHAI TUG AND LIGHTER COMPANY.

Capital, 80,000 Taels, in Shares of 500 Taels each.

CHAIRMAN.

H. D. STEWART, ESQ.

DIRECTORS.

Messrs. E. Buissonnet,	Messrs. F. Porter,
F. B. Forbes,	T. Probst, and
F. B. Johnson,	P. H. Underwood.

The company will be prepared to conduct all business connected with the lighterage of merchandise and specie at this port on and after the first of January next. The discharge of entire cargoes, if required, will be undertaken by first-class iron and other boats, which will be removed about by a steam-tug.

Applications for shares will be received by the undersigned.

J. KEARNY ROGERS, Secretary.

Shanghai, Dec. 23, 1863.

Parliamentary Intelligence.

HOUSE OF COMMONS.

PERSONAL EXPLANATIONS—JAPAN.

(Feb. 18th.) Mr. BUXTON desired to take that opportunity of stating that having found that Admiral Lambert, on whose conduct he remarked on a late occasion, was second in command, and acting under the orders of a superior, he regretted having expressed himself as he had done with respect to that gallant officer.—Mr. LAYARD said he might also take that opportunity of making an explanation with regard to a statement of his the other evening. He regretted to say that he had done an injustice to a meritorious newspaper, the *Illustrated London News*, in assuming that their correspondent was not in Japan on the occasion of the attack upon the batteries at Kagosima. The editor of that paper had informed him that their correspondent really was in Japan at the time.

"THE MARTABAN."

(19th.) Mr. G. SHAW LEFEVRE asked the Under Secretary of State for Foreign Affairs whether it was true that a British ship, the *Martaban*, had been captured by the *Alabama*, and burnt by order of its captain; and, if so, what steps the Government are taking to obtain reparation, and to prevent the repetition of such outrages.—Mr. LAYARD said that no official information had been received. All he knew of the matter he had obtained from the newspapers.

CHINA.

(22nd.) In reply to Colonel Sykes, Mr. LAYARD said he hoped to produce the papers relating to Captain Osborn and Mr. Lay very shortly, perhaps in the course of the present week; and the remainder of the correspondence, which was more voluminous, he hoped would be ready next week.

BRITISH POLICY IN THE FAR EAST.

Mr. FERRAND said he had been requested to postpone the resolutions standing in his name, the hon. member for Northumberland having given notice of a motion with regard to the policy of Her Majesty's Government in China for an early day in March. He was further induced to do so by a wish entertained on the part of many hon. members that the discussion that evening should be confined to the Naval Estimates.

CHINA.

(23rd.) COLONEL SYKES gave notice that he should ask the Secretary to the Admiralty whether the *Africa*, 4 guns, 150-horse power, built in Her Majesty's dockyard at Devonport, and launched on the 20th of March, 1862, had been sold to the Chinese Government, and if so for what sum, and whether the amount had been paid; whether any other of Her Majesty's vessels had been sold to the Chinese Government, and if so for what sums, and whether the price had been paid; and lastly, whether any arrears remained due on account of the Anglo-Chinese fleet lately commanded by Captain Osborn.

SALE OF GOVERNMENT SHIPS TO THE CHINESE.

(26th.) Colonel SYKES wished to ask the Secretary to the Admiralty whether the *Africa*, of four guns and 150 horse-power, built in Her Majesty's dockyard at Devonport, and launched 20th March, 1862, was sold to the Chinese Government; for what sum, and whether that sum had been paid? Whether any other of Her Majesty's vessels had been sold to the Chinese Government; for what sums; whether the price had been paid; and whether any moneys were due, and the amount, from the Chinese Government on account of vessels sold, or for the supply of warlike or naval stores to the so-called Anglo-Chinese fleet lately under the command of Captain Sherard Osborn, C.B., R.N.? And, when the ship's books of Her Majesty's ship *Encounter* were likely to be received at the Admiralty? Lord C. PAGET said the purchase money of the *Africa* was fully paid, and likewise that of the *Jasper* and *Mohawk*, and the stores supplied were also paid for. But he might state that there was a sum of £766. 7s. 6d. still due on the books of the accountant-general of the navy for store supplies for the expedition. He might also state that the Accountant-general said he believed there were stores supplied after the arrival of the ships in the Chinese waters, which might amount to some small sum. He had that day received a visit from Captain Sherard Osborn, and he stated this on his behalf. Captain Osborn said that the actual debt of the Chinese Government would be about £100 when the Admiralty paid him for certain stores which he supplied to the British squadron before he left China. With regard to the latter part of the question, all the ship's books were already at the Admiralty which could be there before the ship was paid off; and the hon. and gallant gentleman could have any extracts from them by calling at the Accountant-general's office.—Colonel SYKES said the noble lord had not stated whether he got the cost price of the ships from the Chinese Government.—Lord C. PAGET replied that the ships were sold at a valuation. They were disposed of for their real value at the time, just as they would be to any private individual.—Colonel SYKES: At a loss. (Laughter.)

MR. LAY.

(26th.) Mr. LESLIE asked the Under-Secretary of State for Foreign Affairs if it was the case that Mr. Lay, after being dismissed by the Chinese Government from the office of Inspector-General of Customs, had been appointed by Sir Frederick Bruce to act as Chinese Secretary to the British Legation.

Mr. LAYARD begged to say that no information of the kind referred to had been received by Her Majesty's Government; on the contrary, as far as he was aware, Mr. Lay was now on his way back to England.

THE CONDITION OF SHANGHAI.

The *North China Herald*, on the condition of Shanghai, says:—

The improvements which are rapidly being made in the Municipal Government of Shanghai are a subject for sincere congratulation. By the exertions of the present energetic Municipal Council, the English settlement has been brought more nearly to a model state than would, perhaps, have seemed possible under the anomalous system of Government prevailing; and we are glad to see that attention is now being turned to Hongque. That district is now finally entrusted to the Council under whose auspices the English settlement has advanced so rapidly, and we hope their efforts will go far to produce similar results there also. Their task will be no easy one, for it is little less than to evoke order out of chaos. It at least possesses the merit of simplicity in one respect, namely, that the evils to be remedied are so patent, that there can be no hesitation in selecting those which require to be first dealt with.

The two principal afflictions at Hongque at the present moment are rowdies and bad roads. To the latter we are glad to see that the Council are turning their earnest attention; and the foreign Consuls show a determination to spare no means to remove the former. We are not aware what the peculiar difficulties are which have to be encountered in dealing with the roads through Wills' estate, to which Mr. Hanbury alluded at the last meeting of the Municipal Council; but doubt not they will yield to the energy of the gentlemen whose task it is to combat them. The conversion of our own streets from the beds of mud which rendered many of the streets almost impassable last winter, into the firm, well-drained roads in which we now rejoice, is an earnest of what may be effected before the next cold season, in the principal thoroughfares of Hongque. Improvement there has begun at the opposite end to that generally the case. The alleys and narrow private streets are, in many instances, models of cleanliness, whilst the principal thoroughfares, such as the Bund and Woosung-road, resemble more nearly ploughed land than roads after a few days' rain.

Digitized by Google

We repeat, however, that before next winter we expect to see the American Bund in as good, or nearly as good, order as the English. We would gladly look forward to an equal improvement in the bridge communications between the two settlements; but fear the cost of erecting a new one in a more appropriate situation, is greater than any funds which could at present be raised in Shanghai for the purpose would meet. Wills' bridge possesses the merit of enabling persons quitting the English Consulate to walk to Hongque in a straight line. But individuals desiring to reach that locality from the northern portion of the settlement, are compelled to go at least a quarter of a mile further than could be necessary if the bridge were constructed in the position which naturally suggests itself to any one walking along the English Bund and looking in the direction of Astor House. However, until an unwieldy cargo boat shall have demolished a few of the supports of the present structure, so effectually as to render it a matter of consideration whether it be worth while to repair them rather than make a new bridge, we fear the present petty annoyances of a circuitous route and cash tolls will have to be submitted to.

Arrangements for the moral purgation of the Hongque settlement are, however, equally urgent as for its material improvement. The evil of rowdyism, though there is a temporary lull in its apparent fruits, is as strong as ever—as will be apparent to any one passing the streets after nightfall. The first and third rules agreed on at the last general consular meeting, are perhaps the most efficacious that could be adopted to reduce to a minimum the almost unlimited freedom the Hongque rowdies have hitherto enjoyed for indulging their various propensities. But the most stringent measures will have to be adopted to compel the low boarding-house keepers, who are the actual fosterers of the nuisance, to act on these rules. The exclusion from their premises of Yang-tze pirates, Soochow refugees, *et hoc genus omne*, the most monied among their customers, will considerably reduce their profits, and no effort is likely to be spared to evade regulations entailing this result.

Not only a frequent inspection of the registers will be necessary, but a careful comparison of these lists with the actual occupants. Otherwise, it will be no difficult matter to produce an admirably-kept register, but entirely, or to a great extent, fictitious. The obligation upon the boarding-house keepers to produce the certificates of discharged seamen will be a check on the unlimited admission of that class, but will furnish no proof that the house does not contain a number of less reputable individuals, whom it might be difficult to class under any appropriate category. The exclusion of Manilamen and Chinese only from the privilege of parading the streets after 10 P.M. shows that the Municipal Council are not converts to the theory of equality between the black and white races, which at present forms the leading principle in the Government of India; but it is no doubt a wise measure, so far as it goes.

Manilamen, besides being the most numerous, are perhaps the most unscrupulous of the rowdy class. Malays and negroes might, however, be advantageously included in the catalogue, for though not numerous, they add the extreme of ruffianism to the bodily strength and daring of their whiter brethren. Lascars, we presume, are included in the ban on the principle of colour, for we doubt their being frequently guilty of any worse crime than drunkenness—that is if the term Lascar is used in its legitimate sense of Hindostanee sailors. It would, no doubt, be very desirable that some system should be devised to keep order among the Cantonese in the settlement. But it would have been well if the Taotai had accompanied his recommendation to this effect by some suggestion for arriving at this system. We confess our inability to conceive any more effectual one than a stringent exaction of night passes, and an obligation on policemen to be present on their beats for the purpose. At present, the Hongque staff of police is very inadequate, and the few who are available appear, as a rule, to act on the principle of keeping themselves out of harm's way during the hours when harm is likely to be encountered.

THE CANTON CLAIMS.

By the subjoined notification it will be seen that the claim of interest on the claims recognised has been allowed, thanks to the perseverance of Mr. Gregson, M.P.:—

The undersigned having received the instructions of Her Majesty's Government respecting the further settlement of the Canton claims on the Chinese Indemnity, the same are hereby notified for the information of those interested.

1st. Interest at the rate of 4 per cent. per annum is to be allowed on admitted claims from the date of loss, to the dates of payment of the principal, which is the case of the factory property will be from the 15th day of December, 1856, to the 22nd day of October, 1861; for the amount payable on the first certificate issued by Her Majesty's Minister at Peking, and from the 15th day of December, 1856, to the 22nd day of October, 1862, on the amount of the second certificate; or, four years 312 days, and five years 312 days on the certificates respectively.

2nd. Interest at the same rate to be paid on the other admitted claims from the time of loss to the 31st instant inclusive.

3rd. The sum allowed to be payable on presentation of a certificate to the officer in charge of the treasury chest at Hong Kong to be granted by the undersigned after the verification of the interest and the claims non-admitted.

4th. Each claimant on receiving the certificate for interest to give a receipt in acknowledgment thereof as accepted in full satisfaction of the claim to which it refers as per annexed form.

Subjoined is a list of the claimants to whom the above arrangement applies, who are requested to send to this office the amount of their claims for interests for verification with as little delay as possible.

D. B. ROBERTSON, H.B.M.'s Consul for Canton.

Form of receipt with reference to Factory Property, other claimants to give special receipts, information regarding which can be obtained on personal application to this Consulate.

I (or we) hereby acknowledge to have received from D. B. Robertson, Esq., H.B.M.'s Consul at Canton, Certificate No. , for the sum of $, payable at sight by the officer in charge of the Treasury chest in the Colony of Hong Kong, being the interest at the rate of 4 per cent. per annum on $, the amount contained in the first Certificate, No. , granted for indemnity for losses at Canton by Her Majesty's Minister at Peking from the 15th day of December, 1856, to the date thereof—viz., the 22nd October, 1861; and on $, the amount contained in the second Certificate, No. , payable twelve months after said date, or from the 15th December, 1856, to the 22nd October, 1862. And I (or we) have hereby accepted the same as a settlement in full of my (or our) claim for losses incurred by me (or us) through the destruction of the foreign factories at Canton on the 14th day of December, 1856, and I (or we) hereby relinquish all further claims on Her Majesty's Government in respect thereof.

OUR HELP TO THE IMPERIALS.

(HERALD.)

We are conjured by ministerial prints not to comment upon the proceedings of Captain Sherard Osborn and Mr. Lay in their absence. The House of Commons itself is bidden to hold silence. But if there ever was a case in which individuals deserved to be criticised in their absence it is this. Why, in fact, are they absent? What business have they in China? At home they might be doing no mischief; abroad, they may be preparing incalculable cost and difficulty for England. The main question, however, is, what have we to do with the internal politics of China? Why should we crusade to keep the Yellow Dwarf of modern times upon his goblin throne? Why are we bound to cement every crack in the obsolete willow-pattern plate? Some of our contemporaries affirm that it is a moral duty on the part of Great Britain to strengthen the Govern-

Digitized by Google

ment whose Emperor we roasted out of his palace at Zehool, to prohibit the burning of cities, and to arrest the Taeping massacres. As to the Imperial Lord of the Vermilion Pencil, who strangles a Cabinet minister once a month, we cannot see what claim he has upon the states of the West; while, in reference to incendiarism and slaughter, it is certain, whatever else may be doubted, that the Imperialists carry their atrocities to a more flagitious extent than the rebels. If there be, as is pretended, a people to be saved from brutality, and a civilisation to be rescued from corruption, the influences to effect the purposes must be far other than those of the imbecile cabal at Peking. All this, however, is beside the real matter in hand. China must take care of China.

We now discover that England has been doubly duped. Captain Sherard Osborn had no right whatever to hoist the Imperial Chinese flag on board of English gun boats. Mr. Lay had no right to the authority which he assumed. What was Earl Russell doing when he acquiesced in these piratical transactions, which, instead of favouring our trade, imperilled its very existence in China? There is a way, no doubt, of bolstering up these ricketty schemes, and of forestalling the defence which the Government will stand very much in need of when the postponed discussion in the House of Commons takes place. However, the apology must be ample indeed which can convince the public that England, without meditating conquests in China, should encourage private individuals, with gun boats under their command, to take part in the sanguinary civil wars of Asia, and to stipulate for the highest titles and powers in the gift of the most stupendous among Oriental monarchies. If they will engage themselves in such a service; if they will become the subjects of Eastern despots; if they will, as independent volunteers and adventurers, enter into the conflict between the old and the new generation amid the chaos of the Oriental world, we cannot help it; but it is not for the ministers of the British Crown to sanction or assist their schemes, and still less is it for them to permit the sailing of armed vessels from our shores with the avowed object of reconstituting the rotten and disfigured Imperialism of China.

THE WIDOWED LADY ELGIN.

(DAILY TELEGRAPH.)

A sad figure, draped in mourning, and wearing the widows' cap, has just landed upon our shores, leaving in India her noble husband, with whom she shared so many cares and honours, and bringing home thence only a great and lasting sorrow. Touched alike by the dignity of her grief and station, His Majesty the Emperor of the French did not allow this lady to pass through his capital unnoticed, but sent a gentleman of his household to express respectful sympathy with her, and to conduct her a little way on her road to England. The courtesy is one which we are proud to imitate, alike in its sincere and unobtrusive aspects; for, while we would not permit ourselves to dwell publicly on personal bereavement of Lady Elgin, we cannot let her arrival among us pass without mark of profound, if restrained interest. The landing at Dover of her ladyship and suite is the last-written chapter of the sad history of the consorts of our Viceroys. Their position in India is a proud one, and such as no Emperor in the world can call it condescension to recognise with his best attentions. They sail, each with her distinguished lord, to be the Queen Regent of a continent, over which he is practically a King. No Court in Europe has power over a vaster population, a more magnificent country, than that which these Englishwomen adorn and share; they are in India the "Lady of the Lord Bahadur," mistresses paramount of society, and to the eyes of the natives undoubted "Maharanees"—indubitable Empresses. It seems a happy fortune—it is a splendid one; but look back only through three such reigns upon the viceregal throne, and note what is paid for the dazzling honour. Lady Elgin is back among us now, without the beloved presence which so short a time ago, in plenitude of reputation and power, was to her her husband—a higher title than that of Governor-General in the heart of the faithful wife. The man by whose side she left her country sleeps far away from it now, among the rhododendrons and oaks of the Himalaya. He is one more in the long roll of the English who lie in an Indian grave; and she one more in the list of those who come back, never to hear the name of the costly country without thinking of the little spot in it which is hers by the title-deed of tears. She survives her husband. Her predecessor in the saloons of Government House, Lady Canning—the graceful hostess in Calcutta, the accomplished friend of Her Majesty here—died before Lord Canning, adding to his great anxieties for the suppression of the mutiny the load of an irreparable loss. Lady Canning's predecessor, again—Lord Dalhousie's amiable wife—departed this life before her husband. Can any incident of domestic loss seem sadder? She had quitted India, obliged to fly from its cruel sun for her life; but all too late. Her husband caught the tidings of her death at sea from the hoarse bawling of the newspaper boys as he drove in the evening along the Strand at Calcutta, and re-entered his palace a lonely man. Three Governors-General, and two Vice-Queens dead in fifteen years—such is the gloomy retrospect suggested by the arrival of Lady Elgin; that is the price we pay, enviers of England, for the country which we water with our tears and fertilise with our blood.

Were this grouped picture of bereavement and distress a mere coincidence—if it could not be paralleled throughout the annals of our rule, and if it were not illustrated daily by sorrow as great, though not so well known, among the less distinguished exiles returning from the East—there would be nothing in it to dwell upon. But this is the story of Indian life, and this the common fate of the gentle and courageous women who share our danger and our duty in India. If you paint your gallery of Calcutta Vice-Queens in sombre hues, paint also in the same sad tints the long line of English ladies who have added their tears to the soldier's blood and the statesman's life, to make up the price of Hindostan. The Dover boat does not often bring us back the widow of a Viceroy; but week by week it carries across the narrow sea some sorrowful face to which the white cliffs of England, with their emerald crown of meadow, are not the gladsome sight they once promised to be in imagination. For those saddened travellers, although their grief is not public, there is some spot of India where they have laid their tribute to its fierce glory. Be it where the palm-trees let their evening shadows fall like a giant dial hand, or where tamarinds and acacias are noisy with forest birds—in the English cemetery, the jungle, the plain, or the little hill-station—that spot is "India" for them. Thousands of English wives and widows among us, if their gentle eyes fall upon these words, will feel them dimmed as they bring back to them the place, lonely, or loud with the voices of the neighbouring bazaar, where they have left "another for India." Lives, too—for this is the barb of the anguish—which might have been spared; lives taken in tribute by the sun from the race which has subdued his dominions; lives of little ones, of husbands, brothers, sisters, friends; all silent and distant under the parched soil. If we are to be reproached, as we may be, for the worst pages of our conquests in the East, let us have the credit of the best. We have bought our right to civilise the Orientals with a price; we have buried our dead, the best and gentlest of our dead, by thousands in their midst; the most eloquent literature of our sway is written upon the tombstones that stand thick, and lovingly kept, in the cemeteries of the soil entrusted to us as a nation.

These thoughts suggest, too, a history that has never been written, and perhaps can never be written, "The History of Englishwomen in India." Smart writers, and those who borrow Oriental life from them at second-hand, to the edification of all equally ignorant with themselves, represent Anglo-Indian society as a compound of frivolity and vice. It is needless to say that their view is due to invention, or to experiences of a different kind from those who consort with decent people. Since the rough days past, when the mistress of the English household in the East was a native concubine, a moral influence of immeasurable benefit has been at work. Steam-ships and railways have reduced the journey thither enough to make the land a home for English wives and mothers; and society is never bad where the true type of these is found. Imprisoned by the heat, and with no absorbing imperial duties like those which occupy their husbands, our countrywomen pass a time of weary luxury; but they have had their work to do, and they have done it, and are doing it in sustaining with the noble influences of home—the best workers there—and, above all, in presenting to the Asiatics the precious spectacle of the freedom and the purity of an English household. There was no influence like this at work to help the old civilising powers; nor is it possible to measure how far it spreads, or how deep it strikes. We do not deceive ourselves, or seek to deceive our readers, by pretending that there are no scandals at the stations, or that the contact between the gentle representatives of England in India and native society is close as can be. But there are, thank God! many English houses there which are silent centres of good to the people—houses where the wandering Hindoo catches glimpses of a noble equality, in duty, labour, faith, and intellect, between the husband and wife; and that experience makes its mark in his mind and home. Let them die still, then, for India, if it be God's will; or let them mourn their dead who die there. Let our sisters still bear their proud, sad share in the moral conquest of this grand country, which must be for most who have sojourned long there Golgotha, "a place of skulls," and Aceldama, "a field to bury strangers in." From the consort of a Viceroy weeping for the dead master of the great appanage, to the subaltern's wife or widow who thinks with choking heart of the grave where she planted the moon-flower and the champak, they have done something for India even in their sorrow. They have helped to erase with their tears the boundary-marks which keep the nations of the earth apart, and which defer the crowning and happy federation of its races.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Feb. 22.

The Colonial Minister has laid before the Second Chamber of the States-General the papers relating to the private cultivation of tobacco in the Residency of Rembang, containing the Governor-General's decree of the 27th of April, 1863, honourably dismissing Mr. H. C. Bekking, and giving Mr. Lawick von Pabst notice that he had not made out a case for obtaining a reversal of the former decree of the 12th of April, 1861, together with a memorandum explaining the contents of the decree; and further, the report of Mr. O. van Rees, Resident of Sourabaya, dated 16th February, 1863, that he was ordered to draw up on the subject. From the latter it appears that the attempts made under the administration of the Residents Bekking and Lawick van Pabst, to encourage the free cultivation of tobacco, did not exceed the powers and instructions belonging to public servants.

In the last sitting of the Supreme Court (civil side) the case of C. Andreas, now appellant, *versus* the Government of Netherlands India, was tried. The case for the plaintiff was conducted by Mr. Procurator Eyssell, whilst Mr. Francois appeared for the defendants. It appears that the plaintiff claims payment of the sum of 150,435 fl. 48 cents and interest as compensation for injustice done to him under the following circumstances:—On the 11th of August, 1859, there was a public competition for tenders to transport colonial produce. There were eleven offers made, the lowest being that of Mr. Andreas, which was 5 doits per picul, and the highest was 6 doits, so that the extreme difference of all the eleven tenders was only one doit. According to the regulations in force in Netherlands India, Mr. Andreas was thus declared the contractor; but it is required to obtain the confirmation of the Governor-General, who may at his pleasure give the contract to one of the other bidders, though in that case he is bound to give compensation to the original contractor who

Digitized by Google

makes the lowest offer. Two months later the Government cancelled the whole proceedings of the above-mentioned competition, on the alleged grounds of having received information of a private combination or conspiracy among the eleven bidders to divide the profits of the contract among them, and it appeared in evidence that the price previously paid for the same work was only 3 8-10th doits. Besides this the Government urged several other objections, viz.—1. That the bids were not made verbally. 2. The trifling difference between the maximum and minimum offers. 3. That the person to whom the contract had subsequently been given for 4¼ doits had immediately sub-let it with a profit of 60,000 florins. 4. That Mr. Andreas had subsequently offered to take the contract also for 4¼ doits; and 5. That witnesses had made a declaration, and were willing to swear to the truth of it, that they were present at a meeting held by the eleven bidders in the office of Mr. Andreas to settle among themselves the offers to be made by each, and to agree to the manner of dividing the profits arising from the contract. Mr. Andreas then brought an action against the Government before the High Court of Justice in Netherlands India, but was nonsuited by decision of that Court, dated 24th of January, 1861, on the following grounds:—1. That the Government possesses the undoubted power to refuse its sanction to preliminary contracts in special cases and for important reasons; 2. That it did no more than act in conformity with the power it possesses; and 3. That not having exceeded the bounds of its authority, it cannot be made responsible for any claim to compensation by a private individual for imaginary wrongs. The pleadings on both sides occupied the Court the whole day. Judgment deferred.

The Netherlands Trading Company have chartered the following twenty-three first class vessels to load cargoes of produce in Java for the undermentioned ports:—*Quintett*, Capt. Slyboom; *Bellatrix*, Capt. Haacke; *Antony van Hoboken*, Capt. Hazewinkel; *Sliedrecht*, Capt. Feenstra; *Julie*, Capt. Brem; *Johannes*, Capt. Ouwehane; *Staatsraad van Ewyck*, Capt. Smid; *Cornelia Adolphina*, Capt. de Roever; *Krimpenerwaard*, Capt. Heyninge; and *Lewe*, Capt. Nyenstein, all for Amsterdam; *Marie*, Capt. Riesthorst; *Nereus*, Capt. Planten; *Sophia Amalia*, Capt. Lourens; *Vriendschap*, Capt. Jansen; *Johannes*, Capt. Rademaker; *Hendrika*, Capt. Volk; *Antonia Petronella*, Capt. Voorendyk; and *Jason*, Capt. van Bueren, all for Rotterdam; *Grootmeester National*, Capt. Giesse; and *Fortuna*, Capt. de Groot, both for Dordrecht; and *Orange Nassau*, Capt. van Hees, *Almonde*, Capt. Surie; and *Dageraad*, Capt. ——, for Schiedam.

At the last meeting of the Indian Association an important discussion ensued on the subject of private possession of land in Java. The three questions debated in succession were:—1. What is the present state of private landholders? 2. What improvements are considered desirable? and 3. What means can be employed for such ameliorations? From the general tenor of the speeches made it would appear that there is a great deal more land in the possession of private owners, particularly in some districts, than is generally supposed. Most of the speakers concurred in the opinion that it was highly desirable to transfer systematically but by degrees the possession of land from the communes to individuals, whilst to attain this object it was needful to pay attention to the following important points:—The legislation of the present landowners and confirmation of their rights of possession; settlement of private property by the clearance and improvement of waste lands; stopping the further division of communal lands; and the mutual division of the Sawahs amongst those entitled to their possession.

By the Cape mail a letter has been received here stating that a bottle had been picked up by Mr. F. Lloyd, near St. Francis Bay, Port Elizabeth, containing the following:—"Monday, July 20, 1863. Dutch barque *Almonde*, Capt. H. G. Surie, from Amsterdam to Batavia, in 39 d. 29 m. south lat., and 18 d. 05 m. east lon. All well on board. Whoever finds this is requested to forward it to a meteorological observatory, as the object is to ascertain the strength and direction of the current." By consulting a map it will be seen that the bottle was thrown overboard about 325 miles south of the Cape, and had been carried 500 miles in a north-easterly direction, though in what time is not exactly ascertained.

The Minister of Finance gives notice that thirteen Dutch bonds of 1,000 fl. each have been destroyed inadvertently by an Englishman of the name of Thomas Carleton Crawfurd, who considered them of no value and tore them up, merely preserving the coupons. The numbers and dates are given, and no caveat is entered by other parties, new bonds will be issued after the expiration of the period prescribed in such cases.

The Dutch barque *Boni*, Capt. Moller, from Java to Dordrecht, put into Table Bay on the 3rd of January to land a sick passenger, and proceeded the next day. With that exception, all well on board.

H.N.M. steam transport *Heldin*, 10 guns, has been taken out of the dry dock at Nieuwe Deep, and is ordered to be got ready for the pennant. She will be commissioned in April, and is destined for the East India station. On being removed from the dock her place was taken by the *Holland*, old 22-gun sailing jackass frigate, ordered to be repaired for service as guardship at Sourabaya. One or two vessels are to be fitted out to cruise in the Channel and North Sea for the protection of Dutch interests in the war between Denmark and Germany.

Policies of insurance to a large amount have been made by Government on specie shipped from the Dutch West India colonies to Netherlands India. It is understood to be the unrequired surplus of the sum sent out as compensation to the planters for the emancipation of their slaves last year.

The *Rotterdam Courant* asserts that a fresh embassy from Japan to Europe is being fitted out and will visit this country. It adds that the expenses will not be borne by the State, but by the individuals composing the mission.

The Colonial Minister advertises for workmen to be employed in the steam-factory at Sourabaya.

COMMERCIAL.

COFFEE.—Though the transactions have not been very extensive since last English mail prices have been well supported, and the market is in a favourable condition. For company's No. 6 47½ cents have been paid, and 45 for Nos. 21, 22, 23, and 26. Among the sales were 3,900 bags of Sumatra ex *India packet* at 45½ and 46 cents 1,050 bags of private trade Java ex *Record* at from 44 to 48 according to quality, and 1,720 bags of Pamanoekan ex *Orange Nassau* and *Ocean* at 44 and 45. A public sale of 6,722 bags of Java ex *Mathilde* and *Batavia* is announced to be held next week. At the company's sale of their whole stock of Ceylon, consisting of 2,078 bags, and 107 casks, all was disposed of at from 33 to 48½ cents for plantation, and 39 to 44 for native.

SUGAR.—A better feeling prevails for the raw article, and some sales have been effected for export at about November prices. The dealings would have been more extensive had the market offered a better assortment. Refined goods dull, but holders firm.

RICE.—The only sales to record are 1,800 bags of cargo Java ex *Zwaan* at secret prices, and 5,400 bags of table rice ex *Mercator* at 17fl.

SPICES.—Nutmegs No. 1, 1863, continue to support the late advance, and even 73 cents has been paid. No. 2 is rather lower, but still commands 63. Mace sells readily at 65 cents. Cloves again are in favour at 27, as is also Java cinnamon, No. 3, which is not be had under 93 cents. Pepper moves off quietly at steady prices.

HIDES.—Java continue in favour. About 4,000 ox and 2,000 buffalo have been disposed of both by tender and private contract at full values.

METALS.—Both copper and tin are rather lower; some of the former has been sold at 60 fl., and Banca Tin at 70 fl., at which latter price there are still sellers.

INDIGO AND COCHENILLE.—No alteration.

RATTANS.—Last week the first parcels were brought to market and found ready purchasers at stiff prices. Amongst the parcels sold were 7,555 bundles (312 piculs) ex *Staatsraad van Ewyck*, and 827 bundles (78 piculs) ex *Batavia*.

DRUGS.—Some public sales are announced for the end of this month.

TOBACCO.—The transactions in Java sorts have not been on a large scale, but values are well supported. The stock, which on the departure of the last English mail was only 4,717 bales, has by the late arrivals been increased to 10,352 bales.

CIGARS.—Since the sales reported in last letter nothing has been done in Manilas.

RESULT OF PUBLIC SALES OF JAVA TOBACCO BY THE NETHERLANDS TRADING COMPANY.

FIRE AT ROTTERDAM.

The *Cologne*, steamer, Captain Ryan, which arrived in the river from Rotterdam, reports that shortly before her departure from that port, at 6 A.M., the greatest consternation was caused among the citizens in consequence of the outbreak of a dreadful fire at the Schieland Palace, the museum and picture gallery of Rotterdam, situate near the High street. The picture gallery formed one of the most interesting exhibitions in Rotterdam. No particulars could be obtained as to the cause of the fire. The Rotterdam fire brigade and engines were soon on the spot after the alarm had been given, but from the first it was seen to be impossible to check the flames. At the time the *Cologne* left Rotterdam all that remained of the old palace were the bare blackened walls. The loss is irreparable.

The London & China Telegraph.

LONDON, SATURDAY, FEB. 27, 1864.

THE PROSPECTS OF CHINA IN PARLIAMENT.

IF among our readers in the Far East there be any who, like ourselves, felt a momentary impatience at the scant attention paid to so important a subject as China in the opening Speech of the Session, we can convey to them comfort, if only in the unprecedented attitude of parties, and the efforts being made to get up papers, &c., which shall provide the various speakers with the requisite implements for the war of debate. Everything points to an early debate on our relations with China, provided the exigencies of the Dano-Germanic war do not force an earlier solution of the question which is on everybody's lips—"What do the Opposition intend to adopt as the basis of their "attack on foreign policy?" The home administration is so solidly based (with the exception of a few shortcomings, such as the law of lunacy, the punishment of death, &c.), that every one instinctively feels that the real tug of the Session will come in the shape of Schleswig-Holstein, of America, or of China. As to the first-named, pending the editing of the voluminous correspondence, of which Mr. LAYARD says truly, that when it is published, abridged or *in extenso*, the most eager political glutton will own himself satisfied, it is quite possible that the question may settle itself. As to the great American question, parties are running so high in the North with respect to the forthcoming Presidential election, that it is quite within the bounds of probability that while the Northern forces are being manipulated by electioneering agents so as to secure their votes, General LEE may possess himself of Washington, and very much this opinion seems to prevail in our own Legislature, where all parties seem to be eagerly awaiting the result of the Presidential campaign. Then, again, there are always a large class of waiters upon Providence, who cannot give a sign till Mr. GLADSTONE has given them his Budget speech, in which he usually contrives to offer a choice of three courses upon every question of both home and foreign policy. The reductions for this year are so trivial that we may expect an unusual crop of paradoxes, and among these it is whispered that the fate of the LAY-OSBORN expedition, or, as it is now more frequently termed, the OSBORN-LAY Armada, is to occupy a very prominent place. The correspondence and papers have been moved for, and the House is in an expectant attitude.

When, therefore, we find that the papers of the OSBORN-LAY expedition have been moved for, identified as it is with the Ministerial policy in the Far East, we perceive that it is not intended that China shall be practically ignored this Session. It is too much the fashion to accept commercial success as the test of wise policy. When in the face of intestine troubles, the trade of all our treaty ports has been found to have run up some 150 to 220 per cent., there is a tendency to exaggerate the importance of such phenomenon, and to underrate the efficacy of a sound and firm policy. We do not anticipate that in the forthcoming debates any serious question can arise as to the attitude assumed by the Foreign Office and Sir FREDERICK BRUCE. It has now been satisfactorily proved that Mr. LAY was acting entirely beyond his powers in assuming the authority he did, and though this does not excuse the perfidy of Prince KUNG in seizing on so shallow a pretext for throwing overboard the men, who more than anything else had contributed to uphold the Imperial authority, and provide it with the requisite funds for employing the aid of mercenaries, yet it affords sufficient justification for Ministers acting upon second-hand information, and worried by the alternate claims of a blind humanitarian fanaticism, and undisguised commercial cupidity.

"MYSTERIOUSLY DISAPPEARED"—THE DENOUEMENT

UNDER this heading our readers will have observed an advertisement in our last number per French mail of 17th inst. It appears, however, that the young lady therein described so minutely did not take passage to the land of her birth (Macao), but simply sped across the Channel to that more fascinating city, Brussels, often described as the miniature Paris. As usual, it turns out that this young lady did not take this step without the kind services of one equally or more interested than herself. A certain medical practitioner named WELLINGS, of East Moulsey, formed an attachment to ALICE BOWRA—for such is the name of the eloper—and on promise of marriage she consented to entrust herself to his care, or, in other and more familiar words, to "run away with him." It appears that ALICE BOWRA inherits from her father, CHARLES W. BOWRA (deceased), considerable property, and it is generally believed that Mr. WELLINGS made this the object of his choice more than the charms of the young lady, not yet out of her teens, while he is a full blown widower with several children.

After the marriage was consummated, we find our hero up and doing, giving early attention to the substantial part of the marriage—the property. The following is a report of the proceedings in the Vice-Chancellor's Court; and, to judge from appearances, the rights of the newly-married couple will be severely contested by the trustees to the estate, who, together with the relatives of the deceased father, are no doubt very wrath at the manner in which their authority has been eluded and defied. There appears to have been a culpable omission in not making the young lady a ward of the Court of Chancery, and thus have secured all parties against such unpleasant proceedings. As it is we may expect to see that the litigants will, at the end of the suits, come out like the celebrated Kilkenny cats.

BOWRA V. THOMPSON.

FEB. 20.—In this case a young lady, eighteen years of age, entitled to considerable property under her father's will, out of which, by an order in Chambers, she was allowed maintenance, had privately left the house in which she lived and gone off to Brussels in company with a surgeon of the name of Wellings. From Brussels Wellings wrote to say that he had married her in that city. Under these circumstances a bill was filed to administer the estate of the young lady's father; but on the hearing it was objected that, if the marriage was a valid one, the suit was wrong in form. The Vice-Chancellor said that at present no decree ought to be made. The case must stand over in order to see what could be done, with leave to amend.

WELLINGS V. WOOLLETT.

FEB. 22.—Mr. Jessell applied to this Court in this suit under these circumstances:—The case of "Bowra v. Thompson" (a notice of which appeared in our columns of yesterday) relates to a young lady, aged 18, who was stated to have been married at Brussels by a Mr. Wellings, and owing to the short period which had elapsed since she left her home, it was made a question whether, under the *code civile*, the marriage could have been valid, for want of the necessary formalities, and the bill, which was filed in her maiden name, and sought to secure her property, might therefore be correct in form, but the case stood over that the parties might consider what had best be done, with leave to amend and to be in the paper any morning. It was now stated that in fact the parties were married in London, and the letter being written from Brussels, and containing the passage, "I was married *this* morning," it had been assumed that the marriage took place at Brussels. After the marriage a bill had been filed by the lady in her married name in the Rolls' Court be her next friend and her several other trustees, who on the next day after such service filed their bill in "Bowra v. Thompson." Under these circumstances it was now asked that no steps might be taken in "Bowra v. Thompson" without notice to the parties in "Wellings v. Woollett," as by swearing the gentleman to be out of the jurisdiction a decree might be obtained behind their backs.

The Vice-Chancellor said he thought he might assume that the parties in "Bowra v. Thompson" would not take the step suggested, knowing of the other suit; but should they do so he would direct a note to be made, that when it came on the Court would know how to deal with it, in order that nothing might be done by inadvertence until notice had been given, which must be done forthwith. Mr. Jessell said he would notice at once.

BOWRA V. THOMPSON.—THE TRUSTEE FOR C. W. BOWRA.

At a subsequent period of the day Mr. Pemberton asked that a petition in this case for inquiries whether a valid marriage had been solemnised, and, if so, under what circumstances, might be in the paper to-morrow.

The Vice-Chancellor stated what had already taken place on Mr. Jessell's application, and said that, as notice must be given, it ought to stand over until the day after to-morrow, and he trusted that no hostility would exist. As the parties were abroad living together, if a valid marriage had not taken place it was expedient that there should be one. The question of whether a mere order for maintenance constituted an infant a ward of Court was in some doubt, and that matter might be discussed, but not now. Counsel in the other suit must have a right to appear at the same time. Mr. Pemberton said that his client (defendant) had not then been served with notice of the other suit.

THE PERSIAN GULF CABLE.

By the last Bombay mail we learn that the *Tweed*, belonging to Messrs. John Willis and Son, with part of this cable on

Digitized by Google

board, had arrived off Galle in seventy-eight days from London. The *Coromandel*, having on board Colonel Patrick Stewart, Sir Charles Bright, Captain C. Stewart, and Dr. Esselbach, left Bombay on the 21st January for Kurrachee, whence she will proceed to Gwadur to meet the *Marian Moore* and *Kirkham* with 360 miles of cable, which will be towed thither by the *Semiramis* and *Zenobia*. The laying of the cable westward from Gwadur towards the landing-place near Cape Mussendom, on the Arabian coast, will then be commenced.

LIGHTS FOR KIU-KIANG.

THE street lamps and large columns supporting three lights of red, white, and blue, for Kiu-Kiang, which have been constructed by Messrs. H. and J. GARDNER, of the Strand, have been shipped off per screw steamer *Far East*, which left Gravesend on the 24th inst. for Hong Kong and Shanghai.

CAPTAIN SHERARD OSBORN and Captain ALLEN YOUNG have arrived in London per overland mail from Bombay, having left the steamers *Keang-soo* and *Kwang-tung* in Bombay in charge of the local Government until the opinion of our Ministers can be ascertained relative to their disposal. Why they should be consulted remains to be seen. The remaining portion of the fleet are on the way to England from China.

STEAMERS FOR CHINA.

The screw steamer *Yuen-Tze-Fee*, lately launched for Messrs. Trautman Co. and others by Messrs. Blackwood and Gordon, at Port Glasgow, having been built by them for the Shanghai and Tien-tsin river trade, was recently tried with most satisfactory results as to her speed and general qualities. In particular, the successful manner in which she was steered elicited the high approval of her owners. Her power in this respect is owing to her having been fitted with the Lumley patent rudder, in the use of which an angle of ten degrees is obtained where twenty would have been the minimum radius under the old system of steering. The *Yuen-Tze-Fee* is one of the first vessels in the merchant service that have been fitted with the new form of rudder.

REPORT OF THE HONG KONG GENERAL CHAMBER OF COMMERCE.

THE last mail brought to hand a document, the title of which we have placed at the head of this article, that is certain to excite considerable attention in mercantile circles in this country, and is a clear and convincing refutation of the random statements that have of late years been so lavishly circulated in this country, as to the low state of commercial morality in the foreign trading community of the Chinese seaboard. We should not have noticed the subject at all, had it not been for the frequency with which such grave though vague charges have been reiterated even by public men of all shades of party opinion, with the unfortunate result of neutralising much of the good which a less mistrusted and misrepresented body of men might have effected for themselves, without requiring to call into play the ponderous machinery of the Colonial or, yet worse, of the Foreign Office. It is with much satisfaction that all unbiassed and reflecting persons at home, have hailed the action of the Committee of the Chamber in disclaiming and refuting the sweeping accusations of wholesale smuggling indulged in by Mr. LAY, and in protesting against the adoption by the Foreign Office of any such report as a final and conclusive authority on so grave and delicate a subject.

But it is not alone in defending from calumny the characters of their constituents that the Chamber has exhibited an energy so marked, that when we contrast its action with the puny efforts of others nearer home, we can but throw up our hands and moan forth, "*O! si sic omnes!*" Thanks to its perseverance, the colony has within the last two years received three great boons—a modified and intelligible bankruptcy law, a new decimal system of coinage—on which, by the way, we commented nearly a year since—and lastly, an Imperial Local Mint—an institution which, under proper management, cannot fail to be largely self-supporting, when we consider the extraordinary fluctuation in the market price of the circulating medium, and the heavy charges for freight and insurance necessitated by the constant outflow of that metal from this country, in regulation of the exchanges.

We are disposed to regret that the Committee decline to accept the responsibilities of a Tribunal of Commerce, for the purpose of deciding expeditiously, but with right of appeal, upon all questions of mercantile law and usage. They imply a conviction that the time is not yet ripe for such a deviation from the tortuous paths of English jurisprudence, as would be implied in their surrendering their right to the enjoyment of all the quirks and quibbles, which the wisdom of our ancestors and the ingenuity of our lawyers have engrafted on the strong common sense and appreciation of truth and fact and right which are the basis of all law. We doubt not, however, that the Committee had good reason for their resolution, though we beg to assure them that they have lost a splendid, perhaps final, chance for inaugurating in the British commercial world a great and most salutary change. Such opportunities, it is but too true

> "On silent pinions fleet away,
> Ah! never, never, to return!"

But we will yet cherish a hope that amid a small society, where each man knows pretty well what is going on, so much good sense will prevail as to lead them to forego the luxury of litigation, entangled by conflicting precedents, and encumbered by obsolete and most inapplicable rules. Even were such a tribunal constituted, there would still remain opportunity enough for the most determined stickler for law and litigation to indulge himself to the top of his bent. Meanwhile, we beg to assure them that the feeling in favour of Tribunals of Commerce has by no means died out at home, as they seem to imagine.

THE REPLIES TO MR. LAY'S CHARGES.

A PARLIAMENTARY Blue-Book has been published containing the refutations of the China firms assailed by Mr. LAY as smugglers. The documents consist of—

Mr. Robert Jardine to Mr. Layard	March	28, 1863
Messrs. Jardine, Matheson, and Co. to Mr. Layard.	June	10, „
Messrs. Dent and Co. to Earl Russell	June	30, „
Shanghai Chamber of Commerce	August	10, „
Hong Kong Chamber of Commerce	October	22, „
Messrs. Lindsay and Co. and H. H. Lindsay ..	April and Sept.	

We append the letter of Mr. JARDINE as a specimen of the refutations. All the circumstances of these cases are well known to our readers, and have now, by the lapse of time, become matters of history:—

TO A. H. LAYARD, ESQ., UNDER SECRETARY FOR FOREIGN AFFAIRS.
3, Lombard-street, March 28th, 1863.

Sir,—My attention has been called to a memorandum by Mr. Lay, Inspector of Customs, in the service of the Chinese Government, included in the papers recently presented to Parliament, in which very grave charges are made against the leading merchants in China, and my firm, Jardine, Matheson and Co., is named as having been engaged in "smuggling."

The memorandum is dated the 11th January, 1862, and I think I may reasonably complain that it should have now been published without any opportunity being afforded to the parties so wantonly aspersed of meeting the statements made in it.

I have no official documents in this country with which to refute the charges I refer to. But in one of the two cases specified by Mr. Lay (that of the *Rose*), a copy of the decision given by the Consular Court at Shanghai appears in the public papers entirely exonerating the master and owners of the *Rose* from the charge brought against them. On receipt of the Parliamentary papers in China, my firm will take the earliest possible opportunity to furnish you with a complete and satisfactory vindication of their conduct throughout.

There is nothing which we desire more than an efficient Custom-house system established on the coast of China, and we have from the commencement cordially approved the principle of a foreign inspectorate. I beg, therefore, to protest against the terms used by Mr. Lay in speaking of the leading houses, and mine among them, particularly in Paragraph XI. of his memorandum, page 175, as being most uncalled-for and insulting, and giving a colour to our conduct directly the reverse of the truth, as will be readily testified by every high officer of the British Government who has served in China since the opening of the trade in 1834.—I have, &c., (Signed) R. JARDINE.

DIPLOMATIC AND CONSULAR STAFF IN CHINA AND JAPAN.

The following list is compiled mainly from information supplied to us by Consular Officers in England, and will be found to differ from the Foreign Office List. We should be glad if the officers in China and Japan will inform us of any inaccuracies:—

PEKING.—Sir Frederick W. A. Bruce, K.C.B., Envoy Extraordinary and Minister Plenipotentiary; T. F. Wade, Esq. (on leave), Secretary of Legation and Chinese Secretary; F. St. John, Esq., Second Secretary; — Saurin, Esq., Third Secretary; —Murray, Esq., Assistant Chinese Secretary; — Lockhart, Esq., Surgeon.

TIENTSIN.—James Mongan (on leave), Consul; J. Gibson, Esq., Acting-Consul; J. T. Middleton, Esq., First Assistant; J. B. Goddard, Esq., Second Assistant.

TANGCHOW OR CHEFOO.—Martin Crofton Morrison, Esq., Consul; W. G. Howlett, Esq., Assistant.

Digitized by Google

NEWCHWANG.—T. T. Meadows, Esq., Consul; A. Davenport, Esq., Senior Assistant.

HANKOW.—W. H. Medhurst, Esq. (on leave), Consul; P. J. Hughes, Vice-Consul; W. E. King, Esq. (on leave), Interpreter; J. A. Webster, Esq., Assistant Interpreter.

KIU KIANG.—T. Adkins, Esq., Vice-Consul in charge.

CHIN KIANG.—G. P. Braune, Esq., Vice Consul in charge.

SHANGHAI.—Sir Harry Parkes, C.B., Consul; John Markham, Esq., Vice-Consul; Chaloner Alabaster, Esq., Interpreter; W. H. Lay, Esq., Senior-Assistant officiating; C. T. Jones, Esq., Senior Assistant; R. Douglas, Esq., Assistant.

NINGPO.—F. Harvey, Esq. (on leave), Consul; R. J. Forrest, Esq., Acting-Consul; A. R. Hewleet, Esq., Interpreter.

FOO-CHOW.—C. A. Sinclair, Esq. (Consul at Chin Kiang), Acting-Consul; W. F. W. Holt, Esq., Acting-Interpreter; C. Carrol, Esq., Assistant.

TAI-WAN.—R. Swinhoe, Esq., Consul.

AMOY.—W. H. Pedder, Esq., Consul; Geo. Phillips, Esq., Assistant.

SWATOW.—G. W. Caine, Esq., Consul; W. Gregory, Esq., Interpreter.

CANTON.—D. B. Robertson, Esq., Consul; W. H. Fittock, Esq., Vice-Consul; W. S. F. Mayers (acting at Shanghai), Interpreter; W. Payne, Esq., First Assistant; J. P. M. Frazer, Esq., Second Assistant; F. Hance, Esq., Vice-Consul at Whampoa.

MACAO.—E. L. Lanca, Esq., Consular Agent.

JAPAN.—YEDO.—Sir Rutherford Alcock, K.C.B., Envoy Extraordinary and Minister Plenipotentiary; Lieut.-Col. E. St. John Neale, C.B., Secretary of Legation; R. Eusden, Esq., Japanese Secretary; Abel Anthony James Gower, Esq., L. Fletcher, Esq., J. MacDonald, Esq., A. Von Siebold, Esq., R. B. Robertson, Esq., E. M. Satow, Esq., Assistants and Students of Japanese; A. R. Jenkins, Esq., of R.C.S., W. Willis, Esq., M.D., Medical Officers.

YOKOHAMA.—C. A. Winchester, Esq., Consul; M. O. Flowers, Esq., Vice-Consul; P. B. Walsh, Esq., First Assistant; Martin Dohmen, Esq., Interpreter and Packet Agent.

NAGASAKI.—F. G. Myburgh, Esq., Consul; A. Annesley, Esq., Assistant; R. E. Schmidt, Esq., Interpreter.

HAKODADI.—Capt. F. H. Vyse, Consul; — Enslie, Esq., Interpreter; — Lowther, Esq., Assistant.

THE CHINESE CUSTOMS AND OUR INDEMNITY.

(To the Editor of *The Times.*)

SIR,—In the present crisis of Chinese affairs it may be interesting to some of your readers to know that a decided opinion prevails at Shanghai that the English control over the Chinese Customs, and the employment of British subjects in their collection, will cease simultaneously with the full payment of the war indemnity. I therefore append an exact statement of our claims on the Government in this respect, compiled by and just received from a friend of mine high in the Imperial service, and the accuracy of which may may be relied on:—

	Taels.
Indemnity for the prisoners unfairly captured on the 18th of September, 1860	300,000
Of which has been received	297,577½
But on the sycee being weighed at Hong Kong it was found to be wanting in weight	2,422½

So that we stand with the Chinese Government thus:—

Dr.	Taels.
Indemnity for prisoners who were unfairly captured on the 18th September, 1860	300,000
For losses at Canton	2,000,000
For war indemnity expenses incurred, &c.	6,000,000
	8,300,000

On the other hand, we have received, Oct. 25, 1860:—

Cr.	Taels.	Taels.
Indemnity for prisoners	297,577½	
Plus short weight	2,422½	
	300,000	
For losses at Canton	3,450,457	3,750,457
Balance remaining unpaid December, 1862		4,549,543

Therefore, at the present rate of payment, it will take from three to four years more to clear off the outstanding amount. Our interests in the meantime are not likely to suffer from the retirement of Mr. Lay.

I also enclose a summary of the trade of the port of Shanghai, which you can publish if you think it worth while.

I am, Sir, your obedient servant,

24, Billiter-street, E.C., Feb. 17. HENRY C. BATCHELOR.

SUMMARY OF TRADE AT THE PORT OF SHANGHAI FOR 1862.

Value of Import Trade—	Taels.	£ s. d.
General Imports	27,968,014,3	14,399,655 6 4
„ „	18,733,570,6	
Opium Imports		5,736,276 10 0
„ „		2,728,021 14 4
		22,863,953 10 8
	Taels.	
Exports—General	15,256,165,9	4,703,984 9 8
„ „	32,313,800,9	9,663,421 18 10
		14,657,406 8 6

Take an *ad valorem* duty of 10 per cent. as an average on this, multiply by two, and you have the result of this year's income from duties paid. [Mr. George Royle, of Kensington, writes to say that the tael is worth on an average 6s. 6⅝d.]

SHERARD OSBORN AND MR. LAY.

(THE TIMES.)

If, as the French proverb says, the absent are always in the wrong, it is not likely that they who are at once absent and unsuccessful will be treated as if they were in the right. Such is the position of Captain Sherard Osborn and Mr. Lay, whose conduct in respect of the naval expedition to China is to be discussed in the House of Commons. Not only must these men undergo in their absence the censure which always, and seldom with entire injustice, follows upon ill-success, but they must endure the taunts and the triumph of those who have no sympathies with the policy of which they were the exponents. There has always been a small party which only saw in the social and political convulsions of China the opportunity of British trade. To strengthen the hands of the Government was, in their eyes, but to give that Government power to destroy European intercourse; to arrest the burning of great cities and the murder of multitudes by the Taiping marauders was but to go out of our way to do unprofitable acts of humanity. Perhaps there was a certain shrewdness, gross and cruel as it was, in this view of the matter; and professors of that policy will hardly fail now to vaunt their sagacity. But it is not only the natural enemies of Captain Osborn and his object who will come to this inquiry with very discontented minds. There were others who thought they saw in this expedition the means of building up again the Chinese Empire; and, if not restoring those peaceful arts which gave splendour to the ancient cities, at least staying the pillage and massacres which are now destroying the old civilisation and brutalising the people. They, perhaps weakly, but honestly, wished to give peace to China, and believed that it was as much our interest as our duty to abstain from all encouragement of the robbers and pirates who laid waste the country and murdered and pillaged its inoffensive and industrious population. The men who thus think form the great body of the English nation. Their hopes have been disappointed, and they have a right to ask from Mr. Lay and Captain Osborn n account of their stewardship. They will require to be shown where the fault lies—whether they were wrong in forming such expectations, or whether a great result has been lost in mismanagement.

The story of Mr. Lay's fall from power in China reads like one of the old chapters in histories of absolute monarchies, either Eastern or Western. The favourite, or the necessary man of the day, springs up in these histories, and for a little time he is all-powerful; some morning his favour or his necessity passes away, and he is cast aside. Such has been Mr. Lay's career. If he had been a Chinaman, he would have been ordered to put himself to death; as he is an Englishman, he is simply dismissed. Some years ago he was picked out by the Chinese as a necessary man. He had intelligence, industry, courage, and, what surprised them much more, he had an integrity which was found to be proof against every temptation, and which came out unsullied from the test of many little traps and pitfalls set to catch him. At that time the Chinese had no notion of such a public servant as this, and they probably fancied there was not another such in the world. Mr. Lay taught them how to make three millions a-year out of their Customs, which had produced them previously rather less than the indemnities they had to pay for breaches of treaty. The whole of this machinery was in his hands, for it was substantially of his own creation. He was the indispensable man, and he was their master. It must be confessed that he was rather a hard master. When the British force went towards Peking, Mr. Lay, the Chinese official, took service among the invaders of China; and in the discussions that preceded the treaty put exceedingly strong coercion upon his Mandarin masters. Lord Elgin more than once declared that he could not have obtained the treaty of Tien-tsin without the exertions of Mr. Lay. The Chinese put up with all this, and he was more absolute in favour than ever after this treaty had been wrung from his employers, in great part by his open and demonstrative interference. It is necessary to remind the public of these facts, for they explain, and to some extent account for, the grievous mistakes which he afterwards committed. He had trod very heavily upon the thin crust of Imperial favour, and it seemed to bear him; he now undertook to build upon it. There can be no doubt that when Prince Kung employed Mr. Lay to equip and commission a naval force to suppress the rebellion, the intention was that he should effect this service upon his own terms and conditions. There seems also to be as little doubt that Mr. Lay relied so entirely upon his personal influence with the Chinese that he neglected the precautions which any less confident man would have taken. If Lay had been as careful to get full powers from the Imperial Government as Osborn was to protect his men and officers in his engagement with Lay, the miscarriage of the expedition could never have taken place. It seems to us here, accustomed as we all are to see the Sovereign power absolute over the two services, that nothing more insulting to a monarch could ever have been inserted into an agreement than the clause by which Mr. Lay undertook to be the sole medium of commands from the Emperor to his admiral, and to suppress such orders as he should deem unreasonable. Yet it is possible that even this might have been conceded at the moment when the rebels were taking city after city, and when the treaty ports, with all their lucrative Custom-houses, seemed to be in danger. It is not only possible, but it is also highly probable that when the rebels were spreading northwards it would have been easy to obtain from the Imperial Government of Peking a commission which would have made Captain Osborn the High Admiral of all the naval forces of China, dependent for instructions upon no other than the Prince or the Great Council. But what can we think of the negotiator who, believing himself to have the power of exacting and of granting such terms, did not take care to have his own instructions worded in the language of the agreement, and the Imperial Commission confirmed with all formalities of seal and edict? What can we say of him, except that a man who has shown himself very able in one sphere often seems to lose his head when he steps out into a wider world of statesmanship? In these matters Mr. Lay appears to have acted with an almost Chinese closeness of counsel. No one in England who was urging on this expedition could have imagined that Mr. Lay was acting only upon a general authority and a loose letter of approval; and, certainly, no one who saw the gunboats sailing from these shores under the new flag of China could have imagined that there was not an Imperial Commission on board any one of the vessels.

Digitized by Google

These are the capital and obvious mistakes which have occasioned the miscarriage of the naval expedition to China. If the ordinary precaution of obtaining the commissions had been observed, Captain Osborn could have taken Nankin and cleared the Yang-tse, while he left Mr. Lay to debate the terms of the agreement at Peking. Having done this, he would certainly have been in a position to make provincial governors very chary of interfering with him, and he might have dictated his own terms to the Imperial Government. But without a commission from the Emperor of China Captain Osborn would have been a pirate. Nothing, indeed, could be more unselfish and chivalrous than the conduct of both these Englishmen when they found themselves in the false position into which Mr. Lay's too great confidence in his own personal influence had betrayed them. It was as grand in its way as the Balaklava charge; but it was also not the most expedient thing to do. Mr. Lay was clearly wrong, and the Chinese were right when they repudiated a portion of the contract he had made. No power which Mr. Lay has shown gave him authority to stipulate with Captain Osborn that all orders should pass through his hands. Whether he had authority to stipulate with Captain Osborn that the commander of the naval expedition should be placed under no superior, but should receive his orders direct from the Government, is very doubtful. It was quite right in Captain Osborn to insist upon such a stipulation; but it should have appeared in his commission, and should have come direct from the Regency. The Chinese, moreover, were not only right, but they were in a position to make full use of their advantages. Mr. Lay had organised the Customs in a most efficient manner, and he had, moreover, left at Peking an *alter ego* whom he had educated in all the learning of China. During Mr. Lay's absence in England the Chinese had discovered that they might rely upon the services of the subordinates if they disembarrassed themselves of the principal. Of course, they took advantage of this discovery. The fleet was no longer a necessity to their safety, and the Controller of Customs was no longer a necessary condition of their large revenue. With the unscrupulous selfishness of Asiatics, they repudiated all engagements except the merely pecuniary part of the transaction, and cast their agent and their admiral adrift. In all this there is much to be deplored. There is nothing, however, to be regretted in the firm and chivalrous conduct by which two Englishmen have, at the expense of fame and fortune, withdrawn themselves unsullied from a false position.

THE ATTACK ON KAGOSIMA.

(To the Editor of *The Times*.)

Sir,—I trust you will allow me to remark that the article in *The Times* of Wednesday on the subject of Mr. Buxton's motion is inaccurate as regards Mr. Longfield's motion. I allude to that portion of the article which says that "even if he may, as Admiral Kuper has in the case of Mr. Buxton, meet with a reasonable critic, who would impute to him only 'a misconception of the duty imposed upon him,' he will be certain to find some more savage foe pushing to the front, who, like Mr. Longfield, moves to make the censure short, sharp, and unconditional." I had the honour to second Mr. Longfield's motion, and neither his speech nor my remarks can possibly bear any such interpretation. I am not now going to discuss our Japanese policy, or the wisdom of the course pursued at Kagosima. But it is well known that if a diplomatist is embarked with a naval officer, even though the diplomatist be of inferior rank, the naval officer is bound to be guided by his judgment as to the adoption of coercive measures, and is in somewhat similar position to the military officer who, in this country, is requested to quell a riot after the Riot Act has been read by the civil magistrate. The whole course of Mr. Longfield's remarks went to exonerate Admiral Kuper, who has been most unjustly blamed by the country, and has been left undefended and unrewarded by the Government. The result of the debate was very satisfactory to Mr. Longfield and myself, for our amendment was adopted by the House, and all shadow of blame was thus removed from a gallant and absent officer.

I am, Sir, your obedient servant,
44, St. James's-place, Feb. 11. J. C. D. HAY.

Sir,—I have read with much surprise the condemnatory observations made by so many speakers in the House of Commons on the attack at Kagosima. They show little acquaintance with the fixed and unchangeable principles and tactics which must ever guide the practice of war, whether by sea or land. However anxious to do so, it is impossible to make the firing of shipping upon forts and batteries protecting towns and harbours so certain as not to permit many of the shot and shell to go over and fall into the town. In ninety-nine cases out of a hundred there will always be some motion, and the slightest motion will, of course, affect the aim from a ship's guns. To avoid the destruction of an enemy's property when no clear military object is to be gained by doing so, and to show the greatest kindness and allay in every possible way to his sufferings and feelings when helpless and in your power, will, I trust, ever be the principle which will guide every civilized, Christian nation.

To be merciful to the lives and property of the enemy at the expense of our own, or for the same reason to neglect opportunities of more readily attaining the objects of the war, would not be consistent with reason or common sense. Should it once be known that our commanders are not to fire on batteries for fear of injuring "houses of innocent people," those houses would soon be the receptacle of concealed troops, who would rush down upon our own men when landing to storm the very batteries upon which they were forbidden to fire. Do these gentlemen reflect upon the greater chances of failure and sacrifice of our men's lives, as well as the disgraceful results and injurious consequences to the interest and reputation of our country, such a system of warfare must entail? On foreign and distant stations the value of the lives of British soldiers and sailors is immeasurably increased by the difficulty of replacing them, and any morbid feeling of humanity to the enemy would be cruelty to our own men and destruction to the end and purpose of war. Will Continental nations refrain from besieging cities and towns for fear of burning the houses of innocent people? Can war be carried on with muffled gloves and buttons on the ends of our swords? Sir, your obedient servant,
Frant, Feb. 12. G. R. SARTORIUS, Admiral.

THE HONG KONG SHIPWRIGHT AND THE SHARPERS.—At the Westminster Police-court on Monday, Charles, *alias* Edward, Williams, Henry Eddon, and William Hope, all well dressed, who had refused to give any addresses, were charged with conspiracy and fraud. It appeared that Charles Adolphe Brandt, a Prussian, carrying on business as a shipbuilder at Hong Kong, and who arrived in London only a few days ago, was walking along the Strand on Saturday, when he was accosted by Eddon. The latter at first pretended that he was the master of a ship with whom he (prosecutor) was acquainted, and after getting into conversation with him pressed him to take a glass of wine. The other two prisoners, who affected to be strangers to Eddon, then came in, and, after talking about their rich relatives, a dispute arose as to the comparative strength of two of them. The prosecutor was asked by Eddon to be present when it was ascertained how many yards Hope could throw a 14lb. weight. He accompanied them to a place named at Chelsea, where he was inveigled into a skittle-alley. There they pretended to lay large wagers, and the usual well known artifices of skittle-sharpers were resorted to. The result was that the prosecutor was induced to part with £20, and then stake his gold watch and chain, value £24, and £6 in gold on another wager. It was undecided when the stakeholder, a person pretending to be the landlord of the Princess of Denmark beershop, New-road, Chelsea, gave the watch and money to Hope, alleging that he had won them. The pretended landlord then affected to advance the value of the watch to Hope, in order that the prosecutor might not lose it. He accompanied the latter to his lodgings to get the £24, which was paid in foreign coin. Hope then offered to lay a wager of £500 or £1,000, to be decided on the Monday, and ultimately the parties all agreed to meet again at the Duke of York's Column on that day between two and four o'clock. The prosecutor was proceeding from the beershop, when he was assaulted, and an attempt was made to steal his watch by some person unknown. On Monday morning he communicated with the police, and the prisoners were captured near the appointed place. John Shaw, 11 F, a detective who apprehended the prisoners, said he knew them all as constant and daily companions of each other, and as skittle-sharpers. He found an imitation gold chain, with a piece of paper at the end of it instead of a watch, fifty-six medals to imitate sovereigns, and two flash imitation Bank of England notes on the prisoners. Hope, on his way to the station, asked witness whether £10 in his pocket would not be better than proceeding with this prosecution, and one of the others added that it was not as if they had robbed a poor man who could not afford it. The prisoners said they had treated the prosecutor very much like gentlemen, for he had bills about him to the amount of £60,000, which they might have induced him to lose by play, and that he had described himself as a man of large property. He had said that he was about to be married at Hong Kong to a young woman with a large estate of her own. Mr. Selfe having told them that he must have their addresses, they very reluctantly gave some. They were remanded until Monday, and Mr. Selfe said he must have good sureties in £100 each for their re-appearance, with 24 hours' notice of bail.

THE FRENCH IN COCHIN-CHINA.—The following is from a Paris paper:—Admiral de la Grandiere, Governor of Cochin-China, has founded a newspaper at Saigon, the capital, by a decree, in which he says that, considering French Cochin-China is little or erroneously known in France and in the neighbouring colonies; that inaccurate information given by ill-informed newspapers may injure the true interests and the development of the colony, the best mode of inspiring merchants and manufacturer, with confidence is to inform them of the numerous resources possessed by Lower Cochin-China. The Governor further announces that an officials political, and commercial newspaper shall appear on the 10th and 25th of each month from the 1st of January, 1864. It is to publish official announcements, leading articles on the resources of the country, on the commercial and agricultural questions connected with them, and the price of articles to be exported. The editor will thankfully receive all articles signed by the contributor, which shall appear to be of advantage to the paper, and all other useful communications addressed to him. The decree founding the paper is followed by three additional decrees, and three notes emanating from the administration of the colony. The first decree fixes he indemnity to be paid to Asiatics summoned to give evidence. The second opens an annual credit of 5,000 fr., granted to the Governor for secret service money, and the third permits the exportation of rice from the 1st of January. The first two administrative notes refer to the perpetual rent representing the part of the land tax to be paid by the purchasers of lands and the formalities to be fulfilled by those who propose to build on their land. The third note states that the Treasury had received a sum or 277f. 50c. restitution money of which it had been robbed. It was restored through Consignor Lefebre, Vicar-General of Cochin-China. The leading article explains the object of the publication, and proposes to make known to France a country of which it is ignorant, and further to explain to the colonists themselves the resources of the soil, which have never been developed; to contradict the assertion of insalubrity, greatly exaggerated; to enlighten the native population as to the intentions of the French in coming to the remote East; to explain the Emperor's views, and thus to reassure capitalists by demanding their co-operation. This article is followed by another on the rice trade; next, a notice to navigators on a shoal situated between Manilla and Saigon; on the postage payable on letters, the price of merchandise, exchange on London, Hong Kong, and Singapore. The first number of the newspaper was published on the 1st of January last.

TRIAL TRIP OF THE S. S. "COHEN."—This large screw steamer, recently launched by the Messrs. Gourlay, took her trial trip in the river with the triumphant result that she was then proved to be the fastest steamer that ever sailed the Tay. The *Cohen* has been built for J. Cohen, Esq., merchant, Moulmein, and is intended, we believe, for the India and China trade. Her length is 240 feet; her breadth of beam 27 feet; and her depth 16 feet. She is of 774 tons burden O.M., and 200-horse power; barque rigged, with full poop, top gallant forecastle, and lengthy deck house. To suit the warm climate in which she is destined to sail, her deck has been made of solid teak, and her cabin of the same—the latter highly polished. By twelve o'clock a select party had arrived on board, among whom were R. A. Robinson, Esq., from London (formerly of the firm of Robinson and Russell, shipbuilders, Blackwall), the representative of the owner; and J. Z. Kay, Esq.,

Digitized by Google

Dundee Local Engineer and Examiner in Steam to the Board of Trade. Mr. Henry Gourlay, for the builders, was also present; and superintended the trials of speed. The vessel started down the river about half-past twelve o'clock, and ran to opposite Barry lighthouse—the high sea rendering it inexpedient for trial purposes to run her further out. She made the run down to this point and back three times—the log being in active use on every occasion—and her sailing powers thus tested, were shown to be of the very highest order. She ran the measured mile the first time against a strong tide in 5 minutes 48 seconds; and in returning with the tide, she passed the posts in 3 minutes 32 seconds! On her second voyage, she ran about much the same speed; but on returning to the offing for the last time, she ran the nautical mile in 3 minutes 13 seconds! This last performance gives a speed of 17 nautical or about 21 statute miles an hour!—and that, too, with the screw not fully immersed in the water, the vessel not being in proper sailing trim. This is a rate of speed equal to that of the Queen's yacht, and fully equal to that of any screw we ever heard of belonging to an unsubsidised company, and constructed for carrying purposes.

CHINESE FUNERAL IN AUSTRALIA.—The mortal remains of Mr. Long Yong, a Chinese merchant, lately resident at the camp, Spring Creek, were interred, with much ceremony, in the Beechworth cemetery. Mr. Long Yong carried on business both at Castlemaine and Melbourne, as well as at Beechworth, and bore a high character amongst his own countrymen and also was held in estimation by all Europeans with whom mercantile transactions brought him into contact. The deceased, a few hours before his death, sent messengers to Mr. Tsze Hing, the Chinese interpreter, requesting that his funeral should be on a grand scale, and as soon as death ensued that gentleman took measures to carry the wishes of the deceased into effect. The procession was headed by a buggy, containing three or four celestials, whom we presume to have been priests, as they took a very active part at the grave. Next came the hearse, ornamented with plumes and drawn by four horses, and then a long line of from 15 to 20 buggies, filled with Chinese. The rear of the procession was brought up by a large number of horsemen, and as it wound slowly through the streets of the borough was calculated to arrest the attention of Europeans from its singularity, as, in place of the black habiliments of woe to which we are accustomed, the whole of the followers, with the exception of the undertaker, were dressed in white and wore white hat-bands. At the cemetery a large number of our townspeople assembled, led thither by curiosity or other motives, to witness the celebration of the funereal riets. The usual celestial ceremonies were duly observed; a fowl, backed by a large piece of pork, and teapot and cups were produced, and, so far as we could make out, were supposed to be devoted to the use of the deceased on his lonely journey, and a quantity of papers that were to us as incomprehensible in their nature as Egyptian hieroglyphics were burnt, as also many tapers. The head board, marked over with a number of Chinese characters, which, it seemed, made known the name and virtues of the departed, was smeared over with the red colouring matter from the outside of the tapers, and then, at a given signal, the white hat-bands were taken off by the Chinese and consigned to the care of the undertaker. A bottle of pale brandy was uncorked and moderately partaken of by the Chinese, and a bottle of the same spirit was placed at the disposal of the sexton. Silver coins were then distributed to a few who were chief mourners (some ladies amongst them), and the ceremony was concluded.

THE MATE OF THE "FLOWERY LAND."—To the Editor of *The Times*.—Sir,—Will you permit me to bespeak the sympathy of your readers for William Taffir, the second mate of the *Flowery Land*? The admirable tact and marvellous fortitude he has evinced in bringing to justice the perpetrators of a series of the most barbarous murders of modern times must be too well known to require further comment. Taffir, who is an intelligent young man, is suffering so much from the terrible ordeal through which he has passed as to be for the present quite unfit to pursue his professional avocations. During the time which elapsed between the murders of the captain, his brother, and the first mate, and the landing of the crew at the entrance of the River Plate—nearly a month—Taffir may be said to have stood face to face with death. But for his energy and activity the seven pirates who are about to expiate their crimes on the scaffold must have escaped, to perpetrate further atrocities, in all probability, when the occasion offered. Taffir, who is destitute of means, has no claim upon the owners of the *Flowery Land*, nor, it would seem, upon the Executive. He has received his wages up to the time of the loss of the ship, and for the time he was engaged in giving his evidence the Government has remunerated him after the rate of his former pay—namely, £4 per month. But, having regard to the services he has performed in the cause of public justice, to the terrible sufferings he has undergone, and to his failing health consequent upon them, I think it will be admitted that he has a claim upon public sympathy which should be recognised in a substantial manner. I have, therefore, undertaken to receive subscriptions on behalf of Taffir, in the hope of enabling him to secure the quiet repose necessary to recruit his shattered health, and ultimately to return to the merchant service an able and efficient officer, to which service I have no doubt he will always do credit.—I am, Sir, your most obedient servant, WILLIAM MITCHELL, *Shipping Gazette Office*.

THE "FLOWERY LAND."—A subscription is on foot for the second mate, William Taffer, of this vessel. He has, in a letter to *The Time* made the following statements:—"I never was intoxicated on board the *Flowery Land*, and I have my characters to show that I am and always have been a sober man. Had I been drunk at that time we should all have been drowned, for the boats were nearly drawn down with the ship by the eddy, and had I not prevailed upon the men to pull the boat out of the eddy we must have been sucked down, as they appeared quite ignorant of the danger. It is even wrong in stating that the whole of the men were drunk, as most of them were very sober men—particularly the Manilla men. There was no short allowance of either food or water, as we had been out thirty-two days, and she was provisioned for six months, and as far as sharing any rations with them, I never had any rations shared out, as I always had my mess in the cabin with the captain, his brother, and mate. As to the men who have been reprieved I will not say a word; but as to those five who have suffered this morning they were the greatest villains that ever lived, and all were guilty of the crime for which they have been executed."

THE NEW YORK STEAMER CHALLENGE.—The ship or steamer race offered by Government to one of our East India merchants will not come off. The merchant owner builds steamers to make money, and not for show. He asks $12,000 a day for his steamer, and then he is willing to let her race for a year, or longer. Government has no money to spend in races, and the merchants will not make up the needful. Despatches have been sent to our consuls abroad to communicate with the rebel Semmes, and to offer him the freedom of every American port and a free pardon, if he will bring the steamer *Alabama* into New York harbour, and sail a race with the Federal steamer *Eutaw*. If Semmes wins, he is to be paid $50,000 for the trouble, and the *Alabama* allowed to depart. If he loses, he is to give a certificate to that effect, and also sign a letter endorsing old Welles as the greatest naval secretary the world has ever seen. Such certificate Mr. Lincoln thinks will go far to mitigate the intense hate and contempt felt by the masses of the people, and particularly the large shipping merchants, towards the Navy Department and its white-headed secretary. We have a great fleet of vessels of war, steamers, gunboats, *Monitors*, &c. Of what possible use are they? We can't catch Semmes, and we have no war with any nation that has vessels and cargoes to pick up and rob.

EXECUTION OF THE "FLOWERY LAND" PIRATES.—On the 22nd inst. five of the seven pirates recently convicted at the Central Criminal Court of the murder of the captain of the ship *Flowery Land*, on the high seas, within the jurisdiction of the Admiralty of England, in September last, were hanged in front of the prison of Newgate, in the presence of an immense concourse of people. The five were—John Leone, or Lyons, 22 years of age; Francisco Blanco, 23; Ambrosio or Mauricio Duranno, 25; Marcus Vartos, otherwise Watto, 23; and Miguel Lopez, otherwise Joseph Chancis, and sometimes called "the Catalan," 22. Basilio de los Santos and Marsolino, who had been convicted with them, were reprieved on Friday evening, so that the lives of these two men have been spared. The whole of the convicts were natives of Manila, except Watto, who was a Levantine.

BARNUM FOR CHINA.—No one would have dreamed that a civil war was raging could he have jammed into the Academy of Music last night, when 5,000 persons in masks and grotesque costumes were assembled at the Arion Ball. Blondin was present, and at midnight walked the tight rope. A nephew of Barnum left yesterday for China. The object of his mission is to procure a regular file of a Chinese newspaper, that Barnum has been informed has been printed on silk at Peking for a thousand years. As literature it will pay no duty, and silk does. Barnum will exhibit the file at the Museum (if he gets it), and afterwards sell the silk to Arnold and Constable. Barnum is getting old, but he will be idolised to the last, and will humbug the people to the last hour of his existence. There are doubts now whether Barnum is for war or for peace.

RETURN OF M. SIMON FROM CHINA.—M. Eugene Simon has returned to Paris from China, after having accomplished a mission intrusted to him by the Emperor. He has brought with him a flock of Chinese sheep, called *ongti*, consisting of two rams and twenty-two ewes, remarkable for their fecundity. This flock is a present made by the French residents of Shanghai to the Zoological Society in the Bois de Boulogne. Fifty per cent. of these ewes produce lambs twice a year, and three at a birth; twenty per cent. produce two at a time twice a year. These sheep are of the middle size, and resemble the Southdown. Their wool, though long, is very inferior to that of the Merinos. It is proposed to send French sheep to Suez to be exchanged with masters of ships coming from China for Chinese sheep.

PARSEE MUNIFICENCE.—Mr. Sorabjee Pestonjee (of the firm of S. P. Framjee and Co., London) has given one lac of rupees to found a Fellowship in the Bombay University to be called "Framjee Cowasjee Fellowship." There is an amount of 1,75,000 rupees also collected to found a Canning Fellowship, open for competition for all Universities of India, of which Mr. Dadabhai Naoroji, of London and Liverpool, has subscribed 50,000 rupees, and Mr. C. N. Cama, of Bombay, 25,000, and others sums of not less than 5,000 rupees each. Government has been asked to give equal aid, which, if obtained, will make the F. C. Fellowship of 250 rupees per month tenable for five years, and the "Canning" 300 rupees a month for the same period. One fellowship to be awarded every year.

THE ANNAMITE AMBASSADORS.—The Annamite Ambassadors, who quitted Valentia in the beginning of December to return to Cochin-China, did not arrive at Alexandria until the 27th January, after having been forced by stress of weather to seek shelter in the ports of Genoa, Civita Vecchia, and Messina. The Ambassadors embarked at Suez on the 29th January, on board the transport *Japon*, which was placed at their disposal by the French Government to convey them to their own country. They appeared to be perfectly satisfied with the accommodation prepared for them.

THE INDIAN MUTINY FUND.—The balance-sheet of the accounts of the fund for the relief of the sufferers by the mutiny in India for the past year, shows that the receipts for that period were £226,688, and the payments £16,578, leaving a balance of £210,110. In the year 1863 the sum of £385. 8s. 4d. has been added to the annual disbursements by the grant of allowances to 38 relatives of sufferers by the mutiny, while, during the year. 67 persons, receiving in the aggregate £789. 4s. per annum, have ceased to be pensioners on the fund. There are still 1,280 recipients on the books of the fund.

Naval and Military.

Admiral Sir James Stirling, formerly on the China station, has declined to be "shelved" on the retired list, which would have been the case had he accepted the service pension lately held by Admiral Mends. The flow of promotion, however, has not been impeded by the circumstance, as Admiral the Hon. Sir Montagu Stopford has accepted the £150 per annum, and consequently has ceased to be a candidate for further active employment.

The screw steamship Princess Royal, 84, Capt. Jones, at Plymouth, will shortly be ready to depart for the Cape of Good Hope to take the place of the Narcissus. Rear-Admiral George St. Vincent King has hoisted his flag, white at the mizen, on board. He immediately saluted the flag

Digitized by Google

of the Port Admiral, which was duly acknowledged by the Royal Adelaide. Rear-Admiral George St. Vincent King, C.B., will now be styled commander-in-chief of the East India and Cape of Good Hope station. The following appointments have been made to this vessel:—Captain: W. G. Jones. Commander: Alexander Buller. Lieutenants: George W. Carter, Thomas Royes, George Rivington, Lord Walter Kerr, and Francis W. Lowther, H. W. Dowding and W. C. J. Blount. Sub-Lieutenant: Thomas E. Miller. Master: William T. Hains. Second Master: Thomas L. Mourilyan. Midshipmen: Arthur A. Duffield, Henry A. Baring, Alexander Cochran, Gerald C. Langley, Richard F. Meade, Dudley C. Stuart, Edward Beauchamp, John Durnfold, Ronald M. Hall, and Lionel Fanshawe. Chaplain: Rev. H. E. Yeoman. Naval Instructor: J. W. Lawley. Naval Cadets: Gordon Glennie and E. C. Moore. Surgeon: Francis Y. Toms. Paymaster: James F. Phillips. Assistant-Surgeons: Robert Hague, M.D., and Alexander Goodall, M.D. (acting). Assistant-Paymasters: Francis P. Lyne and John S. Scriven. Clerks: Charles F. Graham, and Edward T. Dixon. Assistant-Clerk: Robert C. Bates. Master's Assistants: Augustus Fane and David A. Canning. Chief Engineer: E. Boulton. Assistant-Engineers: Aaron Symes and R. T. Rundle. Lieutenant R. H. D. King is appointed Flag-Lieutenant, and Mr. Penfold, Paymaster, R.N., secretary to Rear-Admiral King.

In the new navy estimates, just published, the sum of £55,438 will be required to be voted for carrying out the different works now in progress for the enlargement and extension of Chatham dockyard during the ensuing year, which amount is exclusive of the sum required for the ordinary operations connected with the dockyard. The formation of the new basins, docks, factories, and other buildings intended to be constructed at Chatham, the whole covering an additional space of 300 acres, will involve an outlay of £815,000 beyond the sums already expended; but the sum of £27,000 only is taken in the estimates for the ensuing year. From this it appears that the work will be spread over a number of years. On the occasion of the recent visit of the Lords of the Admiralty to Chatham, it was decided to erect more powerful and costly machinery for carrying on the works connected with the building of the iron and iron-clad ships, and accordingly a sum of £16,318 is taken in the estimates for new machinery, exclusive of £1,500 for improved machinery in the ropemaking department of the establishment. There is also an item of £1,090 for preparing the foundations for the new machinery, and the sum of £900 will be required for the new 25 ton crane which the Lords of the Admiralty directed to be placed between Nos. 3 and 4 docks. The expense of dredging and clearing the harbour of mud is again large, the sum of £1,500 being required for that work during the year. There is a decrease in the number of established workmen, the number being 1,467, against 1,544 last year.

EXPORTS FROM CHINA.

(Chinese Commercial Guide.)

Alum, aniseed stars, oil of aniseed, apricot seeds or almonds, arsenic, artificial flowers, bamboo ware, beans and peas, bone and horn ware, borax, brass foil or tinsel, brass buttons, camphor, canes, cantharides, capoor cutchery, carpets and druggets, cassia, cassia oil, cassia twigs, cassia buds, cassia fistula, castor oil, chestnuts, china-root, chinaware, cinnabar, clothing, copper cash, copper ore, China spelter, copperas, cotton rags, crackers and fireworks, cubebs, curiosities, dyestuffs, dates, eggs, fans, felt cuttings, fishlines, furniture, galangal, garlic, glass, glass beads, gold, ground-nuts, gypsum, grass cloth, hair, hams, hartall, hemp, honey, ivory-ware, India ink, indigo, joss-sticks, kittysols, lackered-ware, lampwicks, lead (red and white), leather articles, lichees, lily flowers, liquorice, lung-ngan, manure-cakes, marble slabs, matting, mats, melon seeds, mother-o'-pearl ware, mushrooms, musk, musk seed, nankeen, nut-galls, oil (bean oil, tea, wood, cotton seed, mien yu, sesamum, ground-nut, olive, cabbage or rape, fish, &c.), oiled paper, olives, oyster shell, paints, palampores, paper, pearls, peel-orange, peppermint oil, pictures, oil paintings, pottery, rattans, rattan-ware, rhubarb, rice, rouge, rugs, hair, samshoo, salt, sandalwood-ware, sea shells, seaweed, seasum deed, shoes. Silk: under this head are—Nankin raw, Canton raw, refuse, firganzine or thrown, sz'cheun yellow, sz'cheun kwang sz', reeled from supions, tung kung sz'; wild raw silk, ye tsan sz'; cocoons, tsan kwan; soss, jung; tassels, wei sien; silk and cotton mixtures, sz' mien, and oz' mau chau; ribbons, sz' tai, and lan kan kwei tai; thread, sz' sien; satin, sz' twan crape, tsau sha; gauze, sha; lustring, kinen; pongee, chau; velvet, tsien jung; crape shawls, tsau-sha tah poh kin. Silver and gold ware, soy, straw braid, sugar, sugar candy, tallow, tinfoil. Tea: under this heading are—Fychow, Pingshui, Twankay or Tun kai, Oonam, Oopack, Pekoe, Hyson, Congou or Kong-hu, Hai-mei, Tsan-tun kiai, Tai Shan, Souchong or Sian-chung, Caper, Ankoi Souchong, Plain Orange Pekoe or Shanghiang, Oolung, Hungmuey or Hung-mei, Young Hyson, Hyson skin or Picha, Twankay, Scented Orange Pekoe, &c. Tobacco, tortoise sheel, trunks, turmeric, turnips, twine, varnish, vermicelli, vermilion, wax, wood, wool.

Monetary and Commercial.

The Messageries Imperiales mail steamer *Moeris* left on the 19th instant, with 46 passengers, 910 packages of merchandise, and £171,200 in specie for India and China; and 47 passengers, 729 packages of merchandise, and £200,000 in specie for Alexandria.

With regard to American steam navigation and Government subsidies, the subjoined paragraph appears in the *New York Journal of Commerce*:—

"The Chamber of Commerce some time ago appointed a special committee to prepare a report and memorial to Congress upon the subject of granting subsidies to certain ocean steam lines. They have given the subject a careful and laborious consideration, and have prepared a report which will probably make about 50 printed octavo pages, presenting a complete history of the Government subsidies to steam lines all over the world, and showing the effect of the policy in commerce. Accompanying this formidable statistical document is a brief memorial recommending that annual appropriations be made to the proposed American steam lines from San Francisco to China, from New York to Rio, and from New York to Liverpool. The report and the memorial will be submitted to the Chamber at the regular monthly meeting next Thursday. The general question of subsidies for steam lines is now before the Senate Committee on Commerce, who are reported to be strongly in favour of it. The Chamber have on former occasions exerted themselves to procure subsidies for steam lines. Last year they made an effort to effect such an arrangement for the San Francisco and China line, and succeeded in getting a bill through one branch, but could not get it through the other."

The Agra and United Service Bank have declared the usual dividend, at the rate of £10 per cent. per annum, for the six months ended the 31st of December, with a bonus of £4 per share, making altogether 18 per cent. for the past year; and, in consequence of the increased business of the bank, they have raised the reserved fund to £225,000.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were to Calcutta, £160,000; to Bombay, £120,000; and to Madras, £20,000. The minimum price declared was as before, 1s. 11⅛d. per rupee on Calcutta and Madras, and 1s. 11⅜d. on Bombay. The application within the limits amounted to £1,870,000. Tenders on Calcutta, at 1s. 11⅛d., will receive about 80 per cent.; on Bombay, at 2s. 0⅛d., about 21 per cent.; on Madras at 2s., about 63 per cent., and all above these prices in full. On the 3rd inst., when the amount offered was £400,000, the lowest rate accepted was 2s. 0⅛d. on Calcutta, Bombay, and Madras.

The ordinary general meeting of the Oriental and General Marine Insurance Company was held on the 25th inst. at the London Tavern; Mr. Mocatta in the chair. A dividend at the rate of 5 per cent. was declared, the chairman intimating that they were in a position to divide a larger sum, but they deemed it prudent not to do so. A much larger dividend might be expected for the next year. The report will be found in our last page.

The annual meeting of the Oriental and General Marine Insurance Company is to be held on the 25th inst. The report to be issued to the shareholders states that after payment of all claims for losses, averages, and all other expenses, to the 31st December last, there remains a balance of £67,274. 16s. on insurance and interest accounts. The directors recommend that £3,339. 5s. be applied in payment of interest on capital, being at the rate of £5 per cent., leaving £63,935. 11s. to be carried forward.

A prospectus has been issued of the British and Californian Banking Company with a capital of £2,000,000 (one-half to be first put forth) in shares of £50. The undertaking is introduced by the London Financial Association, and the board of direction is principally composed of established London banks. The chief point urged in favour of the project is that California is already brought by telegraph within ten days of Europe, and that on the completion of the Great Pacific Railway, now under construction, the transit for passengers and goods from New York to San Francisco will occupy only six days, when the latter port is likely to become an important depot for the trade to China, Japan, and other parts of the East.

The half-yearly meetings of the London joint-stock banks are now concluded, and in every instance they exhibit a degree of prosperity little looked for even by the most sanguine advocates of this class of enterprise. Their profits continue to increase, and the public confidence is clearly shown, not only by the high value of their shares in the market, but by the constantly augmenting amount of the deposits left in their care. Ten years ago the six joint-stock banks then existing held only £22,000,000, while now their number has doubled (including the Consolidated, with which the private firms of Messrs. Heywood, Kennard, and Co., and Messrs. Hankey and Co. have amalgamated), and their deposits reach the enormous amount of nearly £71,800,000; and this without reckoning the Agra and United Service Bank, formerly devoted exclusively to Indian banking, but now doing a large and profitable London business.

The Stock Exchange Committee have appointed a special settling day in the shares of the Hong Kong and China Gas Company (Limited), which are to be officially marked.

The Trade and Navigation Returns for the month of December, 1863, and for the year ending the 31st December last, have at length made their appearance. The returns for the month in question are always subject to delay, on account of the necessity of affording time for the making up of the landing

Digitized by Google

accounts of all cargoes appertaining to the year. The total value of the exports of British and Irish produce for the year is £146,489,768, against £123,992,264 for the year 1862, and £125,102,814 for the year 1861, so that there is an increase of more than 18 per cent. over 1862, and of just above 17 per cent. over 1861. The exports to the Far East for the month of December last, and the three last years, were as follows :—

CHINA.—Cotton Yarn: 56,678 lbs. in December last; the quantity for the year being 2,060,862 lbs., against 3,214,059 lbs. in 1862, an 6,733,914 lbs. in 1861. The value is £221,197 for the year against £183,963 in 1862, and £307,238 in 1861. Cotton Manufactures: 3,470,068 yards in the month of December; and 46,477,529 yards in the year 1863, compared with 80,696,465 in 1862, and 243,654,141 in the year before; the value for the years 1863, 1862, and 1861 being respectively £1,163,984, £1,269,998, and £3,177,048. Woollen and Worsted Manufactures: For the month of December last the export was 94,813 yards; and for the three years respectively, 1,613,005 yards in 1863, 2,037,448 yards in 1862, and 2,884,224 yards in 1861. The value for the month was £17,030, and for the years—in 1863, £296,669; 1862, £254,681; and 1861, £360,528. Worsted Stuffs: For the month of December, 1,057,567 yards; for the years 1863, 1862, and 1861 respectively, 9,238,611, 8,398,271, and 4,704,056 yards. The value was £69,318 for the month, and £650,335 for the year 1863, against £415,756 in 1862, and £350,155 in 1861. Lead: Export for the month, 1,099 tons, and for the year 14,556 tons; that for the years 1862 and 1861 was 9,977 and 5,644 tons. The value for the three years respectively was, 1863, £310,181; 1862, £213,756; and 1861, £122,788.

SINGAPORE—Cotton Yarn: The export for the month of December was 77,300 lbs., and for the years 1863, 1862, and 1861 respectively, 2,011,936, 1,593,371, and 1,660,387 lbs., the value for the month being £10,186, and for the years respectively, £213,231, £99,389, and £96,798. Cotton Manufactures: The quantity for the month was 4,091,218 yards; and for the year, 29,059,153 yards against 32,726,886 yards in 1862, and 44,381,991 yards in 1861. The value for the month was £105,719; and for the years 1863, 1862, and 1851 respectively, the value was £701,548, £567,488, and £616,189.

PHILIPPINE ISLANDS—Cotton Manufactures: The export for the month is 1 005,956 yards; and for the year 1863, 14,256,429 yards, against 14,338,218 yards in 1862, and 34,421,490 yards in 1861. The value for the month is £26,705; and for the three years, respectively, beginning with 1863, £351,096, £294,510, and £596,219.

JAVA.—Cotton Manufactures: The export to this island for the month of December last was 2,176,510 yards, and for the year 1863, 16,165,927 yards, against 26,322,463 yards in 1862, and 48,147,358 yards in 1861. The value for the month was £64,055; and the value for the years 1863, 1862, and 1861 respectively was £411,389, £496,180, and £758,401.

The declared value of British and Irish produce and manufactures exported from the United Kingdom to the countries and ports hereinafter mentioned was as follows, for the months and years named :—

	November, 1863.	December, 1863.
China (exclusive of Hong Kong) ..	£162,560	£213,472
Hong Kong	181,151	126,391
Singapore and the Eastern Straits ..	172,644	179,477
Dutch Possessions in India	75,872	86,458
Portuguese Possessions in India ..	7,211	—
Philippine Islands	16,616	39,412
Japan	2,894	32,477

	1861.	1862.	1863.
China (exclusive of Hong Kong)	£3,114,694	£2,024,118	£2,412,958
Hong Kong	1,733,963	1,113,224	1,473,431
Singapore and the E. Straits ..	1,027,384	1,064,681	1,486,813
Dutch Possessions in India ..	1,091,511	776,564	652,025
Portuguese Possessions in India	6,647	—	7,211
Philippine Islands	784,564	458,404	556,863
Japan	43,100	21	108,897
Labuan	1,217	4,694	—
Siam	35,979	21,907	11,958
Cochin China, Cambogia, and Tonquin	—	247	36,597

The annexed circular has been forwarded to the shareholders of the Labuan Coal Company (Limited) :—

I am desired by the directors of this company to forward for your perusal the annexed extracts from Mr. Sinclair's correspondence and reports, and also to inform you that the general tenour of the advices from the mines since the issue of the circular from this office of the 9th November last has been good, and quite equal to their expectations. The steamer *Stirling*, after having undergone an overhauling at Singapore after her passage out, arrived finally at Labuan on the 23rd December, and, according to the last accounts, was loading, and expected to leave the latter port for Hong Kong with her first cargo on the 1st Jan. The directors look with confidence to the services this vessel will render, and estimate that she will perform an average annual number of at least eighteen runs to the various ports enumerated in her charter-party, her capacity enabling her to discharge about 1,000 tons each time. A total quantity of about 1,700 tons of coal had been delivered in Hong Kong and Singapore, under contract, by sailing vessels chartered by the company's agents in Singapore for the purpose. While the progress abroad has been favourable, the interests of the company have been substantially advanced in this country by the consent of the Secretary of State for the Colonies to grant a lease of the mines upon the terms originally agreed upon, to which effect is now being given by the Commissioners of the Emigration Board, with whom the solicitors of the company are engaged in settling the details. I have much pleasure in adding that the directors have received intimation from the Lords Commissioners of the Admiralty of their lordships' intention to have Her Majesty's ships on the China station coaled as much as possible at Labuan, affording satisfactory proof thereby of their full reliance in the quality of the coal, and its fitness for steam purposes.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 20th inst., was, in gold to Gibraltar, £1,500; to Alexandria, £24,830; to Galle, £2,000; to Madras, £3,336; to Calcutta, £65; to Singapore, £720. In silver: to Madras, £4,040; to Penang, £660; to Singapore, £2,200; to Hong Kong, £8,150; to Shanghai, £22,360. Total in gold, £32,451; in silver, £37,410.

ARTICLES OF IMPORT.

TEA.—We are still unable to notice any improvement in the state of our market. The imports have been far in excess of the wants of the trade, and only a very limited proportion has found buyers, and prices for most descriptions continue much depressed, with a tendency in favour of buyers. Low and dusty kinds of Congou have been offered freely at public sale, without reserve, and sold irregularly, but establishing a decline of ½d. per lb. Good common have been sold to a limited extent from 1s. to 1s. ½d. per lb. Flavoury kinds from 1s. 4d. to 1s. 8d. per lb. have been in full supply, and sales have been effected with great difficulty, and prices must be quoted about 1d. per lb. lower. Good Kaisow kinds have been in better request at former rates. Common to fair black-leaf kinds have sold at public sale from 11½d. to 1s. per lb. Grades ranging from 1s. 2d. to 1s. 5d. have met but little demand. Prices for second-class Monings and Wopaks have given way about 1d. per lb. Fine to finest, also Kaisows of similar quality, maintain fully former value, with, however, only a moderate business doing. Tayshans show no alteration. Oolongs, Souchongs, and Flavoury Pekoes remain much as before. Common Scented Capers have been inquired for, as also the fair to good and fine kinds with strength, and prices show no material alteration. Foochow-make of Orange Pekoes have sold at former prices, but Canton-make continue in very limited demand. Uncoloured Japan kinds have been taken to a fair extent for export at former prices. The public sales of Indian tea continue to go off briskly at full prices. Green teas have been in active demand; some considerable purchases have been made of common Gunpowders and Young Hysons at prices showing an advance of 1½d. to 2d. per lb., whilst the good to fine kinds of both, from recent arrivals, have been freely taken at an advance of 1d. to 2d. per lb. Hysons have in some degree participated in the movement. Imperials continue very scarce. Common Twankays remain dull of sale, but good qualities show some improvement; the finer kinds of Canton-made Young Hyson and Gunpowder have been saleable at fully 1d. to 2d. per lb. higher prices, but the common to fair descriptions, however, continue neglected.

At the public sales on the 16th 45,691 packages were offered, and 23,732 sold, of which 20,927 were without reserve. The following is a list of the sales :—2,691 chests, 3,895 half-chests Congou, 7¼d. to 1s.; 3,253 chests, 1,078 half-chests Congou, 1s. to 1s. 6d; 424 chests, 53 half-chests Congou, 1s. 6d. to 2s. 4d.; 1,169 packages sea-damaged Tea, 2d. to 10½d.; 1,049 boxes Scented Caper, 7¼d. to 1s. 2¾d.; 1,254 boxes Congou, 1s. 1d. to 1s. 9¾d.; 5 half-chests Souchong Congou, 1s. 4d.; 181 half-chests, 64 boxes Hyson, 7d. to 1s. 10d.; 519 half-chests, 575 chests, 381 boxes Souchong, 10¼d. to 1s. 8½d.; 64 half-chests Japan Oolong, 8¾d. to 9½d.; 2 boxes, 88 half-chests Imperial, 6¾d. to 1s. 9d.; 99 half chests, 1,725 boxes Gunpowder, 9d. to 2s. 2½d.; 6 chests Coocheela Tea, 1s. 2d.; 705 chests Flowery Pekoe, 10½d. to 5s.; 211 half chests Japan Tea, 11d. to 1s. 2d. to 1s 3½d.; 396 boxes, 15 chests, 415 half-chests Oolong, 9½d. to 1s. 6d.; 131 half-chests Hyson skin, 6½d. to 8d.; 2,352 boxes Scented Orange Pekoe, 8½d. to 1s. 4¾d.; 85 half-chests Orange Pekoe, 8½d. to 10d.; 529 half-chests, 236 boxes Young Hyson, 8d. to 2s. 0½d.; 21 chests Java Twankay, 6½d. to 7d.; and 88 half-chests Twankay, 7½d. to 9d.

SILK.—The tone of the Silk Market has not improved since last mail, still the disposition shown by some importers to meet the market has produced a considerable aggregate of business during the fortnight, Japan silk perhaps attracting more attention than China silk. Our quotations generally show a further trifling reduction. Deliveries from 1st to 24th inclusive:—China, 2,204 bales; Japan, 1,387 bales; total, 3,591 bales. Quotation: Tsatlee, No. 1, 22s. 6d. to 23s. 6d.; No. 3, 20s. 6d. to 21s. Japan: Mibash, No. 1, 22s. 6d. to 23s.

COTTON.—The latest sales comprise 500 bales American, 26½d. to 27¾d.; 50 Pernam, &c., 27d.: 20 Maranham, 27d.; 110 Maceio and Bahai, 26d.; 500 Egyptian, 26¼d. to 34d.; 200 Smyrna, 23¾d. to 25½d.; 4,620 Surat, 12d. to 23d.: China, 19¾d to 19½d.; Japan, 20½d. to 21¾d. The market very firm.

SUGAR.—Considerable business has been done, and rates are maintained owing to an anticipated reduction in the duty. Clayed Manila sales at 41s. 6d.

Digitized by Google

RICE.—There is no change to observe in this market, which remains quiet. About 15,000 bags have been sold privately. Middling Nakrenzie, 9s. 6d., and Rangoon 8s. 10½d. (cash); also a cargo of 800 tons Nakrenzie, for spring shipment, at 10s. 6d., and one of 1,060 tons old crop (floating), at 10s.

PEPPER.—The demand is less active; at public sale, the sound part of 909 bags Black Singapore was withdrawn, but afterwards sold at 3⅝d. to 3⅞d. for grey to fair, and 616 bags Penang were taken at 3¼d. to 3⅝d.; privately only a limited business has been done. 80 bags common Penang White sold by auction at 5¼d.

COFFEE.—Ceylon: Only 100 casks, 170 barrels and bags Plantation have been offered in public sale, which went off readily at fully last week's rates; good middling coloury to fine, 85s. to 95s. 120 barrels 724 bags native were principally disposed of as follows:—Small, 66s. to 66s. 6d.; fine ordinary to superior, 70s. to 72s. 6d. Privately, about 1,500 bags have been taken on similar terms.

SAGO.—2,100 boxes of pearl offered were mostly all sold at full prices to 1s. advance for large grain, small sold at 19s. to 23s. 6d.; large, 21s. 6d. to 22s. 6d.; 200 bags of flour bought in at 15s. 3d.

TAPIOCA.—Of 200 packages of Penang offered, a small part sold at 3¼d.; and a part of 200 cases of flour, at 21s. 6d. to 22s. 6d.

HEMP.—Manila current large sales at £34 to £36; Sunn £23. 10s.

SPICES.—600 bags of Zanzibar cloves, part sold at steady rates, 3¼d. to 3⅜d.; 970 bags of Pimento met a dull demand, and only 200 bags sold on easier terms, low middling and middling, 2⅜d. to 2½d.; 16 packages of nutmegs sold, ordinary limed, 7d. to 9d.; mace, a few lots at 1s. 8d. for good; of 1,800 cases of cassia lignea, about half sold at 1s. to 2s. per cwt. decline, first pile, 90s. to 92s.; second, 87s. to 88s.; third, 85s.

CAMPHOR.—China and Japan large sales at £5. 5s. to £5. 7s. 6d., and buyers at the latter price.

CINNAMON.—Good business at about 1d. dearer than at last sales.

INDIA-RUBBER.—Very flat; Java is offered at 1s. 5½d. Gutta Percha nominal at 1s. 4d. to 2s. 4d.; no demand.

SAPANWOOD.—Is quiet, and rather lower; and of 67 tons Manila at auction, one-fourth sold at £7. 15s. to £8 per ton; of 29 tons Singapore, three-fourths sold at £8 to £12. 10s.; and of 16 tons Batavia, one-third sold at £9 to £10.

TERRA JAPONICA.—Cutch: Sales at 25s. 6d. Gambier in demand. Sales at 3d. to 6d. higher; of 1,874 bales at auction, three-fourths sold at 22s. for fair block, and 24s. 6d. to 25s. 6d. cubes; good business done privately at 21s. 9d. to 23s. for ordinary to good block on the spot, and 21s. 9d. to 22s. arrivals; and in cubes 24s. to 25s. 6d.

TIN.—Market very dull; sales of Straits at £117, and Banca £118 to £120.

WAX.—Japan: Sales flat, and rather cheaper; 183 boxes sold at auction at 55s. to 65s. per cwt. for ordinary to good block, and 58s. 6d. to 59s. damaged saucers.

TURMERIC.—No China here: of Java 160 bags at auction all retired. Privately moderate business done at 15s. 6d. to 18s. per cwt. for ordinary to good. Very little offering, and advanced prices demanded.

TORTOISE-SHELL.—Auctions have comprised 9 cases Sydney, two-thirds sold at 15s. per cwt. for good, 7s. 6d. to 11s. 6d. inferior and pickings, and 10s. hoof; 2 cases Singapore sold at 15s. 6d. to 16s.; and 2 cases Manila retired.

FREIGHTS AND CHARTERS.

The amount of tonnage loading on the different berths in London still exceeds the requirements of the trade, and freights continue without alteration, at rates lately current.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £39 and 37s. For Shanghai: £49 and 47s. 6d. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £24 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight in the Gauntlet for 59 tons Government stores, including 15 tons heavy ordnance, and have invited tenders for the conveyance of 165 tons of navy provisions from Deptford to Hong Kong, also for 5 tons light measurement stores, and 4 tons gunpowder from the River Thames to Shanghai.

CASUALTIES.

The Clara Talpey, from Cardiff for Hong Kong, put into Queenstown Feb. 16, leaky. She has been surveyed, and will discharge part of cargo.

The President Plate, Harten, which arrived at Brouwershaven, Feb. 18 from Batavia, had experienced a hurricane near Madagascar, during which she lost sails and rigging, and sustained damage to rudder.

The Claro Babuyan, Harrington, which arrived at New York, Feb. 5, from Shanghai, had had her mizen topmast carried away.

ROTTERDAM, Feb. 18th.—The Emilie, Bruynseels, from Batavia, in towing from Brouwershaven to Helvoet Feb. 16 ran aground near Bruinisse, but got off without damage.

TENERIFFE, Feb. 14th.—The Jane E. Williams, barque, Young, of and from Liverpool for Shanghai, with coals, was abandoned, on fire, Feb. 5th, at the north side of this island; master and three men drowned in attempting to land near Port Orotava.

The Falcon, Wilson, from the Clyde for Singapore, arrived at Lamlash Feb. 17th with sails carried away.

BERGEN, Feb. 4th.—The Pieter, Hoogerwerf, of Rotterdam, from Liverpool to Batavia, &c., which had put into an outport north of this place Feb. 2, has been brought in here. She has lost bulwarks, sails, and stanchions, and is said to be leaky, having struck upon the coast.

Intelligence was received here Feb. 23 of the loss in the China Sea of the Surat, barque, Black, from Liverpool to Hong Kong; also of the Lammermuir, ship, Joass, from Shanghai to London, which vessel i reported to have been sunk in Gaspar Straits Dec. 31, after striking on reefs not marked in chart.

At ST. HELENA.—Dec. 30, Fantasie, Forbeck, and Johannes Christiaan, Obelt, both from Batavia, and sailed for Amsterdam; 31, Rubicon, Hoseason, from Amoy; Jan. 2, Volta (barq.), of Dunkirk, Allemes, from Manila, and sailed 8, for Havre; Heilige Liduina, v. Brink, from Batavia, and sailed for Schiedam; 4, Macassar, Coulon, from Banjoewangie, and sailed, 5, for Rotterdam; 5, Edinburgh, Watt, from Shanghai, and sailed, 6, for London; 6, Halton Castle, Scott, from Singapore, and sailed for Liverpool; 7, Nuevo Lantero, Estval, from Manila, and sailed for Alicante; Siwa, Brorsen, for Macao, and sailed, 8, for Hamburg; 8, Reindeer, Clelland, from Hong Kong, and sailed for London; Anna, of Oldenburg, Schulken, from Shanghai, and sailed for New York; Mimosa, Johnston, from Foo-chow-Foo, and sailed, 9, for London; 9, Alaric, Daniel, from Manila, and sailed for Liverpool; Spirit of the Age, from Shanghai; India, of Stockholm, Funch, from Shanghai, and sailed for London; Wm. Melhuish, Duff, from Foo-chow-Foo, and sailed for London; Rocket, Freeman, from Padang, and sailed for Falmouth; Batavia, Pranje, from Java, and sailed, 11, for Amsterdam; 10, Margaretha, Muller, from Batavia, and sailed, 11, for Amsterdam; 11, Peter Symonds, Ockenden, from Singapore, and sailed for London; Clara Novello, Hingston, from Foo chow-Foo, and sailed for New York; 12, India, Vonck, from Batavia, and sailed, 12, for Rotterdam; Minden, Murch, from Manila, and Siam, Wilson, from Shanghai, and both sailed, 13, for Loudon; 15, Havelock, Cock, from Shanghai, and sailed, 15, for London; 17, Lord Macaulay, Care, from Shanghai, and sailed, 17, for London; 27, Merchantman, Gardiner, from Samarang, and sailed, 28, for Amsterdam; 29, Selina Jane, Groenevold, from Macao for Hamburg; Kortenaar, Schuchard, from Batavia for Rotterdam.

At TABLE BAY.—Jan. 7, Portland, Thomas, from Foo-chow-Foo, and sailed, 9, for London.

At ALGOA BAY.—Dec. 16, Eliza Stewart, from Hong Kong.

At PORT NATAL.—Dec. 10, Isabella Hartley, from Singapore.

At MAURITIUS.—Arrived Dec. 24, Calliope, Simmons, from Singapore, 31, Notre Dame des Victoires, Mangul, from Singapore; Jan. 5, Helen's Bank, Lawson, from Singapore; sailed, Dec. 9, Wo-kee (str.), Orkney, for Singapore.

NOTICE TO MARINERS.—SINGAPORE, Jan. 8.—H.M. sloop Vigilant lost her keel on 6th December, 1863, on a rock situated in lat. 13 52 N., long. 118 36 E. from Greenwich. This danger is on the route between Manila and Saigon. Two hours before striking, the Vigilant had good sights for the latitude, and the Greenwich time was given by four good chronometers, so that the position assigned to the rock ought to be accurate.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GRANDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHET, PARIS.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1 Crown-court, Philpot-lane, London.

JAMES HENDERSON,
COMMISSION MERCHANT, TIEN-TSIN, CHINA.
AGENT FOR THE "LONDON AND CHINA EXPRESS."

Drafts issued, and bills negotiated, payable in India, China, &c.

Circular Notes and Letters of Credit, payable throughout Europe, are also issued for the convenience of travellers per overland route.

The purchase and sale of Indian and other securities and the safe custody of the same undertaken. Dividends, pay, pensions, interest, or other moneys realised, and the registry of Indian Government Loan Notes effected, so that the interest may be paid in England.

Every other description of banking and agency business in connection with India, China, &c., conducted on the most favourable terms.

J. OUSELEY, General Manager.

CHANGE of SURNAME.—Take Notice, that I, Frederick Cornes, late of Macclesfield, in the county of Chester, but now temporarily residing in London, and about to proceed to Yokohama, in Japan, merchant, having duly executed under my hand and seal, a deed poll dated the 19th day of February instant, which is intended to be forthwith enrolled in Her Majesty's High Court of Chancery, by which I have declared that from and after the date thereof, I have determined to revert to the method of writing and spelling the surname formerly adopted in our family, and of writing and spelling the same in all deeds, documents, letters, and other writings Cornes instead of Corns, as I have hitherto done, and of USING the SURNAME CORNES for all purposes instead of that of Corns, by which I have been hitherto known.—Dated this 20th day of February, 1864.

FREDERICK CORNES.

JOHN GOSNELL AND CO.'S
PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

Merchants and Shippers supplied on liberal terms.
12, THREE KINGS COURT, LOMBARD-STREET LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

HOLLOWAY'S OINTMENT.—PAINLESS CURES.—Sores, wounds, ulcerations, and other diseases affecting the skin are amendable by this cooling and healing unguent. It has called forth the loudest praises from persons who had suffered for years from bad legs, abscesses, and chronic ulcers after every hope of cure had long passed away. None but those who have experienced the soothing effect of this ointment can form an idea of the comfort it bestows by restraining inflammation and allaying pain. Whenever this Ointment has been once used it has established its own worth, and has again been eagerly sought for as the easiest and safest remedy for all ulcerous complaints. In neuralgia, rheumatism, and gout, the same application, properly used, gives wonderful relief.

THE

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

ESTABLISHED 1861.

Directors.

ELIAS MOCATTA, Esq.
C. F. PICARD, Esq.
Mr. Sheriff CAVE.
MOSES MOSES, Esq.
THOMAS B. YULE, Esq.
JOHN ROGERSON, Esq.

Underwriter.

PHILIP SECRETAN, Esq.

REPORT of the DIRECTORS for PRESENTATION to the SECOND ORDINARY GENERAL MEETING of SHAREHOLDERS, to be held at the London Tavern, on THURSDAY, the 25th day of February, 1864.

The Directors submit to the Shareholders the Accounts and Balance Sheet of the Company for the past year, and have much pleasure in being able to report that the business has been of a most improving and satisfactory character, and fully equal to their expectations.

The Accounts are annexed to the Report, and have been duly examined and verified by the Auditors.

They show, that after having paid all Claims for Losses, Averages, and Returns, Office Charges, and all other Expenses to 31st December last, there remains a balance of £67,274. 16s. on Insurance and Interest accounts.

The two years over which the Company's operations have extended, not being sufficient to afford a safe basis for the calculation of profits, the Directors therefore recommend that £3,339. 5s. only be applied in payment of Interest on Capital, being at the rate of £5 per cent., and the remainder, £63,935. 11s. carried forward in usual course.

In accordance with the Deed of Settlement, the two following Directors retire by rotation :—Elias Mocatta, Esq., and Moses Moses, Esq. These gentlemen, being eligible, offer themselves for re-election.

By Deed of Settlement, also, the Auditors require to be appointed annually, and J. H. Wood, Esq., and J. Notman, Esq., being eligible, offer themselves for re-election.

The Directors have also much pleasure in reporting that, in addition to their several Agencies abroad—where Losses and Claims on Policies issued by the Company are made payable—they have appointed Messrs. Bainbridge, Byard, Gair and Co. to be their Agents at Madras.

The following is now the completed List :—

BOMBAY	... ... Ritchie, Steuart, and Co.	HONG KONG	... ... Johnson and Co.
CALCUTTA	... ... Grant, Smith, and Co.	SHANGHAI	... ... Johnson and Co.
SINGAPORE	... ... Cumming, Beaver, and Co.	MADRAS	... ... Bainbridge, Byard, Gair, and Co.

By Order,

JOHN SCOTT, Secretary.

Summary of News from the Far East.

—o—

JAPAN.

YOKOHAMA.

The dates by the French mail are to the 1st Jan., and were brought by the P. and O. Company's steamer *Granada*, which made a long passage, not arriving at Shanghai till the 12th.

It was understood that the Tycoon was to leave Yedo for Miako about the middle of January. It is said that the great Daimios who have been urging upon the Mikado a liberal foreign policy consider that their purpose is effected, and await the coming only of the Tycoon for the final conclusion of that important determination.

The new Embassy to Europe has been finally determined on. The *Commercial News* says:—"Bearing in mind their avowed policy of exclusion from this port—if not from Japan altogether—it is not to be wondered at that they should attempt to effect in their own way what they failed to do by ordinary diplomacy. Their faith in diplomacy, however, is not exhausted; and concessions which they have been peremptorily refused by foreign representatives they believe will be granted by foreign Sovereigns, as in the case of Osaca, &c.; and so they have resolved to carry their request to the fountain heads at the Courts of Europe and America, by sending another Embassy, which, we heard of late, is to consist of Okubo Bungo, no Kami, late Governor of Nagasaki, Ikida Tzekugo-no- Kami and Awa-to Hantaro, Omet'ske, with the usual staff of attendants. Their departure has, we hear, been postponed to about the 12th February next. Monsieur Degron leaves by the mail of the 1st of January for Shanghai in order to make arrangements for the Japanese Embassy in the French mail steamer, by which line they mean to proceed to Europe at their own expense."

The destruction by fire of the Tycoon's Palace at Yedo, which we have already heard of *via* San Francisco and New York, is confirmed by these advices. Our contemporary last quoted reports:—"The palace, or rather palaces, of the Tycoon—all within the great moat, which the Japanese call, by way of pre-eminence, the Gohonmaroo—have been destroyed by fire; but a conflagration in Japan is a very ordinary incident, and one which, on an average, falls to the lot of a Tycoon as often as to that of a peasant. It is said that the palaces were blown up and fired by gunpowder, and that Hitohs' bashi is the author of this last attempt on the life of the Tycoon. For various reasons, which we need not detail at present, we think this very likely; still, we can give it only as a report." The fire, however, took place on the 22nd December, and not on Christmas-day, as stated in the American account.

On the same day, the new residence of Messrs. Louis Kniffler and Co., situated in the centre of the main street of Yokohama, was totally destroyed by fire. The alarm brought to the spot all the aid of the settlement and of the ships in harbour; but the day was windy, and it was impossible to save the building. Great sympathy and goodwill were displayed by his Excellency Okoobo Kiye-no Kami, Governor of Kanagawa, who, with his staff, hastened to the scene of the fire, planting his fire brigade standard close by, and which, it was evident, some hundreds of his countrymen were prepared to follow, if their assistance was acceptable. We witnessed the whole matter from beginning to end (says the *Herald*), and we saw that members of the Japanese fire-brigade, hearing the alarm, rushed from their sundry employments in all directions, ran to their lodge or rendezvous, and seizing their implements and ladders, hastened towards the fire.

The United States frigate *Jamestown* left on the 25th December, under special orders; of course, the surmise was that she would keep a look out for the *Alabama*.

Trade has shown a downward tendency; but this (observes the *Commercial News*) we anticipated; for, notwithstanding the unusual influx of silk, tea, and cotton to this market a few weeks ago, we had previously known and stated that there was a certain accumulated stock at Yedo destined for this market, and that when this stock should be exhausted a decided slackness would follow. This is proving to be true; for during the last ten or fifteen days no silk has come to market; and with the exception of raw cotton, the supply of export commodities is comparatively small. In fact, it is confined entirely to raw cotton. Owing to the rumoured troublesome times in the interior, imports have been neglected, camlets alone receiving attention at a decline from former quo-

Digitized by Google

tations. Until greater safety is vouchsafed merchants by the Japanese Government in their dealings with foreigners, we fear a cessation on trade will necessarily ensue. To this we may add, as a matter of record, that native chops at Yokohama continue to close. The detrimental influence has extended even to provisioners and poultry dealers; and in a stroll through the native town one cannot help observing the altered condition of things. Upon inquiry as to what this state of things is owing, the cause is generally assigned to the action of the "ronins," who are said to be unusually numerous and troublesome in and about Yedo at present. One is tempted, however, to question this explanation, and to assign the real cause to the policy of the Government. They have of late repeatedly expressed their intention to suspend, or close altogether, the business of this port; and the manner in which trade has alternately advanced and receded of late leaves no doubt that it is wholly in the leading strings of the Government, who guide it as they please.

The *Herald* corroborates the above. It states:—"In Japanese affairs there is little worth notice, excepting, indeed, the closing of sundry shops in the native town. Some say that this is the result of the intimidation and murderous assaults which have been a good deal practised of late upon persons known to be trading with foreigners. We have been credibly informed that at Yedo alone, 38 persons, including even females, have been recently murdered for having traded with foreigners; and the Gorojio state, truly, we presume, that Yedo is so infested with bands of Ronins at present, as to render it highly dangerous for foreigners to visit that city. Some of the Tycoon's ministers visited Yokohama and called on the Foreign representatives during the week. We hear they mean to come again soon after Christmas, but the object of their visit is not yet known."

Dates have been received from Nagasaki to the 16th January. Everything was quiet, and trade moderately active.

CHINA.

SHANGHAI.

DEFALCATION—ORIENTAL BANK, SHANGHAI.

We hesitated to publish the following in our last issue:—

"Considerable sensation has been created here by the defalcation and disappearance of the compradore of the branch of the Oriental Bank; some five native bankers were the principal sufferers; every step was immediately taken by the manager for the apprehension of the delinquent. Reports have been numerous and conflicting, and the exact amount abstracted and the actual circumstances of the case are known but to a few. It is believed, however, that the Oriental Bank will hold the sufferers harmless, and in the meantime we look with confidence to the apprehension and punishment of the defaulter. There can be little doubt that, as a general rule, this class of Chinamen possess far too much the confidence of their employers, which, when worth their while, they but too frequently abuse. The compradore has been placed in custody, whilst the bank holds the native bankers' sycee in trust pending the judicial inquiry."

The following letter appeared in the daily papers:—

"Threadneedle-street, Feb. 27.

"Sir,—By the China papers received this morning it is reported that our native shroff at Shanghai was a defaulter, and that the corporation will be a loser thereby to the extent of 125,000 taels, or about £40,000.

"I am happy to say that the amount of probable loss is greatly exaggerated, as by our agent's advices we have reason to believe that the ultimate loss, if any, will be inconsiderable.

"Your insertion of this will oblige, Sir, your most obedient servant,

"CHARLES J. F. STUART,
Chief Manager."

By the mail delivered this morning, with dates to the 21st January, we have the following additional particulars:—

"We are glad to be able to announce that the Oriental Bank have paid over in dollars to the Chinese bankers the amount for the Syce disputed, with the exception of three boxes and a half, say between 8,000 and 10,000 taels, which the bank refuse to pay. The Chinese we believe have instituted proceedings against the bank for this balance."

The following letter has just been received:—

Oriental Bank Corporation, London, March 7, 1864.

The Chief Manager of the Oriental Bank Corporation presents his compliments to the Editor of the *London and China Telegraph*, and in reply to his note of to-day begs to inform him that some of the Corporation's letters from China has not come forward by the French mail, but the chief manager have reason to believe the information correct that the Sycee, or its equivalent in dollars, has been returned to the native bankers at Shanghai.

Several robberies with violence had taken place by bands of armed Canton men in the Settlement. In one case the ruffians were dressed up as foreigners (unless, indeed, they really were foreign rowdies).

Small-pox was prevalent, and had extended to the floating hospital, *Berwick Walls*.

With reference to the remarks made in the *North China Herald* of the 2nd Jan. as to the facilities offered by the Wharf Companies to steamers requiring to coal quickly, we (*Daily Shipping*) have been informed that many of the mercantile houses in Shanghai owe to the Shanghai Wharf Company their being able to catch the mail for England. The *Chanticleer* took in one hundred tons of coal in five hours, and, although it was late on Sunday night before her requirements were made known to the manager of the wharf, she discharged her inward cargo, took in outward, and was ready to start by 2 P.M. on Monday. The *Feiloong* also took in 40 tons of coal in two hours. These facts are sufficient to establish the value of the Companies, and we therefore trust to find them enjoying a large share of public patronage.

The obstruction caused to the navigation of the entrance to the river and the river itself by the accumulating number of wrecks has caused much dissatisfaction amongst those most deeply interested in shipping matters, and as it appears that there exists no organised means and authority for removing such without considerable delay and circumlocution, we have mooted in the columns of our daily paper, the necessity which exists for the formation of a river and harbour trust, such as has lately been introduced in Calcutta and founded upon that which has worked so well for many years in the Clyde; the right might easily be purchased or farmed from the Chinese Government, and would, we are convinced, after paying all expenses, leave a very pretty margin for the shareholders. We hope to see this question taken up by the Chamber of Commerce, and our hint, if it be worth anything, worked out for the general good of the settlement by wiser and more practical heads than ours.

The Masonic Brethren of Shanghai gave a most successful ball, which was graced by the unprecedented number of nearly fifty ladies, many wearing the scarfs and jewels of their husbands' orders. It was a red-letter evening in the annals of gaiety in Shanghai, and its repetition will be anxiously hailed by all.

A case of considerable interest was heard before the American Consul a short time ago, involving an important question as to the responsibility of employers for the acts of their *employes*. The following letter from "A Merchant" gives the facts and bearing of the point in litigation and of the decision:—

"Mr. David Reid bought (through a broker) from Messrs. Leighton and Co. 8,000 piculs of rice, and in due time paid to their compradore the full amount, receiving in return three godown orders written on the defendants' printed forms, bearing numbers which showed them to belong to a series, and signed for the firm by a clerk who had been in their employ for more than a year, and who is so still. But the delivery was refused on the plea that the defendants were not responsible for godown orders issued by a clerk. This is the real and the only point at issue, for, putting aside the satisfactory explanation given by the pursuer, it is evident that forfeiture could not follow failure to take delivery on the 16th of July without formal notice being first given. It seems then that any American merchant who chooses to repudiate the godown orders of his firm when not signed by himself will be supported by his Consul in so doing. This is a very serious thing for us all, not excepting American merchants, for it is notoriously the universal custom of the port to have godown orders signed by the clerks only. This was fully established by the evidence of the pursuer, who produced other godown orders (those of Messrs. Dent and Co. amongst the number) all signed by clerks only, and for whom the following gentlemen gave evidence to the same effect:—Mr. H. H. Wiggins, manager of the Commercial Bank of India (in which bank an advance had been made on security of the very godown orders in dispute), Mr. G. F. Heard, Mr. C. Thorne, Mr. H. D. Stewart (of Messrs. Turner and Co.), and Mr. A. A. Hayes (of Messrs. Olyphant and Co.). From this judgment there is, it seems, no appeal, so that it cannot be overruled; but for our safety in pending transactions it is desirable that it should be authoritatively pronounced against."

The *Daily Paper* says:—"We learn from a Chinese source that the Imperialists have experienced a severe defeat in the neighbourhood of Chin-keang. They attacked some rebel stockades in force, but were repulsed with great loss, and pursued for some distance by their adversaries. It is evident that the rebel troops retain their old superiority over the Imperialists, when the latter are not aided by foreign discipline and counsel. If the Futai ever indulged the hope that now that Soochow has fallen he could afford to dispense with the services of the disciplined force, the events of the last fortnight will probably have disabused him of the impression. He has been defeated at Chang-chao, with the loss of his best general, and his troops have now experienced an equally severe reverse in another part of the province. It will be unsatisfactory to his Excellency to have to report failure in two minor under-

Digitized by Google

takings, after the glowing accounts of his own prowess which he sent to Peking after the fall of Soochow. But probably his Excellency's command of language will enable him so to represent his defeats as that they shall appear victories."

Her Majesty's Order in Council of the 12th September last, prohibiting the return to China of British subjects sent away from thence by Her Majesty's Consuls, after having been convicted of offences, is republished in the *North China Herald* of the 16th January.

Dissatisfaction is expressed at a new breach of faith on the part of the Futai, by which he seeks to levy half a million of taels, after having agreed in June last that twenty per cent. being then levied on rentals, there should be no further increase or addition made to existing taxes. It appears, however, that "the present demand is not a tax, but simply a request addressed by the Government to its subjects that out of their superfluity they will present it with a certain sum to meet its requirements." The *North China Herald* contends that "the Chinese Mandarins are not entitled to levy taxes on the Chinese residents in the foreign settlements." It appears, however, that Sir Frederick Bruce ruled on a former occasion that the Chinese had a right to tax their own subjects.

The annual meeting of the subscribers to the Shanghai Library was held on the 11th January. The total number of subscribers for the year is 153, of whom 120 are annual, 7 half-yearly, and 26 quarterly. The treasurer's account shows an available balance of taels 198.71.

The week endsng the 16th Jan. has been signalised by the commission of three murders by Chinese on Europeans, and of one by Europeans on a Chinese. A soldier named Bonham, servant of Lieut. Cardew, went out on Sunday afternoon, accompanied by a China boy, to shoot in the neighbourhood of Sikaway. When at a village called Mei-ka-wong, he shot a Chinaman's dog, and was immediately set upon by the villagers, and murdered by blows from their rakes. The boy was bound hand and foot, and carried off; but he, also, was subsequently murdered. Colonel Hough heard of the affair on the night of its occurrence, rode to the spot, and ordered his men to dig in the bed of a small water-course at a place which was pointed out to him as that in which Bonham had been buried. Darkness came on before he had reached the body, but not before he had discovered, in clods of earth saturated by blood, sufficient evidence that his information was correct. He was obliged to desist, but returned the next morning, accompanied by H.B.M. Consul, and renewed the search. The body, however, had been removed during the night, and the neighbouring villages were deserted. The next day, Lieutenant Cardew set out for the neighbourhood, accompanied by a detachment of his disciplined Chinese, and was successful in discovering the body of the murdered man, which had been removed to a spot about a mile distant from that at which it was previously interred. The body of the boy was found in the same grave. Five men have been arrested on suspicion of being concerned in the murder, and there appears little doubt that their guilt will be brought home to them.

The second case was that of two men named Baker and Horgan, who were coming down from Quinsan with a considerable sum of money, said to amount to between $4,000 and $5,000, in the boat. A few evenings ago Horgan's boy arrived in the settlement on foot, stating that his master and Baker had been murdered by men speaking the Canton dialect, who had carried off all the property. Neither the culprits nor the bodies of the murdered men have yet been discovered.

The third case was that of a Chinaman, whose boat was impressed by two rowdies. They replied to the boatman's solicitation for payment by kicking him in the stomach, thereby injuring his spleen so as to cause death. The two men are in custody in the English Consular Jail.

A meeting of the Shanghai volunteer corps has been held, at which the treasurer stated that a balance of tls. 937 stood to the credit of the corps at the close of the year 1863. The corps purposes to erect a gymnasium, but the arrangements have not yet been perfected.

From Soochow we learn that the Futai's brother has marched, with the troops under his command, to besiege Chang-Chow, an important city on the grand canal beyond Woosih. This mandarin has yet only succeeded in getting defeated on every occasion on which he has been entrusted with important command; and as he is likely to find at Chang-chao the most formidable resistance he has yet encountered, it is probable that a similar result will again occur. Fortune has not yet smiled upon the expedition. The celebrated Chinese General Ching was shot through the heart when leading on an attacking party. This will be a serious blow to the prospects of the Imperialists in the province.

The "ever victorious force" has been enjoying quite a round of gaiety whilst resting on their laurels at Quinsan. First, came a dinner given to Major Gordon—then one given to the officers of the garrison; then three in succession, by the officers of the 1st, 2nd and 4th Regiments; and lastly a grand ovation by Admiral Lee Adong on his promotion. The Rhenish band was in attendance, and we hear that the festivities passed off with great *eclat*.

In our last issue we noticed a new Tug and Lighter Company, &c., and we have now to add the Shanghai Steam Washing Company, the proprietors of which are Messrs. Legrand and Co. These gentleman have erected commodious premises, and in addition to celerity and cheapness in turning out our linen, undertake to accomplish necessary repairs, and all at the moderate price of $2.50 per 100, or half a dollar less than the present Dhobee trashing system.

Bulkley, the murderer of McKinnon, had been brought to Shanghai in H.M.S. *Encounter*, and his trial was to come off in a few days. In order to give him every legitimate chance of putting his case in a favourable light, the United States Consul General has permitted him to engage the services of a lawyer.

Commenting on the cases of "Reid v. Leighton," and of the claim of several Chinese bankers against the Oriental Bank Corporation, the *Daily Shipping Paper* remarks "that it is high time for the merchants and bankers of Shanghai to emancipate themselves from their compradors. It is natural that there should be a reluctance to break through an established system which worked smoothly and saved much trouble; but such losses as those experienced by Mr. Reid and by the Oriental Bank are a high price to pay for the convenience. A clear understanding should be come to that the compradore is not authorised to effect any transaction in his own person, and no bargain should be closed with him unless he produce the written assent of his principal to the transaction. A very similar office to that of compradore exists in India, namely, that of banian. But though his functions are similar, a banian's powers are much more limited. A European firm would not conclude a transaction with him without the sanction of his principal's name; nor would a bank entrust its cash to him so implicitly that he could employ it largely for his own purposes."

HONG KONG.

The dates of the present mail are down to Jan. 26. The English mail of Nov. 26 arrived out on Jan. 20, and Dec. 10 on the 25th. We regret to report another piracy similar to the *Parana*.

The Danish brig *Chico*, with a crew of nine European seamen and two Chinese, was towed out by a steamer, and the weather being very rough they came to anchor. At about eleven o'clock P.M. on the day of starting (Jan. 20) two large and two small piratical boats came alongside, boarded, and immediately the decks were covered with pirates, who attacked the ship's company, killing the captain and three Europeans; four of the crew got below, when stinkpots were thrown down; after ransacking the vessel they left. The five Europeans and two Chinese jumped into a small boat and made for the shore and landed; they were followed on shore by the pirates.

The steamer *Bahama* is announced for sale, freight or charter by Messrs. Johnson and Co.

The twenty-fifth annual meeting of the Medical Missionary Society was held at Canton on the 15th January. From the annual report of the hospital in that city, it appeared that the number of patients attended to during the year was 14,628 at Canton, 5,445 at Fuh-shan, and that a new dispensary had been commenced in connection with the Rhenish Missionary Society at Shik-lung, a large town forty miles east of Canton, where 1,730 patients had been prescribed for. The number of children vaccinated was 1,494. The number of in-patients received was 452, and about 600 surgical operations had been performed. Pecuniary assistance to the amount of $75.55 had been given to some of the most destitute in-patients and to some of the out-patients. The amount of money paid out on account of the hospital and dispensaries was $1,376.34, from which is to be deducted a balance from last year of $129.62, and the sum of $87.34 received for medicines and trusses sold, leaving the sum of $1,159.38 expended for rent, hire of assistants, medicines, aid to poor patients, &c. Religious services

Digitized by Google

have been conducted by the Rev. C. F. Preston, assisted in Fuh-shan by the Rev. J. M. Condit. The Rev. Mr. Graves' report of the dispensary at Shau-king (Shiu-hing) was also read. The number of patients prescribed for was 1,685, a number of minor surgical operations had been performed, and some important cases had been sent to the hospital in Canton.

The Treasurer's report stated that receipts of the society, from subscriptions and interest, were $2,132, and the amount paid out was $100. It was stated, however, that the sum of 1,260 for the current expenses of the hospital and dispensary had been paid since the account was rendered. Deducting this sum, there remained $4,247 in the treasury to the credit of the society. A circular was laid on the table to which subscriptions for the enlargement of the hospital had been obtained to the amount of $2,550, and a Chinese subscription book which contained the sum of $445. It was resolved that a new hospital was desirable, and that a committee should be appointed to devise the best means of accomplishing the object. Dr. Colledge, M.D., F.R.S., at present in England, was chosen president for the ensuing year.

A most atrocious murder has been perpetrated in a house in Taipingshan. Mossajee Dawodjee Satty and his wife (a Chinese female) were found by the neighbours dead in their own house, whither the former were attracted by the cries of a little girl of three years, daughter of the pair. It appears that the man had amassed a sum of money amounting to $2,300, and that he was about to return to Bombay with his savings. The circumstance was well known in the neighbourhood, and it is supposed that the murderers wished to possess themselves of the cash. This they did not manage to do, as $1,100 was found in a belt round the waist of the deceased, and he is known to have placed $1,000 in the hands of a native firm here. The bulk of his money is therefore satisfactorily accounted for. The unfortunate victims had been gagged and pinioned before the crime was committed. A coolie who slept in the same building, and who had absconded, has since been taken up on suspicion.

The steamer *Rajah* was advertised for sale by Messrs. Augustine Heard and Co.

The following paragraphs are from the *Peking Gazette*:—

The "filchers" of Nganhwiu province are reported to have invaded the district of Chung-tsiang in Honan, under the lead of Ching-ta and Lau-kan, dividing into parties and spreading over Teh-ngan and Ying-shan. The Imperialists met them in as many detachments, and defeated them at Tapei-tien, and near the Lui-ku or Thundering Drum Hill in Sui Chan, and other contiguous places, on successive days, taking prisoners and executing them. Another detachment of them passed this to the south towards Lang-kiun Bridge in Ying-ching district, where they met a body of Imperialists, and were attacked in several places. The slaughter was very great, including several of their high officers of various ranks left on the field.

The insurgents in various parts of Tsi-nan-fu and of Tung-chang-fu, lying in Shantung, having yielded, and Sankolinsin having made a clearance of their bands, the whole force has gradually been destroyed, except their leader Sung, who has escaped. The Governor of the Province has accordingly repeatedly received orders to disperse the remaining bands, and restore the country to its peaceful condition. But he (the Governor Yen King-ming) has made false reports of a few partial successes over them to assure us that the whole province is quiet, and there is no occasion for more operations. He has accordingly trumped up a statement, and planned a scheme out of these reports to relieve himself of further care, by requesting that he may be relieved of his office. His application to resign on account of family mourning is therefore refused.

The Governor of Kansuh, Ngan-lin, the Mohamedans of Hochan in that province and the Chinese of Tih-tau Chau, since the end of last year have been at strife, and the two parties have repeatedly stirred up the populations there, and had fights among themselves. The Governor Ngan-lin has already issued orders to prefects and magistrates of those districts to exert themselves to allay these feuds, and bring the two parties together so as to remove their suspicions, and quiet the regions This has been done, and the troubles are removed, so that the Governor has requested that the local officers be rewarded for their efforts.

STRAITS OF MALACCA.

SINGAPORE.

The *Straits Times* pays the following well deserved compliment to Captain Reed, of H.M.S. *Rifleman*. The qualities exhibited on a service so essential to the safety of commerce and life, often far transcends in courage, endurance and patience those called forth an actual warfare:—"We are very sorry to learn that Captain Reed of the *Rifleman* has not benefited in his health by his trip to China, and that it is positively necessary that he should proceed to Europe with the least possible delay. Captain Reed has now been altogether ten years connected with the survey of the waters in our immediate vicinity. He was second in command of the *Saracen*, and shared in the work of all the important and well known surveys made in that vessel—including those of the Gulf of Siam and the Straits of Banka. The surveys which have been conducted by him during the last two years in the *Rifleman* are too well known by our readers to require more than attention to be drawn to them, for they have appeared at length in these columns. Captain Reed has wisely and determinedly directed his attention to the clearance of the main routes to China, a work the importance of which can be best understood by a reference to the enormous value of property that is yearly conveyed through them. In his task he has progressed with singular success and rapidity, and it is to be regretted by us—as it probably is by himself—that he cannot remain to complete the valuable work which he has inaugurated and so assiduously carried on for nearly two years.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANGIER—On the 4th March, at Forest-hill, the wife of F. J. Angier, Manager "London and China Telegraph" and "Cape and Natal News," of a son.

ANTROBUS—On the 2nd March, at 12, Sutherland-place, Eccleston-square, S.W., the wife of the Rev. George Antrobus, M.A., of a son.

FREEMAN—On the 3rd Jan., at Amoy, China, the wife of Robert Freeman, Esq., of a daughter.

FARR—On the 15th Feb., at Gravesend, the wife of Mr. F. Farr, of Shanghai, of a son.

OZORIO—On the 20th Jan., at Hong Kong, the wife of C. A. Ozorio, jun., of a son.

SCHEIBLER—On the 26th Feb., at Grove-park, Camberwell, the wife of H. Scheibler, Esq., of a son.

MARRIAGES.

THOMSON—MACHELL.—On the 12th Jan., at Shanghai, by the Rev. R. Hamilton, Harvey Thomson, to Eliza, second daughter of the late Thomas Machell, Surgeon, London.

DEATHS.

MARKHAM—On the 14th Jan., at Shanghai, John Arthur, infant son of John Markham, Esq., H.B.M. Consul.

REED—On the 21st Jan., at the General Hospital, Hong Kong, John Reed, Private H.M. 99th Regt., aged 25 years.

SANDILANDS—On the 28th Feb., at Rathangan Lodge, county Kildare, Ireland, Edwin W. P. Sandilands, B.C.L., late Fellow of St. John's College, Oxford, youngest son of the late Rev. Percival Sandilands, aged 34.

SANDILANDS—On the 29th Feb., suddenly, at Croydon Rectory, Cambs., the Rev. Richard S. B. Sandilands, M.A., of Ch. Ch., Oxford, rector of Croydon, aged 73.

VAN ESSEN—On the 19th Jan., at the Civil Hospital, William Van Essen, Maste Mariner.

CASUALTIES.

The ship Vanguard, sailed from Shields on September 12, 1863, wishes the following report inserted:—"Was detained in Channel by strong westerly gales to the 25th; after which had very light winds; crossed the equator October 22, long. 30 W. From November 9 to 29 experienced some heavy gales with a high sea. Split several sales, lost bulwarks and other damage. Dec. 27 entered the North Pacific *via* Ombay and Gellolo; encountered very light winds, calms, and 204 miles contrary current to January 8, when strong gales commenced, and at 9 A.M., lat. 10 N., long. 130, 20 E., a heavy sea struck the starboard bow, which did considerable damage. From the above date and position to the 12th, when we reached the north end of Luzon, we had very heavy weather, with high confused sea, and the wind very scant. Fine weather succeeded, and we reached this port last night."

Report of the British barque Queen's Own, from London to Hong Kong. Left the Downs July 7th; experienced light winds to the Cape of Good Hope, when had heavy gales and contrary winds to Anjer, Nov. 4th; and since then has had a continuation of gales, having been 78 days from Anjer to Hong Kong. Nov. 3rd, in Straits of Sunda, spoke the Edinburg, from Shanghai 68 days out; the Queen of the Age, from Shanghai 75 days out; Altona, from Shanghai, 70 days out. Nov. 18th, in the Straits of Banca, spoke the Broadwater, from Yokohama to London, and the Minden, from Manilla to London, Nov. 7th.

HONG KONG.

The schooner Pearl, Captain Harrison, from Hong Kong, bound to Ningpo, put back disabled. She fell in with a heavy gale off S. end of

Formosa, when the sea carried away the rudder; starting a leak under the counter; hove in the starboard boat, causing considerable other damage. Put back to Tungao Roads, steering with a water cask over the stern, when managed to rig a temporary rudder, and arrived in Hong Kong, 19th.

SHANGHAI.

The British barque Glendover, from Sunderland. May 10th, left Sunderland; first part of passage had very fine weather; July 12th off the Cape; touched at Anjer Aug. 26th; Sept. 20th experienced a very severe typhoon near Paracels; 28th cargo shifted, compelled to cut away main and mizen masts; 8th Oct. arrived at Hong Kong—foremast badly sprung, refitted, and left 8th Dec.; experienced heavy N.W. gales the whole passage; arrived at Wusung 11th Jan.

Victory, from London, when off Luconia, picked up twelve Chinese from a sinking junk that had been robbed and set on fire. Passengers: Dr. Tennent, wife, and child, and Mr. Middelton.

COMMERCIAL POSTCRIPT.

Sales of bar silver at 61¼d.; Mexican dollars 64½d.

According to the *Telegraphic Journal*, intelligence has been received, dated Mussendar, Feb. 9, of the successful submergence of 359 miles of cable in the Persian Gulf, and also of the safe arrival of the *Assaye* and *Tweed*. The cable was in perfect working order.

ARRIVALS NOT INCLUDED IN THE TABLES.—March 1, off Dungeness, from Sourabaya, Batavia; from Batavia, Jacoba Cornelia; 2, Tagal, Jan Daniel; 4, at Plymouth, from Batavia, L. A. Bang; 5, at Deal, from Shanghai, Jas. Vinicombe; in Channel, from Batavia, Burgermeester v. Middelburg; off Cape Clear, from Borneo, Zambesi; Jan. 19, at Buenos Ayres, from Hong Kong, Banda; March 6, at Deal, from Singapore, Latona; 7, from Shanghai, Edinburgh; 5, from Shanghai, Spirit of the Deep; 7, off Liverpool, from China, Isabella Ridley; 6, at Deal, from Hong Kong, Ocean Bride.

DEPARTURES.—March 4, from Shields, for Shanghai, Cœur de Lion, Crusader; Jan. 18, from Monte Video, for Batavia, Johann Heinrich. From New York, Feb. 9, Kiu-kiang (str.), for Shanghai, and Leopoldum Bauer (Aust.), for Shanghai.

At ST. VINCENT, C.V.—Jan 30, Tun Sin (str.), Rowe, from London, and left Feb. 2 for China.

SPOKEN.—Niphon, Shanghai to Liverpool, Dec. 27, 32 S., 48 E.; Corea, London to China, Feb. 16, 46 N., 12 W.; Electric, Singapore to Liverpool, Jan. 8, 35 S., 17 E.

LAID ON.—At London, for Amoy and Foo-chow-Foo: Rubicon.

LISBON, MARCH 1.—The Wild Deer, Cobb, from Liverpool for Shanghai, which put in here Feb. 27, with considerable damage to masts, spars, sails, &c., will have to unship her foremast (an iron one, and the head thereof being much damaged) for examination, and to repair it if possible in order to make it efficient, otherwise it must be replaced by a wooden one.

The J. C. Munro, from Japan to London, was totally lost, Nov. 1, on Trabas Shoal.

THE ANGLO-CHINESE FLEET.

CORRESPONDENCE RESPECTING THE FITTING OUT, DESPATCHING TO CHINA, AND ULTIMATE WITHDRAWAL OF THE ANGLO-CHINESE FLEET UNDER THE COMMAND OF CAPTAIN SHERARD OSBORN, C.B.; AND THE DISMISSAL OF MR. H. N. LAY, C.B.

SUCH is the title of a Parliamentary paper just published. To some extent the contents have been already given in our issue of the 19th Jan., taken from *The Times*. The total number of despatches is twenty-six. From No. 1 to No. 6 the letters are confined to the request of Mr. LAY that the flag to be adopted by the force shall be described in the *London Gazette*, and recognised by Her MAJESTY'S Government at home and abroad. Mr. LAY addressed Earl RUSSELL, and his lordship handed on the same to the Admiralty, who, it appears, shirked the announcement in the *Gazette*, but said the flag had been duly recorded. No. 7, dated 2nd Sept., 1862, is from Earl RUSSELL to Mr. BRUCE, forwarding the QUEEN'S order in Council authorising Captain OSBORN and Mr. LAY to equip the vessels. No. 8, of 10th Sept., is from Earl RUSSELL, asking Mr. LAY to produce written authority from the Chinese Government. Considering that prior to this the order in Council was passed, it is pretty clear that this important point had been overlooked. No. 9 encloses copy of No. 8 to Sir F. BRUCE. No. 10 is the reply of Mr. LAY, as follows:—

With reference to Earl Russell's desire that I should obtain a written authority from the Chinese Government for the steps I am taking to provide it with naval assistance, I have the honour to state that I hold such written authority, dated the 14th March, 1862, from my *locum tenens*, Mr. Hart, to purchase and equip a steam fleet, in accordance with instructions from the Imperial Government. I have since received regular remittances from the foreign Customs for that purpose, by direction of Prince Kung. I may add, for his lordship's information, that on the 28th June last, I received, through Mr. Hart, a despatch from the Chinese Foreign-office relative to the proposed fleet. This despatch prays the Inspector-General of Customs in earnest terms to use the utmost despatch in procuring the vessels. It repeats the instructions issued to the Governors of various provinces as to the amounts to be contributed by them towards the cost of the fleet; refers to the Emperor's anxiety that no time should be lost; and closes with a second earnest appeal to the Inspector-General for these reasons "not to lose a day." With respect to the flag for the fleet, I have written for precise authority. As soon as I receive it, I will not fail to apprise Earl Russell of the fact.—I have, &c.,

(Signed) H. N. LAY.

It will be observed that this authority is rather slight an second-hand, considering the importance of the matter in hand. Our Government must have put entire confidence in Capt. OSBORN using the war vessels discreetly. Nos. 11 to 14 again discuss the flag question; No. 15, from Capt. OSBORN to Earl RUSSELL, encloses the correspondence which we gave in our issue of the 19th Jan., and which number in all eleven despatches, and concludes with the address of Capt. OSBORN to his officers and their reply, which is not included in the Parliamentary papers. No. 16 is from the Foreign-office to the Admiralty, requesting their superintendence of the sale of the vessels on arrival in England, with a view to prevent them falling into the hands of the Confederates or other belligerents; No. 17 is from Earl RUSSELL to Sir F. BRUCE, enclosing copy of above. No. 18 is from the Admiralty to the Foreign-office, enclosing copy of a letter from Capt. OSBORN, announcing that the fleet would leave China for India and England. No. 19 is from Mr. LAY to Earl RUSSELL, in which he tells his own story as follows:—

Peking, November 10, 1863.

MY LORD,—The present mail conveys to your Lordship the papers having reference to the dissolution of the naval force which Captain Osborn and myself were empowered by Her Majesty's Order in Council to organise for the Emperor of China. And I gladly avail myself of the privilege your Lordship kindly accorded me, to submit to you some account of my proceedings in this country in regard thereto.

On my arrival in Peking, on the 1st of June last, I placed the agreements which I had entered into, under his letter of instructions of the 20th October, 1862, into the hands of the Prince of Kung.

These consisted of:—

1. The agreement between myself, as agent for the Emperor of China, and the officers and crews of the vessels, to which were appended certain regulations for the discipline of the force organised.

2. The agreement between Captain Osborn and myself, which embodied the principles we had laid down for the government of our conduct in this country.

This was framed so as to insure Captain Osborn a proper position; and to provide against his being placed upon a footing with the filibusters in the employ of the Chinese local authorities.

We were careful to guard against the possible mis-employment of the force by the Emperor, by my engaging to be the medium of all instructions to Captain Osborn; and to prevent orders being at any time issued to him at variance with treaties or international obligations, I promised (as is the case in my own department) to refuse to convey instructions of the reasonableness of which I was not satisfied.

Pains were taken to make this agreement stringent in its terms, for my experience made me mindful of the defect in the Chinese character, falsity and bad faith; and I felt that unless the Emperor were securely bound by conditions of the above nature, which he would have to ratify before the flotilla could be called upon to act, any obligations that might be entered into on his behalf would share the fate of all Chinese engagements, whenever it becomes convenient or safe to repudiate them.

The serious responsibilities which I incurred in entering upon the undertaking at all made it incumbent on me, in the exercise of common prudence, to adopt every precaution against the possible misbehaviour in time to come of the Chinese Government. And upon no other conditions than those laid down would I have consented for one moment to become instrumental in procuring force of a formidable character for an Asiatic Power, knowing well that, unrestricted by any conditions, it would sooner or later be tempted to direct that force against our own interests or the interests of other European Powers, leading to complications in which Captain Osborn and I would certainly be sacrificed.

When I presented the agreements for formal ratification, the "Foreign Board" (Prince Kung, it seems, has ceased for a year past to occupy himself with the details of foreign affairs) suggested modification of the terms of my agreement with Captain Osborn. I referred to the Prince's letter of authority to me, which, I observed, had been written upon a draft sent out from England by me for his signature; in that letter he had given me explicit authority to arrange on his behalf the terms of all agreements; under it I had arranged the only terms upon which I could obtain the sanction, in the first place, of my own Government, and in the second the services of officers of proper standing; and by it the Prince must be held bound.

I may mention to your Lordship, that before I acted upon that letter, I took the precaution to fortify myself with a legal opinion, which pronounced it sufficient to warrant my entering into all terms and conditions.

The Board said the Prince would ratify the agreements if I would consent to Captain Osborn's being placed under the orders of the local authorities. I answered that this could not be entertained. Captain Osborn had permission to serve the Emperor of China only, and could receive orders only from Peking.

Thus the matter stood until Captain Osborn's arrival in September. Satisfactory financial arrangements for the maintenance of the force were made in the meantime, the Board taking it for granted that the money question would be the only one which would be considered of real importance by us.

When Captain Osborn arrived, we lost no time in explaining jointly that the proposal to place him under the orders of the local Mandarins was inadmissible. The Board tried hard to persuade us to yield the point, but finding us firm, declared at length that the Prince would in that case decline to ratify the agreements.

I asked repeatedly that this decision might be communicated in writing, but in vain. The Prince had skilfully ignored his letter of instructions throughout, and had left the letter, in which I had drawn his attention to the important clauses of the agreement, unacknowledged.

Digitized by Google

We informed the Foreign Board that if the Prince refused to ratify, the force must be disbanded.

The matter was then placed, with all the correspondence connected with it, in the hands of Sir F. Bruce, from whom, as your Lordship will receive a report of the subsequent proceedings, I forbear trespassing upon your time by referring to them here.

I think that the motives which have influenced Prince Kung to repudiate the agreements entered into under his written authority may be easily explained. When he ordered the steam flotilla the Government had not yet recovered the effects of our last expedition. A vague feeling of alarm as to the future prevailed; the recent progress of the rebels had been rapid; no less than four of the open ports, Canton, Foochow, Ningpo, and Shanghai, were in danger of capture; the Government was beset with appeals from the foreign Ministers for action, and was, in short, told that if it did not make an effort we should have to treat with the rebels.

The Prince was therefore ready to do anything, and while in this mood signed the letter of instructions to me.

In the meantime, however, under the auspices of Admiral Hope and General Staveley, the Government obtained, through the local authorities, all the aid that it needed. Officers were lent; guns and ammunition supplied; and before my return Ningpo was recovered, the other ports secured against attack, and the rebels driven back within the walls of Soochow.

The Chinese Government found itself relieved of its embarrassments in a manner most acceptable to it; the local Mandarins obtained the services of as many officers and men as were necessary, upon the simple terms of so many dollars a month, without guarantees or agreements of any kind; the Government was not required to give a single pledge or to incur any responsibilities.

When, therefore, the terms upon which the naval force had been organized were submitted for ratification, it was not strange that they should be pronounced unacceptable. The Chinese Government naturally prefers unconditional aid, to aid fettered by restrictions. My aim has been to make reform and progress the condition of aid. It is only thus, I believe, that aid can lead to any good in China, or that we are justified in affording it.

The military assistance, as at present rendered at Shanghai, is under the irresponsible control of the local Mandarins, and will, I apprehend, be found attended with troublesome, if not serious consequences. My observation, after five months' residence in Peking, leads me to doubt altogether the sincerity of Prince Kung's friendly professions, and my belief is that the anti-foreign party is gaining strength daily.

In Sir F. Bruce's despatches, advocating the formation of this naval force, he coupled the reformed administration of the Customs with the promised re-organisation of the executive forces of the empire. To have passed the naval force into the hands of the local authorities would have been to destroy all hope of improvement in any direction. As soon as it had served its purpose of slaughter, it would have been thrown aside.

With Sir F. Bruce, I had hoped that Her Majesty's Government would have been relieved, by means of this flotilla, of the expense of maintaining order at the open ports; and that the Chinese Customs' establishment would have been furnished with the necessary support to enable it to contend against the hostility of European evil-doers, and to render it independent of the local authorities, whose interest it is to restore the former corrupt state of things.

Disappointing as the dissolution of the force must be to all concerned, I feel that no one has greater cause than I of complaint against Prince Kung. Obliged to return to England by ill-health, induced by wounds and years of toil in the Chinese service, I sacrificed my leisure while in England to his service. My proposals on his behalf were well received in England, and met with the kindest support of Her Majesty's Government. On my arrival here, the Prince treated the whole matter with assumed indifference, and fancying that we had gone too far to withdraw, and that from the number of Europeans in Chinese employ ready to serve upon his terms he was independent of Captain Osborn, he attempted to impose his own conditions.

Although our hopes have not been realized, I have at any rate the consolation of feeling that we have not broken a single pledge made in England, and that the refusal of the force placed at the disposal of the Chinese Government, through the generosity of Her Majesty's Government, is an act for which Prince Kung and his colleagues are alone responsible.—I have, &c., (Signed) H. N. LAY.

No. 20 acknowledges the above. No. 21 is from Sir F. Bruce to Earl Russell, and briefly announces that Prince Kung refused to ratify the agreement which Mr. Lay made with Capt. Osborn. No. 22 acknowledges receipt of this. No. 23 is from Sir F. Bruce to Earl Russell, as follows :—

Peking, Nov. 19, 1863.

MY LORD,—I have the honour to enclose copies of various documents, forwarded to me by Captain Osborn, on the refusal of the Chinese Government to agree to the conditions on which alone he had consented to organise a steam flotilla for the service of the Emperor of China.

Also, of my correspondence with the Chinese Government and with Captain Osborn on the disposal of these war-vessels, and on the arrangement, ultimately agreed on, for sending them and the officers and men to England.

In order to understand clearly what has taken place, it must be borne in mind that though the flotilla sailed in winter from England to China, it was not until Mr. Lay arrived here in the spring that the Chinese Government had any intimation of the composition of the force, of the cost of its maintenance, or of the contents and scope of the undertaking entered into by Mr. Lay with Captain Osborn; I must call your lordship's attention to the latter document, as the refusal of the Chinese to ratify it has proved fatal to the success of the scheme.

Mr. Lay proceeded at once to urge on this Government the necessity of conferring upon himself and Captain Osborn the authority he had engaged in his undertaking to procure. His recent arrival from Europe, the honours conferred upon him by Her Majesty, and his acquaintance with men of influence and standing, enabled him to assume, in dealing with the Chinese Government, rather the dictatorial tone of an independent authority than the language of persuasion appropriate to the agent of the Government he was addressing. His hopes of success were strengthened by the reserved attitude of the Ministers of the Treaty Powers, all of whom, on different grounds, had reason to be dissatisfied with the dilatory proceedings of this Government, in granting redress for illegal acts committed by the local authorities. The Prince and his advisers were thus led to infer that a scheme which had promised to strengthen the hands of the central Government, as against provincial influences, could not fail to be acceptable to foreign Ministers, as being a step towards that policy of centralisation which they had always advocated, and that a feeling existed in their minds that the difficulties encountered by Mr. Lay were attributable to retrograde views.

So far, therefore, as foreign influences were concerned, Mr. Lay was more favoured by events than he could have reasonably expected, considering the exclusive composition of the force and the jealousies which, in this respect, it was fitted to awaken. I can state positively that nothing fell from the foreign Ministers calculated to thwart him in his attempts to obtain the ratification of these agreements, and that his failure is due to the spontaneous resolution of the Chinese themselves; their motives being the opposition of the provincial authorities; the reluctance of the Chinese Government to assume the responsibility of directing the force instead of leaving it to be directed by local governors; and, above all, the alarm and suspicion engendered in their minds by the proposals contained in the understanding entered into by Mr. Lay and Captain Osborn, by which they considered that the exclusive control of the operations would be vested in Mr. Lay, who would thus be enabled, indirectly, to compel them to act in all matters in subservience to his will.

Mr. Lay injudiciously, in my opinion, held language and advanced pretensions which tended to increase their apprehensions in this respect. He proposed that they should give him a "Foo" to reside in, that is to say, one of the palaces conferred by the Emperor on princes of the blood, such as those inhabited by the Ministers of England and France; a class of building which the highest officers of the Chinese Government are not permitted to inhabit. He acted as if he held the independent position of head of a great revenue department, which put him on an equality with Wensiang and the superior members of the foreign board, and as, therefore, only accountable to the Prince of Kung, the Vice-Regent of the empire. The members of the foreign board could obtain from him no specific statement, or account, of the sums expended by him, or anything beyond vague assurances that the money had been rightly spent, and would be accounted for in due time, and he insisted on the dismissal of the two Chinese superintendents, placed by this Government at the head of the Customs department, and the appointment of himself as sole director and recipient of the foreign Customs revenue, amounting already to about £3,000,000 sterling, with a fair, prospect of increase. In fact, it is impossible to doubt that Mr. Lay, full of large schemes of progress and commercial development in China, desirous of arriving at immediate results, and conscious that the course of improvement will be both uncertain and slow if depending solely on the influence which events and persuasion combined may gradually exercise in the Chinese mind, aimed at solving the difficulty by obtaining the sole command of the most certain source of the Imperial revenue, and of the most efficient branch of its executive. Armed with this power he hoped by threats of suspending the action of the flotilla, and of withholding the funds, that the Chinese Government would be compelled to adopt such measures as he should propose. He was to dictate the policy to be pursued; it was to be promulgated to the Empire by Imperial decree; and to be executed by the flotilla and such land forces as might be required, the expenses of which were to be provided for out of the Customs revenues.

I believe I am correct in assuming that an article in *Blackwood's Magazine* of January, 1863, entitled "Progress in China," contains a statement of the results anticipated by those who promote this course of policy, and I concur with Mr. Lay in thinking that nothing short of a dictatorship, lodged in European hands, and so supported by foreign influence as to render the Chinese powerless to defeat or thwart it by intrigue or opposition, would enable its supporters to realise the promises it holds out. Even thus, looking to the reluctance of the Chinese Government, and the determined hostility of provincial authorities, this scheme could not have been successfully carried out.

The Chinese Government, however, comprehended at once the scope and bearing of this scheme, and look upon it as an insidious attempt to take the administration out of their hands. They were unacquainted with Mr. Lay, and employed him as their agent for the purchase of ships and hiring of men at Mr. Hart's suggestion, who recommended him as a person on whom they might rely, and who, being in England, could carry out their wishes in a satisfactory and economical manner. They had no such special confidence in him as would have induced them to put themselves in his hands. They do not look upon the Inspector-General as anything more than a subordinate officer in their employ, to whom a general superintendence is given over the foreigners engaged to aid in the collection of the Customs revenue on foreign trade, but on whom no control is bestowed over the application of the receipts. They do not consider him as a political officer at all, nor do they consult him as of right even in questions affecting foreign trade. It was only at my invitation, and contrary to the intentions of the Chinese Government, that Mr. Hart was able, two years ago, to come up to Peking, and it was only by his tact, good sense, and modesty that he obtained access to the Prince of Kung, and turned to useful account the favourable impression he made upon his Imperial Highness and his advisers. It is a significant mark of the light in which they view Mr. Lay's pretensions that he was never admitted to the Prince's presence during these months of discussion. Indeed, he would not have seen him at all had I not requested an interview with the Prince, which he anticipated would be of a disagreeable character. To forestal any remark I might make on his not having seen Mr. Lay, he sent for him in the morning, and had a few minutes' conversation with him on indifferent matters.

If the hope, therefore, was entertained in any quarter that Mr. Lay enjoyed, either on account of his personal merits, or in virtue of his office, any such influence over the Chinese Government as would enable him to carry out the views he entertained with their concurrence and assent, it

Digitized by Google

was founded on an entire misapprehension of his position, and of their feelings towards their foreign *employés*. They looked upon him as an agent for a special purpose, whose authority was limited to a purchase of ships and to the engaging of men to bring them out. They certainly did not contemplate conferring upon him any authority to tie up their hands for years as to the manning of these vessels, still less that he should take upon himself to determine, at his will, how the operations of the ships were to be directed, and under whose immediate orders they were to be placed; and they were totally indisposed to alter the character of the office he bears, to give to him, or to any foreigner, a leading part in the administration of the Government, or to invest him with any control over the Customs revenues, except in so far as was required to meet the expenditure of the foreign part of the establishment. They are profoundly irritated, not only because of the embarrassments in which they are involved by his having exceeded his authority, but on account of the position he thus sought to create for himself. They attribute his conduct to personal motives, and their confidence in the good faith of foreign agents has been most seriously shaken.

After much discussion the enclosed paper was drawn up by the Chinese Government, and in order to mark that they could go no further, it was invested with the form of an Imperial decree, the form they adopt when discussion is closed. Whether, as they assert, they understood Mr. Lay to acquiesce in this arrangement or not I am unable to determine, and it is of little consequence, as it remained with Captain Osborn to decide how far he would consent to the modification of his understanding with Mr. Lay.

That officer shortly afterwards reached Peking. During his voyage up the coast incidents were not wanting to show him that his position would be one of more difficulty than he had been led to expect. He found that he would have to encounter the bitter opposition of a large section of the foreign communities, and the active hostility of the provincial authorities. Agents were employed at Shanghai to go on board his ships and to seduce his men, by offers of higher pay, if they would enter the service of the Governor of Keangsoo. He was obliged, in consequence, to discharge some of his men who became dissatisfied with the rates of pay assigned to them, and to remove his vessels up to Chefoo to prevent the disorganisation of his force. He felt that the efficiency of his squadron required not only that he should be freed from the control and interference of the provincial officers, but, further, that effectual steps should be taken to prevent them from offering employment to his men, otherwise his ships might be disabled at any moment. In addition to these difficulties in the provinces, he found, on his arrival at Peking, that the Chinese Government looked upon the flotilla as part of a scheme to place them in a position inconsistent with their dignity and independence of action, and therefore doubly indisposed to antagonise the provincial authorities in its behalf. He accordingly decided, after mature reflection, to abide by the terms of his understanding with Mr. Lay, and to call on the Chinese Government to declare whether they would ratify the agreement or not. On receiving a verbal refusal through Mr. Lay (no written communication having been addressed to him during the period of delay granted in his letter), Captain Osborn enclosed to me the documents with the accompanying letter. It was essential that a decision should be come to at once, as he held no commission, and his authority to enforce discipline among his men was liable to be called in question.

Thus far I had taken no part in the discussions between Mr. Lay and the Chinese Government. Indeed, I studiously avoided expressing any opinion on the proposals made to them, for I felt much embarrassment as to the answer I should be compelled to give if the Chinese Government put the question to me, Are we bound to ratify this agreement against our convictions? I foresaw, also, that if I were to attempt to extort their assent against their will, the question would become a political one, for the Chinese would certainly have consulted the other foreign Ministers, and, in spite of their wish to act with me in a friendly and large spirit, I could not expect their support in any attempt to impose this scheme upon them by menace. I therefore resolved to leave the matter to be arranged, if possible, by the Chinese themselves with their agent and Captain Osborn, and to protract, in the interest of the scheme, the suspense in which they were held as to my opinion and intentions.

During this period I had two interviews with the foreign board. In neither did they allude to the flotilla, and I imitated their reserve. Our conversation turned on the dangers arising from the employment of foreign adventurers by the local governors, and on the impossibility of foreign officers of character being induced to serve the Chinese by land or sea, unless they held formal commissions from the central Government, and unless they were secured against the caprice and jealousy of the provincial authorities. In fact, this was the line of observation most likely to induce the Government to accede to Captain Osborn's terms; for if they and the provincial governors had felt convinced that they would be deprived of the foreign element which has gained for them all their late successes near Shanghai, and would have to rely on purely Chinese resources, they would have had a strong inducement to agree for the moment to the conditions proposed.

So long as Governors can obtain on their own terms foreign officers and steamers officered by foreigners sufficient to repel the insurgents, it is idle to expect that the Government at Peking will undertake the organisation of an Imperial force either on land or on the sea, and thereby relieve local governors from the responsibility of maintaining tranquillity in their provinces, which is the established principle of Chinese administration. Of their reluctance to make this change in their system, we have abundant proof in the abandonment of foreign drill at Tien-tsin, in their refusal to engage, under contract, French drill instructors, or to accept the gratuitous services of officers whom the Russian Government offered to lend them for that purpose.

It was now, however, incumbent on me to interfere directly, and the first step I took was to inform the Chinese Government that I could not consent to hand over the ships to them without instructions from Her Majesty's Government. My reasons for taking the step were, that the ships were held as security by Captain Osborn for fulfilment of the terms agreed on by the men; that the latter were entitled to be sent home, and that it was not quite clear whether they were to be paid up to the time of their arrival in England or up to the 30th of August next. Moreover, these ships are not of a kind that the Chinese could manage, or that it would be safe to put in the hands of the class of foreigners who are on board the small steamers bought by the Governor of Kiangsoo (about ten in number), and which have proved so efficient in the operations near Soochow. On the other hand, it would not be safe to sell them on the coast, as they might fall into the hands of hostile Daimios in Japan, or be bought for employment as Confederate cruisers in these seas. The enclosed copy of a despatch from the Minister of the United States will show that he was alive to this danger; and I may add that M. Berthemy was equally of opinion that the flotilla should not be given up, as there was no means of guaranteeing to what purposes the ships might be turned. It struck me, also, that if the Chinese found that they could not have the ships without ratifying the agreements, they might, perhaps, be induced to reconsider their decision; and in order to throw away no chance of inducing them to accept the flotilla, and to put myself in as good a position as possible to deal with the pecuniary difficulties that would ensue from its rejection, I took advantage of the Prince's reluctance to face an unpleasant discussion, and declined the interview proposed by Wensiang unless the Prince were present.

Having sent me the inclosed despatch, they sought an interview with the Minister of the United States, Mr. Burlingame, upon whose friendly desire to arrange matters satisfactorily I could thoroughly rely. Before entering into the subject, he required them to state, distinctly, whether they had definitively resolved not to ratify the agreements entered into with Captain Osborn. They replied in the affirmative, adding that it was impossible for them, in the face of opinion in China, to take the direction of the flotilla out of the hands of the local authorities, or to ratify conditions which, to use their own phrase, would deliver them over, bound hand and foot, to Mr. Lay.

Mr. Burlingame, in three protracted interviews, argued the question at great length, in order to ascertain whether any feasible scheme could be hit upon which would meet their objections and enable the flotilla to act; but finding that the points on which they differed with Captain Osborn were such as to render a compromise impracticable, Mr. Burlingame advised them to state their reasons fully for not ratifying the agreement, to thank Her Majesty's Government and Captain Osborn for what had been done in their behalf, and to request me to have the vessels returned to England under Captain Osborn, to be there sold, the proceeds, after discharging all liabilities, to be remitted to the Chinese Government. This advice was followed to the letter, as your lordship will see by the enclosed despatch; and the Chinese, of their own accord, and without a suggestion from anyone, added that they wished Captain Osborn to accept 10,000 taels (£3,300) in consideration of the labour entailed upon him by this flotilla. To this letter I returned the reply of which copy is enclosed.

I think the arrangement proposed, in consequence of which the vessels are to leave China at once, is more advantageous to all parties than the one I originally suggested, for expense is thereby avoided, and the danger obviated of keeping a large number of men on the coast in a state of idleness, and subject to no sufficient authority, during the period that must have elapsed before instructions from England could have been received. Captain Osborn takes two vessels to India in the hopes of disposing of them there, and the rest will sail for England as soon as the necessary arrangements are made.

I cannot express too strongly my sense of the friendly and valuable assistance rendered by Mr. Burlingame in bringing about an arrangement which provided satisfactorily for all the interests concerned, and in such a manner as not to compromise those friendly relations which I am so anxious to maintain with this Government; and I think this incident illustrates the importance of adhering, in China, strictly to a just and fair line of policy. The belief that I, as British Minister, would respect the rights of the Chinese, and that I would not force the flotilla upon them from selfish political considerations, induced my colleagues to abstain from interfering while the question was under discussion, and thereby secured for the flotilla a deliberate and unfettered consideration on the part of the Chinese Government; and I am certain that this course was more favourable to the success of the scheme, had success been possible, than any other that could have been adopted. It appeared to me, also, that I should not have been justified in taking a more active part, for I had reason to believe that your lordship had no cognizance of the undertaking of so novel a character entered into by Mr. Lay with Captain Osborn; and the absence of instructions was to me a significant proof that Her Majesty's Government had no intention of being a party to, or responsible for, the arrangements under which the operations of the flotilla were to be conducted. Had the Chinese voluntarily accepted the squadron, the onus of the difficulties it would have encountered would have rested on the Chinese Government; but the burden would have been thrown on Her Majesty's Government by the Chinese, and with justice, had it appeared that this flotilla, exclusively British in its character, directed by British officers and agents, and imposed by British pressure, was acting under a Chinese flag, which the Chinese Government, contrary to its wishes, had been compelled to hoist on board the ships.

Moreover, the Chinese Government has latterly shown its inability or indisposition to carry out the various suggestions I made for strengthening the central power, of which the flotilla is only one, and it was evident that there was no disposition on the part of the Chinese to incorporate it into their system, so as to subserve the general purposes of police and revenue; but that, if forced to accept it, they would have directed it against Nanking, and would then have left it to be disorganised by the illwill and intrigues of the provincial authorities. Putting aside the consideration that Her Majesty's Government would not have assisted in the formation of the force had this been the only object contemplated, I must observe that such a course would have been full of danger to our trade.

In fact, this flotilla ought to have been designed to carry out the revenue laws, and to assist in suppressing piracy. Less formidable and expensive vessels would have been sufficient for these purposes, and they would have been at the same time, though in a subordinate degree, of much use in assisting military operations. Whereas, a purely war squadron was provided, with officers who looked to *actions d'eclat*, and not to the disagreeable and prosaic task of stopping smugglers and robber-junks. And further, if it was considered necessary that the flotilla should be taken out of the hands

Digitized by Google

of the Government who paid for it, and the exclusive control over its operations vested in its foreign commander and the foreign agent employed in procuring it, these conditions, of so singular a nature, ought to have been submitted and agreed to before the vessels were allowed to sail for China.

I owe it to Captain Osborn to state that he has shown great sagacity in appreciating the situation, and the most honourable spirit in the course he has pursued. In spite of the great pecuniary advantages secured to him he would not consent to any compromise which might hereafter place him in a false position, or involve his country in embarrassment.

I have only to request your lordship's indulgent consideration amid so many difficulties, and to beg that Her Majesty's Government will enable me to redeem my pledge to the Chinese Government, and that every assistance may be given in the disposal of the ships and their armament, in order that the loss entailed upon them may be as light as possible.

(Signed) F. W. A. BRUCE.

In this letter are the following inclosures :—

THE PRINCE OF KUNG TO SIR F. BRUCE.

(Translation.)

Peking, Oct. 25, 1863.

The Prince has to acknowledge the receipt of the British Minister's despatch of the 20th instant, on the subject of the purchase of a steam flotilla and armament by the Chinese Government.

Inasmuch as the Chinese Government, of its own motion, authorised the Acting Inspector-General Hart to purchase (vessels), the Prince therefore did not trouble the British Minister with any particulars in regard to the matter; but as the Prince is now in a receipt of a letter from the British Minister on the subject, it becomes His Highness's duty to put his Excellency in possession of the full particulars of the matter.

In the memorandum which Mr. Hart submitted in person to the members of the Foreign Board, last year, as to the officers, gunners, and crews of the steamers (it was proposed to purchase), he mentioned that it would be necessary to appoint a Chinese high officer to act with Captain Osborn in all matters connected with the control and management (of the fleet); he also mentioned that there should be selected 200 Chinese (Hoonan men), to serve as gunners; 200 Shantung men, as sailors; 100 Manchoos, as marines, and 50 Manchoos, to act as powder-monkeys. It appeared to the members of the Foreign Board, upon examination of his proposition, that it would be of advantage, and not injurious to China. It was not proposed that the people to be engaged for the steamers should consist wholly of foreigners, nor was there any intention of depriving the Chinese Government of the military authority. The Foreign Board, therefore, memorialised the throne, and received His Majesty's sanction and permission to carry out the proposal, and the Prince issued official instructions to Mr. Hart to proceed with the purchases, &c., in accordance with that sanction, stating clearly, moreover, in his letter, that it must rest with the Governors-General and Governors to appoint officers to the fleet.

Mr. Hart subsequently informed (the members of the Foreign Board) that, with reference to the purchase of vessels and guns, he had officially addressed the Inspector-General Lay, who was at that time in England, and had placed the whole matter in his hands, and that, therefore, it would be necessary for the Prince to issue to Mr. Lay a letter of authority to enable him to act.

The Foreign Board considering that it had Mr. Hart's memorandum before it, expected that, no matter who might be entrusted with the management of the affair by Mr. Hart, under the authority of the Chinese Government, he would still act in accordance with that memorandum. Mr. Hart afterwards informed the Board that his memorandum was only a general idea of the probable arrangement, and had reference only to the number of Chinese soldiers (to be employed); but that foreign officers, gunners, and crews, &c., would have to be engaged for service on board the vessels by Mr. Lay, to whom it would have likewise to be left to arrange the various agreements for the amounts of salaries, wages, &c., at the time of their engagement by him. The Foreign Board, considering that as the matter to be arranged remained the same, Mr. Hart having first been entrusted to proceed in the matter, and Mr. Lay afterwards having succeeded to the management, the mode of proceeding would, as a matter of course, not differ from Mr. Hart's original memorandum, accordingly prepared the letter of instructions to Mr. Lay, as Mr. Hart had suggested. Comparing that document with the letter which Mr. Lay, on his arrival in Peking, addressed to the Prince, inclosing an agreement in thirteen articles, it was found to differ very materially from Mr. Hart's memorandum. For instance, he proposed that all orders (to Captain Osborn) from His Majesty must pass through him (Mr. Lay), and that if conveyed through any other channel they could not be obeyed. As China would thus have spent several millions of revenue without obtaining an atom of power, his arguments (in support of the agreement) were rebutted, and in the place of it five other articles were drawn up, every sentence of which was discussed and settled in personal interviews with Mr. Lay and Mr. Hart, and without the slightest word to the contrary on their part. The money clauses for monthly expenditure were also one by one discussed and settled; and that being done the arrangements determined by the five articles and the money clauses were embodied in a memorial, and respectfully submitted to, and approved of, by His Majesty. Since that time all the moneys for monthly expenditure, and for purchase and equipment, have been regularly paid over according to agreement.

The regulations have been ratified, and large monthly payments made, it was expected that as soon as the vessels arrived they would accomplish their work, and that there would be no further discussion.

But now the Inspector-General, all at once turning his back on the Imperial decree, disobeys the five articles which had been discussed and settled in personal interviews, and had received the sanction of His Majesty, and brings up afresh the thirteen clauses which it was settled face to face should not be put in force, and insists upon their adoption. This agreement, in thirteen articles, is not only at variance with Mr. Hart's memorandum appended, but is different from the Prince's letters addressed to Mr. Lay and Mr. Hart, and is not in accordance with the intentions of his Highness when he gave his authority to Mr. Lay to enter into the various agreements, and hence the Foreign Board did not accede to the agreement in question.

Moreover, when it had been distinctly settled at the time in a personal interview that the five articles should be the rules of action, and when the Inspector-General had received a despatch announcing that these articles had been ratified by His Majesty, and when in accordance with these five articles he has already been paid over the money to cover expenses for, several months, how it is that he presumes to disobey an Imperial decree looking upon it as mere child's play?

The British Minister and Mr. Wade have on former occasions urged that Chinese military authority ought not to be delegated to foreigners. The principle for China and foreign countries is in this matter identical. And the Prince is still rejoiced to think of the surpassing discernment of the British Minister and Mr. Wade, of the justice and fairness of their remarks, and that they do not share the wish of the Inspector-General, who would insist upon imposing restrictions on the Chinese Government.

As the British Minister has addressed a despatch to the Prince on this subject, his Highness has not been able to avoid entering thus fully into particulars in his reply. If the British Minister will but weigh the matter impartially he will, without doubt, perceive plainly (the real state of the case, or, that the Chinese Government is in the right).

Inclosed are copies of Mr. Hart's memorandum of the letter of instructions to Mr. Hart, of the two letters to Mr. Lay, of Mr. Lay's letter to the Prince, inclosing the agreement, and a copy of the five articles discussed and agreed to in personal interviews with Mr. Lay; all which the Prince requests the British Minister carefully to peruse.

A necessary communication addressed to his Excellency Sir F. Bruce K.C.B., &c.

Tung-Chih, 2nd year, 9th month, 13th day (October 25th, 1863).

REGULATIONS PROPOSED BY MR. HART IN REGARD TO THE (CHINESE) OFFICERS, GUNNERS, SAILORS, &C., TO BE APPOINTED TO THE SEVEN STEAM-VESSELS.

1. An officer of high rank must be appointed to act with Sherard Osborn in all matters connected with the control and management of the fleet.

Seven additional officers (should) be appointed, the number to be added to hereafter as occasion may require.

These officers should not exceed thirty years of age.

2. Two hundred Hoonan men should be selected to serve as gunners. To be had at Hankow, as soon as the vessels arrive.

3. Two hundred Shantung men, to serve as sailors. To be had at Tung Chow as soon as the vessels arrive.

4. One hundred Manchoos as marines, and fifty Manchoo boys, to serve as powder-monkeys. To be had at Tientsin as soon as the vessels arrive.

The gunners, sailors, and marines must be selected between the ages of eighteen and thirty; the boys between the ages of fourteen and eighteen.

Several cooks will also be required on board each ship.

Of the seven vessels, it is probable that four will be large, and three small. Each large ship ought to have on board about forty gunners, forty sailors, twenty marines, and ten boys. Each small ship ought to have about ten gunners, ten sailors, ten marines, and three or four boys.

It is absolutely necessary that all the men appointed to serve on board the vessels should be strong and healthy.

The above is only a general idea of the probable arrangement. What the actual arrangement will be can only be known when the vessels arrive.

INSTRUCTIONS FROM CHINESE FOREIGN BOARD TO MR. HART.

(Translation.)

Peking, February 1, 1862.

The Foreign Board gives urgent instructions to Acting-Inspector-General Hart.

Mr. Hart stated, in a despatch received some time ago by this Board, that, after his arrival at Shanghai, he had had an interview with his Excellency Sieh (then Governor of Kiangsoo) on the subject of the purchase of foreign ships and guns, who had said that, if no more than 800,000 taels were wanted, the getting of the money would be a matter of no difficulty; and that if the Foreign Board in Peking would give an order on the subject, the Shanghai Customs could, within a period of four months, easily provide at least 200,000 taels.

Mr. Hart himself suggested that it would be sufficient if the Shanghai and the Canton Customs were each required to provide 200,000 taels: Foo-chow, 100,000 taels: and Amoy and Ningpo each 50,000 taels.

The Foreign Board thereupon wrote to his Excellency Sieh, to arrange the matter as proposed. This is all on record. But as there is at present a most urgent need for the guns and arms, on account of the recent loss in succession of Ningpo and Hangchow, in the Province of Che-Kiang, this Board has obtained from His Majesty a decree, commanding the Governor of Kiang-Soo, in conjunction with the Superintendents of Customs at Canton and Foochow, to provide funds immediately for the line of foreign steamers, and to commission officers to proceed with these, when procured, to the port of Ningpo, to cut off the escape of the rebels; and also commanding the Governors-General and Governors of Kwan-tung and Fu-kien to hire steamers for the same purpose. This Board has now to instruct Mr. Hart to lose no time in consulting with his Excellency Sieh on the immediate carrying out of these projects. Let there be no further delay when the steamers have been procured and equipped with arms, either of their Excellencies Sieh or Tseng (Governor-General of the Two Keang) will appoint officers to proceed in the vessels, first to Ningpo to oppose and exterminate the rebels, and after that place has been recovered to clear the river and go right at Nanking. With such steamers as these will be we may hope in a given time to see that little plague extinguished. As it is feared that the land-route is not at present quite free and open, a duplicate copy of this despatch is being sent by steamer.

Tung Chih, 1st year, 1st month, 2nd day (February 1st, 1862).

MR. LAY TO THE PRINCE OF KUNG.

(Translation.)

June 29, 1863.

Sir,—I have the honour to acknowledge the receipt, on the 15th of January, 1863, of the letter of instructions furnished to me by your Imperial Highness, and to report that, in conformity therewith, I engaged in England Captain Sherard Osborn to act as Commander-in-Chief of the naval force there organised; and that in accordance with your instructions

Digitized by Google

in which you drew my attention to the three important matters, namely, the purchase of vessels, guns, powder, coal, &c., the engagement of officers and crews, together with the drawing up of every description of agreement, and the setting apart a guarantee fund in order to meet the claims for salaries, wages, &c., I entered into an agreement, in thirteen articles, with Captain Osborn. The important provisions of this agreement are :—

First. That Captain Osborn is an officer under the orders of the Foreign Board, from which he must receive all orders and instructions, so that he may act in concert with the Governors-General and Governors.

Second. That he must have authority and control over all steamers the property of native guilds as long as they are in the employment of the Emperor of China. This is necessary because the men in charge of these vessels are all foreigners, who, under pretext of being in Government employment, claim exemption from all supervision, and then furnish supplies to the rebels, to the very serious detriment of the public service. Moreover, it is a fact that steamers owned by Chinese subjects do, under cover of a foreign flag with which they stealthily provide themselves, engage in smuggling and every kind of illegal practice.

Third. Captain Osborn and myself agreed that there must be provided beforehand, and deposited in a foreign bank, a sum of money about sufficient to cover the pay and maintenance of the force for four years, so as to satisfy Captain Osborn and the officers and men that their pay would be punctually paid, it being apprehended that the pay would not be forthcoming, which might lead to refusal to work on the part of the crews; therefore this arrangement was made. In the meantime we agreed that, until the arrival of the men in China, the vessels and their equipment would be the security for the claims of the force.

I have the honour to submit to your Imperial Highness a copy of the agreement in thirteen articles translated from the original English.—I have, &c., (Signed) H. N. LAY.

THE PRINCE OF KUNG TO SIR F. BRUCE.

(Translation.) Peking, November 2, 1863.

The Prince of Kung makes a further communication in reply on the subject of the purchase of the steamers by the Chinese Government.

As Captain Osborn purposes disbanding the entire force which he has under his command, it is the duty of the Prince of Kung to set forth (beforehand), clearly and in precise terms, the reasons why the Chinese Government has not been able to accede to the agreement in thirteen articles entered into between Mr. Lay and Captain Osborn.

1. Article 4 of that agreement runs as follows :—"Captain Osborn undertakes to act upon all orders of the Emperor which may be conveyed direct to Mr. Lay, and Captain Osborn engages not to attend to any order conveyed through any other channel."

Now, as Captain Osborn is not a subordinate of Mr. Lay's, why should it rest with Mr. Lay to transmit the orders which Captain Osborn can alone obey? The Prince's letter of instructions to Mr. Lay only stated that when the purchase and equipment of the vessels should be completed they must proceed to Shanghai, there to await orders for their distribution. There was no such language in it as that the commander of the vessels should receive his orders from Lay, and through no other channel. If that were the case then China would be placed completely in his (Mr. Lay's) hands. The Prince's letter of instructions had no such intention as this. For these reasons (the 4th Article) cannot be acceded to.

2. Article 5 runs as follows :—"Lay, upon his part, engages to refuse to be the medium of any orders of the reasonableness (or practicability) of which he is not satisfied." Now, in regard to orders that could not be carried out, Captain Osborne could well have consulted with the Chinese high officers (on the spot); but if it were as (this article) proposes, then the Chinese high officers could hold no communication with Captain Osborn, and thus important operations would be seriously impeded. Therefore, this article could certainly not be agreed to.

3. Article 10 provides that "Mr. Lay must, in addition, procure a sum of money sufficient to cover salaries, wages, and other expenses for four years. For the present, while in England, the vessels and their equipments must stand as security (for all claims)."

Now this article shows that Mr. Lay cannot trust the members of the Foreign Board, how, however, can the Prince so far trust Mr. Lay as to hand over to him, a single individual, such a large sum of money? Moreover, China has never followed such a rule as to pay four years' salary beforehand. (This article) for these reasons cannot be agreed to.

The above three articles are not only disadvantageous to China, but do not accord with the (Prince's) original letter of instructions. As for the less important objectionable points (in the agreement) it is unnecessary to point them out one by one.

The Prince and the members of the Foreign Board have seen that the said agreement in thirteen articles contains provisions very much at variance with the object which the Chinese Government had in view in the purchase of the vessels; and now that Captain Osborn is about to take home and disband the force which he has brought out, the Prince has to express his sincerest thanks to the British Government for its friendly intentions in allowing the equipment of the vessels, and in granting special permission to officers to come to China. His Highness must also thank Captain Osborn for all the trouble to which he has been put in procuring the fleet and in bringing it out to China. The Chinese Government will, as a matter of course, pay to Captain Osborn and to all his officers and men their salaries, wages, &c., and all their miscellaneous expenses up to the day of their arrival in England; and, in addition, will present 10,000 taels to Captain Osborn as a recompense for the (additional) trouble (to which he will be put). All these moneys to be given out of the sum that will be realized by the sale of the vessels.

The Prince would also request the British Minister to be so good as to suggest an effectual method by which the money spent in the original purchase of the vessels, guns, and equipments may be refunded to the Imperial Treasury of China.

As these vessels are not to be in the service of the Chinese Government, the Prince has also to request the British Minister to withdraw and cancel the Chinese flag at present used by them.

As the British Minister has already read the Prince's original letter of instructions to Mr. Lay, his Highness encloses herewith, for his Excellency's perusal, a more particular and clear explanation of the important points in that letter.

A necessary communication addressed to Sir Frederick Bruce, K.C.B., &c.

Tung-Chih, 2nd year, 9th month, 21st day (Nov. 2nd, 1863).

SIR F. BRUCE TO THE PRINCE OF KUNG.

Peking, Nov. 6, 1863.

Sir,—I have the honour to acknowledge the receipt of your Imperial Highness's despatches of Oct. 25th and Nov. 2nd, enclosing papers connected with the steam flotilla, and stating the reasons which have weighed with your Imperial Highness in declining to ratify the proposed agreement.

Your Imperial Highness will have observed that I have maintained the strictest reserve while this question was under discussion. It was for China and China alone to decide for herself on a matter so intimately connected with her internal administration, and I should have acted contrary to the spirit in which I am instructed to conduct the relations of Great Britain with China, had I endeavoured to press its acceptance against the convictions of your Royal Highness, after the long and full discussion the subject has undergone. The British Government, in the belief that this scheme had met with your Imperial Highness's approval, had placed ships, officers, and men at your disposal; but it certainly did not intend to force them on your acceptance, in the event of your deciding that the conditions on which alone this force could act were such as you could not agree to. I shall not therefore discuss the arguments advanced in your Imperial Highness's despatch, on which it is not my province to pronounce any opinion, and I shall confine myself to expressing my sincere regret that the details of this scheme were not communicated to your Imperial Highness before the expedition left England, as much expense and embarrassment would have been thereby avoided.

My duty in this matter is to assist your Imperial Highness as far as possible in finding a way out of these difficulties, and I have much pleasure in acknowledging the just and liberal spirit in which your Imperial Highness is disposed to treat the claims of the officers and men engaged to serve in these vessels. A question may arise on the contracts entered into with these men as to the date up to which they are entitled to be paid, viz., whether up to the 30th of August of next year, or only up to the time of their arrival in England. This question I have no power to decide; but as I am anxious that the Chinese Government should be put to no unnecessary expense, I have instructed Captain Osborn that he is to take the opinion of a competent legal authority on the point, and to be guided by it. He is also to dispose of the vessels on the most advantageous terms, and remit the balance, after payment of expenses, to the Chinese Government. I can assure your Imperial Highness that you may have full confidence in him, and that after the handsome manner in which he has been treated by your Imperial Highness, no effort on his part will be wanting to justify it.

As there may be some difficulty in providing the funds necessary for the winding-up of this affair, I will instruct the Consuls to advance what may be required out of the forthcoming payments on account of the indemnity, the sum thus advanced to form a lien on the ships, and to be repaid out of the proceeds of the sale. I feel assured that Her Majesty's Government will appreciate the considerate spirit in which your Imperial Highness has acted, and will willingly assist Captain Osborn in carrying out his instructions.—I have, &c.,

(Signed) F. W. A. BRUCE.

MR. BURLINGAME TO SIR. F. BRUCE.

Peking, November 7, 1863.

Sir.—When the Chinese Government refused the doings of its agent, Mr. Lay, and there was nothing left for Captain Osborn but to dissolve the force of the flotilla—the question was, how could it be done with safety. I feared that the ships might fall into the hands of the Confederates, who are supposed to have agents in China, and then there was the common apprehension from lawless men on the coast in the interest of the Taipings as well as from pirates, and the desire of the Daimios in Japan to procure steamers at any price.

It was clear that the Chinese could do nothing of themselves with the steamers, and that unless something were done by you, they would certainly fall a prey to one of these several dangers. In my solicitude, on account of the rebels in my own country, I made an earnest protest against the delivery of the ships to the Chinese. You responded in that spirit of comity which has ever distinguished our relations, that the ships should be taken back to England, and that no effort on your part should be spared to prevent them from taking a direction against the interests of my country.

Though subsequent events made it necessary for the ships to take the direction indicated by the desire of the Chinese themselves, still I should be wanting in appreciation of your conduct did I not mark it with my most heartfelt thanks, and at as early a period as possible bring it to the attention of my Government.—I have, &c.,

(Signed) A. BURLINGAME.

No. 24 is from the Foreign-office to Capt. OSBORN, acknowledging his letter; No. 25 is from Sir F. BRUCE to Earl RUSSELL, as follows :—

Peking, November 27, 1863.

My Lord,—As I anticipated from the language of the Chinese Government, the failure of the flotilla scheme has led to their dismissal of Mr. Lay. This step is in accordance with their system, for they hold an *employé* responsible for the management of any business confided to him, and reward or degrade him according to the event.

At the same time they have acted fairly by him. They have allowed him 3,000 taels (£1,000) a-month for the expenses of his establishment during his residence at Peking; they allowed him salary at the rate of £8,000 a-year from the 1st of May, 1863, to the month of March next, by which time his accounts are to be made up, and they present him with 6,000 taels (£2,000) as a gratification on leaving their service. I do not think that more could have been demanded, as the high salaries given to the Custom-house *employés* were fixed on the ground of the uncertainty

Digitized by Google

of the duration of the employment, and it is impossible, in my opinion, to maintain that Mr. Lay's dismissal is a capricious act on the part of the Chinese, or that they had not fair ground to complain of his conduct, as the cause of the pecuniary loss which this Government has suffered, and of the censure to which the members of the Foreign Board are thereby exposed. I do not admit that a man who serves the Chinese as an agent is entitled to exceed his authority, and if he does exceed it he must do so at his own risk, and take the consequences.

Mr. Hart is appointed in his place, and I trust that the change will make the Custom-house work more smoothly. He will reside on the coast, coming here when sent for on business, an arrangement which was found to work satisfactorily during Mr. Lay's absence in England. It is very desirable, with a view to the maintenance of the Custom-house administration, that the head of it should not be permanently at Peking, for if he is he is supposed to act as the adviser of the Chinese in matters not appertaining to his office, and thereby incurs the odium of the errors they commit.—I have, &c., (Signed)

FREDERICK W. A. BRUCE.

There are inclosures from Prince KUNG dismissing Mr. LAY, which will be found in our issue of the 27th of January. In addition to this is a despatch from Mr. LAY to Prince KUNG as follows :—

(Translation.)

Nov. 20, 1863.

The sum of £251,960. 2s. 1d. was transmitted to me in England, in bills at six months (I will calculate with Mr. Hart whether this sum in Chinese money corresponds with the amount of the bills he transmitted). I will give Mr. Hart minute accounts as to how this money was expended, and also a statement of the loss suffered in consequence of my having to cash the bills before they came due.

2. When I came to Shanghai I drew on the Shanghai Customs for 120,000 taels, but as the Customs had no money in hand, I made arrangements for a loan to that amount on their account, the terms being that the sum should be repaid with interest by the Shanghai Customs within twelve months. Afterwards, as the Amoy Customs sent up an extra sum of 20,000 taels, I diminished the amount of the loan to 100,000 taels.

(The reason why this money was required was as follows:) When I was in England I received frequent letters from Mr. Hart, at Shanghai, urging me to hurry out the ships, and accordingly (with a view to save time), I bought on credit in England the stores and equipments that were still required, together with the store ship and despatch boat, stipulating that the prices should be paid as soon as they reached Shanghai. My first intention was to use (for this purpose) the Customs Guarantee Fund of 120,000 taels deposited at Shanghai, but as I feared that this sum might have to be carried to the fund set apart for the purchase of the steamers (Mr. Hart having told me that there was still a considerable debt under that head), I was compelled to ask permission to borrow 120,000 taels; I found, however, afterwards, that it would be some time before the stores, &c., would arrive, and that I could apply [the Guarantee Fund] as proposed. For this reason the 120,000 taels were never drawn, though I still retained in my hands the authority to do so, in order to be prepared to meet any other expenditure which Captain Osborn might have to incur. I diminished the sum to be borrowed, however, by 20,000 taels, inasmuch as the Fukhien Customs sent in to the steamer fund an extra sum to that amount. I shall ascertain, in conjunction with Mr. Hart, how much the Shanghai Customs has already paid (to the loan account). As this sum of 100,000 taels has not been drawn or made use of, I shall return to the Foreign Board the documents connected with the transaction.

3. Previous to my departure from England, when I was not aware that certain sums or money had been sent from China, I gave a bond for £50,000 to the Oriental Bank, in order that Captain Osborn might have a sum to draw upon. Afterwards, on my arrival in China, I found on inquiry that Mr. Hart did not know how much money had been sent home, the reason of his not knowing being that M. Meritens (Commissioner of Customs at Foo-chow) had not reported the amount borrowed (and sent home) by him; accordingly, after my arrival in Peking, I requested authority to draw from the Customs the sum of 150,000 taels. (After I left England) Captain Osborn received the money sent home from China (to wit, the sum borrowed and forwarded by M. Meritens), and did not draw upon the £50,000 for which I gave the bond. The 150,000 taels has been apportioned between the different Customs, and paid up in the following manner:—

	Taels.		Taels.
Canton, to pay ..	30,000	has paid	30,000
Swatow „ ..	20,000	„	20,000
Foo-chow „ ..	30,000	„	10,000
Amoy „ ..	20,000	„	10,000
Shanghai „ ..	20,000	„	20,000
Kiu-kiang „ ..	30,000	„	..
Total ..	150,000		90,000

These are all the sums of the payment of which I have been informed up to yesterday, Nov. 19th, 1863, for any other sums that may have already been paid in by the Customs, and of which information has not reached me, I shall account separately.

4. The allowance for the maintenance of the flotilla, at the rate of 75,000 taels per month, will amount, for the three months commencing Aug. 1 and ending Oct. 31, 1863, to 225,000 taels. This sum has been apportioned and paid up in the following manner:—

	Taels.		Taels.
Canton, to pay ..	30,000 ..	has already paid	10,000
Swatow „ ..	15,000 ..	„	5,000
Amoy „ ..	18,000 ..	„	6,000
Foochow „ ..	102,000 ..	„	34,000
Kiu-kiang „ ..	30,000 ..	„	10,000
Shanghai „ ..	30,000 ..		—
Total ..	225,000	Total paid ..	65,000

The amounts received for the first of the three months have already been reported (as above) and sent in, but I have not received the second or third months' allowances. If any further sums have been paid over on this head, I shall account separately for the sums so paid with Mr. Hart.

5. There is deposited at Shanghai a (Customs) guarantee fund of 120,000 taels. This sum was deposited in the Oriental Bank, from April 1861, the date of my departure for England, to April 1863, and 12,000 taels interest at five per cent. per annum has accumulated thereon. Prior to April 1861, owing to the unsettled state of affairs, the sum was only temporarily lodged, and did not produce any interest; this sum, principal and interest, I shall return immediately to the Chinese Government.

6. The cost of the vessels, guns, and warlike stores, and all salaries, wages, and expenses incurred up to the arrival of the flotilla in China, will be paid out of the item of 1,070,000 taels.

7. The entire cost of maintaining the flotilla after its arrival in China will be charged against the monthly sum of 75,000 taels, provided by the Customs, beginning at August 1st and ending October 31st 1863.

This sum of 75,000 taels was originally intended to cover all expenses for salaries and wages, for ammunition, &c., for stores and coal, for rewards and compensations for wounds, and for every kind of unforeseen expenditure. As, however, the flotilla has never come into action, there must be a large balance of this allowance for the three months to be returned to the Chinese Government.

8. Of the 375,000 taels allowed for taking the flotilla home, Mr. Hart and myself will account for 162,000 taels (being the estimate for salaries and wages), according to the accounts rendered by Captain Osborn; Sir F. Bruce and Captain Osborn will account for the remaining 213,000 taels, being the sum estimated to cover miscellaneous expenses.

No. 26, the last, is from Earl RUSSELL to Sir F. BRUCE, stating the approval of Her MAJESTY'S Government of his conduct of this affair.

We think it will be admitted that the following conclusions are evident :—

1st. That Mr. LAY has most completely mistaken his position and authority. 2nd. That the Chinese Government have acted consistently throughout, and have behaved with more than Oriental liberality, considering the loss they will sustain, which may be roughly estimated at £100,000. 3rd. That Capt. OSBORN was entirely misled by Mr. LAY in the first place. That finding the Chinese Government wished to make a mere tool of him to execute their cruel policy through the Governors of provinces, he saved our Government and our countrymen from such disgrace (similar to Soo-chow) by a bold and honest line of conduct in which his officers nobly seconded him. 4th. It is discernible in Mr. BRUCE'S despatches that he did not at all relish the idea of having the Inspector-General resident at Peking with equal or perhaps superior advantages to himself. 5th. Mr. LAY and Capt. OSBORN retire from the Chinese service with handsome accumulations.

CAPTAIN OSBORN'S DEFENCE OF MR. LAY.

(To the Editor of *The Times*.)

Sir,—I can dispose of that part of the charge brought against Mr. Lay by Prince Kung, to which you allude in your leading article of to-day.

I was present at a conference of the Foreign Board in Peking, when, in reply to a charge that Mr. Lay wished to arrogate too much authority, Mr. Lay distinctly told Wur-seang, the Prime Minister, that if the clauses Nos. 4 and 5 of our agreement were considered objectionable, they could be erased, but that, of course, some responsible European must be nominated, who could translate Imperial edicts, and vouch for my acts being in accordance with the Emperor's wishes, and consonant with European ideas of humanity and justice.

I believe the real charge against Mr. Lay, though not expressed, is that he was not artful enough to take advantage of our long friendship and my faith in him to induce me to enter upon such an undertaking without any pledges whatever. He would then have put me into exactly the same false position as Colonel Gordon has been thrust by his friends. I could not have retired. I must have acted under the Foutai, and fulfilled the prophecies of wise men who fancied I and my companions were merely hired as Imperial executioners.

I have just now quite as much in hand as one man can well do, and Mr. Lay is well able to show his own case; all I ask is, reserve your judgment until he arrives in April.

For my own part, I do not question the right of the Emperor to refuse to ratify the engagements of his agent. But I maintain that the agent, a man tried by ten years' arduous service, acted in perfect good faith, and in the best interests of China and of England, and not with any petty views of self-aggrandisement; and that for what he did he had a good authority, which lies within a nutshell. I enclose it, it bears the seal of Prince Kung's office, and it is a Chinese translation of clauses in English, drawn up by one of our own lawyers :—

"I therefore address this despatch to the Inspector-General, and transfer the management of the affair into his hands.

"There are three important points:—

"1. The purchase of the vessels, guns, gunpowder, coal, and the miscellaneous articles for the use of the vessels.

"2. The engagement of officers, gunners, and seamen, and others for services in the vessels; and the arranging the terms and conditions of every description of agreement.

"3. The retention, as proposed, of a sum of money to meet the salaries and wages that may be settled by the agreements, and also to provide for the payment of compensations and other items in time to come.

"The above three points we leave the Inspector-General to dispose of as, in his discretion, he may see fit."

Digitized by Google

Upon less authority than this I have reason to believe that even treaties have been concluded with the Emperor of China.—Yours faithfully,

London, March 5. SHERARD OSBORN, Captain.

THE ORDER IN COUNCIL REVOKED.

The *London Gazette* contains an Order in Council revoking the order made on the 30th of August, 1862, permitting Horatio Nelson Lay and Captain Sherard Osborn, R.N., to enter into the service of the Emperor of China, and to engage and enlist British subjects in the same service, &c.; and also revoking the order made on the 9th of January, 1863, permitting all military officers in Her Majesty's service to enter the service of the Emperor of China. The revocation is to take effect, so far as relates to acts to be done in Great Britain or Ireland, as from the 1st of March, 1864, and so far as relates to acts to be done in China or elsewhere than in the United Kingdom as from the expiration of three calendar months after that date.

From PENANG.—At LONDON: Nipisiquit, Rockliff, Teesdale. A FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

There has been but little doing lately in shipping; high rates are asked for British vessels, consequent upon the risk incurred by the employment of American, Danish, or German bottoms; very high rates of insurance being demanded for these latter vessels. Outward freights continue very quiet, there being little activity in exports, and low rates are readily accepted.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 to £39, and £1. 17s. 6d. For Shanghai: £48 to £52, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 to £26, and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Jubilee has been accepted by the Admiralty for the conveyance of Government stores to Hong Kong.

At ASCENSION.—Jan. 8, Tasmania, Jonker, from Batavia, for Amsterdam; 14, Mexicana, Collins, from Amoy. Off Ascension—Jan. 12, Ravensbourne, from Japan for London; 13, Edinburgh from Shanghai,

for London; 24, G. D. L. J., from Shanghai for Liverpool; 26, Sarah, and Emma, from Shanghai, for Liverpool.

At ST. HELENA.—Jan. 11, Palmerston, Peters, from Shanghai, and sailed from London; 13, Robertus Hendricus, Mulder, from Batavia, and sailed 14 for Amsterdam; 14, Luconia, Admiraal, from Probolingo, and sailed for Amsterdam; 15, Theodora Machtilda, Wyck, from Patjitan, and sailed 16 for Amsterdam.

Off ST. HELENA.—Jan. 12, Melbrek, from Hong Kong.

At TABLE BAY.—Jan. 7, Mary, Silversparre, from Batavia, and sailed 11, for Falmouth; Camoes, Marques, from Macao, and sailed, 9, for Havana; 18, Jane and Isabella, Cole, sailed for Singapore; 15, Leila, Rapson, for Singapore.

At ALGOA BAY.—Jan. 16, Melrose, Huson, from Amoy, and sailed, 17 for Boston.

CASUALTIES.

Teneriffe, Feb. 12. The Jane E. Williams, Young, of and from Liverpool for Shanghai, which took fire Feb. 4th, ninety-three miles from this island, and was abandoned next day, was afterwards taken in tow by an inland vessel, but went down within sight of the port of Orotava.

The Fantasie, Forbeck, from Batavia to Falmouth, which put into St. Helena Dec. 30, was leaky. Having been trimmed by the head, and the leak found and stopped, she proceeded on the 1st Jan., and arrived at Falmouth Feb. 29.

The Amberwitch steamer, from London to Bombay, with fittings for the Persian Gulf cable fleet, arrived in Table Bay on the December 26. On the 27th, during a strong south-east gale in Table Bay, she parted both cables, and before she could be brought up had run foul of the barque Hastings, carrying away her jibboon, &c.

The Wild Deer, Cobb, from Liverpool for Shanghai, put into Lisbon, Feb. 27, with foremast head damaged, and loss of foretopmast, foreyards, sails, &c., and with main top mast and jibboom sprung.

Intelligence has been received from Batavia, under date Jan. 27, of the total loss on Sandalwood Island, Nov. 11, of the barque Edith Pepper, from Liverpool to China, with coals. Six of the crew drowned. Also that the Glaramara (barque), from Foo-chow-Foo to London, with tea, grounded on some rock in Sunda Straits, and had put in there to repair. She had been surveyed and would have to discharge and be docked.

R. KELWAY, Proprietor.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 „

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

THE

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

ESTABLISHED 1861.

Directors.

ELIAS MOCATTA, Esq.
C. F. PICARD, Esq.
Mr. Sheriff CAVE.
MOSES MOSES, Esq.
THOMAS B. YULE, Esq.
JOHN ROGERSON, Esq.

Underwriter.

PHILIP SECRETAN, Esq.

REPORT of the DIRECTORS for PRESENTATION to the SECOND ORDINARY GENERAL MEETING of SHAREHOLDERS, to be held at the LONDON TAVERN, on THURSDAY, the 25th day of February, 1864.

The Directors submit to the Shareholders the Accounts and Balance Sheet of the Company for the past year, and have much pleasure in being able to report that the business has been of a most improving and satisfactory character, and fully equal to their expectations.

The Accounts are annexed to the Report, and have been duly examined and verified by the Auditors.

They show, that after having paid all Claims for Losses, Averages, and Returns, Office Charges, and all other Expenses to 31st December last, there remains a balance of £67,274. 16s. on Insurance and Interest accounts.

The two years over which the Company's operations have extended, not being sufficient to afford a safe basis for the calculation of profits, the Directors therefore recommend that £3,339. 5s. only be applied in payment of Interest on Capital, being at the rate of £5 per cent., and the remainder, £63,935. 11s. carried forward in usual course.

In accordance with the Deed of Settlement, the two following Directors retire by rotation :—ELIAS MOCATTA, Esq., and MOSES MOSES, Esq. These gentlemen, being eligible, offer themselves for re-election.

By Deed of Settlement, also, the Auditors require to be appointed annually, and J. H. WOOD, Esq., and J. NOTMAN, Esq., being eligible, offer themselves for re-election.

The Directors have also much pleasure in reporting that, in addition to their several Agencies abroad—where Losses and Claims on Policies issued by the Company are made payable—they have appointed Messrs. BAINBRIDGE, BYARD, GAIR and Co. to be their Agents at Madras.

The following is now the completed List :—

CALCUTTA	GRANT, SMITH, and Co.	SINGAPORE	CUMMING, BEAVER, and Co.
BOMBAY	RITCHIE, STEUART, and Co.	HONG KONG	JOHNSON and Co.
MADRAS	BAINBRIDGE, BYARD, GAIR, and Co.	SHANGHAI	JOHNSON and Co.

By Order,

JOHN SCOTT, Secretary.

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.—Thousands of persons who have wrought wonderful cures by means of these remedies have extolled them as they deserved, but have not given them one word of praise more than they richly merited. An attentive perusal of the "directions" accompanying Holloway's medicament will enable any invalid to overcome his troubles, whether it be visible outwardly or concealed inwardly. Sores, skin diseases, inflammations, erysipelas, chest complaints, as well as many disorders of the head, heart, stomach, liver, kidneys, and bowels may be radically removed by Holloway's preparations. They have proved the greatest blessing to suffering humanity, because they can be obtained everywhere, are moderate in cost, safe in action, and tend to strengthen, not to weaken, the system.

Cobbett, Edward Mellish, Mr. and Mrs. J. H. Wright, Mr. Fearon, Commander J. Ward, R.N.—To Shanghai: Mr. L. S. Dunlop, T. C. T. Klein.—To Calcutta: Messrs. T. W. Syme and G. Ross, Mr. J. C. Pughe and nephew, Mr. and Mrs. Allen, infant, child, and ayah, Lieut. W. F. J. Wallace.—To Ceylon: Messrs Crowe, R. Crowe, and W. Allen.—To Alexandria: Rev. A. P. Black. From Suez.—To Hong Kong: Mr. Grobien.

Per P. and O. steamer, Syria, March 12, from Southampton.—To Shanghai, via Bombay: Messrs. Nimmo and Stevenson. From Marseilles, March 20.—To Singapore, via Bombay: Mr. W. Steel. From Suez.—To Shanghai, via Bombay: Mr. Cornes.

Per Queen of Nations, for Shanghai.—Capt. Bridgeman, Chas. Keley, and T. Andoe.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The Japanese Government have again raised the question of closing the port of Yokohama to foreign trade. On the 4th January, an interview took place between some officials deputed by the Tycoon and the British Charge d'Affaires, which it is to be hoped will have the effect of thoroughly convincing the authorities that the treaties they have solemnly entered into must be carried into effect in their entirety. As we hear still more of the Embassy, and of preparations for its departure, we may further hope that the impressions they will carry back from London and Paris will bear the same unswerving determination to resist all impediments thrown in the way of the extension of European commerce.

The meeting in question was by appointment with the Japanese Ministers, but at the hour named (reports the *Japan Herald*) two Vice Ministers, Tachibana Idzumono no Kami and Inaba Hiobuzeno, came accompanied by three Governors. They commenced by stating that they had sought the appointment to inform the Charge d'Affaires of the intention of their Government to send an Embassy to Europe; thus having stated their object they would leave the Governors to explain the resons of the intended going forward of the Embassy. His Excellency consented to hear what the Governors wished to say, but gave the Ministers clearly to understand that what was said by the Governors in their presonce would be taken as coming from themselves.

The Governors then referred to the commencement of intercourse with foreigners under treaties, dating from the time of Commodore Perry, and stated that at that time they were only consented to as an experiment, and that if that experiment was not satisfactory, it could be changed. Colonel Neale wished to know if they desired him to understand that there was any formal compact entered into to that effect? to which they replied "No, but it was so verbally understood." To which again Colonel Neale answered, that at least there was nothing of that sort so far as the British treaty was concerned.

The Governors then commenced to speak much of the (presumed) hostility of the people of Japan towards foreigners, a position, however, which was immediately combated by Colonel Neale, who admitted that there might be some feeling of hostility on the part of some of the two-sworded people, and even of some of the Daimios, but that that feeling was general on the part of the people of Japan he believed not to be the fact. The cue once adopted, the Governors were not, however, inclined to drop reference to it. They reiterated the statement, and said that owing to this hostility of the people to foreigners, and consequently to the Tycoon's Government, the greatest difficulties were created, and complicated by assaults and deeds of violence, which were only to be met by the shutting of the port of Yokohama, and the leaving open to trade only the two ports of Nagasaki and Hakodadi. That the Government had therefore determined upon this, and as the British *Charge d'Affaires* and the Ministers of other countries were not empowered to settle this important question, the Government had resolved to send the Embassy to Europe.

Colonel Neale observed that all nations were entitled to send forward embassies whenever they chose to do so, but reminded the Ministers that in the interim it would be his duty, and was certainly his intention, to see to the performance of all the treaty obligations. Colonel Neale then took occasion to refer to the recent obstructions to the free commerce between the Japanese merchants and foreigners, and alluded to the fact of some eighteen large merchants' houses having been lately closed, and also to the fact of the restriction to the supplies of silk coming down to Yokohama. This the Governors attempted to make out was because of the native merchants losing so much money by their trade, and because of their fear of lawless characters, Loonins, and others. This position was also denied by Colonel

Digitized by Google

Neale, who knew full well that, on the contrary, the merchants rapidly made wealth by their trade with foreigners, and as to the other alleged reason, the interference was stated to be not by lawless characters, but by the officials themselves.

After much and prolonged conversation on these points, Colonel Neale gave the Ministers clearly to understand, in unmistakable language, that, from whatever cause arising, the Government had better see to it that these matters of complaint cease to exist, "for," said he (or in words to that effect) "if you stop our trade we will stop yours; if you stop our supplies we will stop yours." He desired particularly that this determination on his part should be explicitly represented to the Tycoon's Government, for on this much of great importance might arise. This seems rather to have awakened their serious attention, for they quickly asked—"By stopping our trade, do you mean our import trade with foreigners?" Colonel Neale soon relieved their minds of this understanding, by making them comprehend that what he meant by stopping their trade was by the use of the forces at his command to stop their own internal commerce, and the transit from place to place of those interchanges of commodities which were necessary for the people; and in respect to the stoppage of supplies, if such measure was taken, we should have ourselves to obtain them in the manner most efficient through their own country.

Our contemporary observes on the above—"The whole interview, as it seems to us, was nothing more than another scene of the old drama of Japanese procrastination—a new move in the old direction, in the hope that some chapter of accidents might turn up by which an advantage—not defined even in their own ideas—might be evolved. From each of these interviews, however, which they so pertinaciously seek, they have to retire with a more settled conviction that the time has now passed when shifting and quibbling laments of the effete character of their own Government will answer any purpose, and that they have only afforded another opportunity for the British Chargè d'Affaires to assure them of the unswerving determination with which the rights of the great nation he represents will be maintained by him. We do not pretend that the above is a full account of all that took place at this conference, which lasted, we believe, upwards of four hours, but, so far as it extends, we believe it to be a correct precis, in general terms, of what took place."

Meanwhile the Japanese are availing themselves of the benefit of foreign intercourse to purchase steamers—and much is hinted of this being done with a view to military purposes. But it is forgotten that Japan is altogether an island empire,—that the residences of the territorial grandees are on the shores of the ocean inlets that indent the coast; and that one cause of quarrel between Satsuma and the Tycoon was that the latter insisted on his powerful vassal travelling by land, even though he was master of a commodious steamer that would take him to his castle in as many days as the land journey would take weeks. The Tycoon, however, has joined the innovators, for he has purchased the *Yangtze* steamer for $145,000, for the special purpose of conveying him to Kioto. In addition to the above, the *Ayrshire Lass* has been sold by Messrs. Glover and Co., at Nagasaki, to Satsuma for $30,000; and the *Shunli*, a British steamer of 650 tons, to the Governor of Nagasaki for $100,000.

An exchange has been effected between the Tycoon and Matzdaira Yamato-no-Kami, by which the Tycoon acquires the newly erected castle of Yamato, at Kawagoi, situated about 10 ri from Yedo, approachable by the Yedo-gawa, and the Prince receives the Tycoon's new castle at Maibashi.

Intelligence had been received at Yokohama of a large fire at Ossacca. It is described as of so extensive a character as to have been raging for three days and nights. Further particulars were not yet to hand. We have nothing more by the present arrival of the fire at Yedo, except that a doubt is created whether the Tycoon's palace was included in the conflagration, which, it will be recollected, was insinuated to have been an act of political incendiarism. The *Herald* says, on the contrary, that the fire was in a quarter called Echingo-yah, in the vicinity of the Niphon bashi, inhabited principally by the first-class merchants, of whose houses a great number (we have heard upwards of 200) have fallen sacrifice to the flames.

At a meeting of the British Episcopal Church Society on the 29th December, Mr. Consul Winchester, who was in the chair, handed in a plan of the new church as furnished by Captain Brine, R.E., and a plan with photograph of the building; and intimated that he considered the report so satisfactory as to authorise him to inform the Government that the church was finished in a satisfactory and workmanlike manner. It now only remained for the community to come forward with half the sum which the building had cost, viz., $1,500, and secure, in terms of Earl Russell's despatch of May 5 (which was read), the contribution of the other moiety from Her Majesty's Government. A resolution was passed empowering the treasurer to collect subscriptions for that purpose.

A meeting of the Yokohama Volunteer Corps had been called to consider the question of a change of uniform, which, it would be proposed, should in future be similar to that of the Shanghai volunteers, with a view to the convenience and saving of expense to those changing their residence to Shanghai, or *vice versa*. It was intended also to form a Volunteer Fire Brigade.

The *Gazelle*, Prussian frigate, has been absent for some days, and with her Mr. de Rohfues, Prussian Councillor of Legation of the King of Prussia, on an extraordinary mission in Japan; Mr. J. de Radowiz, Secretary of Legation; and Mr. de Brandt, the Prussian Consul. There was little doubt she had proceeded to Yedo, and that the purpose of her visit was the ratification of the Prussian Treaty. On the 5th January Mr. Hansard sold at public auction, by order of the Prussian Consul, the hull of the Prussian barque *Oriental*, as she now lies wrecked on Saratoga Spit. She brought $1,050.

Much of the intelligence brought by British mail steamer on this occasion was published in the *London and China Telegraph* of the 7th inst., on the arrival of the French mail steamer.

The following letter on the Exchange operations carried on by H.M. Consuls has been published:—

It may be classed among "things not generally known" (in England), that every foreign Consul at each of the open ports in Japan is allowed by the Japanese Government to exchange, for the use of the Consulate, foreign coin to the amount of one thousand dollars per month, for Japanese money, at the Custom-house. Japanese money, I should observe, is of rectangular form, and the most general coin is the "itziboo," the value of which is about the third part of a dollar. Now, I feel persuaded that it cannot be "generally known" that a very large part of the itziboos thus obtained by Consuls are afterwards sold by them (not always openly) to foreign merchants who are in want of native coin for the purpose of trade; and according as the demand is great or little, so do the Consuls rate the value of this native money given to the merchants in exchange for dollars. This rate of exchange is usually between two and two-and-a-half itziboos to the dollar; and thus a Consul may quietly pocket twenty-five per cent., more or less, by this simple business transaction.

It may also be assumed as a thing "not generally known" (in England), that a clause in each of the existing treaties with Japan provides, or rather stipulates, that all foreign coin shall pass in Japan weight for weight with Japanese money. And this is one of the principal, I may say the chief obstacle to foreign trade in the country, that foreign coin does not find its value; and, consequently, dollars, which are the ordinary currency among foreign merchants in China and the neighbouring countries, are in Japan at a discount.

Besides Consuls and higher officers of the diplomatic service, ships of war draw exchange, according to the numbers of their crews, at so much per head per diem, and most of this finds its way into the hands of foreign or native merchants somehow or another. The trade in itziboos has now come to such a pass that at one port in Japan, where the number of foreign residents is comparatively small, and ships of war are few and far between, the Consuls actually rule the money market; the value of the dollar—to the disadvantage of the merchants—being directly controlled by their (the Consuls) trading itziboos for dollars. We can hardly blame an American "commercial agent," whose salary exist only in consular fees; and we may fairly excuse a representative of France who receives no salary while the port is unfrequented by French vessels, because, in order to live, he is forced to sell his exchange; although this does not exonerate his Government for making an appointment on such conditions. But for a British Consul, with pay of about one thousand pounds annually, to trade with the exchange allowed ostensibly for defraying the expenses of the consulate, would appear somewhat *infra dig.* I might go farther. I could prove that ministers, chargés d'affaires, and consuls-general, are not beyond the influence of the "almighty" itziboo.

The cargo per *Louis Kniffler*, for London, cleared by Aspinall, Cornes, and Co., is as follows:—Silk, 210 bales; do., floss, 15 do.; tea, 380 packages; cotton, 1,212 bales; sundries, 3 packages.

The exports of tea and silk from Yokohama for the six months ending Dec. 31, 1863, are as follows:—

	To Europe.	To America.	To Hong Kong and Shanghai.
Tea, lbs. ..	1,419,122	698,426	1,236,128
Silk, bales ..	6,674	55	5,074

CHINA.

CHEFOO.

Dates from this port are down to the 9th of January. The following statement of imports and exports for 1863 shows a very firm business for this new port:—

IMPORTS.—Opium, 653 chests; on board ship not cleared, about 140 chests; grey shirtings, 68,845 pieces; white, shirtings, 5,750 chests; T-cloth, 6,650 chests; spotted and brocades, 19,620 chests; damasks, 1,332 chests; Chintzes, 7,572 chests; drills and jeans, 1,596 chests; dyed, figured, and plain cottons, 16,194 chests; velvets and velveteens,

Digitized by Google

153 chests; handkerchiefs—cotton, 9,600 chests; wool and cotton mixtures, 2,064 chests; bombazettes, 105 chests; lustres, 592 changs; Spanish stripes, 860 changs; long ells, 2,464 changs; camlets, 300 changs; Iron—bar, nail, rod and hoop, 3,140 piculs; steel 154 do.; ironwire, 125 do.; lead, 5,927 do.; window glass, 25,500 ft.; matches, 1,080 gross; cotton umbrellas, 620 pieces; betel nuts, 1,098; piculs; black pepper, 7,750 do.; white pepper, 71 do.; rattans, 1,396 do.; cloves, 222 do.; sandalwood, 512 do.; sapanwood, 50,257 do.; ginger, 1,786 do.; isinglass, 539 do.; nutgalls, 1,086 do.; orange peels, 1,404 do.; shark fins, 201 do.; seaweed, 8,513 do.; tea, 1,791 do.; alum, 1,909 do.; Japan copper, 210 do.; galangal, 756 do.; white lead, 5,927 do.; red lead, 304 do.; poles, 38,143 pieces; planks, 90,600 do.; cardamoms, 657 piculs; capia buds and twigs, 652 do.; gum olibanum, 401 do.; hemp bags, 273,000 pieces; prepared tobacco, 356 piculs; indigo, 708 do.; paper, 59,381 do.; and sugar, 105,122 do.

EXPORTS.—Beancakes, 596,906 piculs; peas, 574,756; wheat and Indian corn, 16,002; black dates, 17,552; red do., 10,024; liquorice, 7,473; lilly flower, 2,742; peas oil, 3,460; ponjees, 59; tobacco, 446; vermicelli, 19,023; strawbraid, 307; and cotton, 2,466.

SHIPPING.—CLEARED IN.—British, 138 vessels, 44,408 tons; American, 20 vessels, 8,564 tons; sundries, 190 vessels, 54,483 tons;—348 vessels, 107,445 tons

CLEARED OUT.—326 vessels, 101,139 tons.

SHANGHAI.

A report from Soochow that Ching had fallen at an attack on Chang-chow has been authoritatively denied. Within Soochow itself all remains quiet, yamuns are being rapidly established in different quarters of the city, and the inhabitants have returned to their ordinary avocations, while the old residents are rapidly crowding in from the surrounding villages. The reports prevalent in the settlements as to the death of Dolle, late captain of the *Cricket*, and the other men seized on board the *Firefly*, are without foundation. Mr. Seward, the U.S.A. Consul-General, during his recent visit to Soochow, made arrangements which will secure the early return both of Dolle and his companions.

The intelligence from Nanking is very adverse to the Taipings. Tsing-kwo-fan was pressing the siege with vigour, and although he meets with severe repulses, and sustains heavy losses, still he perseveres, and as ammunition and provisions are becoming scarce in the insurgent camp, the Imperial cause was day by day displaying ascendency. The insurgents occupying the smaller outposts have become alarmed and disheartened, and are in some instances either disbanding or submitting to the Mandarins. The impression amongst those who are well informed and who are favourably disposed towards the Taipings is, that unless they make a dash and obtain a great victory their cause is hopeless.

In our last issue on the 7th inst. we gave the particulars of several outrages in the settlement. It would appear, from the following comments of a contemporary, that foreigners are largely implicated, and the fault lies at the system of allowing our soldiers and sailors to enter the Chinese ranks:—

An alarming increase in crime of every description has become noticeable in and around Shanghai. The Cantonese who have been compelled to leave Soochow are now hovering about the road and creeks, reinforced by a few desperate Europeans. The presence of the latter may be accounted for by the fact that, with very questionable judgment, Major-General Brown granted discharges to a considerable number of the men of the 31st Regt., when that regiment was upon the point of leaving for England. These men were allowed to join Gordon's bodyguard, but no arrangement was made with the Chinese authorities as to sending them home, should their services be dispensed with. The consequence was that when Gordon's bodyguard was disbanded, the country became flooded with foreigners of the very worst character. There is now little doubt that some of these fellows were implicated in the murder of Baker and Horgan. Travelling around Shanghai has, therefore, become so dangerous that we have been assured by men whose duties compel them to go backwards and forwards between Shanghai and Soochow, that at night they hardly think of sleeping, lest when least suspecting danger they might find themselves surrounded by foes. Within the English settlement, also, we have had unequivocal demonstrations of rowdyism. On Monday, between the hours of 7 and 8 P.M., a gang, consisting of ten Cantonese and two foreigners, made a forcible entrance into a large Chinese store, and succeeded in carrying off a number of clocks and watches, together with $500. They then attacked the shop of a small banker, and robbed him of $40 and five shoes of sycee.

The minutes of the Municipal Council, held on the 13th Jan., contain a scheme for the formation of a Land Office. The changes proposed to be introduced in the present system are as follows

1. The abolition of the Sub-Register system, and the issue of Title deeds in every case.
2. The cancelling of old and complicated title deeds, and issue of new documents.
3. A regular issue of classified land lists.
4. The preservation and registry of uniform plans of land.

It was proposed that the land fee be raised from the land noted in the semi-annual list of Renters. Any Consulate in which a land office shall be established would thus be in a position to levy its revenue on the amount of business transacted.

MEETING OF THE CHAMBER OF COMMERCE.

On the 21st January a meeting of the Chamber was held: Present: Messrs. Whitlow, Kahn, Keswick, Antrobus, Thorburn, Ezekiel, Marston, Cull, Owerweg, Gilfillan, Forbes, Tyson, H. Innes, Gracie, J. A. Maitland, C. Thorne, Cordier, J. P. Lynill, W. H. Carter, Tyers, Porter, Dow, Leeman, R. Reid, Baker, Westall, J. Cock, D. Reid, Stewart, Probst, and King; R. C. Antrobus, Chairman.

Resolution I.—Mr. Kahn proposed Messrs. Reid and Co. as members of the Chamber. Their name being seconded by Mr. Reid, and the motion put to the vote, Messrs. Reid and Co. were unanimously elected.

Resolution II.—Proposed by Mr. Webster and seconded by Mr. Keswick:—That in consideration of the numerous disputes arising from the arbitrary valuations placed upon different dollars of the Mexican currency by the native shroffs, the members of this Chamber agree that, on and after this date, all undefaced Mexican dollars of standard purity and weight shall be considered clean dollars, and be accepted by foreign firms in discharge of engagements in that currency.—Carried unanimously.

Resolution III.—Proposed by Mr. Porter and seconded by Mr. Khan: "That in the event of a mint being established at Hong Kong and the Government issuing a silver coin of equal standard and purity to the Mexican dollar, such coin shall be accepted in discharge of all engagements as a clean Mexican dollar." Mr. Reid suggested that the resolution was premature, and Mr. Lynill also opposed it for the same reason. Mr. Kahn thought the resolution might have influence with the Hong Kong Government in their decision on the question of establishing a mint in the colony, and recommended its adoption on that ground. The resolution on being put to the meeting was lost by a considerable majority. Mr. Keswick then proposed and Mr. Reid seconded the following resolution:—

Resolution IV.—Inasmuch as it has been the practice of the port for godown orders to be signed by the clerk in charge of that department of the business, this Chamber is of opinion that such orders are considered binding upon the firm in whose name they are issued; but, considering the great extension of the trade carried on here, it would be desirable to make godown orders in future not transferable, without the countersignature of the firm by whom they were issued. Mr. Kahn proposed as an amendment:—That in future all godown orders issued by members of this Chamber shall be signed by a member of the firm which issues them, or by a person duly authorised by that firm; and that all such orders shall have the words "not transferable" plainly marked upon them. The amendment was seconded by Mr. Tyers, but on being put to the vote was lost, and the original resolution was then put and carried by a considerable majority. The following resolution was then passed on the proposition of Mr. Thorne, seconded by Mr. Dow:—

Resolution V.—That whereas great difficulty has been heretofore experienced in arriving at a correct account of the settlements of tea during the fortnight between each mail, also in obtaining stocks, it is desirable that an uniform system be adopted; for which purpose a committee be formed consisting of one public tea inspector, and two tea inspectors in mercantile houses, that each firm hand into the committee two days before the departure of each mail, a full account as per schedule now before the meeting, that when the summary is completed, a copy be sent to the Chamber of Commerce, in order that it may be exhibited publicly for the benefit or those who are interested therein. Proposed by Mr. Dow and seconded by Mr. Kahn:—

Resolution VI.—That Messrs. Mercer, J. Forster and Co., and Ringer, form the committee appointed by resolution No. 5.

The return which we *(North China Herald)* published of the quantity of silk exported from Shanghai during the past year is far from satisfactory; only 39,245 bls. passed through the Custom-house in 1863, against 84,983 bls. during the previous year. And the falling off of more than one-half in this important article of commerce is, we believe, susceptible of no other explanation than of a decrease in production, owing to the civil strife now raging in the two provinces in which the principal silk districts are situated. The eyes of the up-country producers, also, appear to be opening to the great demand which exists for silk for exportation to foreign countries, and the prices demanded by them last year were so high that, in most cases, the cost of the silk when it left this port was in excess of the price quoted in the home markets. The English market, however, has also been singularly dull during the past year, and prices have generally been below the average; so that in England as well as China, circumstances were adverse to the trade. It is estimated that not more than 6,000 or 7,000 bales are still held by foreign and Chinese merchants in Shanghai, principally by the latter, who have held out in the hope of obtaining a better price. This hope, however, appears now to be abandoning them, and, partly in despair of an improvement in the market, partly under pressure of requirements for money to meet their new year engagements, many are offering to sell at a de-

Digitized by Google

cline of tls. 30 per picul. Even at this rate, however, foreign buyers do not come readily forward, as the high rate of exchange renders remittance to England a more advantageous method of investment than the shipment of silk appears likely to be. The supplies of silk from Japan, too, have been far less than were expected. It was estimated that from 15,000 to 20,000 bales would be derived from this source, whereas the Customs returns shows that only 6,857 have arrived in Shanghai.

A farewell dinner was given by the corps of Mounted Rangers to their late captain, Panmure Gordon, Esq., at the Astor House. The Rhenish band was in attendance; the room was most tastefully decorated with flags; the dinner was excellent, and the whole affair went off admirably.

The case of defalcation by the Compradore of the Oriental Bank, and the case of Reid *v.* Leighton, continue to be commented on, but no new facts have come to hand beyond those given in our issue of the 7th inst., per French mail. *The Times'* correspondent in noticing them says:—

The most desirable form of Government for Shanghai presents a difficult problem, on account of the three different interests which are represented. It would, probably, be impossible to establish one court of judicature to which English, American, and French would agree to submit their cases indiscriminately. But a law officer might advantageously be appointed by each country to try cases in which his own countrymen were concerned; and an arrangement might be made that whenever a British subject sued an American, or *vice versa*, the American and English legal officers should sit on one bench and decide it—a similar course being pursued where French and English, or French and Americans were concerned. The other foreigners may well be left to their own Consuls. They are not numerous, nor are their cases important.

HANKOW.

The correspondent of the *Shanghai Market Report* writes:—The approach of marauding bands has been so often positively announced by the native authorities at this port, that such rumours are now daily losing their effect in disturbing the tranquility even of the Chinese residents. A report, which, as usual, proved to be totally without foundation, had been circulated amongst the native merchants a few days before the date of our correspondent's letter, but as it did not produce any tender of pecuniary assistance to the mandarins, it had died out. Trade is excessively dull; in fact, no important operations whatsoever have been reported. The foreign residents are becoming painfully alive to the increase of rowdyism on the banks of the Yang-tsze. Our correspondent informs us that a Chinaman was wantonly shot by a foreigner in Hanyang on the 15th inst. The culprit has not as yet been discovered, but both foreign and native authorities are using every exertion to effect his capture. The defence ditch is progressing rapidly. About four thousand men are kept continually at work upon it. These fellows hoot and jeer at any foreigners who approach the works, and seem determined to permit no interference whatsoever with their mode of operation. There had been considerable speculation in cotton, but late advices from Shanghai checked intending purchasers. The river continues very low.

NINGPO.

A correspondent, writing under date of the 14th of January, says that on the 12th the Franco-Chinese force succeeded in taking eight stone forts and one stockade close to Hangchow. The loss on the side of the rebels is estimated at 500 killed, besides a large number of wounded which were carried away in safety. The attacking party lost two officers killed, three wounded, and 50 soldiers killed and wounded. The 25th of January had been fixed upon for the final assault on the city itself.

FOOCHOW.

A serious disturbance took place at the American Baptist Chapel. The rioters broke into the place on the Sabbath, and demolished all they could. The *Hong Kong Daily Press* has a full account of the matter.

HONG KONG.

There is nothing new reported since our digest of news up to the 26th January. The dates are now up to the morning of 1st February. The French mail of 17th December arrived on 30th January.

CANTON.

Matters at Canton are proceeding very unsatisfactorily. The Governor-General, finding himself no longer safe, lately sent for one thousand Hunan soldiers to act as a bodyguard. These ruffians have already created great disturbances in the city, wounding a number of citizens. A number of shops have been closed—these are ordered to be reopened under threat of fine and imprisonment.]

JAVA.

BATAVIA.

The news of the *Edith Pepper*, given under casualties in our last issue, and the accident to the *Glaramara*, are both confirmed by to-day's mail.

On the volcanic eruptions we find the following in the *Straits Times*:—"The eruptions of the Merapi and the Kloet were felt at most parts of the island, and the several residencies between the Treanger Regenues to Probolingo, west and east of the two volcanoes, were covered with ashes on the day of the eruption. The loss of life and cattle is said to be enormous, and it is feared that several thousand acres of rich land have been rendered unfit for future cultivation. In some places, however, heavy rains followed, and the boiling mud and ashes were washed away, leaving hopes of some benefit accruing to the surrounding fields and pasture lands. The quantity of ash and sand thrown into the residency of Madioen alone, is computed at no less than 1,744,522,416 cubic feet. The private letters from those parts are heartrending to read."

There has been an inundation at Samarang, but the water had subsided again when the last telegram arrived. At Kedirie, also, several little towns have suffered from inundation, which was mostly of mud, no doubt from the neighbourhood of the volcanoes.

Amongst the resolutions passed by the Government lately, there is one by which the delivery to Government *only* of all coffee grown on Sumatra, is prescribed. A translation of the particulars is given in the *Java Times*.

STRAITS OF MALACCA.

SINGAPORE.

Dates are down to the 7th February. The English mail of 26th December, arrived on the 31st January, having been delayed *en route* by an accident to the P. and O. steamer *Candia* between Suez and Galle.

The last fortnight has been barren of political interest. The transfer commission, it is understood, sends home its report by the present mail; at all events, Sir Hercules Robinson, the president, proceeded to Hong Kong on the 1st February, to resume the reigs of Government.

The fortifications appear to have come in for their fair share of attention. Fort Fullerton, a most effective little fort mounting nine large guns, but right in the centre of the sea frontage of the town, has been doomed to be dismantled, and the process has already been commenced. Fort Canning, it is believed, will, before long, be dismantled of its heavy guns, and be kept only as a sort of citadel to which the European residents might resort in case of any outbreak among the natives—(a very improbable event, however). The guns taken from these forts are to be mounted some on Mount Palmer, some on Mount Faber, and some, it is believed, are to be placed in position at Tanjong Katong, the eastern limit of the harbour. The reason of these changes is this, that both Fort Canning and Fort Fullerton are so placed as to draw an enemy's fire right into the centre of the town, and that doubtless before they could be silenced a great part of it would be laid in ashes.

Tigers appear to be rapidly on the increase in the island. Deaths by them are of almost daily occurrence and their foot (?) prints may frequently be traced now on the suburban roads. About ten days ago a cub fell into a pit which had been dug purposely to entrap them, and for three days the mother tigress kept watch over it before she was shot. The pit was surrounded by jungle in which the tigress would lie concealed, till some of the party in chase of her would gather round the pit, and then she would spring out among them, leaping to right and left of them, and rendering any attempt to shoot her next to impossible. One man, a police peon, was killed by a random shot on one of these occasions. On the third day, however, the tigress was killed, and the cub being brought into town alive, where it still lives.

To-day, the 6th February, is the anniversary of the settlement of Singapore, and a holiday in the Government offices, but owing to the near despatch of the home mail it is not observed by the mercantile community. Monday the 8th is also a public holiday, being the Chinese New Year, and the banks are closed; but the mail also interferes with the enjoyment of this by

Digitized by Google

the merchants, and they have decided to observe the day following as a holiday.

Two Chinese had been carried away by tigers near the thirteenth milestone on Thomson's-road, whilst working on gambier plantations, within half a mile of each other. One body had both legs eaten off, and the other was found headless and armless.

The *Pinang Gazette* understands that the Public Works Department, as a quasi-independent branch of the local service under a chief engineer and high salaried executive engineers, is to be abolished from the end of April next. Captain Mayne will return from Calcutta for the purpose only of closing the accounts of the department. Major Hilliard and Captain McNair will also leave. At this station the public works will be superintended by Mr. Magaelhens in Province Wellesley, and by Mr. Bennett in Pinang, under direct responsibility to the resident councillor. The appointments of executive engineer in Pinang, Singapore, and Malacca are to be abolished.

Nineteen Chinese had been arrested at Singapore, caught in the act of initiating and admitting members into the Hoey or Secret Society. They were all Macao men. In front of the joss was found a bag containing banners of all descriptions, and the bye-laws of the society. They were committed to take their trial at the next quarter session on a charge of unlawful assembly.

Whether or not the Gas Company will be enabled to illuminate the streets by the beginning of April, says the *Straits Times*, the manager is certainly proceeding with great energy and with very little noise towards the laying of the pipes. As far as we can judge, one-half of the main pipes are already in the ground, and with very little apparent damage to the roads.

The Court of Inquiry into the loss of the *Lammermuir* had given it as their opinion that Captain Joass was not to blame in any way for the loss of that ship, he having taken every precaution to ensure the safe passage of his vessel through the Macclesfield channel. With regard to the loss of the British barque *Surat*, on the Sunda Straits, the court censured Captain Black for not having had proper set lookouts while running among so many islands, more especially as he was a stranger to that channel; and also for not having laid his position at noon every day on the chart, and stated it in his log-book; but in consideration of his long services and testimonials, they returned him his certificate.

The Sarawak steamer *Rainbow*, Captain Hewat, from Sarawak with dates to the 28th Jan., has arrived, but brings no news of importance.

PENANG.

Our Penang files have not come to hand for several mails. The following is from Messrs. Sandiland, Buttery, and Co.'s report:—

Since date of our last report, the *Gitana*, from Liverpool; the *Roslin Castle*, from Clyde; and the *Frederica*, from London, have arrived. The *Gitana* imports only phospho guano (sold at $65 per ton), and the *Frederica* and *Roslin Castle*, a small amount of Manchester staples, the greater portion of which was sold some time ago to arrive, at much higher rates than could now be obtained. Late depressing advices from the Indian markets, with lower prices in China and Singapore, have acted most unfavourably on our market, our dealers have taken the alarm and refuse to purchase, and until we receive more cheering advices from India, and the Chinese New Year holidays are over, we can expect no improvement. During the last fortnight transactions have been confined chiefly to a few sales by needy Chinese for cash, at very reduced rates. The Straits traders have also been importing from Singapore, and selling for cash at much lower rates than are current in that market. The clearances have been the *Edinburgh Castle*, for London, *Etoile* and *Hooghly* for Bordeaux, the cargo of these vessels being as follows:—The *Edinburgh Castle*, for London: Sugar, 5,906 piculs; black pepper, 471; white, 205; tin, 3,227; rattans, 759; hides, 242; gum benjamin, 75; India-rubber, 235; gutta-percha, 454; isinglass, 5; tapioca, 3,213; nutmegs, 325; mace, 9; cloves, 25; rum, 11,765 gals. Per *Etoile*, for Bordeaux, 5,880 piculs black pepper, 815 tin. Per *Hooghly*, for Bordeaux: Black pepper, 2,161 piculs; tin, 112; tapioca, 218.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FRY—On the 7th inst., at Mitcham, the wife of Walter J. Fry, Esq., of a son.

HYDE—On the 12th March, at Blandford House, Kensington-park, W., the wife of John G. Hyde, Esq., of a son.

VROOMAN—On the 13th Jan., at Canton, the wife of the Rev. D. Vrooman, of a daughter.

MARRIAGES.

LOFTUS—THULBOURNE.—On the 30th Jan., at St. Andrew's Church, Singapore, by the Rev. C. J. Waterhouse, Chaplain, Capt. Alfred John Loftus, to Miss Charlotte Maria Thulborne, of Walthamstow, Essex.

MILLER—RIXON.—On the 10th March, at St. Pancras Church, by the Rev. W. W. Champneys, the vicar, Richard Smith Miller, Esq., many years resident in China, only son of the late Francis Miller, Esq., of Barbadoes, to Gertrude, fourth daughter of William Rixon, Esq., 33, Gordon-square. No cards.

DEATHS.

CUNNINGHAM—On the 1st Feb., at Singapore, Mrs. D. Cunningham, of Dublin, aged 63.

EDAN—On the 23nd Jan., at Shanghai, Mr. V. Edan, aged 63.

IRWIN—On the 26th Jan., at Hong Kong, Emma Maria, the beloved wife of the Rev John J. Irwin, D.D., Colonial Chaplain, and elder daughter of Alfred Chandler, Esq. formerly of the Wandsworth-road.

KING—On the 27th Jan., at Hong Kong, Maria, the wife of William King, Ordnance Department, aged 32 years.

KEUN—On the 29th Jan., at Singapore, P. J. Keun, aged 40.

MASON—On the 23rd Jan., Alexander Charles, youngest child of Alexander and Jane Mason, aged 9 months.

RUSSELL—On the 30th Jan., at his residence, Sandy Point, Singapore, Mr. Donald Russell, ship carpenter, aged 38.

SCHILLING—On the 24th Jan., at Canton, Catharine L. Schilling, wife of Rev. J. G. Schilling, of Maryland, U.S.A.

TOMLINS—On the 7th Dec., 1863, suddenly, at sea, on his voyage to China, aged 39, Harold J. G. Tomlins, Commander of the barque Esk, and of Walthamstow, Essex, fifth son of the late Harold Nuttall Tomlins, Esq., of the Hotwells, Clifton, near Bristol. Friends will please accept this intimation.

VAN ESSEN.—On the 19th Jan., at the Civil Hospital, William Van Essen, Master Mariner.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: The advance in exchange, the unfavourable advices from England, and the extreme firmness of the teamen, have combined to keep buyers of Congou out of the market, and consequently the business of the fortnight has been very restricted indeed, without showing any reduction in rates. In other descriptions the settlements have been trifling, exhibiting no feature worthy of remark. The stock of country greens is held at an advance of 5 to 6 taels on the offers submitted of 41 to 43 taels. The following are the settlements of the fortnight:—Congous: 1 chop Honchow, blk. lf. on pek. fivr., at 29½ taels; 2 do. Oopacks, blk. lf., at 35 taels; and 300 hf. ch. Tyshaan, at 20 taels. Scented Caper: 700 boxes fair at 17½ taels. The stock on the market is thus reported:—Country Congous, 43 chops; Tyshaan, do., 1,800 hf. ch.; Country Greens, 1,150 hf. ch.; Canton teas, uncertain.

AMOY.—During the early part of the fortnight there was a fair inquiry for teas suitable for the New York market. Rates tended down, although supplies had ceased and stocks very low. This demand almost swept the market, reducing the stock to a trifle, and virtually ending the season. The settlements are reported as under. Oolongs, 9,500 hf-ch. at $15 to $23. Ankois, 335 do. at $10 to $14½ for low and common, and $18½ for fine. Congou, 900 hf.-ch, at $12 to $18 for low ordinary to but middling. The stock remaining is stated at 550 hf.-ch. Congou, and 1,550 do. Oolong.

FOO-CHOW-FOO.—About the end of the year, in the face of the reduced stock and a good demand, prices advanced fully one tael on all teas above common, the lower kinds tending up rather than advancing. The stock being thus further reduced, holders became very firm, and notwithstanding the advance in freight and exchange, prices have been fully maintained. The following are the settlements of the month: Congous, 20,200 chests, 9,800 hf-ch., and 1,200 boxes at 8 to 15½ taels for ord. brkn. lf., 15 to 20½ taels for good common to flavoury, and 20 to 23 taels for good flavoury. Souchong, 2,700 chests at 16 to 27½ taels for common to fair. Oolong, 6,000 hf.-ch. at 16 to 20 taels for inferior to fair cargo. Scented Teas, 1,700 boxes at 23 to 23½ taels for fair. The following is a comparative statement of the supplies of teas this season to date, placed in juxtaposition with corresponding supplies, same period last season.

SUPPLIES FOR SEASON TO DATE.

	PRESENT SEASON.	LAST SEASON.
Congou	533,200 chests ..	564,009 chests.
Souchong	63,100 „ ..	32,500 „
Oolong	164,000 hf.ch. ..	217,900 hf-do.
Flowery Pekoe ..	9,100 chests ..	11,900 chests.
Scented Tea	81,000 boxes ..	123,200 boxes.

The present unsold stock on the market is thus stated:—Congou, 20,000 chests (against 48,000 same period last season). Souchong, 2,800 chests (against 700 same period last season). Oolong, 3,900 half-chests (against 40,700 same period last season). Flowery Pekoe, 400 chests (against 1,300 same period last season). Scented Teas, 4,200 boxes (against 14,400 same period last season).

SHANGHAI.—Black: The settlements of the fortnight amount to 10 chops, about 4,700 chests congou, making the total settlements for the season 378,000 chests against 266,000 chests same period last season. The state of the money market has had the natural effect, but still the advance in exchange more than counteracts the fall. The rates quoted are almost nominal. The stock on the market is stated at 11,000 chests congou, and 500 chests flowery Pekoe. Green: Only one full chop has been settled during the fortnight, and that being a forced sale, showed a decline of 4½ taels. Holders are firm, but the following quotations should be deemed nominal:—

	Fychow and Moyune.	Pingsuey.
Young Hyson ..	28 to 30 Tls. ..	27 to 46 Tls.
Hyson	36 to 60 „ ..	33 to 36 „
Twankay	20 to 32 „ ..	22 to 25 „
Gunpowder ..	34 to 65 „ ..	43 to 62 „

The stock on the market (which is nearly all in foreign hands) is stated at 21,300 hf. ch. Fychow and Moyune, 6,500 do.; Pingsuey, 1,600 do. Hoochow, and 700 do. Japan. The total settlements of the season are reported at 232,000 hf. ch., against 227,000 hf. ch. same period last season.

HANKOW.—The settlements of the fortnight are reported at 3 chops only, at a slight reduction, but not sufficient to represent the advance in exchange and freight. The supplies of the season amount to 667 chops, against 473 chops same period last season. The stock now on the market consists of 12 chops only, and few if any more are expected from the country. The quotations are as follow:—Oopacks, Cheongsowkyes, Leylings, and Ningchows, 20 to 25½ taels; Oonam, 14 to 17½ do.

KEWKIANG.—Green: During the early part of the fortnight there was a good demand; but little business was done, however, owing to the extreme firmness of the teamen. Advices arriving from Shanghai of the money crisis which existed there, exporters withdrew and business came to a stand. The settlements of the fortnight are reported as follows—8,500 hf.-ch. Moyunes at 33½ to 41 taels, and 500 hf.-ch. fair mixed at 29 to 31 taels. The stock on hand is about 30,000 hf.-ch. As the teamen are

Digitized by Google

very firm it is hardly likely that any more business will be done until the pressure for money at Shanghai shall be over over—that is to say until after China new year. Black: Nothing done on the market. Some shipments to Shanghai have taken place.

YOKOHAMA.—We have again to report a small business in this article, only about 500 piculs settled since last report at nearly previous rates.

RAW SILK.—Shanghai: There has been literally nothing doing, the further advanced rate of exchange, having prevented operations. The approach of China New Year, added to a most severely tight money market, have caused the dealers to be more anxious to realise, and some of the more needy have been willing to submit to a decline of taels 20 to 30 per picul for cash payment. There have been, however, so few transactions that quotations are almost nominal. The arrivals from Japan have been about 350 bales and by latest advices the receipts at Yokohama were very trifling, but a large stock was reported to be detained at Yedo by the interference of the authorities, and this had caused a remonstrance from the British. The transactions of the fortnight are estimated at 600 bales only, against 3,000 bales corresponding fortnight of last season, and 3,500 the season before. The stock unsold is computed at 5,000 bales, against 4,000 bales same time last year, and 9,000 the season before. With the exception of a trifling quantity on board the mail steamer, there is no silk afloat. The following are the latest quotations:—Tsatlees, No. 1 chops, — tls. per picul; 2, 410 to 450; 3, 420 to 430; Market, 3, 405 to 415; 4, 390 to 400; 5 and com., 380 to 385; Taysaams, No. 1 and 2, 380 to 420; 3 and inferior, 330 to 370; Yuenfa, No. 1 and 2, 400 to 425; 3 and inferior, 370 to 390; Hainings, 370 to 420.

CANTON.—The season is over. MACAO.—There are no sales to report; there are some 20 piculs Cumchook offering at $400, at which there are no buyers.

YOKOHAMA.—During the past week we have no improvement to notice in the position of the silk market, holders continuing very firm in their demands, which, coupled with the high rate of exchange ruling, has considerably restricted operations. Receipts have been insignificant; the unsold stock is estimated at about 200 piculs. Ida: Best, none; medium, 540 to 555; inferior, 500 to 520. Mybash: Best parcels, 550 to 560; medium, 530 to 455; inferior, 520 to 525. Cosbu: Best parcels, 495 to 510; medium, 470 to 485; inferior, 455 to 465. Hatchogee, 410 to 420; superior, 380 to 385. Oshio: Best parcels, 535 to 545; medium, 490 to 510; inferior, 445 to 470. Meshta: None. Æchesan: None. Sodi: Fair to good, 480 to 490.

DRUGS, &c.—Cassia Lignea: Sales 1,500 piculs at $15.50; stock 2,800 piculs. Cassia Buds: None. Cassia Oil: Sales 15 piculs at $214 to 215; stock, 7 piculs. Aniseed Oil: No sales; stock, 30 piculs offering at $115 to 152. Star Aniseed: Sales 200 piculs at $18.40 to 18.50; stock, 500 piculs of inferior quality offering at $17 to 17.50. Galangal Root: Sales 300 piculs at $2.80 to 3; stock, 500 piculs. Gall Nuts: No sales; stock, 20 piculs held at $13. China Galls: No sales; a few piculs offering at $13.50. Ginger Preserves: $2.90 for best. Vermilion: Sales at $39.50 for India. Camphor: In no demand. Some 350 piculs have been sold since the issue of last report, at prices varying from $17.70 per picul unpacked to $19 packed. The principal holders of the article ask $20 per picul packed, which may be considered the market price. Stocks about 1,500 piculs.

COTTON.

HONG KONG.—The prevailing causes have operated directly on this article. The Chinese hold considerable stocks, and are eager sellers. The home advices are not of a nature to promote speculation, and foreigners, unwilling to realise at a loss, are shipping their stocks to England. The sales of the fortnight are reported at 5,000 bags Ningpo, at $29 to 31½, and 3,000 bags Shanghai, at $27 to 31, according to quality. Since the arrival of the French mail more anxiety to realise is evinced, and quotations have declined from one to two dollars.

CANTON.—The trade is reduced to a bagatelle, the only sale of the fortnight reported being 100 bags Shanghai, at 21 to 22 taels. The stock is only 500 bags Shanghai and 200 bags Ningpo.

SHANGHAI.—Very little business has been done, owing to the continued scarcity of money and high rates of exchange, which, since the departure of last mail, have so advanced as to very seriously depress all business operations. The supplies coming forward are now very insignificant; the stocks on hand are not large, and those on the market principally in the hands of natives. Holders generally, viewing the certainty of this season's crop being exhausted, or nearly so, are becoming very firm. Native holders have determined to wait until after the New Year, pawning their cotton in the meantime. Hence we may consider that as the supplies begin to fail, prices may advance for the old crop. Operations, of course, will be but small until the money market is easier and freights are lower; but it is not being too sanguine to suppose that by the next mail we may have to report sales at something near the highest rates quoted in December last. As the stocks on hand become shipped and supplies shortened, the present high rates of freight will not be maintained. The long spell of extremely fine weather which we have had, however, must have greatly favoured the new crop, and from the demand which has existed for the present crop, and the remunerative rates paid up-country, we may anticipate a large increase on the previous crop. The cotton hitherto sent in is seedy, and the Chinese are guilty of an immense amount of false packing; but as the extent of the crop increases, this latter defect will be remedied. Closing rates for No. 1 Shanghai, 16 to 18 taels; Country (nominal), 20 taels.

NINGPO.—The quotation is $30 per bale of 118 to 120 catties, but the supply is short and the demand slack.

AMOY.—Shanghai staple is quoted $32 to $33 per picul. The only sales reported are a few bales damaged.

HANKOW.—The market has declined about 3 taels per picul, and still tends down, buyers having all withdrawn. The nominal quotation is 20 taels per picul.

YOKOHAMA.—In active demand and scarce at $33 to $34 per picul. The Japanese merchants admit that the rate ruling gives an enormous profit, and it is certain that large supplies would come forward but for the obstructions put in the way by Government. One of the principal native dealers has been assassinated, and it is feared that the supplies, which fall off daily, will soon be entirely stopped.

TEA SHIPMENTS FOR JANUARY TO GREAT BRITAIN.

In our last issue we gave the exports up to the 31st December, we now append the exports for January:—

Ship.	From	Quantity. lbs.
Amaranth	Amoy	326,424
Glaramara	Foo-chow	573,200
L. Kniffier	Japan	25,000
Marquis of Argyle	Foo-chow	730,703
Governor van Sweitin	Japan	161,740

CHINA IMPORTS.

COTTON YARN.—The transactions reported during the past fortnigh are confined to a sale of 50 bales Nos. 16-24 placed in this colony, while in Canton nothing has been done.

GREY SHIRTINGS.—The sales of these goods amount to 2,300 pieces placed in Hong Kong at prices which show some decline upon the quotations previously current, and as the dealers are now commencing to prepare for the Chinese new year, it is not expected that any inquiry will exist for goods until after the holidays.

WHITE SHIRTINGS have met with buyers during the fortnight to the extent of 1,700 pieces, and prices are rather easier.

T-CLOTHS.—These goods have not been in any demand amongst the native dealers for some time past, and the quotations must in the absence of transactions be regarded as in a great degree nominal. In Canton the quotations given for all the above goods remain much as before, with the exception of Yarn, the prices of the lower numbers of which have advanced about $6 per picul, medium and higher qualities having experienced a decline to nearly a similar extent.

WHITE SPOTTED SHIRTINGS, Dyed do., Brocades, White and Coloured, are without change to quote in value, and without sales to advise. Damasks: There are not any sales of these goods to report. Raw Cotton: Has again declined materially during the fortnight, but the business transacted has been somewhat larger than was reported under date of 14th instant; the purchases effected by Chinese amounting to about 4,500 bales, while some 2,500 bales have been taken on foreign account.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: There is not any change to notice in the value of these goods, neither are there any sales to report as having been effected during the past fortnight. Long Ells: Have met with a moderate amount of inquiry, and Assorted Colours are now becoming rather dear, the settlements effected amount to 540 pieces. Camlets: Sales of these goods to the extent of 300 pieces are reported, prices not showing any change. Lastings: There have not been any settlements of Lastings effected since the date of last circular, and prices remain as then quoted. Blankets: 100 pairs have changed hands during the fortnight.

METALS.—Iron, Flat, &c: In this colony all descriptions of iron have continued without enquiry, and with the exception of a small sale of hoop iron amounting to 200 piculs no transactions are reported. In Canton, however, a better demand has existed at, in some instances, improved prices, and the settlements effected during the fortnight amount to 1,700 piculs of Nail Rod, 1,200 piculs of Hoop, and 500 piculs of Iron Wire. Lead: The price of lead continues to droop: the sales reported in this colony being put at 480 piculs while in Canton 3,000 piculs have changed hands at a reduction of about 5 to 10 cents on the quotations of the previous fortnight. Tin: The sales since the 14th inst. are reported at 45 slabs in Hong Kong.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	7s. 3d. to 7s. 4d.	7s 5d. to 7s. 6d.

Digitized by Google

The Exchange on India at Shanghai was Rs per 100 taels. At Hong Kong Rs 226 to 227 per $100. Bar silver at Shanghai per $100. At Hong Kong 5 per cent prem. The quotation at Shanghai for Mexican dollars 76, and exchange on Hong Kong, 32 to 34 discount.

HONG KONG REPORT ON GOLD.—The amounts received during the fortnight have been three lakhs; and the value exported during the same period, inclusive of those by the *China* on the 15th January, and exclusive of those by the *Behar* to leave on 1st Feb., are equal to five lakhs of dollars' worth.

SILVER.—Half a lakh may be put down as covering the shipments inwards and outwards of this bullion for the two weeks past; and owing to the scarcity at present, the quotations must be considered nominal.

DOLLAR CURRENCY.—We have received six lakhs and a half of dollars, of which five lakhs and three quarters have been sent away, almost entirely to Shanghai. The few parcels of clean coin have been bought up for shipment to Singapore and Saigon.

DISCOUNT AND MORTGAGES.—A few days since money was in much demand, and 18 per cent. was paid in some instances upon the produce advances for short periods. Mortgages have been negotiated at 11 and 12 per cent.; but at the moment, the above may be considered outside rates.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: Jan. 20, Dunkeld; 21, Lauderdale. From Liverpool: 21, Vauda; 22, Kirk Connel. From Cardiff: 15, Simoda; 21, Oscar, Bessie Stanton; 22, Mosquito; 24, Matador. From Newport: 13, Providence. From Swansea: 18, Zoe. From Newcastle: 20, Abbotsford. From New York: 24, Cap Singmoon.

At HONG KONG.—From Liverpool: Jan. 28, Carlotta. From England: Wookee (str.)

At MANILA.—None.

At SINGAPORE.—From London: Jan. 17, Constantine. From Liverpool: Thomas Blyth. From Cardiff: Henrietta; 5, Anna Decatur; 11, Alardus; 28, P. Clonde, R. Surcouf. From Glasgow: Jan. 8, Roslin Castle; 6, Frederika; 19, Scotland. From Sunderland: 11, Silver Cloud. From Jersey: 12, South Western (str.) From Bordeaux: Feb. 1, Minerva. From Rotterdam: Jan. 1, Marie Godard; 3, J. C. Simony; 15, F. Hendrik. From Scheidam: Feb. 1, A. Reyling. From Hamburg: Feb. 25, Dunnivrite.

At PENANG.—From Liverpool: Jan. 21, Gitano.

DEPARTURES.

From JAPAN.—For London: Jan. 3, Louis Kniffler.

From SHANGHAI.—For London: Jan. 13, Amelia, Oliver Cromwell, 20, Wagoola; 21, Ralston; 22, Thomas Dryden.

From FOO-CHOW.—For London: Jan. 14, Herald; 15, Weymouth, Stuart Wortley. For New York: Santon.

From HONG KONG and CANTON.—For London: Jan. 25, Rio. For Liverpool: 25, Devonshire; 29, Dolphyn.

From MACAO.—For Hamburg: Jan. 26, Gravina, Orion.

From MANILA.—For Liverpool: Teide. For Cowes: Manila.

From SINGAPORE.—For London: Feb. 1, Early Dawn; 2, Chili. For England: Feb. 24, H.M.S. Centaur. For Copenhagen: Jan. 26, Emma. For New York: Feb. 2, Rudolph.

From PENANG.—For London: Jan. 25, Edinburgh Castle.

From BANGKOK.—For London: Jan. 16, Bankok.

VESSELS LOADING.

At JAPAN.—For London: Alexandria, Forerunner, Nelly, Cymbeline, Mary Shepherd, Cissy.

At SHANGHAI.—For London: Annie Archbell, Aurora Australis, Stornaway. For Liverpool: Alice Tainter, Antelope, Blackburn, Thos. Roydon, Polmaise. For New York: Heversham, Lettice Catherine, Lord Collingwood, Macassar, Silvercraig. For Montreal: Alt Mecklenburg, Madura, Romeo.

At FOO-CHOW.—For London: Pakwan.

At HONG KONG and CANTON.—For London: Vanguard, Tamerlane. For Liverpool: Alchymist, Annie Duthie, Constantia, Isabella Hercas, J. L. Dimmock, Nancy Brysson, Norwood, Patrician. For New York: Hamilla Mitchell, Resolute.

At MACAO.—For Channel: Regnel.

At MANILA.—For London: Tyburnia. For Liverpool: Jalawar, and J.A.U.

At SINGAPORE.—For London: Eliza Thornton. For Boston: Pearl.

At PENANG.—For London: Claymore.

FREIGHTS AND CHARTERS.

JAPAN.—To London, cotton and tea, £5; silk, £6.

SHANGHAI.—The prospects remain good, and are expected to continue so, unless large arrivals take place. The rates are as follows:—To Liverpool and London, cotton and tea, £4. 10s. to £5.

FOO-CHOW.—To London, £5, with an upward tendency.

HONG KONG.—Tonnage has been in active demand. The following will show the rates:—For Liverpool, Dolfyn (260 tons), £4. 5s. per ton; Constancia (437 tons), £4. 10s.; Isabella Hercus (600 tons), £4; Nancy Brysson (390 tons), £4; and Patrician (1,139 tons), £4. 10s. To New York, Neuhof (Dan.), (381 tons), €5. To Bangkok and back, 60 to 65 cents per picul. To Rangoon and back, 85 to 95 cents per picul.

MANILA.—To London, £3. 15s. for dry sugar, £5. 15s. to £6 per ton of 20 cwt. hemp, and £5 per ton of 50 feet measurement.

At BANGKOK.—To Ningpo and on Shanghai: Charters have taken place, varying from 70 to 90 cents per picul to Ningpo and on Shanghai. To Hong Kong: 50 to 60 cents per picul.

PENANG.—To London, £3. 10s. dead weight, £4 light freight, and £4. 5s. measurement. Tonnage is required for the rice ports and for China.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Jan. 9, Florence Adelaide, from Cardiff to Singapore; 11, Minerva, from Bordeaux to Singapore; 16, Willem and Carel, Newcastle to Batavia; 16, Hortensia, Cardiff to Singapore; 18, Albuera, London to Shanghai; 19, Akinda, Newcastle to Japan; 21, Joan M. Kemper, Amsterdam to Batavia; 23, Courier de la Sonde, Bordeaux to Singapore; 26, Avonale, London to Singapore.

From UNITED STATES to CHINA, &c.—Jan. 26, Beverley, Boston to Batavia.

From CHINA &c., to ENGLAND and CONTINENT.—Jan. 6, General Putnam, Shanghai to Liverpool; 11, Virginia, Hong Kong to Liverpool; Trende Brodre, Singapore to London; Amaranth, Amoy to London; 15, Itsamboul, Nagasaki to London; Margareta, Manila to Cadiz; 16, Montmorency, Shanghai to Liverpool; 17, Tafferette, Canton to Havre; 20, Crusador, Singapore to Liverpool; 21, Saint Michel, Shanghai to Bordeaux; 22, Glaramara, Foochow to London; Albrecht Oswald, Foochow to London; Herman de Ruyter, Batavia to Amsterdam; 24, Spanker, Singapore to Liverpool; 27, H.M.S. Centaur, Singapore to England.

CASUALTIES.

HONG KONG.

The schr. Doris reports the loss of the British brigantine Nankin, which vessel left Sual, bound for Hong Kong, on the 24th of December, and at five o'clock on the morning of the 26th foundered at sea. The vessel sank so rapidly from the time the leak was discovered that there was scarcely time to cut away the boats before she went down, head foremost, capsizing one boat and nearly drawing them both down with her. She was in lat. 17 16' north and long. 119 22' east, about sixty miles from the land, for which the captain, with his wife and nine of the crew, and the mate, with six of the crew, at once made, neither boat having food or water. Both boats arrived in Sual on the evening of the 30th. The Doris brings a part of the crew to Hong Kong, the What Cheer having taken the remainder.

COMMERCIAL POSTSCRIPT.

According to the Circular of Mr. F. M. Page, bill and bullion broker, the export of Mexican dollars to China from 1st January to 3rd February has been £68,108, and bar silver £28,440, to Singapore and Penang, £1,036 in gold, £2,860 in Mexican dollars, and £3,480 in bar silver.

DEPARTURES.—March 8, from Shields for Shanghai, Queen of the Ocean, for Hong Kong, Carisbrook; 9, from London for Shanghai, Solent; for Singapore, Prince Alfred; from Liverpool for Singapore, William Cundell; 8, from Cardiff for Batavia, Johanna Maria; from Sunderland for Shanghai, Queen of the East, Carrizal; for Hong Kong, Aboyne; 11, from London for Singapore, Blue Jacket; 9, from Sunderland for Hong Kong, Harkaway; 12, from Liverpool for Hong Kong, Milton; from London for Hong Kong and Canton, Southern Belle; 10, from Shields for Singapore, Eddystone; from Sunderland for Shanghai, Margaret Wilkie; 14, from Liverpool for Shanghai, Recife; for Singapore, Euphrates.

The Hamburg (barq.), Jacatia (Spring), from Hamburg for Batavia, with coals, was totally destroyed by fire, Jan. 3, in lat. 40 S., lon. 64 E.; crew saved and landed at Batavia.

SPOKEN.—Dunnikier (barque), Clyde to Singapore, Feb. 25, 50 N., 17 W.; Surat, Shanghai to London, Dec. 22; Baron van Heemstra, for Batavia, Nov. 20, 10 S., 32 W.; Melbourne, Manila to New York, Dec. 29, 35 S., 31 E.; Hurry Puddemsey, London to Singapore, Jan. 22, 1 N., 22 W.; Bacalan, Bordeaux to Hong Kong, Jan. 10, 4 S., 33 W.; Lady McNaghten, London to Shanghai, Jan. 27, 12 N., 28 W.; Stanley, for Shanghai, standing S.W., in a gale from W.S.W., March 4, 48 N. 12 W.,; Mary Hale (?), Batavia to Amsterdam, 56 days out, Jan. 4, 31 S. 12 E.; Kykduin, Tilatjap to Amsterdam, Feb. 1, 7 N., 29 W.; India, Banjoewangie to Rotterdam, Jan. 15, 12 S., 11 W.; Margaretha, Batavia to Amsterdam, Jan. 19, 6 S., 16 W.; Mary and Hillegonda, Batavia to Rotterdam, Jan. 13, 2 N., 21 W.

At Santa Cruz, Teneriffe, Feb. 28: Yeun Tze, Fee, st., Stocks, from Port Glasgow, for Shanghai.

Laid on at Liverpool for Shanghai: Morning Star, Diligentia.

SOOCHOW, BY THE BISHOP OF VICTORIA.—The Bishop of Victoria in a paper contributed to the current number of *Christian Work*, says:—"The recent perfidy and cruelty of the Imperialist authorities in the recapture of the city of Soochow from the Taipings, and their following up victories obtained by British help with all the horrible barbarities of pagan warfare, are a sad blot, at the present time, on the history of our international intercourse." But the Bishop draws another picture, as pleasing as this is sad. He contrasts Canton as he found it on a recent visit with the Canton of nineteen years since. Then foreigners were hooted and abused on their approach to the gates, and actual entry was only effected at the peril of life. The Mandarins proscribed them, and the mob pelted them. Now, the officers of State delight to show them honour, the crowds not only leave them unmolested, but are well pleased to see them mingling with them and increasing their trade, while a dozen Protestant missionaries, American and English, are quietly but successfully engaged in teaching the Christian religion to the thronging population. "All this change," he says, "has of course been the result of political causes, and the severe lessons received during the bombardment and capture of the city." As at the South so at the North. Since we unmis-

Digitized by Google

takably asserted our superior force and our determination to keep the Chinese to their engagements, our plenipotentiary and our missionaries reside without difficulty at Peking, and they have been treated by the Government not merely with civility, but with cordiality. The preachers of Christianity travel to and fro without fear, and are everywhere well received by the people, though formerly they dared not penetrate the country from fear of being murdered. The Rev. Joseph Edkins has just taken a journey from Peking to one of the principal cities on the frontier of Tartary, and has met with nothing but good-will and an anxiety to obtain gifts of books from high and low upon his journey. Mr. Edkins's fear about the Lay and Osborn affair is that it may interfere with the good understanding which has lately subsisted between the Chinese and English authorities.

MR. MOSSMAN AND COLONEL SYKES.—(To the Editor of *The Times*.)—Sir,—Colonel Sykes, in commenting on "China affairs" in the House of Commons, selected the *North China Herald* as the object of his special vituperation, calling it "a paper which has always been the uncompromising advocate of the Tartar Government in all its proceedings," and "the unscrupulous supporter, hitherto the organ and diplomatic agent, of Her Majesty's Ministers in China." Allow me, through your columns, as the editor of that journal during the most troublous times at Shanghai, to express my indignation at the unjustifiable assertion I have marked in italics, and to state that while surrounded by the contending interests of foreign traders and native factions, I pursued a straightforward and impartial course in the cause of humanity, irrespective of Tartar or Taiping. I was the "uncompromising advocate" of the industrious inhabitants whom the latter had plundered and enslaved; and when I supported the former it was in the suppression of anarchy, so that the suffering people might resume their labours, while I advocated the policy of Her Majesty's representatives—diplomatic, military, and naval—from a conviction that it was the best means of saving Shanghai from wreck and ruin, and for the protection of legitimate trade under the terms of the Elgin treaty of Tientsin.—Faithfully yours, SAMUEL MOSSMAN.

WILL OF THE LATE FREDK. HUTH.—The will of the late Frederick Huth, Esq., of Harley-street, a merchant of the City of London, was proved by his three sons, who are appointed executors. The personalty was sworn under £500,000. The will, dated 1859, after stating that he had five daughters and three sons, and that he had made settlements in his lifetime of considerable sums in favour of his daughters, proceeds to make a further provision for them and their families, leaving the residue of his property amongst his three sons. There are liberal legacies and annuities to servants and dependants, free of legacy duty. Amongst some specific bequests are presentations which had been made to the testator, one of which is a gold snuffbox, with diamonds and a portrait of the Queen Mother Maria Christina of Spain, which Her Majesty, then Queen Regent, presented to him in 1840. This, with some other presentations, he leaves to his eldest son, Charles Frederick, to be held as heirlooms. Other mementos and gifts of esteem and affection which had been presented to him he has distributed amongst his family.

SALE OF LORD LYNDHURST'S HOUSES.—The valuable freehold estate of the late Lord Lyndhurst, Nos. 25 and 26, George-street, Hanover-square, has been disposed of by Messrs. Christie, Manson, and Woods. The property was divided into two lots. The first included the spacious freehold mansion No. 25, George-street, situated on the east side, close to Hanover-square, the property, and for many years the residence, of the noble lord; all the fixtures included in the purchase. This lot was adjudged to Mr. Duddell at the price of £13,000. The second lot, the family residence, No. 26, George-street, Hanover-square, adjoining the mansion of his lordship, let by the year to Dr. Hawkesley, was knocked down to the same gentleman at the price of £5,000. Total produce of the freehold estate, £18,000.

COMMODORE MCCLUNY.—Commodore Wm. J. McCluny, United States Navy, died at his residence in Brooklyn. At the time of his death he had been in the service fifty-two years. He entered the navy in 1812, and was an acting lieutenant in the fight between the *Wasp* and *Frolic*. He was attached to the Japan expedition under Commodore Perry. From 1858 to 1860 he commanded the Home squadron. He had seen over twenty-one years' sea service, and spent considerable of his time on shore and other duty. He was universally beloved and respected, and his loss will be severely felt among a large circle of friends.

THE "ALABAMA" AGAIN.—There is a story going the rounds of the American papers, on the authority of a letter from Messrs. Walsh, Hull, and Co., of Kanagawa, addressed to Messrs. Macondray and Co., of San Francisco, under date Jan. 7, that "the *Alabama* was in dock at Amoy on Jan. 2, with the *Wyoming* standing sentry over her." This intelligence is accompanied in the same newspapers, by the intelligence that Hakodadi was burned by incendiary fires on Oct. 31. Our readers will be aware from our last number that these statements are incorrect.

M. CHAMPANHET, of Shanghai, has been appointed by the French Government Postmaster-general of China.

MR. T. F. WADE, Chinese Secretary, was presented at the late levee by Earl Russell.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 9.

The sittings of the Second Chamber of the States-General take place now as usual; but the debates have been exclusively confined to home subjects. Among the Bills laid before that Assembly for their confirmation is the Treaty of Commerce and Navigation concluded between Holland and the Kingdom of Italy. One of the stipulations it contains is that the produce or manufactures of Holland and of the Dutch colonies, from whatever country imported, shall be placed with regard to import duties upon the same footing as the same articles of the most favoured nations, whilst reciprocity of the same nature is granted to all goods the produce of the soil or of the industry of Italy, in Holland and her East India colonies and possessions.

At the last monthly meeting of the Indian Association, held last week, the principal subject of discussion was the question of personal servitude in Java. From the tenor of the debates it appears to be the general wish of the members to see it abolished, not only as being highly oppressive on the natives, but rather that the system gives rise to innumerable abuses. The meeting expressed its unanimous wish to see Article 57 of the regulations for the Government of India more strictly executed, so that the time may soon arrive when it will be possible to abolish altogether the personal service as far as the State is concerned, and then to deprive by degrees the native chiefs of it, who, however, ought to receive an adequate remuneration—in both cases subject to the levying of a tax on the inhabitants as an equivalent, if so required.

Two of the Japanese officers that have been studying for more than a year in this country, are gone to the head-quarters of the allied armies in Schleswig to gain a practical insight into the European mode of warfare. They are accompanied by a Dutch naval officer as interpreter, though they require his services in that capacity but little, as they have a great natural aptitude for learning languages, and speak with considerable fluency German, Dutch, and English. On their arrival at Gravenstein they were kindly received by Field-Marshal von Wrangel and the Prussian Princes, and have been several times to the outposts to get as near a view as possible of the celebrated entrenchments of the Danes at Duppel. They appeared much struck with the pontoon bridge at Eckensund over the mouth of the inlet called Nubel Noer, and examined its construction very closely. They are now gone northward to the Austrian head-quarters at Hadersleben, but it is understood they will return to witness siege operations which are about to be commenced against that formidable position. As they wear their own national costume, their appearance excited considerable curiosity, and probably they were equally struck with the diversity of uniforms they met with at every step, which are much increased by a number of officers of almost every army in Europe collected at the seat of war to witness as *amateurs* the military operations now going on.

It will be remembered that some time ago the newspapers of Netherlands India contained a sharp polemical dispute concerning the cultivation of the chinchona tree in Java, and that a bulky quantity of papers, reports and documents on the subject were laid on the table of the Second Chamber. In the report of the sitting of the Imperial Academy of Sciences, held at Vienna on the 14th of last month, we learn that a paper was read by Mr. de Vry, an officer of the East India Civil Service, now in Europe on leave of absence. That gentleman on his way home from Java visited British India for the purpose of examining the mode of cultivating the chinchona as pursued in the latter country. He states that the difference in the cultivation is that in Java they always plant the trees in thickets and let them grow up in the shade of other timber, whilst in British India they are planted at a distance from any other trees, and are thus fully exposed to the direct influence of the sun's rays, in consequence of which system it is found that the chinchona produces much more quinine and at an earlier period than that obtained in Java.

The number of vessels that arrived in this country from Netherlands India during the course of February was twenty-two, against thirty-one in January. Of these, fifteen brought cargoes for the company, and seven for the private trade. Fifteen came from Batavia, three from Samarang, two from Sourabaya, one from Pecalongan, and one from Tjilatjap. Twelve discharged their cargoes at Amsterdam, eight at Rotterdam, one at Middelburg, and one at Dordrecht. Among other produce they brought 83,230 bags of coffee, 35,242 kranjangs of sugar, and 1,705 chests of Java tea.

Great interest was felt here for the fate of the Bremen barque *Java*, Capt. Dehle, from Lossarang to Rotterdam, with a cargo of 10,328 bags of rice and 7,672 bundles of rattans as dunnage. On her arrival in the channel she was warned by a steamer chartered for that purpose by the shipowners and underwriters of Hamburg and Bremen, that a Danish steam-frigate, the *Niels Juel*, was cruising in the channel to intercept and capture homeward-bound German merchantmen, and was thus enabled to put into Plymouth. While she was lying there in safety, as she could not be captured in a neutral port, the *Niels Juel* came in for coal and water, and then stood out to sea in a S.W. direction. The *Java* then went out, but kept a sharp look-out, suspecting that the frigate would alter her course and give chase. And so it proved; but the *Java* perceived it in time to put back again into Plymouth Sound, and waited a few days, when the frigate received orders to return home, and the *Java* has now arrived at Brouwershaven without any more adventures.

H.N.M. screw steam-corvette *Soestdyk*, of 10 guns, Lieut. R. A. Houck in command, left Helvoetsluys on the 25th ult. for Surinam, from whence she will eventually proceed to reinforce the squadron in the Eastern Archipelago.

PASSENGERS ARRIVED.

Per *Jannetje*, Capt. Lubcke, at Brouwershaven, from Batavia: Lieut. A. J. Cosser, R.N., Lieut. C. Schuytenberg-Versteeg, R.N., four young gentlemen, four non-commissioned officers, and twenty-seven privates.

Per *Loovenstein*, Capt. Hulsthof, at Brouwershaven, from Java; Lieut.

Digitized by Google

J. L. Inckel, R.N., Captain and Quartermaster J. H. van Boven, Mr. J. J. Ruys.

Per *Ida Elisabeth*, Capt. Dooren, at Brouwershaven, from Java: Mr. and Mrs. Graafland and family, Mr. Lammerts van Toorenburg and daughter, Mr. and Mrs. Meysenheim-Knipschaar and family.

Per *Nicolas Witsen*, Capt. Portengen, at Amsterdam, from Batavia: Mr. Schmidt van Loffelt, Miss Linnen.

Per *Nedeland and Orange*, Capt. Brouwmeester, at Dordrecht, from Batavia: Mr. van Velzen, naval engineer, and ten passported soldiers.

COMMERCIAL.

COFFEE.—Thare is but little alteration to report since last mail. Favourite numbers out of last sale, such as Nos. 18, 22, and 23, sell easily at 45 cents, but inferior qualities, such as Nos. 25 and 26, are not so saleable. The only sales by importers were 2,500 bags of Java, ex *Johannes Lodowyk*, to one house, at 42 to 47, according to quality, and 900 bags do., ex *Zwaan*, also to one single house at secret prices. Good Java, of clean taste, continues in demand at 45½, and for bright 47½ is paid. The company's first spring sale is announced for the 16th inst. in this city, and the quantity to be brought forward is only 79,900 bags; all Java, except 2,400 bags of Padang.

SUGAR.—The raw market is calm, but prices are not so firm as they were. Though the quotations are still nominally 1 to 1½ fl. above November sale prices, it is very doubtful if buyers could be found at those rates. The stock of raw sugar in Holland is 20,854,395 kilogr., against 26,869,056 k. last year. The company's March sale will be held on the 22nd inst., also in this city, when 71,500 kranjangs and mats of Java will pass the hammer. At the March sale last year the quantity offered was 62,300 kranjangs. Refined goods inactive; the present prices of raw, as compared with refined sugars, are such as to hold out no inducement to refiners to enter into contracts for later delivery.

RICE.—Some sales of rough grain have been made at very high prices, chiefly for shipment. Cleaned sorts go off quietly at full values.

SPICES.—On the whole the market is in a feeble condition, and though the dealings were far from extensive, previous prices could with difficulty be maintained. Cloves are quite neglected. Pepper is rather more in favour.

METALS.—Company's copper is 2 fl. lower, and can be had at 58 fl. Banca tin remains steady at 70 fl., at which figure the small transactions of the fortnight have been done. 4,000 blocks of Billiton are expected to arrive in a short time.

INDIGO.—There has been a good demand for Java, and 290 chests have changed hands at former values. Some private trade parcels have come to hand, and will be shortly in the market.

GUTTA-PERCHA.—Some lots that were bought in at the last sale have been since disposed of by private contract.

RATTANS.—This article commands an easy sale at full prices. Among the transactions were 900 bundles (200 piculs) ex *Knight*, 800 bundles (130 pic) ex *Wave*, and 3,321 bundles ex *Zwaan*.

TOBACCO.—Market firm; in prices no alteration. There have been no sales by auction since last mail, but several parcels have been sold by tender, amongst which were 1,502 bales of Java, mark NICOT, and 518 bales of do., mark CUBA.

FRANCE.

The *Moniteur* says:—"The transport *Europeen*, commanded by a captain in the Imperial navy, sailed from Suez on the 3rd of November last, and arrived at Saigon, in Cochin China, on the 3rd of January. She had on board 1,161 men, passengers and crew, of whom eighty-five were marines, received on board at Pondicherry. The *Europeen*, which is to be replaced on the Cochin China station by the *Sarthe*, is shortly expected at Saigon, having left Singapore on the 20th of January. The *Europeen*, which requires repairs in her machinery and masts, is to return to France.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA AFFAIRS.

(March 4th.) Colonel SYKES rose to call attention to the following resolution, passed unanimously at a meeting of the Consuls representing European nations at Shanghai, on the 16th day of December, 1863, at the British Consulate, moved by Mr. Markham, the British Acting-Consul, and seconded by Mr. Keswick, Danish Consul:—"That this meeting, as representing the whole foreign community, views with unqualified disapprobation the late proceedings of the Futai at Soochow as an act of extreme treachery, abhorrent to human nature, calculated to withdraw from the Imperial cause the sympathies of Western nations, and the aid of the gallant officers who have hitherto assisted them,"—and to ask the First Lord of the Treasury whether, with this renewed instance of perfidy in Imperial officials, it is intended by Her Majesty's Government to pass unnoticed further violation of the instructions of the Foreign-office to British authorities in China, to be strictly neutral in the civil war which has so long raged in China. He said that in November last he received from Soochow a statement to the effect that a force consisting of 200 men of the 67th Regiment, 100 men of the Royal Artillery, and 100 men of the 22nd Native Infantry had left, under the command of Captain Murray, R.A., for Taitsang; that 200 Belochees, under command of Captain Hogg, had also been thrown into Quinsan; that the garrisoning of these two cities by the British would enable Major Gordon to advance with almost his entire force to Soochow, and would ensure his retreat in the unexpected event of a reverse; and that it was believed that as the capture of Soochow was considered essential to the tranquillity of Shanghai, Sir Frederick Bruce looked favourably on the conjoint action of native and foreign troops if such should be found necessary. From Hong Kong by the same mail he received a communication to the same effect—viz., that British troops had been sent by Major-General Brown to places beyond the 30-mile radius to enable Major Gordon to advance upon Soochow. Now, the House had been informed more than once by the Prime Minister, the Under-Secretary for Foreign Affairs, and the Secretary of the Admiralty, that the Government had issued instructions to the effect that strict neutrality would be maintained in China beyond the 30-mile limit from the treaty ports, which it was thought advisable to secure from the effects of the contest between the rebels and the Tartar Government. The moment he received that communication from China, knowing the orders which had been issued from the Foreign-office, and recollecting the statements which had been made on the part of the Government, he addressed a letter to Earl Russell, stating the facts he had mentioned, and intimating at the same time that he should consider it his duty to bring the violation of the orders of the Foreign-office by Major-General Brown to the notice of the House of Commons. On the next day—the 23rd of November—Earl Russell acknowledged the receipt of his letter, and his object now was to redeem the pledge he had given to the noble lord. The first remark he had to make was that the meeting of the representatives of European nations at Shanghai was caused by a horrid butchery perpetrated at Soochow. Probably the Under-Secretary for Foreign Affairs, who had always been the champion of the Tartar Government, would tell the House that the occurrences at Soochow had been exaggerated, and that he had been told so by Major Gordon. But the fact was that Major Gordon did not witness the butchery. Indeed, he had not an opportunity of witnessing it, for he was next to a prisoner when it took place, and he had no means of preventing it, having sent his troops back from Soochow to his head-quarters. Great events sometimes sprung from trivial causes, and so it had been on this occasion in China. Had not Major-General Brown violated his orders by garrisoning two cities far beyond the thirty-mile radius, Major Gordon could not have withdrawn the whole of his troops from those places, nor could he have made that impression upon Soochow which led to the surrender of the town by treachery—an enterprise in which he was sorry to say Major Gordon himself took part. From a report of the meeting of the Consuls at Shanghai he observed that Major-General Brown was the chief denouncer of the butchery at Soochow. At that meeting the resolution included in his notice was carried unanimously.

The unanimity of the Consuls he found explained in the *North China Herald*, a paper which had always been an uncompromising advocate of the Tartar Government in all its preceedings. Under date the 12th of December, 1863, it contained a memorandum communicated by Major Gordon himself, stating that on the 28th of November, on the morning after La-wang and other leaders had opened negotiations with the Futai for the coming over of the troops, the Tartar General brought to him the heads of the traitors, who said he thought the garrison were willing to give the city up to the Imperial Government on condition that their lives and property should be guaranteed. Major Gordon added that he conversed with La-wang, who seemed to have some doubts, from past experience of Tartar perfidy, and told him that would be an exceedingly acceptable thing to bring together the conflicting parties in China; and, moreover, that the Imperialists were not the people they had been in former days, thus leading the unfortunate wretch to believe that any arrangement made with the Futai would be carried out under the guarantee of Major Gordon himself. Major Gordon then had a communication with the Tartar General, who said it would be very acceptable if the place surrendered, for a great number of men would be lost in attacks on the gates, which were well fortified. But the Governor was a man of high distinction and much respected by Major Gordon himself, and the bargain made with the Imperial General was that the Governor should be handed over to him a prisoner. The strength of the position was such that great loss was anticipated in attacking it. The proposal to evacuate the city was therefore eagerly entertained by Major Gordon and the Imperialists. Then Gordon had scarcely returned to his quarters before Soochow, when General Ching sent him over two Frenchmen who had just come into the lines, and they said that at two P.M. on the 4th of September all the chiefs had been assembled in Mowang's Palace, and after a dinner they had offered up prayers (to the Christians' God, it should be remarked), that they then adjourned to the great Court, where they put on their robes, crowns, &c.; that the Governor mounted his throne and began an address, in which he stated their difficulties. The other Wangs answered him, and the disscussion grew higher and higher, till Kung-wang drew a dagger and stabbed Mo-wang in the neck, and the other wangs seized him and decapitated him, his head being afterwards sent to the Imperialist General.

On the night of the 4th, Ching's men having taken possession of the gate, the rebels within the city shaved their heads—(a laugh). The House was aware that when the Tartars conquered China they required the population at large to shave their heads and wear the *queue* in token of their submission. Major Gordon went to the Futai, and represented to him the danger of keeping the disciplined Chinese in a state of inactivity, also requesting that in recognition of their services a gratuity of two months' pay might be given to each inferior officer and man. The Futai refused, but after much wrangling Gordon induced the men to accept one month's pay as a present. This was given to them as the result of Gordon's negotiation in lieu of their alleged right to go in and plunder the city. The troops were then ordered back to Quinsan. On the 5th Ching announced that the Futai had written to Peking stating that he had extended mercy to the rebels. The morning after the troops left Gordon started for the city, sending the two steamers to meet him, as from information he obtained in Mo-wang's house he expected to have recaptured the *Firefly*, which had been taken from him. He saw the chief conspirator riding in the city to the Deputy-Viceroy's camp to make his submission, and he then endeavoured to while away the time till the steamers arrived. From the top of one of the gates he noticed a large crowd near the Imperial General's stockade, where the Deputy-Viceroy was staying, but thought the Imperialist soldiers were merely gratifying their curiosity by a glimpse of the rebel chiefs doing obeisance to the Futai. In a few minutes more a large body of men came up, and, passing the gate, rushed cheering into the city, firing their muskets in the air, and yelling. At that moment the decapitation of the princes was taking place in the crowd before his eyes. After much equivocation on Ching's part, Gordon at length became uneasy about La-wang (the chief conspirator), and went to his palace. He arrived there after dark, and found it completely ransacked. He entered the house of the prince, who had been butchered, and remained all night, defending him-

LONDON, MONDAY, MARCH 14, 1864.

THE DEBATE ON COLONEL SYKES'S INTERPELLATION.

WE wish we could believe that the course of the discussion on Friday evening last, inaugurated by the gallant Member for Aberdeen, could be accepted as an indication that Parliament is beginning to feel that what are called "substantive motions" are out of place upon a question so important as our precise duties in China. Five years ago the arch-champion of the Taipings would have brought forward some pithily-worded motion, which the Opposition, whether accepting it in all its entirety or not, would have seized as a *cheval de bataille*, and we should have had a definite expression by the House of their feeling as to the employment of English mercenaries by the Chinese Government. China has already unseated one Ministry, and that whose chief was identical with the head of the present Cabinet. What are we to infer from the altered tone of the Taiping advocates in 1864? What from the taunt levelled at the Under-Secretary of State for Foreign Affairs, who entered public life as a follower of Lord DERBY, and is known to be much the most Conservative in his view of the present Ministry, that he has always been the champion of the Tartar Government? What from the absolute silence of even the underlings of the Opposition, even when Mr. KINNAIRD had what we must consider the hardihood gravely to maintain, by implication at least if not in express words, "that the policy of Her MAJESTY'S "Government had been limited to the protection of the Treaty "ports?" We own we are glad to find the House in such an acquiescent mood, and are inclined to ascribe it to other causes than the explicit declaration of Lord PALMERSTON that the Orders in Council had been revoked which authorised, first, the Anglo-Chinese expedition, and, secondly, the acceptance of service under the Chinese Government by such British subjects as chose to avail themselves of the permission.

There is visible in the veteran Premier's remarks a constraint, when he ventures to allude, even in the most cautious manner, to our future relations with China, which shows that even he feels that an irresistible destiny is hurrying on this country into a certain definite policy, which all true statesmen must regret, but which they are powerless to escape from. His Lordship, without actually committing himself to a final declaration of opinion as to the possibility of the rebels succeeding in establishing a Government, states that our only policy henceforth must be "to re-establish peace and order, as it is very im-"portant for the commercial interests of this country connected "with China" that "such commerce should be permitted to revive and expand freely." Here was a splendid opportunity for any gentlemen to make a little political capital, by following up Colonel SYKES's vague generalisations, and insisting on "the sacred right of rebellion." But the oracles were dumb, so we may conclude that the House tacitly agrees with Lord PALMERSTON, that the best thing we can do is—to protect our rapidly increasing commerce. In truth, we do not see what other conclusion they could come to; but why cannot honourable members go a little farther, and inquire how that desirable object is to be carried into effect? It would, perhaps, be asking too much of a man in his eightieth year to forecast the details of a policy, to anticipate twenty or thirty years of a history, that is evolving itself with a startling rapidity to which only the United States can furnish a parallel. But we suspect his Lordship, as he casts his eye over the maps of the Far East, must shake his head sadly as he contemplates that vast Empire which extends from the shores of the Aral to the Pacific, conterminous with the northern frontier of our Indian Empire, and mutter to himself the prophetic phrase, "*Après moi le déluge!*"

For however peaceable these his words may sound, there has always been found lurking in them the seeds of those troubles and convulsions that make what the mass of mankind call history. The defence of the privileges of a chartered company led to the acquisition of our Eastern Empire, and that by a succession of acts which still bring a blush of shame to an honest man's face. Must we repeat these errors of policy and shabby subterfuges on a yet more extensive field, or shall we not rather boldly grapple with the well-established political axiom, that the protection of a great commerce against the encroachments of the Government of the country with which we are trading, is neither more nor less than a declaration of war—and a war that must be internecine, since it implies that two leading principles are *struggling* for the mastery? Lord PALMERSTON was so emphatic on "the two faults that must be matter of re-"proach to the Chinese, perfidy and cruelty," that it is evidently a foregone conclusion in his own mind that, supposing either Taiping or Imperialist were entirely successful to-morrow, we should still have "to protect our commerce." Against whom? Against that "horribly corrupt officialism," as it has been well termed, which in the insolence of success would at once turn its attention to intermeddling with the detested FAN-KWEI, and attempt to drive him out of the country, in order that oppression, and extortion, and devilish cruelty might again stalk through the land. Whatever be the faults of the British pioneers of trade, they have never, at any period of history, been found to lend themselves to be the tools of others in oppressing the people. Their hand has been heavy on their own behalf—judged by results; their little finger has been thicker than the loins of the most truculent despot, or the most merciless race of conquerors that ever lived or ruled. But this is simply because the principle they represent is one form of moral force, which here, as elsewhere, overcomes brute force with its own weapons, ere it proceeds to organise anew the conquests it has made. As a general principle, then, a policy of protecting our Chinese commerce will inevitably lead us into annexation and absorption more or less gradual.

But this view is greatly strengthened if we only consider what "protection to commerce" means in the midst of such a rebellion as is now devastating China. We leave out of view all speculations as to the humanity of sternly using our power to restore order, upon the same principle that NAPOLEON never fired blank shot first. We simply note the fact that we are thus bound to act impartially against both parties; and the natural result is that as we are known to be strong enough to compel submission to our will from both parties even, if invited, we must acquire fourfold the *prestige* we otherwise should, if we had nothing but a faction to coerce instead of a united people. It is this very *prestige* which we wish to avoid increasing, if there be any meaning in Colonel SYKES's question and Lord PALMERSTON's reply; yet we adopt the very means,—viz., a strict neutrality between the two belligerents, both about equally ignorant of these subtleties of political fastidiousness by which our power and fame must increase, best calculated to extend it with an irresistible impulse, and attract to ourselves the entire commerce, and therefore the real destinies, of this overgrown empire. It is much to be regretted that there is no member of either House honest and outspoken enough to enunciate these plain and wholesome, though unpalatable truths. We smile contemptuously at the fractious patient who refuses the means of restoring health to the exhausted frame, because it implies the endurance of pain and discomfort; but in what is our policy on this important subject superior to such a childish display? Nothing is easier than for well-meaning gentlemen to sit on a comfortable bench, and listen to platitudes about neutrality, and the propriety of maintaining the peace, leaving "men and brethren" to hew each other to pieces. Scripture and the hard lessons of worldly policy are alike against such worldly-wise policy; and we may remind those gentlemen that they would be the very first to cry out were the sudden success of either combatant to find "the protection of our commerce," entrusted to the small force that is alone requisite to enforce the observance of our rights as neutrals.

Meanwhile, Lord PALMERSTON was enabled to ride off with

Digitized by Google

a certain reputation for exercising a wise caution in dealing with the issues raised by Colonel SYKES, by reminding the House that we had not yet learned what had been the result of our Minister's representations of the conduct of the Fu-Tai. We may look, therefore, for a renewal of the debate on some future evening, when we trust—but, we confess, with but the slenderest expectation that our hopes will be gratified—that some member will approach the subject with a proper grasp of the momentous issues involved in it to the next generation if not the whole human race.

THE MEETING OF THE CHAMBERS OF COMMERCE.

THE pressure upon our columns must be our apology for so briefly adverting, as we are compelled to do, to one very imporannt recommendation, adopted after much discussion at the recent meeting in London of the United Chambers of Commerce. We allude to the changes recommended in the distribution of the duties of the Consular body, who, the Chambers seem to think, could best discharge their important duties by confining themselves entirely to the transaction of mercantile business, and being placed under the control of the Board of Trade. We need not say that we cordially concur in the latter recommendation, and only differ as to the former on a matter of detail. It is absolutely necessary in countries where we have no regular envoy that some diplomatic authority should be present to represent the Majesty of England. For this duty we would recommend the retention of Consuls-General and Consuls under the control, as at present, of the Foreign Office, and communicating with them exclusively upon diplomatic matters, while the Vice-Consuls might be handed over to the Board of Trade, and report exclusively to that department, referring all other matters that came before them each to his immediate chief. As soon as the report is in our hands we shall recur to this subject. as we believe its recommendations will be found to contribute very materially to the efficiency of a valuable body of public servants.

DEPARTURE OF THE STEAMER "KIU-KIANG" FOR CHINA.

The fine steamer *Kiu-Kiang*, under the command of Captain S. N. Taylor, sailed from New York for Shanghai, via Cape de Verde, Cape of Good Hope, Singapore, and Hong Kong on the 9th Feb.

The *Kiu-Kiang* was built at New York by Mr. Inglis, for Messrs. Olyphant and Son, and is intended to run on the Yang-tze river. She is a paddle-wheel steamer of eleven hundred tons register, with a beam-engine, having a cylinder of fifty-eight inches in diameter and twelve feet stroke, which was built at the Allaire Works.

The following passengers went out in her:—Captain Walsh and wife, Captain Preston, Mrs. Bridgeman, Dr. Abbe, Messrs. F. R. Talbot, G. S. Dabney, Mr. Reed, and five Chinese in the steerage.

Naval and Military.

The *London Gazette* announces the appointment of Rear-Admiral Augustus Leopold Kuper, C. B., with the temporary rank as Vice-Admiral, while Commander-in-Chief on the East Indian and China station. to be an Ordinary Member of the Military Division of the Second Class, or Knights Commanders, of the Most Honourable Order of the Bath.

The Adventure, screw troopship, Capt. Waddilove, is under orders to embark supernumeraries for China about the 15th inst.

Captain Lord John Hay, C.B. (1854), who was recently in command of the Odin, on the China station, has been selected as the future captain of the iron-plated ship Achilles. This vessel will be ready for her tria cruise in May or June.

The announcement was made at Chatham of the appointment of Lieut.-Col. A. P. S. Green to the command of the 1st division of the Depot Brigade Royal Artillery, in succession to Lieut.-Col. R. Talbot, who has been placed under orders to embark for the Cape of Good Hope, to take the command of two batteries of the 2nd Brigade Royal Artillery.

The iron-cased screw steam frigate Prince Consort, 35, Capt. Willis, left Plymouth Sound for a trial cruise in the channel. She will rendezvous at Portland until the arrival of the squadron from Lisbon. After her voyage to Dublin, in which she encountered very heavy weather, very large sums were named as the probable cost of her repairs. Including several expensive improvements unconnected with that trip, the entire charge will not be much beyond £10,000.

The battle of Cape St. Vincent, where Nelson so greatly distinguished himself, was fought on the 15th of February, 1797, sixty-seven years ago, and only four officers are now surviving who were present in that action. There are several officers living who were present at Lord Howe's victory on the 1st of June, 1794, some of them hale and hearty, and able to attend their club at the anniversary day of that great battle.

The Royal Sovereign converted cupola ship was successfully floated out of dock at Portsmouth, in the presence of Vice-Admiral Sir M. Seymour. There was no mishap, and the long-expected event was attended with every success. The tide was very high, and our only turret ship was taken alongside the sheer jetty in capital order. It will be remembered that the Royal Sovereign was a new three-decker; but has been cut down and converted into a cupola ship, with three turrets, on Captain Coles's principle. She is a powerful vessel, and will be most valuable for coast defence. She floats much lighter than was expected, and draws 18 feet forward and 24 feet aft. She is a great success as far as her conversion goes.

THE COLONY OF SINGAPORE.

(EXAMINER.)

The colony of Singapore, about to be transferred from the Indian to the Colonial department of administration, is the first and most successful example in British history of the beneficial effects of freedom of trade. Singapore has an area of about 200 square miles, or is about one-third larger than the Isle of Wight; but even of this small area but a few square miles are as yet cleared of a forest, the trees of which would for size and frequency do honour to the region of the Amazons. This forest harbours royal tigers, which yearly destroy more human beings than cattle, but only because of the two the human herd is more numerous. The island lies but eighty miles from the equator and is hot, yet being well ventilated by monsoons and land and sea winds, it is eminently healthy. Its main advantage consists in its position, for it lies on one of the two great highways through the Malayan Archipelago which connect the Eastern with the Western world, while it has a roadstead and a harbour safe and accessible at every season.

Singapore became a British possession in the month of February 1819, and is consequently as a British colony just forty-five years old. It was ceded to us by a very poor chief, the head of a band of Malay fishermen, not indisposed to piracy when opportunity offered. The grandson of that chieftain is a well-educated man, a proprietor of land, and in the enjoyment of a yearly income of £30,000, a fact which tells well for the prosperity of the colony and the justice and liberality of those who have administered it. He is probably the wealthiest Malay that ever lived, and he could certainly buy and sell all the Malay princes of the Archipelago.

Singapore has been a free port in the most comprehensive sense from its first establishment, for no duties are levied on ship or cargoes, and this without reference to nationality. The result is striking and exemplary. The population of some 200 beggarly and barbarous fishermen has risen to an industrious community of 100,000. Of these the European inhabitants of all nationalities, but the majority English, do not exceed a few hundreds. About three-fourths of the population are Chinese, a few of them Creoles, but the great number emigrants from China, including without the last year or two a few females. The bulk of the rest of the inhabitants consists of various nations of the Malay Archipelago and of various nations of Hindu origin, to which may be added some Arabs, Persians, Armenians, and Jews.

And now for the commerce, which has brought together this miscellaneous population. We have before us the returns for the official year 1862-3. The imports amounted in value to £6,461,720, and the exports to £5,555,573, the first exceeding those of the previous year by £889,200, and the last by £594,020. The number of square-rigged vessels which entered was 1,279, of 471,440 tons burthen, and the departures 1,241, of 396,599 tons, but this is exclusive of native craft of many descriptions. Full one-half of this shipping is British, the rest sailing under no fewer than twenty different national flags, of which the most considerable are the American, the Dutch, the French, the Hamburg, the Bremen, and the Siamese. The great majority of the shopkeepers and brokers are Chinese, but among these are also found wealthy merchants and shipowners, with correspondents in London, Liverpool, and Glasgow. Englishmen and foreign Europeans are the chief merchants and bankers. Next to Bombay and Calcutta Singapore is the greatest commercial emporium of British India, and this is the result of freedom and a happy geographical position.

But how fares it with financial matters? Surpassingly well. The revenue, a net one, amounted in the year quoted to £125,210, and the expenditure, civil and military, £105,555, giving a clear surplus of £19,855. This, however, is not the real state of the account, for the local revenue is charged with the maintenance of all the convicts of British India, amounting in number to some 3,000. This is exactly as if the revenues of the colony of Western Australia were to bear the charge of all the felony sent to it from England. The amount of this charge is £11,900 and adding to it the surplus already stated, we find the income to exceed the expenditure by better than £30,000. When, therefore, Singapore comes under the direct administration of the Crown, a consummation devoutly desired by the inhabitants, it will be the only colony out of forty that, while conferring great advantages upon the nation, will be no burden on the mother country. The colony, it is almost superfluous to add, has an abundance of skilled artificers, with wet-docks capable of accommodating vessels of large burthen with a cheap supply of good timber for their construction.

THE ANGLO-CHINESE FLEET AND THE DEBATE ON CHINA.

(THE TIMES.)

The discussion upon the massacre at Soochow, the failure of the Osborn expedition, and the repeal of the Orders in Council leaves the whole question as to the responsibility of the failure still resting upon the papers just laid before Parliament. The other speakers added nothing to what appears in these papers, and Lord Palmerston volunteered no decision upon the points they raise. Chinese statesmen are seldom at a loss to make out a specious case. Even Yeh was a sage and a moralist when he was not slicing off rebel heads by the hundred or cutting women into morsels upon wooden crosses. He went far to convince some Englishmen that Sir Michael Seymour and Lord Elgin were men of violence and unreason; yet there was no doubt about the history of the "execution ground" or the horrors of the Canton prisons. So in the despatches which Sir Frederick Bruce has recently transmitted from Peking, and which were discussed in the House of Commons, the "Foreign Board" make out a triumphant case, and put Mr. Lay completely in the wrong. Yet no one disputed that the Futai who exercised over Major Gordon the command attempted to be imposed over Captain Osborn, did, as Colonel Sykes recounted, break faith with Gordon and massacre the people and

Digitized by Google

the prisoners whom Gordon had admitted to mercy. The Chinese are a people who have no difficulty in being always in the right, for they have no difficulty in inventing the facts from which it would follow, as a matter of reasoning, that they must be in the right. We will not assume, therefore, because the Chinese statesmen are indignant with Mr. Lay, nor even because Sir Frederick Bruce seems to justify their indignation, that therefore all the right is on one side, and all the wrong is on the other.

Still, however, the Chinese do appear to be at least technically right in their controversy with Mr. Lay. But, right as the Chinese are, there can be no doubt on any mind that if Captain Osborn had allowed himself to be put under a Chinese admiral, as was proposed, and had permitted his squadron to be dispersed under the orders of the Futais and Taoutais of the provinces, England would be ringing at this moment with execrations at the atrocities of which these ships had been made the agents; the world would have been scandalised that prudish England should have been made the executioner of a Chinaman's vengeance, and Lord Palmerston would have had a much more difficult speech to make than that which satisfied the House. Sir Frederick Bruce felt this, even while he was holding that the Chinamen were right in resisting the pretensions of Mr. Lay. If he had not felt it, he would have allowed them to officer their fleet themselves, as they might readily have done, with desperadoes at the open ports. The other foreign Ministers felt this, or they would not have interfered to fortify Sir Frederick in his resolution not to allow this powerful force to pass over to Chinese commanders. Sir Frederick Bruce, indeed, seems to have held a tacit opinion hostile to the expedition altogether, if it be true, as the Chinese say, that "the British Minister and Mr. Wade have on former occasions urged that Chinese military authority ought not to be delegated to foreigners." Sir Frederick, however, never suggests any desire to see Captain Osborn take command under a Chinese admiral; but, on the contrary, repeatedly in his despatches applauds that officer's conduct throughout the matter. Sir Frederick Bruce admits that he did not give Mr. Lay or Captain Osborn any active assistance in their demands, and the Chinese extol "the surpassing discernment of the British Minister" that he does not share the wish of Mr. Lay, who would insist on imposing restrictions on the Chinese Government. Under the circumstances, we agree with Lord Russell that Sir F. Bruce pursued the proper policy. This expedition had got into a false position, and Sir F. Bruce would have done no good if he had attempted to lift it by orce into a bettergroove.

On the other hand, we cannot agree with those who see in this affair another instance of the bad faith and ingratitude of the Chinese Government. There might have been, and we think there was, great folly in the conduct of the Court of Peking in thus rejecting this force, which would have certainly accomplished the object expressed in the instructions of the Foreign Board, "to clear the river, and go right at Nankin;" and we believe that Captain Osborn would have given peace to the middle provinces of China and would have offered to the decaying monarchy another chance of salvation. The Chinese, however, thought otherwise. They allowed themselves to be befooled by their own notions of the unalterable nature of Chinese traditions. They became, while in this frame of mind, the dupes of foreigners who were hostile to this expedition from various and even contradictory motives. Some saw in the force the initiation of a permanent British supremacy in China. Others beheld in it the end of that system of confusion which gives opportunity for irregular profits. But, however mistaken the policy of the Foreign Board of Peking, the course they had adopted was one they had a perfect rtght to pursue so far as Captain Osborn and Mr. Lay were concerned. Mr. Lay had exceeded his instructions, which extended no further than to obtain ships, stores, sailors, and officers; and it was a capital mistake that the expedition ever left England without commissions and instructions under the seal of the Chinese Emperor.

We cannot see how this is to be answered. Of course, we by no means admit the conclusion the Chinese seem to have drawn, that because Mr. Lay had omitted to obtain the proper authority for such conditions as any British officer in Captain Osborn's position must require, he was therefore to do their bidding as a mercenary without any securities as to the nature of the work he was to perform. But there being no conditions fixed, they certainly had full right to reject the very inadmissible conditions which Mr. Lay had taken upon himself to lay down. Under the circumstances, when they volunteered to pay all expenses up to the arrival of the expedition in England, and made moderate complimentary grants to Captain Osborn and Mr. Lay for the pains they had bestowed upon the ships and their equipment, the Chinese Government behaved with a liberality and sense of propriety not often to be found in their transactions with Europeans. At the bottom of it all there was, no doubt, a desire to use this force after their own fashion, and to accomplish that "extermination" of which they speak in one of their papers of instruction; and this mingled largely with that "profound irritation" against Mr. Lay on account of the position he had assumed of which Sir Frederick Bruce speaks. If they had gained their point with Captain Osborn, the consequences could not have been other than those we have already indicated; but in rejecting the demands they were in their right, and they have used their right with a remarkable moderation. However great the disappointment to the commander and officers of this expedition, they must, as reasonable men, see that if they have any grievance it is not against the Chinese.

PARLIAMENT—(*Continued from page* 145.)

self. His troops were gone. He tried next day to make his way back to his garrison; he was intercepted and detained as a prisoner; he was then allowed to go away, and from that moment he saw nothing of what took place in Soochow. The House ought to know what did take place. He had in his hand the account of a European eye-witness of the governor's assassination at Soochow. This person's narrative stated that after the rebel commander-in-chief left Soochow the Europeans all lived together in the Mo-wang's palace and were well treated; that on the 4th of December the Mo-wang had invited half-a-dozen of the other wangs to a large dinner, over which it was understood they were to discuss what was to be done; that the Mo-wang had no idea of the treachery which was in store; that he was standing up saying something loud when all at once a man belonging to the Liu-wang went behind him, and with a long knife which he had concealed up to that time stabbed the Mo-wang in the body; that the Liu-wang immediately jumped towards the body and cut the head off.

He had also a statement from one of Major Gordon's own officers. The writer said that having been at Soochow on the day that "the viceroy, the type of all that is detestable and infernal, glutted his vengeance on the unfortunate inhabitants, men and women, who had surrendered on terms that should have been held sacred," he felt it his duty to write his regrets at the treachery which had taken place, "dishonouring as it was to the cause for which so many brave and honourable men"—generally Englishmen mixed with other foreigners—"had shed their blood." Here was Major Gordon's defence. It was dated December 14. It stated that the withdrawal of the troops from Soochow totally disabled Major Gordon from preventing what had occurred, and which (as he could show the House) continued to occur for twenty successive days. The defence was that Major Gordon wanted to bring the parties together, and that in so doing he had led the chief conspirator to believe that he might safely trust the Imperialist authorities. The *North China Herald*, speaking of the horrors of Soochow, said, "During the campaign of the last two years against the rebels of this province the Imperialists have availed themselves of every opportunity of gratifying their taste for indiscriminate slaughter which was ever found among uncivilised nations." This came from the unscrupulous supporter, hitherto the organ and diplomatic agent of Her Majesty's Ministers in China. The account then went on to mention the facts as they had occurred. It ended with saying "We believe, however, that the recent events in Soochow have cast an indelible stain on the Chinese as a nation, and this was the more to be regretted because up to the time of their occurrence an English officer was in command." Again, it was stated guns and ammunition were freely supplied. "In a word, everything that could be done by one nation for another was done by the English and French for the Chinese." What! After the declarations of neutrality and in spite of the instructions from the Foreign-office? Yet all ended in "indiscriminate slaughter." Nor was this account exaggerated. Here was another eye-witness. The hon. and gallant member then read an account of a visit to Major Gordon's camp.

The artillery were in position. They promised to preserve the city from being looted, and that persons and property would be respected. They were to receive one month's pay in lieu of loot. The writer visited the Mo-wang's palace. On the stone steps of the reception-hall lay the body of the truly brave and noble-minded Mo-wang; his head was outside the city in the hands of Ching. On raising the cloak that covered his body a stab was seen in his stomach and nine in his back. Sad as was the fate in store for the other Wangs, one can but think it was a just retribution for this cowardly assassination of one who had gained the respect and admiration of his enemies. This was from one of Major Gordon's officers. With respect to the supposed ignorance and brutality of the rebels the same officer said, "We visited several other places. Everything seemed undisturbed; houses and narrow streets looking dull from the former being closed; the palaces all looking bright from fresh decorations, some not finished." The same officer described how "Ching's brave celestials ran to do their cowardly work of slaughtering unarmed men. Those who came down the street to leave the city were stopped by the guards and looted. If resistance was offered there was work for the knife and sword. May the Futai have a miserable end for being the author of that cowardly act!" Several fires were then raging. That was on the 5th of December. There was the account of another visitor to Soochow on the 26th of December, 21 days later:—"We mounted the great tower, one of the finest in China, and we saw in many places the flames and smoke ascending from numerous burning houses." So that, in fact, the burnings had gone on from the 5th to the 26th.

Another account, dated Shanghai, January 2, said, "The country is generally untenanted, but the crops raised by the Taipings were in a flourishing condition, and, of course, very acceptable to the Imperialists." This officer had an interview with the secretary of Tchoong-wong. He found the house had not only been looted, but the valuable furniture it contained had been literally smashed to atoms by the Imperialist soldiery. On the walls he found a series of pictures representing the sad journey of Jesus from the house of Pilate to his place of execution. On the 20th of December he went to the Padicho gate, where he saw the heavy artillery outside. "We looked," he said, "with regret upon those splendid 'peacemakers,' that they should have been loaned to the butcher of Soochow, being the property of the British Government." He had given an account of the treachery and butchery practised by the Chinese authorities, which had excited the indignation of the representatives of foreign nations. He had also shown how those horrors had been brought about by the violation of his instructions by General Brown, who by garrisoning two other places enabled Gordon to attack Soochow, and the Futai would not have had opportunity of perpetrating his butchery. One account stated that up to the 22nd of January no less than 30,000 men, women, and children had been slaughtered in consequence of the treachery at Soochow. The House might perhaps think that this was only an accidental occurrence, but he assured them that it was not so, but that such proceedings had ever characterised the Tartar rule in China. The Jesuit Martigny, who was in China at the time of the Tartar conquest, stated that after the capture of Canton 100,000 persons were put to death. When we more recently took Canton we found in the execution ground a cross, to which criminals were fastened and then hacked into pieces. That cross was of course removed, and while we remained in possession of the city executions were conducted in a less horrible manner. When, however, we ceased to exercise control in Canton the cross was restored, and all the former atrocities were renewed. The House had no doubt a painful recollection of the treachery which led to the murder of Brabazon, Bowlby, and their companions on their way to Peking. Neither would they forget the seven prisoners who were fastened to stakes, left exposed all day to the sun, and in the evening hacked to pieces within a short distance of the British camp.

A gentleman of credit, recently arrived from Amoy, mentioned the case of an old man and his wife who were accused of robbing a man to whom they had given a lodging. In spite of their denials they were condemned and executed, the old man being nailed to a cross and left to die, the narrator adding that he saw the poor creature alive on the

Digitized by Google

fourth day. The woman was put to death under circumstances too horrible to be detailed. The editor of the *North China Mail* described his visit to a prison in Shanghai, where he found in the yard the body of a man fastened to a stake, where he had been left to die. All these examples proved that the treachery at Soochow was not an accidental occurrence, but of a piece with the ordinary habits of the Tartar Government; and yet that was the Government which this country had been supporting with her blood and treasure, and on behalf of which we had imperilled our national honour. What must be the effect of such proceedings upon our unfortunate countrymen who were serving such a Government? In the five regiments under Major Gordon there were perhaps 180 Europeans. The effect of witnessing such horrors committed by the Government they were serving must necessarily be to brutalise them and to destroy all humane and Christian feeling among them. In conclusion, he would ask the noble lord at the head of the Government whether, with this renewed instance of perfidy in Imperial officials, it was intended by Her Majesty's Government to pass unnoticed further violations of the instructions of the Foreign-office to British authorities in China to be strictly neutral in the civil war which has so long raged in China?

Lord PALMERSTON: Upon the general question I cannot entirely concur with my hon. and gallant friend, because my opinion is that it is for our interest that the rebellion should cease, and that the authority of the Imperial Government should be maintained and re-established in China. It cannot be for the advantage of those who trade with China that the country should be in a state of war. If there were any possibility that the rebels would succeed in overthrowing the Imperial authority and in establishing some other Government in lieu thereof, then there might be a choice between the two Governments, and persons, according to the views they took, might think it desirable or not that the present dynasty should be maintained or the rebel authority established in its place. But there is no chance of that. The rebellion has not within itself any elements of success or organisation, and therefore I think it is very important for the commercial interests of this country connected with China that order and peace should be re-established there, that commerce may revive and be carried on without impediment. It was with that object that permission was given to Captain Osborn and Mr. Lay to organise a naval force for the purpose of co-operating with the Imperial troops. With that view, an Order in Council was passed permitting British subjects generally to enter into the service of the Emperor of China. Unfortunately, neither of those arrangements have answered its purpose. The expedition under Captain Osborn is returning to this country; that gallant officer, having had a difference with the Imperial Government, had felt it to be his duty to retire from the service of that Government. One Order in Council was passed to authorize that expedition; the other Order in Council, authorizing generally British subjects to enter the service of the Chinese Government, has been taken advantage of only by Major Gordon and one or two other persons. The expedition under Captain Osborn having entirely failed, that Order in Council was revoked, and as the conduct of the Chinese officials has been so disgraceful, as stated by my hon. and gallant friend, the other Order in Council has also been revoked, leaving it, of course, to the discretion of the Crown, according to its standing prerogative, to grant, if it should think fit, permission to individuals to enter into the service of the Emperor of China, upon application duly made in each case by the individual. Nothing can be more deserving of condemnation than the conduct of the Futai at Soochow. I am afraid we must admit that all nations have their faults, and there are two faults which must be matter of reproach to the Chinese—one is cruelty and the other is perfidy. They certainly have shown on this occasion most lamentable instances of both. We do not know what was done in consequence of that barbarous act of treachery. Colonel Gordon, according to our accounts, was only waiting to know what course the Imperial Government would take. He had made a representation to Sir Frederick Bruce, who, no doubt, would truly represent to Prince Kung the abominable conduct of the Futai. The result of this representation is still unknown, but we hope, for the honour of humanity, that adequate punishment will be inflicted upon the Futai for his barbarity upon that occasion—an act which we are entitled to resent, because Colonel Gordon was made the unwilling instrument to lure these people into the power of the Futai, and was, of course, so far, an instrument in their barbarous execution. Not only shall we endeavour to prevent any further acts of the sort, but we shall make strong representations with regard to that particular act of treachery. At the same time I can only repeat that Her Majesty's Government deeply lament and indignantly condemn the conduct of the Futai, but that we do not know as yet what the Chinese Government have done. There are some papers relating to the subject which will be ready, I believe, in the course of a few days, and it is far better, as the Government are in possession of information, that that information should be laid before the House. (Hear, hear.)

Mr. WHITE said that the announcement just made was very satisfactory as far as it went. He presumed that if permission were given in future to British subjects to enter the Chinese service it would be only for the purpose of training Chinamen to a knowledge of military tactics, and not of taking personally any part in the war. (Hear, hear.) The policy of Her Majesty's Government in reference to the civil war had excited the astonishment of those who were acquainted with the Chinese, and these persons declared that the Government had not adopted in China the principle of non-intervention which they took so much credit for upholding on this side of the Cape. (Hear.) He did not gather from the noble lord's observations whether the Government meant to adhere to that principle, or whether the troops at Shanghai were to be sent beyond the 30-mile radius. But he was satisfied that if it had not been for the action taken by the Government that portion of the Chinese empire to which we had access would now be in a state of prosperity. The Taiping rebellion was successful until it came into contact with British power. The wish of the rebel leaders was to be on friendly terms with us, and not to injure British interests. When they sent to tell us that they meant on a certain day to take Shanghai, asking the British authorities there to adopt the necessary measures for the safety of Europeans, no fighting would have taken place but for our troops, for the Imperialists would have withdrawn and the British forces would have protected the British settlement. The rebels, however, were driven back by our troops; yet, to show their friendly feeling towards us, no violence was offered to the many English merchants who were at that time within the rebel lines' carrying on their trade and having large sums of money in their possession, and although the rebels had been repulsed from before Shanghai with shot and shell, not one of these merchants was harmed and not one penny of their property was touched. (Hear, hear.) He thought it evident that the policy of the Government in China had hitherto been strikingly detrimental to British interests; and his belief was that, but for our injudicious interference, that part of the country to which our trade was chiefly confined, instead of being in a state of anarchy, would be by this time prosperous and peaceful. (Hear, hear.)

Mr. KINNAIRD said the policy of Her Majesty's Government had been the protection of the ports, and where would our great trade with China have been but for that policy? He deprecated the reflections which had been cast upon Captain Dew, than whom he believed there was not a finer officer in the service. (Hear, hear.)

CHINA.

(7th.) Mr. LIDDELL asked the noble lord at the head of the Government whether he would be disposed to grant any facility for the discussion of the important correspondence relative to China.—Lord PALMERSTON replied that it was too early in the Session for the Government to give a day for the discussion of the papers, as other opportunities before the end of the Session would present themselves for any debate that might be desired on the subject.

Monetary and Commercial.

The biddings for 40,00,000 rupees (£400,000) in bills on India took place at the Bank of England. The proportions allotted were: To Calcutta, 22,00,000 rupees; to Bombay, 16,00,000 rupees; and to Madras, 2,00,000 rupees. The *minimum* price was as before, viz., 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to 237 lacs (£2,370,000). Tenders on Calcutta at 1s. 11¾d. will receive about 11 per cent.; on Bombay, at 2s. 0⅛d., about 16 per cent.; on Madras, at 2s., about 44 per cent.; and all above these prices in full.

The ordinary general meeting of the Oriental and General Marine Insurance Company was held on Feb. 25 at the London Tavern; Mr. Mocatta in the chair. A dividend at the rate of 5 per cent., free of income-tax, was declared, the chairman intimating that they were in a position to divide a larger sum, but they deemed it prudent not to do so. A much larger dividend might be expected for the next year. The report will be found in another page.

A meeting of gentlemen friendly to the equalisation of the sugar duties was held at the London Tavern; Mr. Crawford, M.P., presiding. A resolution was moved by Mr. Gregson, M.P., to the effect that the existing differential duties were contrary to the principles of free trade, and injurious to the consumers.

A call of £5 is to be paid on the 10,000 new shares of the Bank of Hindustan, China, and Japan (Limited) by the 30th inst.

The trade and navigation accounts for the month of January in the present year have made their appearance. The Export returns present the following results in regard to the countries eastward of India:—

CHINA.—Cotton Yarn: The export for the month of January was only 1000 lbs., against 130,000 lbs. in the same month last year, and 680,000 lbs. in 1862. The value was £180, compared with £12,198, and £34,781 in the corresponding month of 1863 and 1862. Cotton Manufactures: Export for the month, 2,153,981 yards, against 1,356,838 yards in 1863, and 8,441,260 yards in 1862. The value for the month in the three years, beginning with 1864, was £63,251, £32,481, and £120,965. Woollen and Worsted Manufactures: For the month, 78,293 yards, against 93,491 yards in 1863, and 106,800 yards in 1862. The value for the month, beginning with the present year, is £16,947, £19,024, and £13,350. Worsted Stuffs: For the month, 743,014 yards, against 462,990 yards in 1863, and 345,460 yards in 1862. The value for January in each year, beginning with the present, is £53,865, £31,263, and £16,723. Lead: For the month, 506 tons, against 568 tons in the same month last year; the value this year being £10,810, against £12,202 in 1863.

SINGAPORE.—Cotton Yarn: No export during January. Last year the export for the month was 53,800 lbs., of the value of £6,550. Cotton Manufactures: For the month, 660,508 yards, against 1,263,009 yards in 1863, and 6,104,972 yards in 1862. The value for January, 1864, is £15,818, against £31,679 in 1863, and £106,331 in the year preceding.

PHILIPPINE ISLANDS.—Cotton Manufactures: For the month, 2,213,905 yards, against *nil* in 1863, and 3,389,185 yards in 1862. The value is £61,003, against £64,190 in January, 1862.

JAVA.—Cotton Manufactures: For the month, 361,415 yards, against 813,876 yards in 1863, and 2,102,744 yards in 1862. The value for the month, beginning with the present year, is £11,125, £19,757, and £37,392.

Under the section of imports, and class "Articles subject to Duty," we find that of "unrefined Sugar, third quality (not equal to brown clayed)," 8,325 cwts. were entered from Java and the Philippine Islands in January, against 57,351 cwts. in 1863, and 22,614 in 1862. The import of sugar from the same quarter for the last three years was in value as follows:—

Digitized by Google

	1861. £.	1862. £.	1863. £.
Second quality, equal to brown clayed ..	101,429	49,736	4,577
Third quality, not equal to brown clayed..	570,069	352,262	841,216

The value of the Hemp imported from the Philippine Islands for the years 1861, 1862, and 1863 respectively, was £233,264, £225,414, and £421,004.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 4th inst., was, in gold to Alexandria, £20,300; to Madras, £2,343; to Hong Kong, £5,000. In silver: to Galle, £25,250; to Madras, £1,555; to Calcutta, £79,400; to Penang, £760; to Singapore, £23,680; to Hong Kong, £74,400; to Foo-chow-Foo, £1,930; to Shanghai, £7,580. Total in gold, £27,643; in silver, £214,555.

ARTICLES OF IMPORT.

TEA.—Our market during the past fortnight has been very quiet. The continued arrivals of tea on a large scale have added to our already heavy stock, whilst the trade still only purchase for immediate wants, thus sales have been very difficult to make, and prices have ruled in favour of buyers for medium kinds of Congou, of which the supplies offering are very large. Low and dusty kinds of Congou have been in demand, and the sales both at public auction and privately have been large, and latterly prices have recovered the decline of ½d. per lb. last quoted. Fair to good common with leaf have been inquired for, and the latter may now be quoted 1s. to 1s. 0½d. per lb. Flowery kinds, from 1s. 2d. to 1s. 8d., have been greatly in excess of the demand, and the few sales made have been at a decline of 1d. per lb. Good Kaisow kinds, from 1s. 10d. to 2s., have been wanted. Common to fair blackish-leaf kinds have sold at the last public sales at an advance of ½d. per lb. The better descriptions of second class have been saleable to a moderate extent at a shade under previous prices. In fine to finest business has been small, but prices are firmly supported. Fine to finest Kaisows show no alteration. Tayshan kinds remain as before. In Oolongs purchases have been made in common to fair kinds from 1s. to 1s. 2d. per lb.; fine have been inquired for, but medium kinds difficult of sale. Souchongs are selling in small parcels at previous prices. Flowery Pekoes remain neglected. Common to fair Scented Capers have sold at former prices; in good qualities a large business has been done at full rates. Scented Orange Pekoes, both Canton and Foochow make, show no change. Uncoloured Japans have been in demand for common to fair qualities at 1s. 3d. to 1s. 3½d.; for other qualities buyers are not inclined to pay prices asked by importers. The public sales of Indian teas have sold steadily at full prices. Green teas continue firmly supported, the supplies being still moderate, and the demand for export is still considerable, so that all the supplies coming to hand are eagerly purchased at extreme prices. Canton-made kinds of good to fine quality continue in request at fully former rates. The sales of Indian tea took place on the 26th ult. and 9th inst., when 2,351 packages were brought forward, and nearly the whole found buyers. 40,909 packages of China tea were brought forward on the 1st inst., of which 23,711 packages found buyers, 21,311 packages being without reserve. Further sales are declared for the 15th inst. The stock in the United Kingdom was estimated on the 29th ult. at 96,900,000 lbs., against 92,200,000 lbs. last year, and the quantity afloat at 33,779,860 lbs., against 30,500,000 lbs.

SILK.—There is no improvement in the Silk Market; if anything, business is duller than ever, and prices of all descriptions are very weak. The strengthening nature of the recent advices from China and Japan seem to have no effect, and the trade will only buy from hand to mouth. Coarse Silk is wanted, but unfortunately there is more. Deliveries from 1st to 8th inclusive.—China, 970 bales; Japan, 509; total, 1,479 bales.

SUGAR.—The market has been rising, and bears still a firm appearance. 320 tons Penang realised 39s. 6d. to 42s., and 42s. 6d. to 46s. 6d., according to quality. Of clayed Manila, 3,700 tons went at 40s. 6d. to 42s., besides 400 tons to arrive at 28s., as also 1,150 tons Muscovado, for London, at 23s., landing weights. There is now some deficiency as compared with the general stock of last year.

COFFEE.—Mocha: Of 184 bales at auction, two-thirds sold at 98s. per cwt. for very good yellow long berry, and 87s. 6d. to 88s. 6d. middling greenish short berry, being very full value. Ceylon: Market very firm, with limited trade in both descriptions; Plantation at very firm prices to 1s. per cwt. advance; and native at fully the previous value.

COTTON.—The course of prices has been decidedly downwards since our last. China has been more freely offered, and in prospect of large supplies prices have given way ¼d. to ⅜d. per lb. For cotton to arrive the business transacted has been quite inconsiderable. China is worth from 18d. to 18½d. for November and December. Quotations for China, middling fair, 18½d.; fair, 19d.; good, 19½d. to 20½d. The quantity of cotton reported to have been shipped (and now at sea) for Liverpool from India, China, and Japan is 480,161 bales; ditto for London, 86,841; making a total at sea of 567,000 bales. The prospect of these arrivals is probably somewhat affecting this market.

RICE.—This market has been tolerably active, with very fair business on the spot and for arrival, without material alteration in currency; but of late it has become flat, and former terms not nearly obtainable. Not any business of interest doing in Java. Quotation, 9s. to 19s. per cwt.

CAMPHOR.—Auctions have comprised 100 tubs and 43 cases Japan, sold at £5. 12s. 6d. to £6 per cwt.; and 317 cases China, two-thirds sold at £5. 10s. to £5. 15s., with discoloured at £5. 7s. 6d. to £5. 12s. 6d. Considerable business also done in China, mainly at £5. 15s.

CASSIA LIGNEA.—Quiet, with moderate trade upon former terms, 84s. to 92s. per cwt. Buds: Retail transactions only within our quotations, £14 to £16 per cwt.

DRUGS.—Cubebs: Very flat; quotation, £4. 10s. to £5 per cwt. Dragon's Blood and Galangal Root: Both these drugs remain very dull, with little of any business doing in either. Rhubarb: Has been the subject of unusual interest and excitement, absolute present and probable future scarcity inducing the expectation of much higher rates. Sales have been very numerous, several hundred chests changing hands, and prices rapidly advancing 1s. 6d. per lb., but subsequently receding 6d., and leaving the market more quiet. Only 67 chests at auction, three-fourths sold at 3s. 4d. to 3s. 6d., including flat, and 4s. to 4s. 3d. fair round.

GUMS.—Benjamin: Siam scarce and dearer; 1st and 2nd Sumatra also wanted; the lower sorts of Sumatra again rather cheaper; 4 cases Siam sold at auction at £22 to £24. 10s. per cwt. for 3rd quality, and £14. 15s. to £17 dark block. Of 52 cases Sumatra, three-fourths sold at £5 to £6. 2s. 6d. for middling to fair 3rd. Damer: Steady; 72 cases sold at auction at 43s. to 43s. 6d. per cwt. for fair picked. Gamboge: Firm; 26 cases at auction sold at £8. 5s. per cwt. for fair picked, and £4. 15s. to £5s. 5s. ordinary and chips.

GUTTA PERCHA.—Quiet; and of 10 tons at auction, a small portion only quitted at 1s. 8d. per lb. for middling genuine. India Rubber: Meets with a little more demand. 32 baskets Singapore, at auction, chiefly sold at 1s. 5s. per lb. for fine, and of 58 packages Assam, half sold at 10½d. for very good.

HEMP (Manila).—Very firm, with large operations on the spot, and for arrival. No auctions. Quotation, £32 to £36.

HORNS.—Steady; auctions confided to 24 tons Calcutta, and 3 tons Madras Buffalo Horns, sold at 28s. to 29s. per cwt. for 2 lb. average, and 23s. 1½ lb.

JAPAN WAX.—873 boxes all sold; good, 63s. 6d. to 65s. 6d.; inferior, 60s. to 61s.; saucer, 67s. to 67s. 6d.

OILS.—Anniseed: Since our last a large stroke of business has been accomplished, commencing at 6s. 3d., and rapidly advancing to 6s. 9d. per lb. The market remains firm at our quotations, but with sellers. For arrival 6s. 10d. realised. Cassia: Subsequently to our last 15 cases were brought to auction, and two-thirds sold at 9s. per lb.; prices then speedily rose to 9s. 6d., at which several cases were sold, and at which the market is now steady. Mace and Nutmegs: Nothing doing; of 12 cases Nutmeg Paste at auction two sold at the previous low price of 1d. per oz.

SAGO.—Firm, with moderate business privately; 450 boxes at auction all retired. Flour: Moderate transactions here also upon former terms; and 1,135 bags at auction all retired.

SPICES.—Cloves: No auctions; moderate sales of Zanzibar effected privately at the recent advance. Mace: Fine pale realises higher prices; red and reddish without change; 30 cases Penang and 9 cases Singapore at auction nearly all sold at 3s. 4d. per lb. for very good pale; 1s. 4d. to 2s. 5d. good bright reddish to fair palish; and 10d. to 11d. low dull red, wormy. Nutmegs: Quiet, and of 74 cases Penang at auction only half sold, maintaining with difficulty the former terms, at 3s. 2d. to 3s. 7d. per lb. for fair to good bold, and 11d. to 2s. 2d. ordinary small to fine medium. Pepper: Black, very quiet and rather lower. 1,582 bags Penang at

Digitized by Google

auction sold at 3¼d. to 3⅜d. per lb.; private trade very moderate. White has gone back ¼d. per lb.; 30 bags Singapore at auction sold at 5¾d. per lb. for fair; and 44 bags Penang sold at 5⅝d. for middling.

TERRA JAPONICA.—Cutch, Pegue: 1s. 6d. per cwt. dearer, and in much request. 934 packages at auction, mostly sold at 26s. to 26s. 6d. per cwt. for good Pegue. Fair business done privately on similar terms, as well for arrival as on the spot, and the market remains very firm. Gambier: Remains very firm; and of 637 bales at auction, three-fourths sold at 22s. to 22s. 3d. per cwt. for fair block, and 24s. 6d. cubes: fair business done privately at corresponding prices on the spot; and for arrival at 22s.

TIN.—Market most inactive and heavy; prices £1 to £2 per ton lower and bus ness very trifling.

TOBACCO.—Manila leaf: None here, but supplies expected; several parcels offering afloat, but the prices demanded too high to tempt buyers. On the 18th December in Manila only one lot of 500 quintals of tobacco was sold, and a further quantity, 15,000 quintals, was to be submitted to auction on 20th January. Manila Cheroots: No alteration in prices, and a good demand exists. Java: All desirable parcels eagerly taken, and the market begins to assume a more circumscribed position as regards fine and medium qualities, whilst of inferior there is more than sufficient. It is reported that injury has been sustained by the crop through volcanic eruptions. Japan: Continued to hold its position as a desirable substitute, and supplies much wanted of eligible sorts. Quotations: Manila cheroots and cigars, 7s. 3d. to 7s. 9d. Japan, 4d. to 8d; Java, 6d. to 1s. 1d.

MISCELLANEOUS.—Black Lead: In increased demand; and of 259 barrels at auction, one-third sold at 22s. at 25s. 6d. per cwt. for fine lump, and 9s. dust. Galls: All kinds—Bussorah, China, and Japan—very scarce and much wanted. We quote Japan and China, 60s. to 90s. per cwt., the higher price having been recently obtained. Rattans: Continue very firm; and 3,291 bundles Penang, and 4,124 bundles Singapore at auction, all sold at 4s. 7d, to 8s. 2d. per 100. Sapan Wood: Quiet; 18 tons Manila at auction, retired; and of 6 tons Siam, half sold at £11. 17s. 6d. per ton. Mother-o'-Pearl Shells: Both Singapore and Manilla scarce and very firm. Elephants' teeth: £34 to £51 for sound Siam. Tortoise-shell: Of four cases Singapore at auction only one sold at 11s. 6d. per lb., being its previous value, and two cases Manila retired. Turmeric: No China here: moderate transactions in Java upon previous terms. Vermilion: Continues to creep up; very little to be got at present prices, 2s. 8d. to 2s. 10d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod £9. 10s. to £10; hoops, £11; sheets, single, £12; Staffordshire bars, £10. 10s.; rails, £8.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £110 per ton; yellow metal, 9¾d. per lb.

TIN.—116s. for block; 117s. for bar. Tin plates, best charcoal, I.C. 31s. per box.

LEAD, &c.—English Pig, £21. 7s. 6d. to £21. 15s.; W.B., £22. 10s.; shot, patent, £24; sheet, £22; spelter, £23; zinc, English sheet, £27; quicksilver, £8. 10s. to £8s. 15s.

The following is from the Circular of Messrs. French and Smith:—A moderate business has been transacted during the past month, but prices generally have been easier, and owing to the failure of a metal dealer in Birmingham, who speculated largely in metals, the market generally is depressed. Iron is not in such great demand as in January and preceding months, but the best makers both of Welsh and Staffordshire are firm; some second class brands may be bought rather lower. Pig iron has declined considerably, and is to-day about 57s. 6d. cash, 59s. three months, open. Copper: The transactions in copper during the month were very trifling, and principally under official quotations; this has induced the smelters to drop the price £5 per ton; this reduction was declared 1st inst. The price of ores has also fallen to about 19s. per unit. Tin: English is dull. Foreign very quiet. The quotation for Straits is 116s. cash, 117s. three months. Banca 118s., but very little doing. Tin Plates: The demand not quite so active, prices unchanged. The shipments last month were about 64,000 boxes, against 70,000 boxes in February, 1863, and 80,000 boxes in 1862. Lead is in great demand, principally for America, and the quotations have improved from 5s. to 10s. during the past month. Spelter steadily advanced all February, and is now quoted about £23, spot, £23. 5s. for delivery in a month. The stock here is 8,220 tons, against 4,607 tons, same date last year. Quicksilver continues scarce, price about £8. 10s. per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

From PENANG.—At LONDON: Nipisiquit, Rockliff, Teesdale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

There has been but little doing lately in shipping; high rates are asked for British vessels, consequent upon the risk incurred by the employment of American, Danish, or German bottoms; very high rates of insurance being demanded for these latter vessels. Outward freights continue very quiet, there being little activity in exports, and low rates are readily accepted.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 to £39, and £1. 17s. 6d. For Shanghai: £48 to £52, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 to £26, and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Jubilee has been accepted by the Admiralty for the conveyance of Government stores to Hong Kong.

CASUALTIES.

The J. C. Monro, from Japan, has been reported at Lloyd's lost on the Pratas, but since contradicted.

At MAURITIUS.—Jan. 14, Olympia, Jopp, from Singapore; 27, Helene, Boysen, from Singapore for Falmouth, with damage; Feb. 2, Dom Fernando, de Senna, from Macao; 6, Malta, Duncan, sailed for Singapore.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN (Limited).

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

H. PEAT,

SADDLER AND HARNESS MAKER 14, Old Bond-street. Removed from 167, Piccadilly, London.

THE

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

ESTABLISHED 1861.

Directors.

ELIAS MOCATTA, Esq.
C. F. PICARD, Esq.
Mr. Sheriff CAVE.
MOSES MOSES, Esq.
THOMAS B. YULE, Esq.
JOHN ROGERSON, Esq.

Underwriter.

PHILIP SECRETAN, Esq.

REPORT of the DIRECTORS for PRESENTATION to the SECOND ORDINARY GENERAL MEETING of SHAREHOLDERS, to be held at the LONDON TAVERN, on THURSDAY, the 25th day of February, 1864.

The Directors submit to the Shareholders the Accounts and Balance Sheet of the Company for the past year, and have much pleasure in being able to report that the business has been of a most improving and satisfactory character, and fully equal to their expectations.

The Accounts are annexed to the Report, and have been duly examined and verified by the Auditors.

They show, that after having paid all Claims for Losses, Averages, and Returns, Office Charges, and all other Expenses to 31st December last, there remains a balance of £67,274. 16s. on Insurance and Interest accounts.

The two years over which the Company's operations have extended, not being sufficient to afford a safe basis for the calculation of profits, the Directors therefore recommend that £3,339. 5s. only be applied in payment of Interest on Capital, being at the rate of £5 per cent., and the remainder, £63,935. 11s. carried forward in usual course.

In accordance with the Deed of Settlement, the two following Directors retire by rotation :—ELIAS MOCATTA, Esq., and MOSES MOSES, Esq. These gentlemen, being eligible, offer themselves for re-election.

By Deed of Settlement, also, the Auditors require to be appointed annually, and J. H. WOOD, Esq., and J. NOTMAN, Esq., being eligible, offer themselves for re-election.

The Directors have also much pleasure in reporting that, in addition to their several Agencies abroad—where Losses and Claims on Policies issued by the Company are made payable—they have appointed Messrs. BAINBRIDGE, BYARD, GAIR and Co. to be their Agents at Madras.

The following is now the completed List :—

CALCUTTA	GRANT, SMITH, and Co.	SINGAPORE	CUMMING, BEAVER, and Co.
BOMBAY	RITCHIE, STEUART, and Co.	HONG KONG	JOHNSON and Co.
MADRAS	BAINBRIDGE, BYARD, GAIR, and Co.	SHANGHAI	JOHNSON and Co.

By Order,

JOHN SCOTT, Secretary.

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

DOCKS.

PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 286 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864.

Notice to Passengers.

KELWAY'S ORIENTAL HOTEL, SOUTHAMPTON.

(Adjoining the Docks and Railway.)

Hot and Cold Baths, and Moderate Charges,

THE Proprietor, having been many years in the employ of the P. and O. Company, can give every information respecting the arrival and departure of the steamers.

R. KELWAY, Proprietor.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 ,,

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine, Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author,
12 stamps; sealed ends, 20.
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.
—BETTER THAN A FORTUNE.—These purely vegetable extracts can be safely and effectively used by all persons suffering from internal or external ailments. The directions wrapped round every pot of Ointment and every box of Pills are amply sufficient to guide the most diffident and encourage the most timid. When illness makes its appearance, and remedies are eagerly sought after, none will be found more effectual than Holloway's in alleviating and assuaging the pains of the diseased and the afflicted. Both Ointment and Pills purify and preserve every component part of the human body. It will not do to use them on one day and neglect them on the next. Steady perseverance must be maintained till health is restored.

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to 500 places, free no application.

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W., and 23, Regent-street, S.W.

Will have immediate despatch, having a large part of her cargo engaged.

FOR HONG KONG and WHAMPOA, the splendid, British-built clipper-ship PRINCE ALFRED, A 1 twelve years, W. ELLISON, Commander, 663 tons register, loading in the West India Docks. This noted fast-sailing ship always delivers her cargoes in the best condition, and has superior accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, London, E.C.

FOR HONG KONG direct, with immediate despatch, the magnificent, new, river-built, clipper ship DILKHOOSH, A 1 twelve years, 795 tons register, JONATHAN PURDY, Commander; loading in the East India Docks. This fine ship has just been built in the river upon the most improved principles, to combine strength and security with speed, and is expected to make a rapid passage. Shippers are requested to inspect her.

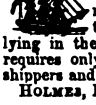
For Freight apply to GEORGE DUNCAN and Co., 2, East India-avenue, Leadenhall-street, E.C.

SINGAPORE Direct, to follow the Prince Alfred, the splendid clipper ship WM. SIMPSON, A 1 13 years, 396 tons register; now loading in the St. Katharine Docks, has a large portion of her cargo engaged and shipping, and will meet with quick despatch.

For Freight or Passage apply to the owners, Messrs. THORNTON and WEST, Old Swan-wharf; or to DOUGLAS and MILLS, 23, Billiter-street.

SHANGHAI Direct.—Last shipping day 16th March, the magnificent new clipper ship DELHI, A 1 12 years, 675 tons register, W. SANDERSON, Commander; lying in the West India Docks. This beautiful vessel requires only to be seen to secure a preference from shippers and passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill.



SHANGHAI Direct (receiving goods all this week), the magnificent new clipper-ship DELHI, A 1 12 years, 675 tons register, W. SANDERSON, Commander, lying in the West India Docks. This beautiful vessel requires only to be seen to secure a preference from shippers and passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill.

HONG KONG and WHAMPOA (to sail 18th March), the very fast-sailing clipper ship LORD RAGLAN, A 1 13 years, 753 tons register; D. POPE, Commander; loading in the East India Docks. This splendid ship, so well known for her rapid passages and sound delivery of cargo, is confidently recommended to shippers of fine goods.

Apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street.

SHANGHAI Direct (receiving goods until the 25th March).—The well-known China clipper ship BEEMAH, A 1 11 years, 887 tons, THOMAS JOHNSON, Commander; loading in the East India Docks.

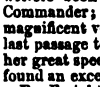
For freight or passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the well-known clipper ship JUBILEE, A 1 fourteen years, 764 tons register, J. A. GRANT, Commander, lying in the East India Docks. Has superior accommodation for passengers.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

With immediate despatch.



DIRECT FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper ship SYDNEY EGGERS, classed A 1, 20 years, in the Liverpool Underwriters book; 870 tons register; H. W. CAMPBELL, Commander; loading in the East India Docks. This magnificent vessel, built on the Clyde in 1859, made her last passage to Bombay in seventy-nine days, is noted for her great speed and sound delivery of cargo, and will be found an excellent opportunity to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

NOTICE to SHIPPERS to COLOMBO and TRINCOMALEE.—The fast-sailing clipper ISABELLA, A 1 9 years, is now completing her loading in the West India Docks. Last shipping day, Wednesday, 16th March.

For Freight or Passage apply to the owners, STUART and SIMPSON, 9, Clement's-lane, E.C.

GELLATLY, HANKEY, and SEWELL will despatch the undermentioned high-classed SHIPS to CALCUTTA, from the East India Docks, punctually on the dates named. These vessels, built principally for the Calcutta trade, offer the best opportunities to passengers and shippers of fine goods. These ships will carry experienced surgeons:—

Richardson, and M. Ross, Col. Bundall, Lieut. Collen, and two second-class passengers. To Ceylon: Messrs. J. M. Misteon, G. Ross, and Sabonadiere, Mr. and Mrs. A. K. Dyer.

Per P. and O. steamer Ceylon, from Southampton, April 4.—To Hong Kong: Mr. Holberton, Rev. J. Wilson, R.N. To Shanghai: Mr. Sharp, Mrs. Mackellar and child. To Singapore: Mr. Maxwell. From Marseilles, April 12.—To Shanghai: Mr. Thos. Francis Wade, Bishop Boone. From Suez.—To Hong Kong: Mr. F. Grossmann.

Per P. and O. steamer Poonah, from Southampton, April 20.—To Hong Kong: Mr. F. H. Lane. To Shanghai: Mr. H. Morrison. From Marseilles, April 28.—To Shanghai: Mr. W. Arets.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our last advices informed us that some members of the Prussian Legation were at Yedo for the purpose of obtaining the ratification of the Treaty between Japan and their Sovereign. On arriving at Yedo they took up their quarters at the French Legation temple-residence, Saikaid'i, much to the bewilderment of the Japanese authorities, for on the 13th January the Gorogio sent Takimot and another Minister down, to beg the advice of the French Minister as to how they could best induce the former to leave their residence on shore, or, if they insisted on not returning to Yokohama, at least to go on board their ship. The Gorogio expressed their readiness to give the ratification of the Prussian Treaty in ten days, but in the interval expressed great concern upon the continued residence of the Minister and Consul ashore. The French Minister declined the discourteous task of asking his guest to turn out, and gave the ministers the only advice he could give them, viz., to avoid all trouble by hastening the ratification of the treaty, which, as they intended to give in ten days, they might just as well give in as many hours, when doubtless the Prussian Minister would, as the other foreign Ministers have done, abstain from present residence at Yedo, except when called thither on business. The delay of ten days appears, however, to have been an insurmountable necessity. It was not till the 22nd that the Prussian war-steamer *Gazelle* returned to Yokohama, bringing with it the desired ratifications, which were exchanged the day before. On the 21st the Vice-Ministers Suwa Inaba-no-Kami and Tatsibana, Idsumi-no-Kami went on board about one o'clock to receive the letter of the King of Prussia, being furnished with full power to receive the same in the name of the Tycoon. The ratifications were exchanged by Tamura Higo-no-Kami. The Minister Kawadsi Idsu-no-Kami, who is about to proceed as one of the Envoys to Europe, was also present. The letter of the King being handed over, a salute of twenty-one guns was fired, and this important ceremony concluded. The Ministers, and their friends and suites, were then, at their request, shown over the frigate, and, after the enjoyment of an elegant repast, left, with every demonstration and expression of friendship and goodwill. The members of the Legation who officiated on the occasion were M. de Rehfues, the Minister; M. Radowitch, Secretary of Legation; and M. von Brandt, the Consul. The *Japan Herald* observes in reference to the event:—"The successful issue of the negotiations at this eventful period, when the great aim of the Japanese would appear to be to circumscribe and hamper foreign relations, was more than could have been reasonably confidently anticipated, and it is to be hoped that these circumstances will be well considered, and a due importance attached to them, when an approving Sovereign shall mete out to these his energetic servants that honour and reward which doubtless will convey his sense of this important service."

The new Embassy is now on its way to Europe. It was arranged with the French admiral, at a conference held on board the *Semiramis* on the 28th January, that the Japanese Embassy (three Ambassadors and suites) would embark officially on board His Imperial Majesty's steamer *Monge* on the 2nd February, at three o'clock. A salute of seventeen guns was to be fired by the frigate, and acknowledged by the Kanagawa forts. The Embassy would be conveyed to Shanghai on board the *Monge* (which would take her departure about the 5th or 6th), and proceed by the French mail line to Marseilles, passages having been arranged for at Shanghai

Some important reductions have been made in the import duties on certain descriptions of foreign merchandise. A conference was held on the 26th January between the French Minister and some of the Japanese authorities, whereat it was agreed that in future the duties on wines and spirits should be reduced to 5 per cent., and on Parisian articles to 6 per cent.

One of the principal grievances foreigners present at or trading with Yokohama port have had to submit to, has been the enormous rates of duty payable upon imports both for foreign use and for sale to the Japanese. The duty upon wines and spirits was 35 per cent., and the general duty (save upon a few excepted articles) 20 per cent. When the former Japanese Embassy was in London and Paris in 1862, one of the conditions upon which the English and French Governments consented to the postponement of the opening of Yedo, Ossacca, &c., was the revision of these duties, and in compliance with this arrangement the ambassadors were, on their return, appointed commissioners to treat with the ministers, who received power on behalf of their respective Governments as to the time and nature of these reductions delay as usual has taken place, but the necessity arising to the Japanese to send another embassy home, they see also the necessity to go with clean hands as to the performance of the promise made by the former embassy. They are quite shrewd enough to propitiate the favourable reception of their new mission by obtaining, even at the last moment, the credit of having performed their former contract. Accordingly, on the 26th the two same Ministers had an interview with Mons. du Bellecourt, and having told the French Minister they had come upon this subject and referred to their promises made in Paris, began treating with him as to the amount of reduction and the articles upon which it should be made. 15 per cent., then 10 per cent. were proposed, and ultimately the duties above stated, 5 per cent. on wines and spirits, and 6 per cent. upon all articles coming under the denomination "articles de Paris"—watches, clocks, mirrors, furniture, &c.—were agreed to. They have since waited upon the British Charge d'Affaires and communicated to him in like manner this their tardy compliance with the obligations made in 1862.

A Convention has also been concluded by the Japanese with General Pruyn, the United States' Minister, with the similar object of reducing duties. This document is couched in the following terms:—

For the purpose of encouraging and facilitating the commerce of citizens of the United States in Japan, and after due deliberation, His Excellency, Robert H. Pruyn, Minister Resident of the United States in Japan, and His Excellency Sabata Sadataro, Governor of Foreign Affairs, both having full powers from their respective Governments, have agreed on the following articles, viz.:—

Article I.—The following articles used in the preparation of packing of teas shall be free of duty:—Sheet-lead, solder, matting, rattan, oil for painting, indigo, gipsum, firing-pans, baskets.

Article II.—The following articles shall be admitted at the reduced duty of 5 per cent. Machines and machinery, drugs and medicines.* Iron, in pigs or bars, sheet iron and iron-wire, tin-plates, white sugar, in loaves or crushed, glass and glass-ware, clocks and watches, watch-chains, wines, malted and spirituous liquors.

Article III.—The citizens of the United States importing or exporting goods shall always pay the duty fixed thereon, whether such goods are intended for their own use or not.

Article IV.—This convention having been agreed upon a year ago, and its signature delayed through unavoidable circumstances, it is hereby agreed that the same shall go into effect at Kanagawa on the 8th February next, corresponding to the first day of the first month of the fourth Japanese year of Bunkiu-Ne, and at Nagasaki and Hakodadi, on the 9th day of March next, corresponding to the first day of the second month of the fourth year of Bunkiu-Ne.

Done in quadruplicate, each copy being written in the English, Japanese, and Dutch languages, all the versions having the same meaning, but the Dutch version shall be considered as the original. In witness whereof, the above-named Plenipotentiaries have hereunto set their hands and seals at the City of Yedo, the 28th day of January, of the year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-eighth corresponding to the twentieth day of the twelfth month of the third year of Bunkiu-Ne of the Japanese era. ROBT. H. PRUYN, SIBATA SADATARO.

During the last week (states the *Japan Herald* of the 16th January) the Japanese in our neighbourhood have suffered severely from the occurrence of fires. On Sunday last a very extensive one raged for some hour or more at Kanagawa, and must have committed great havoc. On Thursday another, also of very serious character, occurred at Kanagawa-dzi Koyas (the spot, or close to it, where poor Richardson was murdered); and several conflagrations of a slighter character are reported; but all sink into insignificance by the side of the reports of the destruction of so large a portion of the city of Ossacca, that the ruins are said to be scarcely comprised within a belt of five miles in circumference.

The first annual statutory meeting of the British Episcopal Church Society for the year 1864, had been held at the British Consulate. Mr. S. Maine, the treasurer, brought up his accounts for the year, which were of the most satisfactory character, and were received and adopted by the meeting *nem. con.* A list of the subscribers towards the erection of the church, showing the collection of the sum $1,500, having been handed in; it was moved by Mr. Macpherson, seconded by Mr. Marshall, "That the Consul be requested to apply to the Secretary of State for Foreign Affairs, for the equivalent sum of $1,500 to make up the $3,000 originally advanced for the erection of the church." This having been unanimously aodpted, thanks were voted to the late treasurer and trustees, Mr. Bourne was requested to act as treasurer, and Messrs. W. Marshall and M. Bourne were requested to act as trustees for the ensuing year. Votes of thanks were then unanimously passed to various donors to the church, viz.:—To the visitors at Yokohama, for the gift of the harmonium; to Captain Vyse, for the church stove; to Mr. Eusden, for the font; and to Mr. Flowers, for the lectern. A short discussion arose on the question of obtaining further fittings and embellishments; but it appeared to be the general opinion that the public having subscribed so frequently and so liberally of late to matters in connection with the church, some time should be allowed before further calls should be made upon them. The chairman himself took this view, and in the course of his remarks dropped the observation, that "he considered there had been a disposition towards too many emblems of late." This remark was met by general expressions of concurrence; and it having been moved by Mr. Macpherson and seconded by Mr. Wilgoss:—"That all designs for the adornment and embellishment of the church shall be submitted to the Committee, and shall be approved by them; and that all gifts offered to the church shall be sanctioned by the Committee previously to being placed in the fabric, the end being the preservation of that unanimity so desirable in Church matters," the resolution was carried unanimously. A resolution having been passed that the chaplain should confer with the committee upon the form and manner of all notifications of services, &c., the meeting adjourned.

Lewis Martin, a Portuguese steward of the British ship *Forerunner*, was charged at the Consular Court on the 15th January with the commission of an assault with intent to do grievous bodily harm upon George Caerns, the chief mate of that vessel. It appeared that the prosecutor was taking a doze upon one of the cabin seats, when the prisoner stealthily entered and struck him a tremendous blow over the face with a small axe, missing, as it seems, the blow with the head of the axe, but still inflicting a contusion of a most severe character. It also appeared that the prisoner had made use of threatening language to others as to his intention at some opportunity to "cook the goose" of the prosecutor. The prisoner was ably defended by Mr. Crutchley. The Court found the charge fully proved, and sentenced the prisoner to six months' imprisonment with hard labour.

A correspondent of the *Herald* complains of the serious difficulties thrown in the way of trade by the Japanese authorities. He writes:—

Suddenly merchants in Yokohama disappear, and on inquiry we are probably told that one has been threatened by a writing, and another by a visit of a Loonin. Next comes down the dwelling or shop, and we find that he and all his house have departed to a place where there is more safety, if not so many opportunities of amassing wealth. Beyond this, trade is stopped in a still more effectual manner. One morning we heard that nine men, some merchants, and some officers of the Boat-house, had been murdered in Yedo, and for two days trade was stopped. On inquiry we are answered with a single word "Loonin." We are told by the native merchants here that no imports are allowed to go to Yedo—still "Loonin" as the reason. Loonins there may be, it is true, but they are Government Loonins, who live in the Guard-houses in the streets of Yedo, and receive bribes to permit traffic and commerce. The two last-named causes appear to have succeeded better to gratify the aims of the Tycoon's Government than any before adopted. Two-thirds of the merchants' houses are closed, and trade is rapidly coming to the point which the Government so ardently desire, namely, to have only two or three native traders (and those perhaps Government men) in the post. What price shall we then have to pay for our exports, and what may we expect for our imports? A hard "Mexican" presents many attractions to a Japanese, but they are more than counterbalanced by the fear of losing his head. The Japanese Government know this, and take their measures accordingly.

While writing the foregoing, I hear that three Japanese merchants, by name Eraziah, Euraziah, and Izmaiah, have been arrested and sent to gaol for the crime of bringing silk to this market, and I have been told that a servant of a gentleman here has been informed by some unknown

* The prohibition of the importation of opium, according to the existing treaty, remains in full force.

Digitized by Google

visitors that the house he occupies is by far too good for one in his station of life.

LATEST.—The steamer *Fokkein* arrived at Hong Kong on the 14th Feb. from Yokohama, bringing dates to the 8th Feb. The Japanese steam fleet left Yedo on the 5th inst., conveying, as it was said, the Tycoon to Miaco. The Ambassadors composing the new mission embarked on the 6th on board H.I.M.'s ship *Monge* for Shanghai, whence they will proceed, per Messageries Imperiales line, for Marseilles.

CHINA.

PEKING.

From the capital there is no news of importance. The river is frozen, and the winter is a severe one. Sir Frederick Bruce, it is rumoured, leaves shortly for England, on leave of absence. It is not yet known who will act as *locum tenens* to his Excellency.

The relations existing between the foreign Ministers and the Chinese authorities remain upon the most friendly footing. We understand that the local militia in the province of Chih-li has been transferred to the command of the provincial magistrates, and no longer remains in the hands of private individuals. Our countrymen in the capital have vindicated their claim to the English name by initiating races. We publish below an account of the proceedings:—

The first amateur races which have ever taken place at Peking were held on Thursday, the 17th December last, at the Anting plain, to the northward of the city. They were got up by the Student-Interpreters of H.B.M.'s Legation and of the Imperial Chinese Maritime Customs, and consisted of pony races for various distances, varying from half a mile to two hundred yards. A dense crowd of Chinese, Mongolians, and Thibetans soon assembled near the winning post, and appeared to derive unlimited satisfaction from the riding and speed of the ponies, and to enter heartily into the spirit of the race.

The course was attended by the Ministers of the different foreign Legations at Peking, and the gentlemen of their suites.

As a guarantee that the want of liberal feeling usually attributed to the missionary body has no place among the learned and hardworking gentlemen who have chosen Peking as their field of labour, we may mention that we observed at least one reverend gentleman on the course lending his countenance to this thoroughly English amusement.

The races were as under:—

I. Distance, half a mile. Mr. Hobson's "Rev. Mr. Mitchell," Mr. Brett's "D.I.O."

1, "Rev. Mr. Mitchell." 2. "D.I.O."

II. Distance quarter of a mile. Mr. Denny's "Pistol," Mr. Solbes "Excommunicated."

1, "Excommunicated," 2 "Pistol," who when close upon the winning post and two good lengths in front, lost the race by bolting outside the course.

III. Distance, quarter of a mile. Mr. Allen's Gulf Arab "Giles Scroggins," Mr. Bismark's Western Mongolian pony "Ironsides."

1, "Ironsides."

IV. Distance 200 yards. Mr. Denny's "Pistol," Mr. Brett's "D.I.O." "Pistol," ten yards start.

1, "Pistol."

V. Distance quarter of a mile. Mr. Murray's "Devil," Mr. Walker's "Revolver," Mr. Dennys' "Slowcoach."

1, "Devil," 2, "Slowcoach."

VI. Handicap.—Distance, half a mile. Mr. Denny's "Pistol," Mr. Denny's "Slowcoach."

SHANGHAI.

The dates are down to the morning of the 9th February. The English Mail of 26th November and 10th December had arrived. The French Mail of 17th December, which arrived at Hong Kong on the 30th January, does not appear to have reached Shanghai. The Chinese new year holidays had checked business as usual. The prevalence of outrages in the settlement is of serious consequence.

The *Recorder* gives about eight columns of the trial of J. D. Buckley for the murder of Capt. McKinnon. The sentence was as follows:—

COURT OF UNITED STATES CONSULATE GENERAL.

Shanghai, Feb. 4, 1864.

In re United States *versus* John D. Buckley.

JUDGMENT.—The Court finds the prisoner guilty of murder, and assesses upon him the punishment of death by hanging.

G. F. SEWARD,
Consul-General Acting Judicially.

Assented to
HENRY C. ENDICOTT.
ALBERT L. FREEMAN.
THOS. W. STILLMAN.
JOHN M. NIXON.
Associates.

We take from the same journal a notice of the land regulations:—

We understand that the arrangements proposed to be entered into for the purpose of extending the efficiency of the Land Office in the British Consulate are now completed, and that the vote passed at the last meeting of the land renters will be carried out by the levy of a small fee, to be collected on the value of registered land. This is computed at a minimum of 8,000,000 taels, a scarcely perceptible percentage on which will yield an income of several thousand taels per annum. This will, it is believed, be amply sufficient for the purpose of organising a land department in the British Consulate, which will meet the requirements of the leaseholders and the community generally, as well as the expenditure requisite in executing an accurate and reliable plan of the settlement, which has so long been urgently required.

Suggestions for Proposed Land Office.

I. The establishment of the proposed office will enable several useful changes to be introduced, and the current business to be conducted with increased despatch and efficiency. Among the proposed changes are:—

1. Abolition of Sub-Register system, and issue of title deeds on all occasions.
2. Cancelling of old and complicated title deeds, and issue of new deeds.
3. Regular issue of classified land lists.
4. Preservation and registry of uniform plans of land.

II. Land fee to be raised from the land exhibited in the semi-annual of the renters. By this means any Consulate in which an organised land office may be required, will be able to levy its revenue on the amount of business actually transacted.

III.—Estimate of Expenditure.

Compensation of land officer, say £250	$1,200
Pay of 1 European clerk	1,800
„ Chinese do.	400
Annual stationery	250
Annual expenditure	$3,650

N.B.—In justice to the clerks employed by the Chinese authorities, some compensation should be allotted to them for the increase of work likely to accrue.

ESTIMATED REVENUE.

Land in British settlement estimated at	$8,000,000
Land outside do. do.	1,500,000
	$9,500,000

At $50 per $1,000, say $1,500.

An Imperial Proclamation has been issued by the Futai, declaring all title to land in Soochow purchased by Europeans invalid. Copies of the proclamation have been posted on the walls of the city and about the settlement. We believe several parties became purchasers of land, some at low rates, and others at fair rates, prior to the evacuation of Soochow by the rebels, considering that the title would be valid enough, and that such purchases would be remunerative when peace was restored and trade in action. Such purchasers seem likely to be doomed to disappointment, as by this proclamation they cannot hold the land they have bought. It may be imagined that such purchasers will be able to re-sell to Chinamen. This we believe cannot be done, as the Chinese executive will not recognise any transfer of land from Europeans, under the pretence that they are not landowners.

The *Fennella* and *Louisa* have been chartered by the Chinese Government to convey back to Nghui the refugees who had been driven from their homes during the civil war which has been raging through that part of the country. Large numbers arrive daily here from the country awaiting a passage; among them is a large number of "Braves," who return to Hu-nan.

The necessity of an efficient river police is demanded. It appears that the present water police themselves are among the worst thieves; and that the police, taken altogether, of Shanghai, are a myth. Little by little, Government matters here are drifting into a crisis which, we hope, will work out a remedy not worse than the disease.

We hear from Ningpo that the Siamese steamer, *Viscount Canning*, Captain Shanning, when anchoring off the White Dogs, on her way from Hong Kong, had the misfortune to break her shaft, so causing her passage up to be twenty days in duration. The vessel's destination is Shanghai, though it will not be possible for her to leave Ningpo for a fortnight.

A soldier of the 67th regiment was attacked on the Yang-king-pang Creek, on what is called the French road from Sicka-wei, by a Chinaman armed with a knife. The soldier was quite unarmed, and succeeded in preventing the Chinaman from wounding him, but observing two or three men coming to the assistance of the man who commenced the attack, he took to his heels, and immediately met two gentlemen on horseback. The Chinaman escaped into a sampan, and the Europeans, reflecting that they were unarmed, did not pursue them. No doubt the object of the assault was to plunder the soldier of his medals, or whatever he might have about him.

Digitized by Google

The native and foreign rowdies who have during the past month taken such care to distinguish themselves in Shanghai gave on last Thursday evening a further proof of their activity. At about half past six o'clock the shop of a poor fellow who lives in Market Lane, a small street running from Church-street to Barrier Road, was entered by a gang of Cantonese armed with knives, who searched the house, seizing everything of value contained in it, and getting away safely with booty amounting to about three hundred dollars. Where the police were on the occasion is a mystery which we do not attempt to fathom. In Shanghai we have no areas, and no confiding "servant gals." The police might therefore be expected to do something sometimes—to be at least in at the death, and, if not able to prevent an outrage, to manage to report it.

We extract from the *Friend of China* as follows :—

(To the *Friend of China*.)

Messrs. Editors, — I met with an incident this morning which I think merits a public rebuke. Riding past the Prussian Consulate with a gentleman and lady companion, I observed that a large number of stones had been removed from my land, which fronts upon that site, and I immediately made inquiries of the French keeper of a gate near by, and was told that the stones had been taken and carried away by the soldiers of the quarters near there. I immediately went to the quarters and expressed a wish to see the officer in command. A young man kindly offered to call the colonel. A man soon made his appearance; who he was I know not. His conduct was that of a blackguard. Before I could state my complaint I was told to "clear out," "go away." I immediately rejoined that he had better behave in a gentlemanly manner, and hear what I had to say. He again, in a coarse, brutal manner, repeated the order to "go away," adding that I had no land about there, and if I didn't go off, he would have me arrested at once! I replied that he had better "try it." He finding I persisted in my purpose, *i.e.*, the making of my complaint, and was not to be intimidated by his violent threats and outrageous conduct, immediately turned and went away, stating "I could stay there as long as I liked."

Now, if he expects to stifle my complaints, and screen villainous depredations committed upon my property apparently with his sanction, he'll find himself mistaken, if there is any justice and virtue in the powers that be.

If we are to submit to these armed depredations, it is well for the public to know it. FREDERICK G. WARD.

[The above was handed to us by the father of the late General Ward.]

A statement of this kind from so respectable a quarter merits the attention of the public who have property in that direction, *i.e.*, near the Beloochee Barracks. No doubt Mr. Ward's property has been abstracted in a moment of necessity, when stone was needed for the outer defences. At the same time we must consider his treatment by the officer in command as very ungentlemanly, unless that individual entirely disclaims the intention of insulting a gentleman of Mr. Ward's standing. This is not the first time we have heard complaints of that officer.

Civilians here are accustomed to receive the highest courtesy from our brave defenders, and it is with pain we learn of Mr. Ward's having been so grossly insulted. We will still hope that the commander of the Ningpo Joss house troops was under a false impression when he went so far as to threaten to arrest Mr. Ward.

Military men ought to understand that they are the servants of the public, and *not* their master; and that as their code is carried out to the very *ideal* of honor and fairness, they should not only prevent the robbery of private property, but also show their respect to civilians who are gentlemen, and their superiors perhaps in some things, and certainly their equals, when it is a question of right and wrong.

No doubt the gentleman in command of the Ningpo Joss house force will extricate himself from the charges of Mr. Ward. If he does not we shall regret that some of our military are wanting in politeness, to say nothing of principle, which are positions untenable by those who represent such a respectable body as our defenders certainly are in China.—ED.]

NOTICE.—Communications for this journal should be distinctly addressed to the Editor, or to J. T. DOYEN, who this day assumes editorial responsibility. W. TARRANT.

Friend of China Office, Shanghai, 23rd Jan., 1864.

We learn from Hankow that the mercantile credit system is to be modified, a step, we think, in the right direction. It causes us some surprise that there are some "timid folk" there who "dodged" the question, on the ground of reference to the Shanghai houses. The Chinese perfectly understand the benefit of a cash system of trade, and they are cunning enough to band together to force foreign traders to *their* terms. As Europeans are shamefully deficient in having an *esprit du corps*, it works well to the advantage of the Chinese trader. We sincerely hope that the Chinese will continue to enjoy their advantage over foreign merchants, till the latter meet them on their own ground. It is nothing but right that the cleverest trader should laugh in his sleeve, provided the merchant that overreaches himself knows what he is about, and perfectly understands the "position."

The defence ditch seems to progress, 4,000 men being employed on it. The lowness of the river is complained of, especially above Kiukiang. Chun-Kwo Fan is still at Nanking (capital of Anghui), waiting, like Mr. Micawber, for "something to turn up." Le Futai is in the midst of marriage festivities, to say nothing of China New Year. Chung Wang has opened up communication with Nanking, and so matters remain. What next?

Major Gordon's Anglo-Chinese forces remain inactive pending answers from Peking relative to the cruel treachery of the mandarins at Soo-chow.

We extract from the *North China Herald*:—Amongst the other incidents which have occurred during the past fortnight, we regret to have to announce the wreck of the *Fire Cracker*, long known as one of the most successful river steamers. The S.S.N. Co's steamer *Kiangsi* arrived in Shanghai on last Saturday afternoon, and reported the steamer *Fire Cracker* badly on shore about sixty miles above Kiukiang. The water in the river is now so low that captains are obliged in various places to seek for channels. We understand that it was while groping for a channel that the *Fire Cracker* struck on a rock previously unknown. The S.S.N. Co's steamer *Shansi* left yesterday with a lorcha in tow, in order, if possible, to save some part of the cargo.

We have had a large fire in the neighbourhood of the settlement, which at one time seemed likely to lead to the most serious results. It originated amongst a quantity of coals stored in a Chinaman's compound, in the immediate neighbourhood of Messrs. Jardine, Matheson, and Co.'s silk factory. A large body of municipal police, accompanied by Mr. Gould, secretary of the municipal council, brought up the Paon-shun engine, and the Kwang-lung engine was also quickly on the spot. A party of the 67th Regiment and a body of seamen, besides some Indian troops, were marched up, and proved most indefatigable in pulling down the surrounding houses. Fortunately the wind was westerly, else the silk factory would in all probability have been destroyed.

Two seamen belonging to H.M.'s gunboat *Starling* got intoxicated on shore, and while in that state took a sampan in order to return to the ship. When in the act of going up the side they missed their footing and fell into the water. Lieutenant Campbell, of the *Hardy*, succeeded in saving one of them, but the other never rose to the surface. We understand that this is the second occasion upon which Lieutenant Campbell has saved the life of a drowning man.

SOOCHOW.—We understand that the Futai of this province has engaged to convey back to their homes the rebel soldiery who came over at the time of the fall of Soochow. Most of these men are natives of the country around Anking. The *Fenella* and the *Louisa* have accordingly been chartered up the river. Shanghai has been made the depot, and large numbers are now every day pouring in to wait their turn for embarkation.

From Quinsan we have received information to the effect that Kia-shing has tendered its allegiance, but that the Ping Wang has refused to accept Ching's guarantee for his safety, and will not come over unless a civil mandarin named Sieh, pledges himself for the safety of the garrison. It is said that Sieh has been sent to inquire into the matter.

The *Firefly* was seized by the Imperial troops near Changchow-fu, on the 22nd of January. It is said that after her recovery she was blown up by the mandarin Ko-ta-jen, but as to this no accurate reports have been received. As to the capture, however, there is no doubt.

HANKOW.

We learn that a meeting of foreign property holders was held at Hankow on the 18th January, on which occasion a matter

Digitized by Google

of great importance to all those connected with the Hankow trade was brought forward. It appears that the credit system has been for some time gaining strength, so that, although formerly the time allowed for payment did not exceed a fortnight or three weeks, now a merchant, in order to effect a sale, is compelled to give from a month to six weeks' credit, and is even considered fortunate if he receives payment at the end of that time. This evil has grown so rapidly, that it now assumes a shape really dangerous to the safe and satisfactory conclusion of business arrangements. It was therefore put to the meeting, as representing the body of merchants, whether they would agree not to do business, except for cash on delivery within twenty one days, or forfeiture of five per cent. bargain money, to be paid at the time of sale. The sense of the meeting was decidedly in favour of the measure, but some of the representatives of Shanghai firms declined to announce their decision until after consultation with the heads of their respective houses. An amateur theatrical company has been formed at Hankow. The first performance, which was given on the 25th of January, proved highly successful, and was attended by all the ladies resident in the settlement.

HONG KONG.

The English mail of 26th Dec. arrived on the 11th Feb. The dates are down to the 15th. The Chinese New Year and the Races appear to have monopolised attention, but did not prevent the Colonial Treasurer issuing his report, from which it appears that the revenue for 1863 was $572,968, and expenditure $448,669.

JAVA.

The weather has been still very unfavourable. Samarang, Solo, Madioen, Sourabaya, and Panaroekan have all been either wholly or partially inundated.

The British brig *Isabella*, Captain Heath, from Otago, had arrived at Batavia, and we regret to say that an unhappy accident deprived some of the passengers of their lives on the 8th February. On that day a *tambangan*, in which were the captain, a gentleman passenger, his wife, four children, and a Chinese nurse, was capsized on the bar. Three of the children, the nurse, and one boatman were drowned. The lady and surviving child were brought on shore almost lifeless, but were fortunately restored. Captain Heath was mainly instrumental in saving the life of the gentleman and his wife, having succeeded in swimming to a boat near at hand, and returning with it to their rescue.

The British ship *Florence Adelaide*, Captain Hiltz, from Table Bay to Singapore, grounded on a shoal not marked in her charts, shortly after passing through the Caramatta passage, and filled so suddenly that the crew had scarcely time to lower their boats to save themselves. All had arrived at Batavia from Indramayoe, to which port they were taken by the Dutch ship *Lammina Elisabeth*, and would proceed to Singapore.

The Hamburg ship *Jacatra*, 1,500 tons, Spring master, from Hamburg to Batavia with coals, caught fire off St. Paul's and Amsterdam, and was burnt to the water's edge. The captain and crew were picked up by the Spanish three-masted schooner *Trafalgar*, and brought on to Batavia. There being no Spanish Consul at that port, the captain, Biscot by name, after giving all he had on board to supply the men he saved, could get nobody to assist him with funds to purchase fresh supplies, and lost several days before he could procure the needful.

MALACCA STRAITS.

SINGAPORE.

The dates from this port are to the 22nd of February; but we regret to say that our files of papers have not come to hand.

The *Courrier de Saigon* having in its second number, published on the 10th January, boasted of the flourishing and unrestricted trade prevailing there under French rule, much in the terms used by the papers in France, the *Straits Times* comments on the article referred to as follows:—

"Our own records in the Import and Export Office give a very different impression of the condition of Cochin China ten years ago. It may be true that few of the junks then engaged in the trade with our ports were vessels were counted by hundreds, and not as yet the number of these pean traders are now. During the rice season there were units, as the Europassed over that did not see four or five of these junks arrive in a week pore alone, while at the same time a large trade was carried on with many of the surrounding native States. The commercial prosperity, under French administration, for which this ancient state of affairs has been exchanged, can be better understood by the world at large by a reference to the shipping statistics of Saigon, than from the generalities of any writer in the *Government Gazette* of that settlement. During the administration of Admiral Charner from 1860-1861, exactly fifteen ships, o the average of 350 tons, loaded rice at Saigon. During the time of Admiral Bonard, from 1861-1862, some twelve vessels of a similar size loaded, and since the accession of Admiral de la Grandiere, from 1862 to the end of 1863, only about five ships have taken cargoes. Certainly, this progression seems of the wrong nature. One vessel, which was chartered from this last year to bring down rice, had to load up with the very mat bags which the people had prepared for their own rice, but were unable to fill. As for junks, there is not now one to be seen; and yet this is the state of affairs with which it is intended to disparage the active native trade of ten years ago. But the writer we have quoted is particular to mention, as a sort of reason for the scarcity of shipping in the old time, the heavy restrictions that were placed upon trade, and instances the present freedom from these. We are afraid he has not been more fortunate in this allusion than he was in the one we have just discussed. The vaunted freedom of the port of Saigon consists—first, in a tonnage due of 50 cents per register ton of all vessels casting anchor there except French ships and Spanish ships; second, in a charge of $1 per ton for landing or taking on board ballast; third, in a light due of four cents per ton; and, lastly, in a pilotage, ranging from five to ten cents per ton, according to size. What would the merchants of Singapore say to port freedom of this sort? No; a charge such as this upon shipping would damage the best trade in the world. It is wrong that the French should congratulate themselves upon a progress in trade that is wholly illusory, for it will still further retard the attainment of that position of commercial prosperity into which we should wish to see their East Indian colony grow up.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

LEWES—On the 9th Jan., at Hong Kong, the wife of Capt. W. F. Lewes, of a daughter

WILSON—On the 11th March, at 2, Buckland Villas, Belsize-park, Hampstead, Mrs John C. Wilson, of a daughter.

MARRIAGES.

COLLINS—BORTON.—On the 2nd Feb., at St. John's Cathedral, by the Rev. J. J. Irwin, Colonial Chaplain, Charles Collins, second Clerk Police Magistrates Court, to Mary, third daughter of James Borton, Hong Kong.

CRIBB—GRAVE.—On the 12th March, at St. Paul's, Covent-garden, by the Rev. Charles E. Oakeley, M.A., B.C.L., assisted by the Rev. G. A. Crookshank, M.A., and the Rev. A. D. Graham, B.A., the Rev. Arthur William Cribb, C.M.S. Missionary to Fuhchau, China, eldest son of Mr. Arthur Cribb, of Soho-square, to Josephine, fifth daughter of Mr. Lewis Grave, of Henrietta-street, Covent-garden. No Cards.

DEATHS.

BATT—On the 22nd March, John Batt, Esq., of 8, Highbury-grove, and 39, Old Broad-street, London, aged 61. Friends will kindly receive this intimation.

GRAY—On the 8th Feb., at Salemba, Henry Alfred Gray, aged 19 years, youngest son of the late J. B. Gray, Esq.

HILL—On the 31st Jan., at the Civil Hospital, James Hill, destitute seaman.

MOORE—On the 12th March, at Southampton, Richard Henry, eldest son of the Rev. R. G Moore, vicar of Horkstow, Lincolnshire, and fourth officer of the Peninsular and Oriental Co.'s S.S. Baroda.

PATTON—On the 15th March, at his chambers, 20, Cockspur-street, Admiral Hugh Patton, aged 73.

SAVAGE—On the 14th March, at Southampton, suddenly, Francis James Saumarez Savage, Esq., youngest son of the late Major-General Sir John Boscawen Savage, K.C.B., K.C.H., aged 65.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—There is still some stock left at all the ports. The general feature of the market is the extreme firmness of the teamen, notwithstanding the universal disinclination of exporters to operate on the present scale of rates, which render it impossible to lay down teas at the prices ruling in London at date of last advices. Black teas can hardly be quoted lower, but greens are one or two taels below the extreme rates which they had attained. The export to Great Britain still exhibits an unprecedented total as compared with previous seasons, but it is considered yet doubtful whether the total export to all places will exceed that of last year.

CANTON.—Owing to the customary suspension of business at China new year time, and to the great firmness of the holders of Congous, the transactions of the fortnight have been trivial, and are thus reported:—Ankoi Souchong: 50 chests at 25¼ taels. Canton Greens: 4,000 boxes Gunpowder, low to common at 12¼ to 14½ taels. Country Greens: 260 half-chests Hyson finest 62 taels good cargo 42 taels. Stocks remain as last stated, the quantity of Congou being 42 chops and of Country Greens, 7,900 half-chests.

AMOY.—The settlements of the month consists of a few hundred packages to fill up the Neuhoff. There have been no arrivals, and the remaining stock is very trifling. The settlements reported consist of 127 half-chests. Oolong common to good common, cargo at $17½ to 19. Ankois, 60 half-chests common at 8. Congous, 362 half-chests ordinary to but middling, at 13¼ to 18¼. The remaining stock is comprised of 146 half-chests. Congou, 1,272 half-chests Oolong and Ankoi, and 458 boxes Caper.

FOO-CHOW.—The settlements, since the date of last report (24th ult.) have been on a very restricted scale, the teamen evincing no disposition to realise, and exporters no wish to purchase at the present scale of rates. The supplies from the country have ceased for the present, and it is not likely that there are many more teas to arrive; stocks however are slightly increased by Foo-chow packed teas. The settlements above referred to comprise only 500 ch. Congou at 15 to 17 taels short. The total arrivals to date are—Congou and Souchong, 601,800 ch., against 600,200 do. last season; Oolong, 172,900 hf.-ch. against 210,400 last season. The stock on the market is thus estimated—Congou, 24,000 ch., against 35,200 last season; Souchong, 2,400 ch., against 300 last season; Pekoe, 630 ch., against 1,500 last season; Oolong, 1,600 hf.-ch., against 20,000 last season; Scented, 4,000 boxes, against 8,000 last season.

SHANGHAI.—Black: We have again to report no settlements during the past week, the same causes we mentioned in our last having checked all business. There is, however, to-day rather more inquiry, as

Digitized by Google

the sudden decline in exchange is tempting merchants to make offers. Without any arrivals from Hankow and Kewkiang, our stock remains unaltered. Settlements on the market, none. Reshipment on owners' account, 4 chops. 2,314 chests Oopacks, Oonahms, Ningchows, and Hohows—say—2,314 chests, making total settlements and reshipments to date 581,114 chests. Stock, waiting shipment, 7 chops, and for resale 15 chops—22 chops. We quote second and third crop Oopacks and Ningchows, 25 to 29 tls., nominal; second and third crop Oonahms, 19 to 25 tls., nominal; second and third crop Hohow, 17 to 21 tls., nominal. Green: During the latter part of the fortnight there has been rather more inquiry for Green Teas, but as holders generally are very firm, only a small business has been done. Purchases can now be made at a decline of 2 tls. on our previous quotations. One chop of common Shanghai packed has been taken at 26 tls. Reshipment and settlements, 9,591 half-chests Fychow, &c., 1,337 chests Pingsuey, 1,335 half-chests chests Japan—12,263 half-chests, making total to date 232,835 half-chests. Stock of Green Tea is estimated at 10,715 half-chests Fychow, &c., 1,100 half-chests Shanghai packed Japan, 6,956 chests Pingsuey—17,871 half-chests.

HANKOW.—There have been no settlements during the past fortnight, and quotations remain unaltered. The total settlements for the season amount to 655 chops, leaving a stock on the market of 12 chops. There may be a little still to arrive, but certainly not much. The teamen have not pressed sales, and appear to prefer holding until after the holidays, as they have hitherto dictated their own terms.

KEWKIANG, Jan. 30th.—There is not a transaction to report. The stock is stated 34,000 hf.-ch. green, including some parcels of Kewkiang packed. The shipments to Shanghai since last report, say from 18th to 29th January, amount to 1,542 chests black and 2,900 hf. do. green, making the total for the present season to date 106,500 ch. black and 170,900 hf.-ch. green, against 51,500 ch. black and 183,500 hf.-ch. green, corresponding period last season.

YOKOHAMA.—(For the week ending 20th January.)—We have but little to remark on this article for the past week. The settlements have been but moderate, and prices have ruled at full rates. Some 600 to 700 piculs changed hands at rates ranging from $24.50 to 29.50 per picul; but with this exception, little else has been settled. (For the week ending 27th January.) We have to report another week of great dulness in this staple. The arrivals have been unimportant, and most buyers have been waiting for European advices. It is hardly to be believed that the Government have no hand in the present suspension of supplies, as the rates now current would bring large quantities down unless the merchants were prevented by some underhand conduct on the part of the officials.

RAW SILK.—SHANGHAI.—Since last report there has scarcely been a single transaction in China silk, the demands of the dealers having shown no decline, and 10th December advices from Europe holding out no encouragement for profitable investment. During the fortnight there have been no receipts from the interior, and from the most reliable native sources, it is affirmed that there is little silk to be brought down. It is impossible to give quotations in the absence of settlements, and the very material fall in the rate of Exchange has caused the dealers to hope that they may obtain an advance on their late demands. The supply from Japan has been about 600 bales, and it appears probable that shipments will continue moderate for the remainder of the season from that quarter. Since last mail the only transactions have been the re-shipment of Japan, say 584 bales; the transactions of corresponding fortnight of last year were 1,800 bales, and of the year before 1,500 do. The present unsold stock is computed at 5,000 bales, against 3,500 do. same period last year, and 9,000 do. season before.

YOKOHAMA.—(For the week ending 20th January.)—This staple has been much neglected during the past week, partly from there being literally no supply of the article, and partly from the high rates demanded by the sellers for the few lots on offer. (For the week ending 27th January.)—Hardly a transaction has taken place in this article during the past week; supplies have been on the smallest possible scale, nor can any alteration be expected on this side of the New Year's holidays; prices nominally unchanged; with regard to the future, native merchants speak of large supplies to arrive shortly, but little or no reliance can be placed on such information. The following are the latest quotations:—Ida: Best, none; medium, $530 to 550; inferior, 510 to 520; Mybush and Sinobus, best, 550 to 560; medium, 530 to 540; inferior, 515 to 525. Cohios: Best, 425 to 505; medium, 460 to 485; inferior, 440 to 460. Oshios: Best, 530 to 550; medium, 420 to 520; inferior, 440 to 480. Hatchogee: 510 to 520.

DRUGS.—Cassia Lignea: No sales, quotation $16.50 to 17, stock 100 pls. Cassia Oil: Neither sales nor stock—nominal quotation, 215. Cassia Buds: No sales—quotation, 55 to 57½, stock about 100 pls. Star Anniseed: Neither sales nor stock—nominal quotation, 22½ to 25. Anniseed Oil: Neither sales nor stock—the value is 140 to 150. Rhubarb: The market is bare, and there is no inquiry. China Root: No sales—quotation, 3.25 to 3.75, stock 300 pls. Galangal: No sales—quotation, 3.50 to 4, stock 250 pls. Galls: No sales—quotation, 14.50, stock very trifling. Vermilion, 45 to 46 per box.

CAMPHOR.—HONG KONG.—In no demand and no sales reported since the issue of last report. The stock on hand amounts to some 1,500 to 1,600 piculs for which $20 per picul is asked but this price is quite nominal and $18 per picul would be accepted by some native Hongs, holders of small lots.

COTTON.—HONG KONG.—Before the arrival of the English mail on the 11th instant there was no animation in the market as the Chinese holders, with very few exceptions, were unwilling to place at the low rates then nominally quoted. Since then a good demand has sprung up in consequence of a rise in price in England by late telegrams. During the interval about 6,000 bales of Shanghai were sold at $29 to 32; 5,000 bales Ningpo, 28 to 34; and 2,000 bales Japan, 33.50 to 36. The principal foreign holders [illegible] now shipping instead of selling, as before. Import from North has amounted to about 10,000 bales, and [illegible] ease in the money market in Shanghai, with the re[illegible]ption of business by the Chinese, will again tend to the [illegible] to 32; Ningpo, 32 to 34; and Japan, 35 to 36. Stock of all kinds is about 40,000 bales.

CANTON.—The business done in this market has become so insignificant as to be only worthy of record, lest it might be supposed that they had been omitted to be noticed. Throughout the fortnight no sale whatever is reported, and rates remain nominally as last quoted. The entire stock is comprised in 500 bags Shanghai, and 200 do. Ningpo.

AMOY.—There have been no sales from foreign hands, stock being 1,300 bags held by Chinese. The present quotation is $31 to 32 for Shanghai, with a drooping market.

SHANGHAI.—For some days subsequent to the date of last advices the market, influenced by the high rate of Exchange and the advance in freights, continued dull and tended down; and upon those causes being removed, and the rates of Exchange materially declining, an active inquiry set in for good quality, which proving scarce, soon commanded 21 to 23 taels. The supplies from the country continue scant, and the bulk of the stock is in the hands of foreigners, who incline to hold for an advance, which it is very probable they will succeed in establishing—especially should Exchange keep down.

HANKOW.—There having been no demand for export, prices tend down. The only transaction reported for the fortnight is a sale of 200 bags at 18 to 18½ taels.

YOKOHAMA.—From a variety of causes this article has experienced a heavy and rapid fall—quotations being upwards of $10 lower. Supplies continue to arrive freely, but for the moment the decline appears checked. No doubt the next mail from China will have some marked influence, many anticipate an adverse one.

CHINA IMPORTS.

COTTON YARN.—There are not any sales of Yarn to report, and prices remain without change to notice. Grey Shirtings: The quotations for these goods remain without material alteration, and the sales effected during the fortnight are limited to 5,000 pieces. White Shirtings have found purchasers to the extent of 400 pieces, and prices remain as before quoted. T-Cloths: The sales of the past fortnight are reported at 2,000 pieces, and there is no material alteration observable in the value of these goods. White Spotted Shirtings, Dyed do., Brocades, Whites and Coloured: Some 500 pieces of coloured brocades have found purchasers at $5.90 per piece. In the other descriptions enumerated there has not been any business done. Damasks have also been bought to the extent of 500 pieces, and prices remain unchanged.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Remain without alteration to notice in value, and the only sale reported is one of 140 pieces of Spanish stripes. Long Ells: These goods have remained without enquiry during the fortnight, and the only transaction to notice is the sale of 220 pieces of damaged sold by auction. Camlets: There have not been any sales of these goods effected since the date of last circular, and prices remain as they were then quoted. Lastings: There have not been any transactions. Blankets have been taken to the extent of 400 pairs at about former rates.

METALS.—Iron, Flat, &c., remain without inquiry in Hong Kong, and there have not been any sales reported during the fortnight. In Canton, where prices at the date of last circular showed some slight improvement as compared with previous advices, settlements are comprised in 1,600 piculs of Nail Rod, and 850 piculs of Bar, sold by public auction—130 piculs of Iron Wire have also changed hands. Lead remains in this colony as last quoted, and about 520 piculs have changed hands, while in Canton an advance of about 5 cents per picul has been established, with sales of 2,500 piculs reported. Tin: A fair amount of business has been transacted in Tin during the fortnight, and sales of 1,200 piculs are reported. Tin Plates: Nothing doing either here or in Canton. Steel: There are not any sales to notice.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divideduto decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Privat.
At Shanghaf (per Tael.)	6 months sight.		6s. 6d. to 7s. 1d.	6s 8d. to 7s. 3d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 11d.	5s. 0d. to 5s. 1d.
At Singapore	6	ditto	4s. 11d. to 4s. 11½d.	5s. 0d. to 5s. 1d.
At Manila	6	ditto		

At Shanghai: Bills on India, Rs. 303 to 304 per 100 taels. At Hong Kong: Rs. 229 to 230 per $100. Bar silver at Shanghai, 110. Hong Kong, 5 prem. Mexican Dollars at Shanghai, 74; and exchange on Hong Kong, 25 discount.

GOLD.—We have received since last accounts three lakhs and a half of dollars worth, principally from San Francisco. The amount exported, including that by the *Behar* on the 1st Feb., and excluding that to leave by the *Ottawa* on the 15th, is only equal to one and a half lakh. The facilities which Hong Kong possesses for the disposal of this bullion is proved by the advance in value in face of such considerable receipts.

SILVER.—Half a lakh of bar silver has been imported, and we are at present without any records of its re-shipment. Some sales have been made at 5½ per cent., but it might be difficult at present to obtain as much.

DOLLAR CURRENCY.—Over five lakhs have been imported, and three and a-half have been sent away during the fortnight. The demand for clean coin is not active at the moment. An amount of new small coin has been received by the Government, but as the absorption of this currency will be slow it has not been taken into account.

DISCOUNTS AND MORTGAGES.—Banks' own acceptances, which a fortnight since commanded twelve per cent., have been done pretty largely at 9 per cent. Mortgages of house property may still be obtained at from ten to twelve per cent.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—From London: Jan. 20, Etheldrida. From Holland: Fagel.

At SHANGHAI.—From Liverpool: Feb. 3, Sea Nymph. From Cardiff: Jan. 30, Theodore and Lulo; Feb. 2, Egean. From Sunderland: 3, La Serena, Cambodia. From Newcastle: 4, Netherley. From Newport: 5, Child of the Ocean.

At HONG KONG.—From London: Feb. 5. John Banfield; 12, Isabella, Falcon. From Liverpool: 12, Sarica. From Cardiff: 4, Edith; 11, Antonia. From Newcastle: 5, B by Benmore. From Hamburg: 11, Canton. From New York: 1, Benefactress.

At MANILA.—From Glasgow: Jan. 28, Perfecta.

At SINGAPORE.—From Glasgow: Feb. 12, Warsata. From Cardiff: 7, A. Norwood, Harzburg. From Sunderland: 7, Freida. From Bordeaux: 1, Minerva. From Amsterdam: 6, Almelo. From Hamburg: 14, Amphitrite,

DEPARTURES.

From JAPAN.—For London: Jan. 20, Forerunner, and Alexandra.

From SHANGHAI.—For London: Feb. 1, Aurora Australis; 6, Annie Archbell. For Liverpool: 2, Thomas Royden. For New York: Jan. 30, Alt Mecklenburg; Feb. 4, Silvercraig. For Montreal: Feb. 1, Romeo.

From FOOCHOW.—None.

From HONG KONG and CANTON.—For London: Feb. 9, Alchymist; 11, Tamerlane. For Liverpool: 1, Bella; 11, Constantia. For New York: 6, Hamilla Mitchell.

From MACAO.—For Falmouth: Feb. 6, La Plata.

From MANILA.—For London: Jan. 30, Tetuan. For New York: 30, Caduceus. For Boston: Feb. 6, Troas.

From SINGAPORE.—For Boston: Feb. 12, Pearl.

LOADING.

At JAPAN.—For London: Anglo Indian, Auld Reckie, Cissy, Mary Shepherd. For New York: Osborne.

At SHANGHAI.—For London: Samuel, Spirit of the North, Thomas and Rebecca, Berdinkha. For Liverpool: Blackburn, Bentick, Bertie, Fort William, M. M. Peter, Victory, Polmaise, Macassar, Antelope. For New York: Heversham and Lord Collingwood.

At FOOCHOW.—For London: Daybreak. For New York: Dorette.

At HONG KONG and CANTON.—For London: Vanguard, Queen's Own, Coniston.

For LIVERPOOL.—Black Prince, Berwickshire, Nancy Brysson, Patrician, J. L. Dimmock. For New York: Resolute.

At SINGAPORE.—For London: Kalahome, Polly, Eliza Thornton.

At BATAVIA.—For London, West, For Channel for orders: Annie Forster.

For AMSTERDAM.—Zeenymph, Maria Agnes, Java Packet, Vriesland, Maria Eliza. For Rotterdam: Hendrika, Francina Williamina. For Holland: Leading Star, Friesland.

FREIGHTS AND CHARTERS.

JAPAN.—To London, for cotton and silk, £6; and £5 to £6 for tea.

SHANGHAI.—Tonnage continues in active demand, both for home and for coasting ports. The rates are as follows:—To London, £4 to £4. 5s. To Liverpool, £4 to £4. 10s. To London and Liverpool (*via* Yokohama), £5. 5s. to £5. 10s.

FOO-CHOW.—To London, £5.

HONG KONG.—The demand is good, and is expected to continue so, although there are plenty of unemployed tonnage in the harbour. The rates for Europe continue firm, which are:—For London, £5, and Liverpool, £4. 10s. per ton. To Saigon and back, 50 to 55 cents per picul. To Bangkok and back, 55 to 60 cents per picul.

MANILA.—Freights have advanced, which are as follows:—For Liverpool: For Clayed Sugar, £4. 15s., Unclayed £5, and £6 to £6. 5s. for Hemp.

SINGAPORE.—There is an active demand for the rice ports, and some inquiry for home. To London: £3. 10s. per ton; Gambier, Sugar, and Sago Flour, £4. 10s. for light cargo. To Rangoon and back; 50 cents per picul. To Hong Kong: 70 cents, and to Shanghai, $1 per picul. Rangoon to Hong Kong: $1 per picul.

BATAVIA.—To London: £4. 16s.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Jan. 9, Florence Adelaide, Cardiff to Singapore; 11, Minerva, Bordeaux to Singapore, 16, Hortensia, Cardiff to Singapore; Willem and Carel, Newcastle to Batavia; 18, Albuerra, London to Shanghai, 19, Akinda, Newcastle to Japan; 21, Joan M. Kemper, Amsterdam to Batavia, 31st, Otto, Newcastle to Hong Kong, Feb. 4, Emily and Hall, Cardiff to Singapore, Wilhelmina, Newcastle, (for orders Anjer); 6, Canton, Hamburg to Singapore.

From UNITED STATES, &c.—None.

From China, &c., to England and Continent.—Jan. 8, General Putnam, Shanghai to Liverpool; 11, Virginia, Hong Kong to Liverpool; Ivendre Brodre, Singapore to London; Amaranth, Amoy to London; Itsamboul, Japan to London; 16, Montmorency, Shanghai to Liverpool; 17, Tafferette, Canton to Havre; 20, Crusader, Singapore to Liverpool; Saint Michel, Shanghai to Bordeaux; 22, Glaramara, Foochow to London; Abrecht Oswald, Foochow to London; 30, Koh-i-noor, Hong Kong to Liverpool; Emma, Singapore to Copenhagen; Feb. 6, Ocean Bride, Hong Kong to London; Orithona, Shanghai to London; Oliver Cromwell, Shanghai to London; Fair Leader, Shanghai to London; Devonshire, Rio, Hong Kong to London; Orion, Macao to Falmouth; 7, Thomas Dryden, Shanghai to London; 8, Veloz, Shanghai to Liverpool; 8, Chili, Singapore to London; 10, Alice Tainter, Shanghai to Liverpool.

From CHINA, &c., to NEW YORK.—Jan. 6, Elizabeth, Shanghai to New York; 11, Kahlamba, Foo-chow to New York; Guiding Star, Shanghai to New York; Johanna, Shanghai to New York; 21, Capella, Shanghai to New York; 29, Hermine, Shanghai to New York; 31, Thetis, Shanghai to New York; Feb. 6, Santon, Foo-chow to New York; 8, Hamilla Mitchell, Canton to New York; Jan. 31, Don Eli Susanne, Shanghai to Montreal.

COMMERCIAL POSTSCRIPT.

The following is from the circular of Mr. Page, bullion broker:—Mexican Dollars: Notwithstanding the large arrivals per Louisiane, Bolivar, and La Plata, amounting to over a million of dollars, no great decline has taken place in price. On and since the 16th inst. about £150,000 have been settled here for China at 5s. 3½d., and some £50,000 (in time for the M. Impl. Steamer of 19th inst) were settled at Marseilles at 5s. 3⅞d. At the present time, with no opportunity for despatch before 4th proximo, and with a further arrival to be expected per W. L. Packet,

Digitized by Google

due on 28th inst. there appears to be no inquiry, and no quotation can be given. Probably a limited amount could still be obtained within the next few days, at the last price of 5s. 3½d.

SILK.—We have had more activity in China and Japan silk, and the market has assumed a somewhat firmer tone. Since receipt of the China telegram announcing a considerable increase in the unsold stock at Shanghai, there has been less disposition to do business, but it is generally considered that this news requires confirmation, and the China letters due on Monday are consequently awaited with considerable interest. Deliveries from 1st or 23rd inclusive:—China, 2,416 bales; Japan, 1,207 do.; total, 3,623 do. The quotations are:—Tsatlee, No. 1, 22s. 6d. to 23s.; 2, 21s. 6d. to 22s.; 3, 20s. 6d. to 21s.; Taysaam, No. 1, 20s. to 20s. 6d.; 2, 19s. to 19s. 6d.; 3, 18s. to 18s. 6d.; Mibash, No. 1, 22s. 6d. to 23s. nominal; 2, 21s. 6d. to 22s.; 3, 20s. 6d. to 21s.

The decline in the Cotton Market is confirmed. The price of China is ¼d. per lb. lower than last week.

ARRIVALS NOT INCLUDED IN THE TABLES.—March 23, at Portsmouth, from Batavia, Zephir; 18, off Scilly, from Batavia, Graafstroom; 21, off Belle Isle, from Batavia, J. J. Granville; from Sourabaya, Chaptal (supposed); 24, at Mount's Bay, from Hong Kong, A. O. Anderson; at Queenstown, from Moulmain, Alice Thompson; 17, off Scilly, from Manila, Preusse; from Kanagawa, Cambridge. Off Folkestone, from Batavia, Tuisco; March 24, at Plymouth, from Patjitan, Theodora Machtilda; 22, off Plymouth, from Batavia, Luconia. Off the Eddystone, from Japan, Maria Theresa; 18, at Cadiz, from Maulmain, Astrea.

DEPARTURES.—March 5, from Santa Cruz (Teneriffe), for the Cape, Singapore, and China, Yuen-tze-Fee (str.); 24, from London, for Hong Kong, Langdale; for Hong Kong and Canton, Lord Raglan; 26, from Glasgow, for Singapore and Penang, Hoang-Ho; March 23, from Cardiff, for Singapore, Alblasserdam; 26, from London, for Cardiff and Hong Kong, Cavour.

SPOKEN.—A Dutch barque, showing 3rd d.p., No. 6,970 (Atacama), Sourabaya to Middelburg, Feb. 22, 31 N., 37 W.; A. R. Falck (barq.), Sourabaya to Amsterdam, Feb. 27; Marmion, Canton to New York, Jan. 8, 24 S., 67 E.; Nederwaard, Penang to Rotterdom, Feb. 22, 5 N., 28 W.; Guurtje and Maria, Falmouth to Batavia, Feb. 14, 3 S., 28 W.; Thusnelda, Brem. barque, Newport to Singapore, Jan. 21, lat. 33, lon. 30.; Bernard and Agnes, Amsterdam to Singapore, Jan. 22, 1 N.; Amazone, Hamb. barque, Hong Kong to Liverpool, Dec. 31, in the Straits of Sunda; Canopus, American ship, Sumatra to Pernambuco, Jan. 12, off Madagascar; Indiaman, Liverpool to Hong Kong, Jan. 30, 2 S., 134 E.; Conflict, London to Hong Kong, Jan. 12, Straits of Manila; Esmeralda, Newcastle to Shanghai, Jan. 22, 40 N., 132 E.

CASUALTIES.—Amsterdam, March 24.—The Vertrouwen (ship), de Vos, hence to Sourabaya, has put back to-day with considerable damage, and must go into dry dock to repair, having been in collision.

The Alexander, of New York, from Liverpool to Singapore, struck on the Frederick Rock, Straits of Rhio, Feb. 5, and was beached same night in a sinking state on East Island.

LAID ON.—At Glasgow, for Shanghai, Glenclune; at London, for Singapore, Coromandel.

The Admiralty have invited tenders for the supply of 6,000 tons of Welsh coal, to be delivered at Shanghai. Ships are in request also for coals to Singapore and Hong Kong.

MANCHESTER MARKETS.—Mr. Mendel's Circular states that prices are weaker, with a limited demand. Grey Shirtings, 7lbs., 17s. to 17s. 6d.; 9lbs., 23s. 6d. Cotton Yarns, 16-24, 2s. 6d. to 2s. 7d.; 28-32, 2s. 8d. to 2s. 9d. Maddapollams, 7s. 3d. Long Cloths, 19s. 6d. T-Cloths, 13s. White Spot Shirtings, 21s. 6d.; White Brocade do., 22s. White Damasks, 37s. 6d.

THE P. AND O. COMPANY.

The P. and O. Company will reduce their fares on the 1st June, as follows:—

Penang	£95
Singapore	£100
Hong Kong	£120
Shanghai	£130

We hear, also, that arrangements are in progress to give the passengers' cargo, &c., to and from the ports East of India, a special steamer from Suez, instead of as at present being transferred into the boat from Calcutta at Galle.

THE "ADVENTURE" FOR CHINA.—Under our Naval and Military will be found a notice of this vessel. The following is the latest posting in reference to her departure:—The *Adventure*, screw troopship, Capt. C. L. Waddilove, remains at anchor at Spithead, the present orders being that she is to remain there until about the 12th proximo. If no fresh case of small-pox appears there among her crew she will proceed to Dover, and embark there a battery of garrison artillery, and a detachment of the 2nd battalion of the 20th Regiment. From Dover she will proceed to Plymouth and there take on board the troops and naval supernumeraries conveyed to that port from Portsmouth in the *Himalaya*. She will then start on her China voyage. Statements have been made in connection with this ship, regarding the prevalence of small-pox at Portsmouth, which are gross exaggerations. Small-pox is prevalent to a certain extent in some of the most crowded portions at Portsmouth and its suburbs, as it is just now in many other towns, but there is no foundation for the statement that there are crowds of people waiting at the doors of medical men for vaccination, &c. The disease made its appearance on board the *Adventure* and as a simple matter of precaution her vogage to China has been delayed the cases having in the meantime been removed to hospital, a number of her crew vaccinated, and the ship thoroughly fumigated and cleansed.

Captain Townsend, Ensigns Wayman, Francklen, and Hincks, with a small detachment of the 60th Regiment, go out to China in Her Majesty's ship *Adventure*, to join the head-quarters.

ANOTHER NEW GUN.—The Mersey Steel and Iron Works Company have just completed a new description of gun for Mr. Mackay and some experiments have taken place on the Crosby shore near Liverpool. The weapon is a large wrought iron gun; for the purpose of throwing cylindrical shot, and its peculiarity consists in giving the shot a sufficient rotatory power without allowing the missile to enter the rifling. The trials were of a preliminary nature, intended to ascertain the general capabilities of the gun, and to test the velocity of cylindrical shot of various weights with graduated charges of powder. The initial velocity was taken by the apparatus designed by Mr. Newman, of the Electric Telegraph Company, being somewhat similar to that used at Shoeburyness. With a projectile weighing 100lbs., and a charge of 20lbs. of powder, the initial velocity attained was 1,508 feet per second, although the wind blew in fitful gusts of half a gale across the range. Several shots went through the targets which were placed at a distance of 1,000 yards and 1,500 yards. The weight of the gun is about nine tons, and the bore is 8.12 inches diameter.

SALE OF THE EFFECTS OF THE LATE MR. W. M. THACKERAY.—There was a large gathering of literary men, artists, and others, who were the personal friends of the late Mr. W. M. Thackeray, in the house which was built, some time ago, under his superintendence, on Kensington Palace-green, to witness the sale of his library, furniture, and other effects, which were disposed of by auction. The greatest attention appeared to be paid in the first instance to the library, and particularly to those books which Mr. Thackeray had made the chief object of his study. Among these were the old English novelists and poets, with Euripides, Sophocles, Homer, Horace, Virgil, and other classical writers. The pictures were not numerous, but they had evidently been selected with great care and judgment. Amongst the articles sold were beautiful old Italian, French, and English decorative furniture and ornamental objects, with some valuable specimens of porcelain. The appointments of the house generally were much admired. The various articles secured good prices. The sale will be continued. It was announced by the auctioneers that the lease of the mansion will be sold by private contract. It is held direct from the Crown, for about 80 years, at a ground-rent.

THE ATTACK ON KAGOSIMA.—The *Spectator* does not from the following appear to be satisfied with the despatch of Colonel Neale. The analogy is a very strained one. "The Government has received a despatch from Colonel Neale explaining the disaster of Kagosima, which the official journals consider very triumphant. It would be, if it had anything to do with the accusation. Colonel Neale says the town holds 40,000 people instead of 180,000—a figure we took from the local accounts—that they all had orders to leave the town before the attack began, and that by Japanese confession, the fire blazed so high because there was nobody left to put it out. That is pleasant reading to people who dislike useless slaughter; but how much of all that did the Colonel know *before* the bombardment began? The charge is one of carelessness about people's lives, and Colonel Neale replies by showing that his acts did not take so many as they naturally ought to have done. Suppose Smith fires into a crowd of children, and everybody ducks. Is Smith innocent?"

AMERICAN INTERESTS IN THE FAR EAST.—Senator Morgan presented to the Senate a memorial from the American Geographical and Statistical Society in favour of Surgeon Macgowan's proposed economic mission to Eastern Asia, that portion of the project which contemplates the negotiation of commercial treaties with Cochin China and other States east of the Cape of Good Hope being, in the opinion of that Society, a matter of pressing and immediate importance.

THE COAL EXPORTS OF THE UNITED KINGDOM.—The coal exports from the various ports of the United Kingdom during the month of February amounted to 575,933 tons, an increase of 90,320 tons compared with February, 1863. The total exports during January and February, 1864, were 1,107,637 tons, an increase of 227,643 tons as compared with January and February, 1863. During February, 1864, the total imports of sea-borne coal into London were 228,233 tons, a decrease of 37,646 tons as compared with February, 1863. From the 1st January to the 28th February, 1864, there were 1,538 ships containing 576,830 tons of coal, being a decrease of 201 ships and 22,468 tons of coal as compared with the first two months of 1863. By railways and canals the imports were 132,354, being an increase over 1863 of 92,313 tons. The actual increase of imports in February, 1864, was 54,667 tons, and from January 1 to February 29, 1864, as compared with 1863, 96,597 tons.

JAMAICA AND THE LATE EARL OF ELGIN.—A resolution of the House of Assembly, Jamaica, thus records the sense in which that House regards the loss of the late Governor-General of India:—"That, lamenting deeply the death of the late Earl of Elgin and Kincardine (once the Governor and Commander-in-Chief of this island), the Assembly of Jamaica gratefully record their high sense of the skill with which he administered its government, and the conciliatory and social spirit he displayed towards all its classes; and appreciating highly the worth of rulers so gifted to govern people of different interests and origin, the Assembly sorrowfully express their sympathy with their Sovereign, who has lost such a servant, and with the people of the Indian Empire, who have been deprived of such a ruler—so well calculated to develop among them the career of conciliatory policy and wisdom he commenced in this island, where all honour his name and memory, and deplore their country's loss.—WM. KEMBLE, Clerk to the Assembly."

GUANO.—The imports of guano last year seem to have been on a larger scale than in any previous twelve months since 1858. Thus, the computed value of the guano imported in 1863 was £2,658,856, against £1,635,322 in 1862, £2,022,283 in 1861, £1,557,895 in 1860, £769,333 in 1859, £4,084,170 in 1858, £3,613,074 in 1857, £2,136,431 in 1856, £3,137,160 in 1855, and £2,530,272 in 1854. The quantities received in the ten years were:—233,574 tons in 1863, 141,636 tons in 1862, 178,423 tons in 1861, 141,435 tons in 1860, 84,122 tons in 1859, 353,541 tons in 1858, 288,362 tons in 1857, 191,501 tons in 1856, 305,061 tons in 1855, and 235,111 tons in 1854. The imports, as a whole, do not seem to be making any progress, notwithstanding the considerable deliveries in 1863.

DR. BOWRING has presented to the British Museum his very fine collection of insects made during his long residence in the East. The Bowringian collection, as it is called, consists of 84,200 specimens, arranged in three cabinets of sixty drawers each, and fourteen cabinets of twenty drawers [illegible]

COCHIN-CHINA.—The *Moniteur de la Flotte* publishes an interesting letter from a correspondent at Saigon, the capital of the new French colony in Cochin-China, dated the 30th of January. The colony is said to enjoy perfect tranquillity, and the rivers were never so safe, thanks to the energetic measures adopted against the pirates who infested them. The last harvest was most abundant, which, perhaps is one of the causes of the tranquillity that prevails. In consequence of the great number of merchant vessels which have arrived at Saigon the price of rice is well maintained, a fact which will dispose the natives to remain at peace. At the date of the letter there were 20 foreign merchant ships loading rice at Saigon. A great number of Annamites are demanding grants of land from the French authorities, others are seeking employment. Europeans are beginning to establish themselves outside of Saigon, and they are treated with great kindness by the natives. The land is cultivated in every direction, fresh gardens are planted, and the Saigon market is well supplied with vegetables. Although the population of the town has tripled within 12 months the price of provisions has diminished, and it is expected to fall lower. The Annamites are delighted to find that the French authorities render justice gratis, and the custom of giving presents to the native magistrates is gradually losing ground. It is the intention of Admiral de la Grandiére to build a gunboat at Saigon; hitherto the largest vessel completed was a whale boat. A naval arsenal has likewise been commenced, and several workshops covered with thatch are already occupied. The Annamites are industrious workmen, and excel in imitating the work of others. The Annamite seamen likewise continue to render good service. The Admiral Governor is about to send several boys to France, as he expects that on their return they may be useful as interpreters. The *Forbin* has taken three; the *Europeen* will take as many, and great numbers offer themselves for a similar voyage.

THE ANGLO-CHINESE FLEET.—The *Army and Navy Gazette* says:—Whether Sir F. Bruce be right or not in his very severe strictures upon Mr. Lay, no one can doubt that Captain Sherard Osborn has acted in the crisis which led to the dissolution of the Anglo-Chinese squadron with the utmost chivalry and good faith. Sir F. Bruce accuses Mr. Lay of using language and advancing pretensions tending to increase the apprehensions otherwise generated by his proceedings, that he was about to act the "Imperator," and become a Mayor of the Palace. To them he was an agent who wished to become the "*Se qui facit per alium*," and they resolved in self-defence to decapitate the "*se*" and the "*alium*" together. Captain Osborn acted with the most perfect good faith, and with the self-respect which should be, and is, the characteristic of an officer of Her Majesty's Navy in such positions. It is strange to hear Sir F. Bruce declaring to Lord Russell that the Chinese Government knew nothing of Mr. Lay, and that he was merely recommended to them by Mr. Hart, whom Mr. Lay describes as his *locum tenens*. Indeed, Sir F. Bruce throws much mud in the name of Prince Kung on Mr. Lay, and holds him up to the Foreign Office as a Custom-house agent who tried to make himself a dictator. "They do not consider him a political officer at all, and they do not consult him, as of right, even in matters affecting foreign trade." Prince Kung declares Mr. Lay assented to the conditions which he finally repudiated. All honour to Captain Osborn and his officers for their conduct. It was what might have been expected from British officers who find themselves in a false position.

THE CHINESE JUGGLERS.—The Parisians don't consider Sam-Ung and Arr-Hee to be barbarians, I assure you. "Who are they?" you ask. *Entre nous*, they are two Chinese jugglers, who have been vindicating their rights to be considered responsible members of society by having a law-suit. The Tribunal of Commerce was the scene of action, to which the venue had been changed from the Circue Napoleon. Arr-Hee engaged Sam-Ung, for 50 francs a week and his board and lodging, to stand up against another board while said Arr-Hee darted knives at him, and set him, as it were, in a frame of sharp steel. Ill-feeling having arisen between these two artists, the dartee naturally objected to conclude his engagement, urging very truly that a man with an ill feeling towards you might possibly dart into instead of round you. Imagine a man with a spite pelting one with sharp carving knives! The darter pleaded that art was above passion, and that his knife could and would "*effleurer*" his living target as delicately as ever. Nevertheless, he was condemned with costs. In the interest alike of dramatic art, humanity, the amusement of delicate women and sweet children, it is to be hoped that such a foolish, trifling quarrel as this will not be allowed to interfere with so truly interesting and dramatic a performance.

THE RACE CUP FOR SHANGHAI.—Mr. Hancock, of Bruton-street, had the honour of an interview with their Royal Highnesses the Prince and Princess of Wales, to submit for inspection a very fine silver group, manufactured by him for "The Shanghai Races," subject, "The Battle of the Standard:" King David defending the body of his son at the battle of Northallerton:—

"The Scotts they fled, but stille the King,
With hys brave sonne feught fulle welle,
Till o'er the moore an arrowe y flewe,
And brave Prynce Henrye felle."

THE *Illustrated News* of the 19th inst. has an engraving of "The Governor of Kanagawa going to a Fire," and another of Japanese warriors.

THE "ALABAMA."

(From the *New York Herald* of March 1.)

Two English mercantile houses, that have lost largely by the depredations of the *Alabama* are, it is said, about to send out a fast and powerful ship to assist in her capture. Naturally enough, it has been suspected that this is only another rebel dodge intended to increase the number of the rebel cruisers now afloat. Since the Emperor of China and the Bey of Tunis have proved to be fellows of no account, it is not improbable that and thus carry a cruiser to sea on that tide of popular sentiment which is the Southern agents in England may be ready to avail themselves of the virtuous indignation that John Bull now begins to feel against that awful *Alabama*, now rising in our favour. Once before a ship was fitted out in England, under the most favourable auspices, to cruise against pirates. Her commander was a New Yorker, named Captain Kidd, and when he got to sea he proved to be the worst pirate of all. Probably we may have a repetition of that history in the present case. But we suppose our interests are quite safe; for it can hardly be possible that Mr. Adams will fail to scrutinize very closely the whole history of this ship. If she is not all right he can stop her, as he has stopped others; if she is all right he will merely sit still, and we suppose there will be no affidavits. The British Government, as we all know, has no power in the absence of affidavits. Affidavits are the power behind the throne, and in front of the throne; and all around the throne. Without affidavits the custom house officers will be as lifeless as lampposts, the cannon of the British men-of-war will be the merest Quakers, and the cruiser will go to sea and catch the *Alabama*—of course.

The Panama correspondent of the *Herald* writes:—

"I am in expectation daily of hearing that Semmes and the *Alabama* are in the Pacific Ocean, burning and destroying as usual. His having been among the East India Islands is known all over India and China, and his business there will soon be over in consequence. His next point will be in this vicinity. The commerce of the Pacific Ocean has heretofore been undisturbed by rebel cruisers. Hence, Rip Van Winkle Welles and his cunning little Fox thinks there is no necessity of increasing the number or class of vessels of our squadron in these waters. This pair of worthies, now given to ship-racing, will find, as usual, when too late, that the Pacific Ocean can be visited by Semmes, as well as any other part of the world, and that the finest field now open to him will be sure to be taken advantage of by this active man. He made a mistake in capturing the *Ariel*, and may attempt to redeem the error by getting possession of one of the steamers from San Francisco. He must be in want of funds, and a million and a half in gold would supply his wants for a long time, and buy coal wherever he can find it. Some such disaster I am looking for; that it has not occurred before is the only matter for surprise. When it comes what a row there will be, and how the question of "who's to blame?" will go the rounds of all the public journals. This question can be answered by the two words, "Navy Department," the establishment that has now in the Pacific Ocean the following squadron to guard the commerce and the interests of the United States:—Steam sloop, *Lancaster*, twenty-two guns (flagship), at Acapulco; steam sloop, *Narragansett*, seven guns, in the North Pacific; steamer *Saginaw*, three guns, on the coast of Mexico; steam frigate, *Saranac*, ten guns, undergoing repairs at Mare Island; sloop of war (sailing), twenty-two guns, South Pacific, and sloop-of-war, *Cyane*, twenty guns, in Panama harbour. The *Alabama* can run away from the *Lancaster*, *Narragansett*, and *Saranac*; she can whip or run away from the *Saginaw*, and the sailing vessels she cares nothing for in any manner, unless she should by accident find herself directly under their broadsides. The merchants, underwriters, and others of New York and other places had better examine this list of our squadron in the Pacific Ocean, and its armament and class of vessels. Once having a knowledge of it, they must not wonder if the *Alabama* or other rebel cruisers should make their appearance here and use up the little commerce we have left. It will require three months to get other vessels here, even if Rip Van Winkle and Renard can be aroused to the necessity. In that time the mischief may all have been done; but the force needs increasing anyhow. So let additional vessels of the proper kind be sent at the earliest possible moment—the *Eutaw* among the number.

THE NEW PROBLEM IN MARITIME LAW.

(THE TIMES.)

While the legality of building ships in the country for the Confederate service is still under discussion a question of equal nicety, respecting the legal character of Confederate prizes afterwards converted into "tenders," has been causing much anxiety to the Government of the Cape. The curious history of the *Tuscaloosa* is already known in part to the public, but a series of papers just laid before Parliament enables us to present it for the first time in a complete form. On the 19th of August last, Sir Baldwin Walker, the Admiral of the Cape station, and Sir P. E. Wodehouse, Governor of the Cape colony, acquainted the Admiralty and the Colonial-office respectively, with the difficulty that had arisen about this vessel. She had first made her appearance in Table-bay, about a fortnight before, in company with the *Alabama*, whose "tender" she was represented to be. On her arrival in Simon's-bay Sir Baldwin's suspicions were at once aroused as to the lawfulness of recognising in this capacity a ship which he had reason to believe was neither more nor less than an uncondemned prize, and, as such, liable to restoration whenever she should come within British jurisdiction. Accordingly he communicated with Sir P. Wodehouse, and received from him the copy of an opinion on the subject from the Attorney-General of Capetown. This opinion, which purported to be founded on *Wheaton's International Law*, affirmed the principle that the employment of a ship in the military service of a belligerent, under the authority of the commander of a squadron, was *prima facie* evidence of her being entitled to the privileges of a public vessel. Sir Baldwin demurred a little to the application of this principle where, as in the case of the *Tuscaloosa*, the prize thus clothed with an immunity from seizure has not been refitted for warlike purposes, and even retains her original cargo on board. He also pointed out the abuses or evasions of our neutrality which must inevitably arise from the adoption of such a rule. His misgivings, however, were overruled by the same Attorney-General's opinion that as there were two guns on board the *Tuscaloosa* (transhipped from the *Alabama*), and a Confederate officer in command, she belonged to the Confederate navy. She was, therefore, allowed to complete her necessary repairs, and leave the port freely.

In the meantime, of course, the Consul of the United States was remonstrating and protesting in the most emphatic terms against the concession of belligerent rights to a vessel captured on the high seas, nominally commissioned by Captain Semmes, without being condemned by a prize court, or even brought *infra præsidia*, but still remaining a merchantman in all essential respects. Relying on the terms of Her Majesty's Proclamation, he contended that the *Tuscaloosa*, as soon as she entered a British port, was forfeited by the captors and reverted to her original owners. When the despatch of the Duke of Newcastle arrived it was

Digitized by Google

found that the legal advisers of the Crown agreed more nearly with the doctrine of the Consul than with that of the Governor. Their opinion was that the mere shipment of two small guns and the presence of ten men and an officer belonging to the *Alabama* would not divest her of her former character as a prize, or justify her admission to British waters. Upon receipt of this despatch, in December last, Sir P. Wodehouse not unnaturally applied for more precise instructions as to the course which he should pursue in future. Before the end of December, however, the *Tuscaloosa* returned to her anchorage in Simon's-bay, "from cruising off the coast of Brazil." The Admiral had now to act to the best of his judgment upon the principles laid down in the last despatches from England. In concert with Sir P. Wodehouse, he resolved to detain her, having first elicited from her commander, Lieut. Low, that she carried no other credentials than the commissions of her officers, and had never been taken before any regular court. Lieut. Low lodged a solemn protest against the seizure, founded, not so much on any independent arguments as on the inconsistency in the conduct of the colonial authorities. The *Tuscaloosa* had been permitted before to remain in Simon's Bay for seven days as a ship of war, and no intimation had been given, either then or subsequently, of any exception to her assumed quality. How, then, could she be treated differently on putting back thither without a manifest breach of faith? It must have been a somewhat unpalatable duty to Sir P. Wodehouse, whose own view of the matter was contrary to that of the Home Government, to turn a deaf ear to Lieut. Low's appeal. However, he considered he had no option but to carry out his orders, which seem to have had the hearty approval of Sir B. Walker. As the Consul for the United States declared his inability to take charge of the ship on account of the owners, she was consigned provisionally to the Admiral's custody, while the Consul received a timely hint that like measures would probably be dealt out to a Federal prize commissioned at sea in a similar manner. This hint had special reference to the *Alabama* herself, which the captain of the *Vanderbilt* was counting upon converting—as soon as he could catch her—into a Federal cruiser.

This time Sir P. Wodehouse had a fair right to hope that his treatment of the *Tuscaloosa* would satisfy his superior. He had sacrificed his own feelings and judgment to the Duke of Newcastle's peremptory direction, and incurred something like an official censure before the United States' Consul. His perplexities, however, were not ended, for the next mail took out a short note from the Duke, dated March 4, ordering the restoration of the vessel to Lieutenant Low, or some other Confederate officer, and promising further explanations in a few days. These are contained in the last despatch of this correspondence, dated March 10, and when they reach Capetown, qualified as they are by expressions calculated to soothe the Governor's mind, cannot but impress him afresh with the difficulty of acting as agent to a principal some thousands of miles off. They confirm the order for the release of the *Tuscaloosa*, not as required by any rule of international law, but on the very grounds alleged by Lieutenant Low. At the same time the Duke transmits, on the part of the Government, a warning to Captain Semmes against any future transgression of the same kind. Thus the affair ends for the present, and we are left to lament the fatality which prevents questions of the utmost importance to our maritime rights and obligations from being settle on their real merits. The *Alabama* escaped by a trick, whiledall the lawyers were disputing over the legality of her equipment. The *Alexandra* was seized, indeed, and has been made to run the gauntlet of the Courts; but it seems highly probable that the discovery of a technical and preliminary objection may thwart the attempt to get a final decision. The case of the *Tuscaloosa* illustrates a new problem in the law of maritime capture, but "special circumstances" have intervened to spoil the solution of it, and deprive us of a valuable precedent. From one point of view, perhaps, we ought not to regret that a difficulty has thus been staved off, but in the interests of jurisprudence and of peace in the long run we cannot but wish that the issue had been fairly tried out. How far has a belligerent cruiser the right to burn her prize at sea, and, granting that she may lawfully do this, subject to the consequences of mistaking neutral for enemy's property, how far may she commute this right for that of commissioning them then and there? Such questions might not have become practical but for the peculiar position of the Confederate States. The possession of a naval force without the possession of a single port as a basis of operations is a novel fact in warfare, and, as the fact itself has been recognised by ourselves and France, it is desirable to face and determine the new conflicts of right which necessarily arise out of it.

HOUSE OF COMMONS.

THE NAVAL GUNS.—KAGOSIMA.

(March 10th). Lord C. PAGET stated, in reply to questions put by Sir J. Elphinstone, and in answer to Mr. Berkeley, that that gentleman was mistaken in supposing that while the Americans had shell-guns in their ships, we had only the old round shot; our ships had shell-guns, and the Admiralty was intent upon providing the navy with the most effective armament. He honestly believed, he said, that in respect to guns we were more advanced than the French. In reference to the 110-pounder, the following statement was made by the same speaker:—I said that the Admiralty was not satisfied with the 110-pounder Armstrong; but while I said that I did not say that we disapproved it. I frankly say that we do not like it; but I do not wish the hon. member to think that we condemn it entirely. This gun was used during the action at Kagosima. They had one on board the flag-ship, and the report of its performance was this: that the vent pieces blew out, and that in one case the vent piece did a great deal worse than blowing out—it jammed. The consequence was that the gun was *hors de combat* for some time—about half an hour. But it is stated that its precision and range were extraordinary, and likewise that the precision in the bursting of its shells was something marvellous. That was the report from the flag-ship. On board the other ships they did not give so good a report. They said that the gun did not show very great precision. In fact, they condemned the 110 pounder Armstrong. On reading these reports I am disposed to admit that there are great defects in this gun, but, at the same time, I think it has considerable advantages in respect of its extent of range. Still, we have not been satisfied, and consequently the Duke of Somerset, within the last two years, communicated to the War-office—and he did so before the death of Lord Herbert—his earnest desire that there should be a good, wholesome smooth-bore gun for the navy.

BOMBARDMENT OF KAGOSIMA.

(14th.) Mr. LAYARD asked the indulgence of the House in making a statement in vindication of the character of two very meritorious and excellent public servants, Lieutenant-Colonel Neale and Admiral Kuper. (Hear, hear.) When information reached them of the sensation which had arisen in this country concerning the events which had taken place in Japan, these gallant officers naturally felt very deeply pained. He had this morning received a despatch from Colonel Neale, relating the exact circumstances of the case, which he trusted the House would permit him to read, as due to the gallant officer and Admiral Kuper. The despatch would, of course, be immediately printed and circulated, but he was anxious to bring it before the House at the earliest moment. (Hear, hear.) Colonel Neale wrote as follows:—

"Yokohama, Jan. 16.

"My Lord,—The misconceptions which appear to have influenced the remarks of some of the public journals in England in respect to the proceedings at Kagosima, as published in the London *Gazette*, I venture to conceive, render it proper that I should place upon record a series of facts, the official recital of which did not seem to me at the time to be of urgent necessity. The statements of the Prince of Satsuma's agents, herewith enclosed, were made in free and friendly conversation with the members of this Legation, while the indemnity money was in course of counting and reception. I deem it desirable to add that the population of Kagosima at no period exceeded 40,000 inhabitants, far less 180,000, as has been strangely imagined, to serve as a more striking text for comments; and, further, that those 40,000 souls, men, women, and children, withdrew while their huts and paper houses incurred the risks attendant upon stray shot and shell from a British squadron, audaciously fired upon by numerous batteries because it had signalled its intention to obtain redress for a barbarous murder and outrage committed upon British subjects, for which all redress had been evaded. Subsequent events, the voluntary payment of the indemnity demanded, the formal obligation entered into to execute the murderers of Mr. Richardson when arrested, the professions of friendship cheerfully expressed by Satsuma's envoys on behalf of their chief, their desire to cultivate friendly and social intercourse with the British nation, and their good humour and graceful offerings (of fruit) to the crew of the flagship of the British admiral after the facts of Kagosima, would all imply that the agents of Her Majesty displayed a degree of caution and moderation duly appreciated by those most deeply interested. "I have, &c.,

"EDWARD ST. JOHN NEALE."

The second paper contained the purport of the conversation and statements of the agents of Prince Satsuma on the occasion of the payment of the indemnity money at Her Majesty's Legation, on the 11th of December, 1863, and was as follows:—

"The agents for the payment of the indemnity stated that they had taken advantage of a coming typhoon at Kagosima to fire on the squadron, but that the typhoon had been the cause of the extent of the conflagration, and in consequence of there being no people in the town to put it out; that the number of soldiers collected in and about the batteries was 6,000; that immediately upon the appearance of the squadron, and even previously, as they had heard through Nagasaki it was coming, the Prince of Satsuma had ordered the inhabitants to retire into the villages, and that, therefore, no harm had happened to the people; that if we returned to Kagosima we should find the town nearly restored to its original state; that reserves of soldiers were kept outside the batteries, but that it was difficult to get them to go into them to supply the place of those who were killed; that, immediately upon our taking the steamers, a horseman had been despatched at full speed to ask the Prince of Satsuma what should be done, when he directed that the batteries should immediately open fire upon the squadron.

"ABEL A. J. GOWER. "LACKLAND FLETCHER.
"JOHN MACDONALD. "A. VON SIEFOLD."

(Hear, hear.)

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 22.

The great parliamentary event of the day is the passing of the new Ministerial Bill for the improvement of the colonial system of finances, on which great stress is laid in this country. After a smart debate in the Second Chamber of the States-General, the general principle of the Bill (the settlement of the Colonial Budget by a special enactment) was passed by thirty-nine to fourteen votes, and thus the Bill was virtually carried. The ninety-nine clauses of the Bill were thengone into *seriatim*, but more as a matter of form, for but little or no opposition was offered to them separately. The whole Bill was then read and triumphantly passed by fifty-eight votes to twelve, one member being unavoidably absent from illness, and one seat being vacant by a late death, which thus accounts for the seventy-two members of the Second Chamber.

Lieutenant-General J. van Swieten, formerly Commander-in-Chief of the land forces in Netherlands India, and now member of the Council of State, is appointed Government Commissioner to the Netherlands India Railroad Company in this country, with an *ex-officio* seat at the board.

The following twenty-eight first-class vessels have been

Digitized by Google

chartered by the Netherlands Trading Company to load cargoes of produce in Java for the undermentioned ports :—

Provincie Drenthe, Capt. Boer; *Mathilde*, Captain Fekkes; *Batavia*, Capt. von Dolder; *India Packet*, Capt. Diepering; *Johanna Maria Christina*, Capt. Gorter; *Nederland and Orange*, Captain Rosier; *Petronella*, Capt. Strootman; *Koophandel*, Capt. Mooi; *Amsterdam*, Capt. Dooksen; *Maria Veronica*, Capt. Schol; *Wilhelmina Maria*, Capt. Postma; *Vertrouwen*, Capt. de Voss; and *Kandanghauer*, Capt. Zeelt—all for Amsterdam. *Bastian Pot*, Capt. van der Hoog; *Lichtstraal*, Capt. Wierix; *General de Stuers*, Capt. Viersma; *Jannetje*, Capt. Meyerhoff; *Julia*, Capt. van Tas; *Petronella*, Capt. Leicher; *Frederik Hendrik*, Capt. Glazener; *Zes Gezusters*, Capt. Rutgers; and *Ottolina*, Capt. Eleman—all for Rotterdam. *Gertruida Maria*, Capt. de Ligny; and *Wall van Puttershoeck*, Capt. Lammerts—both for Dordrecht. *Louis Meyer*, Capt. Holtgreve; and *Salatiga*, Capt. Kettler, both for Middelburg. *Jacobus Martinus*, Capt. Meppelder; and *Baron Pallandt van Roosendaal*, Capt. Hoogenstraaten, both for Schiedam.

The two Japanese Daimios, Enomotto and Akamats, who have been to the seat of war in Denmark, have now returned to this country to resume their studies. After paying a visit to the Prussian headquarters at Gravenstein, and going to the outposts to take as close a view as possible of the Danish entrenchments at Duppel, they went back through Kiel and Lubeck, at which latter port they embarked for Copenhagen, and thence to Alsen, to see the Danish side of the Duppel entrenchments. After that they re-embarked for Lubeck, and returned to this country, passing through Hamburg, Hanover, and Cologne.

A little work has just been published by the firm of Vanden Heuvill and Van Santen, at Leyden, under the title of "The Report of Mr. Stieltjes on Improved Means of Transport in Java, with Notes by an Officer of Engineers of the East India Army." The report in question bears date November 6, 1862, and was originally printed for private distribution among the members of the States-General, but subsequently made accessible to the public, and caused a deep sensation, especially those passages that were left out when presented to the Second Chamber, but now replaced, so that the whole report is now published. The report is of great importance, and enables the reader to gain a clear insight into the present state of the roads in Java, the necessity of an improvement, the means by which this can be achieved, and the author's opinions on railroads and water communication. Not the least important part of the work is the preface and the notes, not only on account of their scientific and theoretical contents, but most especially in a practical point of view. They are evidently from the pen of an officer of experience and tact, too independent to be led away by prejudice or party spirit. He judges very impartially, praises many parts of Mr. Stieltjes' conduct, but condemns his opposition to the Governor-General and the Colonial Minister. I may add that he totally disapproves of the policy of granting piecemeal concessions for different lines of railroad.

H.N.M. steam corvette *Princess Amalie*, of 19 guns, Capt.-Lieut. J. J. Wichers, which sailed from this country on the 18th of December last for the East India station, arrived at Paramaribo on the 6th of February, and was to proceed on her voyage on the 22nd of the same month. All well on board.

The King has given orders that the number of men originally fixed for the military contingent to reinforce the army in Netherlands India this year (1,400 men) be increased by 600 more, thus making a total of 2,000 men.

The *Staats-Courant* contains an invitation to young and unmarried teachers, who may feel inclined to accept situations in the Government schools in Java, to send in their names to the Minister of the Interior for communication to the Colonial Department, accompanied by certificates of good conduct, verified by the Burgomaster of their place of residence, with special mention of the religion to which they belong.

The King has granted a pension of 1,805 florins per annum to Younker P. T. van der Maesen de Sombreff, late Minister for Foreign Affairs.

The following officers of the E. I. Army, now in this country on leave of absence, have been permitted, at their own request, to retire from the service with a pension for life :—Capt. G. A. F. Boer, of the Artillery, Capt. J. J. Keyzer, of the Infantry, and Mr. F. A. Rothe, medical officer of the second class.

Mr. F. E. P. van den Bossche, secretary for the affairs of the natives at Macassar, has been appointed Knight of the Military Order of Willem, as a reward for his brilliant military achievements when Civil Governor of Lamatang Oeloe, near Palembang, during the military expedition to Sumatra in the years 1858 and 1859.

The Rev. Dr. S. A. Buddingh, pensioned clergyman of the Reformed Church at Batavia, lately entrusted with the office of Inspector-General of the Protestant Religion and the schools in Netherlands India, has received the royal license to accept and wear the gold medal for arts and sciences, conferred on him by His Highness the Duke of Nassau.

PASSENGERS ARRIVED.

Per *Jacoba Cornelia*, Captain Etts, at Brouwershaven from Batavia: Mr. B. Jocklige.

Per *Johan Christian*, Capt. van Heemstede Obelt, at Amsterdam from Batavia: Captain van Byleveldt, of the East India army, and family, Mr. Mande, Mr. Mande, jun., Mr. Giling, Sergeant Vriese and family, Sergeants de Roo and Riese.

Per *Franz and Elise*, Capt. Niedfeld, at the Texel from Batavia: Mr. C. H. Schoenmaker.

Per *Macassar*, Capt. V. Coulon, at Brouwershaven from Macassar: Mr. H Holtz, Controller of the First Class, with two servants.

Per *Brouwershaven*, Capt. Huyzer, at Zieriksee from Padang: Capt. Roels, of the E.I. infantry, with children, and Mr. Voorthuyzen.

Per *Cortyene*, Capt. Rusman, at Rotterdam from Batavia: Mr. Th. Schuurman.

Per *Jacoba*, Capt. Schaap, at Helvoetsluys from Padang: Major Fritzen, E.I. Army, family, and five passported soldiers.

PASSENGERS OUTWARD.

Per *Nederland and Orange*, Capt. Rosier, from Rotterdam to Batavia: Messrs. J. Enderle and G. W. Vogelpoet.

Per *Amsterdam*, Capt. Dookzen, from Amsterdam to Batavia: Mr. and Mrs. Nederburg, Mr. and Mrs. Visscher, Mrs. Prins, Messrs. Fontein, Wittenrood, Bernard, and De Rochemont.

Per *Vriendschap*, Capt. Jansen, from Brouwershaven to Batavia: Messrs. Andeweg and Cremer.

Per *Kandanghauer*, Capt. Zeelt, from Amsterdam to Batavia: Mr. and Mrs. Boskes, Mrs. Bonnett, Messrs. de Bruyn, Verkerk, and Neys.

COMMERCIAL.

COFFEE.—It is scarcely to be wondered at that the company's sale on the 16th inst. should have gone off so well, considering the small quantity offered for competition, the still fewer lots of clean-tasted and favourite qualities, and the large number of dealers whose stocks are exhausted and must be renewed at any price. Some few lots went off very considerably higher than the brokers' valuations. Thus of the parcels in warehouse at Amsterdam, No. 26 yellow Havanna-like was valued by them at 48, and fetched 53½ cents; No. 27, yellow, rather mottled, was valued at 46, and sold for 49¼ cents; No. 41, bright coloured, valued at 47, realised 49 cents, and the same with the following parcels lying at Rotterdam: No. 1, yellow, valued at 47, fetched 49, cents, and No. 4, large yellow berries, but rather damaged, valued at 47½, sold at 49½, cents. But the greater part realised ½ to 1½ cents above the brokers' valuations, and every bag was sold. That the quantity offered by the company was far from adequate to the requirements of the trade is clear from the demand for private trade coffee, of which several thousand bags have been sold at 45½ to 46 cents for good ordinary Java, amongst which may be specified 1,700 bags ex *Jamsetje*, and 1,000 bags ex *Tasmania*.

SUGAR.—The raw market is in a tranquil state. During the last few days about 1,000 kranjangs of Java, No. 14 to 15, have been sold for arrival at ½ fl. above the November sale; but the higher qualities are not to be had at that rate. Low brown descriptions under Standard No. 12 fetch readily 1 fl. above November sale prices. Refined goods continue in favour, especially loaves in paper, and prices are well supported. Of crushed, 200 tons of the new Rotterdam refinery have changed hands at 39½ florins.

RICE.—In clean descriptions the dealings have not been extensive, and the market is by no means in an animated condition. Of rough the only sale reported since last mail was 2,400 bags of Sourabaya, ex *Jason*, at 7½ florins.

SPICES.—Java Cinnamon, No. 3, is in some demand at 90 cents; cloves neglected. For nutmegs, No. 1, 73 cents has been paid for small parcels, and 63 cents for No. 2.

HIDES.—Java ox in great request, both for export and home consumption. At public sale on the 18th inst. buffalo sold at very high prices. Arrived, per *Merchantman*, from Surabaya, 750 ox and 400 buffalo.

TIN.—Banca meets no improvement. A few lots have been sold at 68½ to 69 fl.

COPPER lower, and may now be bought at 55 fl.

INDIGO is very lively, 400 chests of Java having found purchasers at very stiff prices. The demand still continues, but holders are not disposed to sell unless at an advance.

GUTTA PERCHA.—At public auction 2,800 kilogr. imported per *Susanna*, from Padang, were all sold at prices ranging from 40 to 141 cents, according to quality.

RATTANS.—Prices well supported, but business rather slack. Among the few sales were 829 bundles (16 piculs) ex *Amphitrate*.

JAVA TOBACCO.—Market quiet but firm. Stock, 8,224 bales. There have been some public sales at Rotterdam, which went off as follows :—

298	bales	Lemadjang, P Q R, average paid ..	27⅓ cents.
262	„	(V in a triangle)	29⅔ „
126	„	(L in a triangle)	29½ „
169	„	Wonosari	33 „
835	„	T Not sold.	

FRANCE.

The Port-admiral of Brest has received instructions to despatch 600 officers and seamen of all ranks to Toulon, who are to be embarked on the 25th on board the steam-frigate *Labrador* for Alexandria, whence they are to proceed to reinforce the naval stations in China and Cochinchina.

FURTHER JAPANESE COMMERCIAL TREATIES.

"CAPTAIN PEN" is again adding to the laurels he has already acquired in the Far East by proving himself, as before, the able coadjutor of "Captain PLUME." The Japanese, indeed, have; begun to manifest a confirmed preference for encountering the former rather than the latter gallant official. Possibly they have discovered themselves to be more equally matched with Europeans in a contest of "conventions" than in one of cannon. Having determined on forwarding another Embassy to Europe, —which, in fact, may be expected at Marseilles next month— like experienced diplomatists as they are, they concluded it would be a point in their favour, towards further negotiations, to show that they had scrupulously carried out their former stipulations. To that feeling must be ascribed the fresh conventions with France and the United States for the reduction of duties on imports. The same sentiment probably prevented any further delay in the exchange of ratifications with Prussia; and has smoothed the way for a treaty between Switzerland and Japan, which our private information leads us to believe was signed at Yedo on the 3rd of February. All this, there can be no doubt, has been done deliberately, and after consultation with the notables of the State. A great council of Daimios was, according to the advices just received, being held at Osaca, at which the TYCOON would be present before it separated. The difficulties between Europe and Japan are to be referred to a keen encounter of wits, in which Oriental subtlety hopes to come off the victor, and to wrest certain desired modifications from the sluggish perception of the Westerns. We feel every confidence that Colonel NEALE will have put the Foreign-office at home in possession of whatever information it can require on the points likely to be urged by the Japanese Envoys. Whether the TYCOON is really in earnest in wishing to close Yokohama to foreign trade, or whether that is the object aimed at by the Daimios, with the purpose of opening other ports, and of so distributing the benefit of the accruing wealth more equally over the country, it is hard to say in the present state of our information. The new treaties entered into with European nations, and the conventions reducing the import duties, cannot be looked on as emanations from a policy opposed to and dreading intercourse with foreigners. Yet, for some reason not apparent on the surface, it is clear that every possible impediment and difficulty is thrown in the way of commerce at Yokohama, and that such is the drift of the TYCOON'S policy alone. One thing is needful above all at the present juncture—and that is for England and France, and the other Governments really interested, to agree fully and firmly beforehand on all the matters that can possibly be raised for discussion by the Ambassadors about to arrive; so that the boasted immobility and hatred to change of the East may, on this occasion, be compelled to give way before a mighty and resistless concentration of European progressiveness.

OUR PROSPECTS IN JAPAN.

THAT the recent policy of the British Government with regard to Japan has been a right policy, is proved beyond all question by the transactions of the last few months. The turn of events is so striking and so favourable to the interests of Great Britain, that those who were most disposed to cavil at the firm and resolute attitude assumed by our Government, are compelled to own that it has at least been partially successful. Last year it seemed as if all our efforts to hold peaceable intercourse with Japan were destined to be frustrated. We believed that if we maintained our position in the country it must be by force of arms. Some people, indeed, asserted that the bellicose movements which have attended our commercial prosperity in China would be enacted once again on Japanese soil. "Trade," they said, "can never be established "by the sword: to knock your man down first is scarcely the "way to give him a kindly feeling towards you;" and they urged upon us the duty either of withdrawing from the empire, or of trying—as if, forsooth, we had not tried often enough— the effects of conciliation. Most of our readers will remember that in a celebrated poem the same advice is gently tendered to a butcher who is trying to drive a refractory sheep into his yard; whereupon he immediately seizes the unfortunate animal—

> "And hugs and lugs and tugs him neck and crop,
> Just *nolens volens* through the open shop,"

exclaiming, when he had done it, "There, I've conciliated him!" There is a moral in this story with regard to British policy in the Far East. Honest TOM, the butcher, was resolute, but he was not cruel. He used a summary process, but it was brief, and eminently satisfactory. He laid hold of his wether with vigour, and consigned him to the inevitable bourn, but he did it in a good English fashion, without any unnecessary words or blows.

Now it is certain that a firm, not a stern policy, is absolutely needful in our intercourse with Japan. The statement has been reiterated *ad nauseam*, but it has never been confuted, that concessions only increase our difficulties in that strange country, and that Japanese statesmen, like all Eastern politicians, are incapable of understanding the motives which sometimes induce the British Government to waive a just claim, or to renounce a treaty right. Our action, therefore, with regard to the RICHARDSON murder has taught them a new and important lesson. No longer can they suppose, as one of their Daimios once asserted, that all foreign nations, excepting Russia, could be insulted with impunity, and neither the GOROGIO, nor the independent Daimios, will now venture to treat us with disrespect. The despatch read by Mr. LAYARD in the House of Commons on the 14th inst. with reference to the bombardment of Kagosima, contains a satisfactory reply to the objections of the many writers and speakers who in their ignorance of the circumstances have so bitterly denounced that action. The course adopted by Admiral KUPER, instead of being so horrible that the imagination, to quote an agent of the Peace Society, "reels and staggers" before it, is now proved to have been alike judicious and humane; the "awful destruction of human life," on which members of Parliament recently enlarged with such unction, turns out to be a myth, and the agents of SATSUMA have declared that they appreciated the moderation displayed by Her MAJESTY'S ships. Our comparative ignorance of Japanese home politics prevents us from altogether understanding the somewhat contradictory news which has reached us from that island empire. The proposition to close the port of Kanagawa, the letter of expulsion issued by ONGASSAWARA, the rumour, if it were nothing more, that orders had been given for the destruction of three-fourths of the silk-cocoons; together with the proposed erection of batteries near Yokohama, and the internal troubles of the Empire, might seem to imply that intercourse with foreigners is still repudiated and detested by the rulers of the land. But, on the other hand, we learn that many of the great feudal chieftains have themselves been encouraging and urging upon the MIKADO a liberal foreign policy; our demands upon one of them have been fully complied with; the Americans, who, on account of the attack on the *Pembroke*, also claimed an indemnity, have received 100,000 dollars; a new impulse, despite a temporary stagnation, has been given to trade; SATSUMA, who it was once thought was our arch-enemy, has proved a liberal-minded ally, and proposes to send a number of young men for education to this country; and, finally, it has been resolved to despatch a new Embassy to Europe—a proof, even

Digitized by Google

if it stood alone, that the warlike counsels which prevailed in the summer of last year are no longer in the ascendant. But this Embassy, although it may be regarded as a token of peace, will be despatched, it is said, for the purpose of effecting a compromise. The party in the country opposed to foreign trade is, we believe, becoming smaller every day. But it is nevertheless a strong party, and what it cannot secure by force it will strive to gain by negotiation. Of this, however, we have had enough in times past. The concessions by which we tried to ingratiate ourselves with the Japanese, and the mild expostulations which followed their foul misdeeds, were perhaps honourable to the heart, if not to the head, of a British statesman. For the future, it behoves us to assume a temperate but decided attitude; first to assure ourselves that we are acting with a fitting regard to public morality and justice, and then to steer right on—yielding not a jot to the representations of the GOROGIO, unless convinced that it is judicious and expedient so to do.

The great authority which has been delegated to Sir RUTHERFORD ALCOCK will, we would fain hope, be used to the advantage of his countrymen in Japan. Important changes have occurred since he left his onerous post at Yedo. Sir RUTHERFORD knows better, perhaps, than any man what those changes portend. Long ago he was convinced that if we did not withdraw altogether from the country our policy should be one of undeviating and consistent firmness; long ago he was convinced that every point we yielded to the Japanese, merely for the sake of conciliating them, was yielded with certain detriment to our own interests. Doubtless, towards the Government of the TYCOON, Sir RUTHERFORD ALCOCK will act as becomes a British Consul-General. We wish we could feel as certain that his conduct towards his own countrymen will be marked by urbanity and good feeling. The view entertained by Her MAJESTY'S Minister of his own merits is such as does not misbecome a gentleman who has risen in life by the sheer force of his ability and perseverance. We wish for the sake of Englishmen in the Far East, that Sir RUTHERFORD ALCOCK'S opinion of their good qualities were at all equal to that which he has conceived for his own.

TO PEKING *VIA* SIBERIA

WE have received from the Rev. A. WYLIE a few notes of his journey through from London to Peking and Shanghai *via* Siberia. This route, as the railway advances across Siberia, will become, both from its novelty and the varied regions it traverses, a favourite trip with the more adventurous traveller. Indeed, it is possible that as the railway may be slow in stretching its iron arms along so vast a space, the practicability and safety of the present existing land journey, as proved by Mr. WYLIE'S narrative and other notices that have already appeared in this journal, will be sufficient to tempt those who are wearied of the monotony of the sea voyage, to try the Russian overland route. To such the information furnished in Mr. WYLIE'S notes will be valuable. We shall take up the narrative with his departure from St. Petersburg:—

From the 8th to the 18th August (1863) I remained in the capital, during which time, through the kindness of our ambassador, Lord Napier, I obtained from the Minister of the Interior letters of introduction to all the Governors on the route from Nijni Novgorod to Irkutsk, besides a special open order for assistance, to be shown to any officials throughout the empire, if necessary. These were of great assistance, and, with an introduction to the Governor-General of Eastern Siberia, from General Ignatieff, the head of the Asiatic department, did much to facilitate my progress. I had also a passport from the Governor-General of St. Petersburg, made out for St. Petersburg to Peking. On arriving at Kiachta, the frontier town, I found it was very important that Peking had been named, and any one proposing to make the same journey should be careful when at St. Petersburg to get the name "Peking" inserted; else he may be detained an indefinite time on the frontier of Russia and Mongolia. It is true that a passport is seldom if ever asked for after leaving Russia, but it is just possible it might be; and in such case the inconvenience would be serious. Mine was never demanded, but I sent it to be visèd by the Mandarin at the Great Wall, on entering China.

On the 18th, at noon, I left St. Petersburg for Moscow, and arrived there next morning by eight. The temptation to linger in Moscow is very great, but time is precious to the traveller, so I left at ten P.M. on the 21st., by rail, for Nijni Novgorod, and reached that town early the following day, the great fair being then just at its height. Here I remained till the 24th, and then took a steamer down the Volga for Kazan, where I arrived the day after at six P.M. Left again at five P.M. on the 27th, by steamer, for Perm on the river Kama, and landed there about two P.M. on the 31st. Beyond Perm the only method of travelling is by post horses. As far as Tumen the posting is in the hands of a company, which has a contract with the Government. Beyond there it is conducted directly by the Government. Up to one stage beyond Tumen the rate for horses is just double what it is from that point eastward. Having made the acquaintance of a gentleman on board the steamer who was travelling to Omsk, I arranged to accompany him as *compagnon de voyage*, and, provided with the various requisites for the journey, we started about midday of September 2, having hired a *tarantas* to Ekaterinburg. This is a kind of open carriage, covered in with an apron and fall, without springs, but balanced on long poles between the fore and hind wheels, which are placed far apart. The road is tolerably good and somewhat interesting, though hilly. Travelling day and night, we reached Ekaterinburg in the afternoon of the 4th, having in the morning passed the marble obelisk that marks the boundary between Europe and Asia, on the Ural Mountains. We had expected to hire a *tarantas* from Ekaterinburg to Tumen, but found there was none to be had, and so were obliged to perform this part of the journey in the common post *kibitkas*, which had to be changed at every stage. This occupied us from the evening of the 9th to the 11th, and we passed the night at Tumen. Road very good thus far; country flat and uninteresting. There I purchased a *tarantas*, in which we continued our journey on the morrow, and reached the town of Omsk on the 19th, having had to stop three nights on the way for want of horses. This was the most wretched part of the road, with the most miserable weather that I experienced throughout the journey. At Omsk I had to seek for a new travelling companion, and soon fell in with a gentleman who was going to Irkutsk to occupy a post in the Government service. So I willingly waited a few days for him, and we started for Tomsk on the 25th, and, without stopping on the way, reached that town about midnight of the 29th. Road very good, and fine weather most of the way, which went far to counterbalance the uninteresting character of the steppe country we were passing through. After a stoppage of two days at Tomsk, we got off again on the 1st of October, being the first day of snow I had seen in Siberia; but the fall was slight and partial, as the country indicated between that and Krasnoyarsk, where we arrived on the 4th, and passed the night there. Resuming our journey on the following day, the coachman, who had been somewhat too free in his potations, upset the carriage on a very dark night. Fortunately, there was no further damage than breaking a shaft, which detained us till the next morning, when we got it replaced. With some other slight mishaps, we reached Irkutsk on the 12th. The roads in the government of Yennissei are excellent, but for six stages between Nijni Udinsk and Irkutsk the way is really dreadful. The country becomes much more hilly and picturesque as we approach Irkutsk. From Irkutsk to Kiachta I travelled in company with a courier in the Imperial service. The passage across the Lake Baikal in a steamer forms an agreeable break in this part of the journey, and although we were detained a day till a storm on the Lake had passed over, the interesting character of the neighbourhood scarcely allowed the stoppage to be felt as tedious. Leaving Irkutsk at midnight of the 16th, we arrived at Kiachta in the afternoon of the 20th. There I found Mr. Grant, who has gone out to superintend the telegraph and courier communication between London and Peking.

There are two routes from Irkutsk to Kiachta. By the ordinary one the traveller is dependent on the steamer, which crosses the Baikal every Wednesday and Saturday, weather permitting, from March to October; but in winter, when the Lake is frozen, it is traversed by sledges, and the whole distance, about 500 versts, might be accomplished in a day and a-half, or less. The other route is round the southern end of the Lake, through a difficult mountainous country, the distance being about the same; but there are 150 versts of the road yet unmade, and the journey would probably occupy a little more time. From Kiachta to Kalgan, on the Great Wall of China, the time occupied by the present postal system is eleven days, but a line of couriers might easily accomplish it in half that time. Two days more would complete the communication to Peking.

Reaching Kiachta on the 20th, by the 29th I had made all preliminary arrangements, including passport, commissariat, &c., and commenced my journey across the desert in a camel cart, the most tedious part of the whole route. A Mongol *lama* agreed to take me through in twenty-five days, which he faithfully accomplished, reaching Kalgan on the 23rd of November. There I had to leave the cart which I purchased at Kiachta, as it is impossible for such a conveyance to cross the mountains between that and Peking. So, having engaged a mule palanquin, with extra mules for baggage, I took my departure the following day, and reached Peking on the 28th, just four months and a day after leaving London, eighty-six days out of which I had been actually on the journey.

A fortnight was very agreeably spent in Peking and the neighbourhood, and on the 14th Dec. I took my departure in a Chinese covered cart, reaching Tien-tsin on the 16th; the river there being already frozen over, and all communication with the sea thus cut off, my only resource was to make the journey overland, either to Che-foo or to the Yellow River. Being desirous of visiting the foreign settlements at Teng-chow and Che-foo, I chose the former route, and am now the seventh day on my journey, being nearly half way to the port where I hope to get a steamer for Shanghai. We are obliged to diverge considerably from the direct road, in consequence of the country being flooded by the waters from the Yellow River.

SHANGHAI, JAN. 20, 1864.—As there has been no opportunity of posting this letter yet, I add a few lines to say that I reached Tang-chow city on the morning of New Year's Day, having found it necessary to leave my cart about seven miles previously in consequence of the hilly nature of the road, and to proceed on a mule. I found the city gates shut, in consequence of a riot among the students who had come up for examination, above 4,000 in number. They had seized the magistrates of the district and prefecture on the previous day, and beaten and maltreated them. The gate was readily opened, however, on my application, and after spending half-a-day there, I continued my journey, arriving at the seaport of Che-foo the evening of the following day. There I was detained a week, and ultimately got away in the *Sir H. Parkes* steamer on the 10th, reaching this city on the 13th after a very favourable passage. My journey from London to Shanghai has thus occupied more than five months, but it will be observed that my stoppages have been many, and protracted. Where expedition is an object the same journey might be accomplished in half the time. I have found no difficulty in the way of travelling. The Russian officials proved most polite and obliging through out, with a very trifling exception, and I much prefer this route to the sea voyage.

THE CIVIL SERVICE ESTIMATES.

The Estimates for the Civil Services for the year ending the 31st of March, 1865, have been laid on the table of the House of Commons. We extract the portions relating to China and Japan, and other parts of the Far East:—

CHINA.

The total amount is £76,081. 10s. 2d., against £61,328 for the year ending in this present March. The items are as follows:—

PEKING.—Envoy Extraordinary and Minister Plenipotentiary, and Chief Superintendent of Trade, £8,000; Secretary of Legation and Chinese Secretary, £1,200; Second Secretary, £500; do., £400; Assistant and Accountant, £500; Surgeon, £200; Assistant Chinese Secretary, £600; ten Student Interpreters, £2,200; Chinese Writers or Linguists, £250. Special Allowances to Colonial Officers at Hong Kong for services rendered to Superintendency, viz.:—The Attorney-general, £250; the Surveyor-general, £200; the Colonial Auditor, £500; Assistant, £300.

CANTON.—Consul, £1,600; Interpreter, £700; First Class Assistant, £400; Second Class Assistant, £350; Chinese Writers or Linguists, £180; Vice-Consul at Whampoa, £750; Consular Agent at Macao, £150.

SWATOW.—Consul, £800; Interpreter, £500; First Class Assistant, £400; Chinese Writers or Linguists, £100.

AMOY.—Consul, £900; Interpreter, £500; First Class Assistant, £400; Chinese Writers or Linguists, £125.

FOO CHOW.—Consul, £900; Interpreter, £500; First Class Assistant, £400; Second Class Assistant, £300; Chinese Writers or Linguists, £100.

NINGPO.—Consul, £800; Interpreter, £400; Second Class Assistant, £350; Chinese Writers or Linguists, £100.

SHANGHAI.—Consul, £1,500; Vice-Consul, £750; Second Vice-Consul, £750; Interpreter, £700; First Class Assistant, £400; Second Class Assistant, £350; Third Class Assistant, £300; First Linguist, £300; Second Linguist, £300; Third Linguist, £200; Writers, £120.

TAIWAN.—Vice-Consul, £750; Interpreter, £400; Third Class Assistant, £300; Chinese Writers or Linguists, £100.

CHIN-KIANG.—Consul, £900; Interpreter, 400; Third Class Assistant, 300; Chinese Writers or Linguists, £100.

KIU-KIANG.—Vice-Consul, £750; Interpreter, £400; Third Class Assistant, £300; Chinese Writers or Linguists, £100.

HANKOW.—Consul, £1,300; Interpreter, £400; Second Class Assistant, £350; Third Class Assistant, £300; Chinese Writers or Linguists, £100.

TANG-CHOW.—Consul, £900; Third Class Assistant, £300; Chinese Writers or Linguists, £100.

TIEN-TSIN.—Consul, £900; Vice-Consul at Taku, £500; Interpreter, £400; Third Class Assistant, £300; Chinese Writers or Linguists, £100.

NEW-CHWANG.—Consul, £1,300; Third Class Assistant, £300; Chinese Writers or Linguists; £100.

Contingent expenses,* £15,000; Passages for Student Interpreters, £471; Purchase of House for Consulate at Swatow, £6,000; For Consular Buildings at Hankow, £4,000; Repairs to Consular Buildings at Shanghai, £1,500; Purchase and Enclosure of Cemetery at Peking, £700; to complete Repairs to Residence at Peking, £257. 5s. 2d.; Pay of Legation Guard and Escort at Peking, £857. 15s.; Passages for do., £1,020. 10s.; Temporary Allowances at Shanghai, £1,350.

The fees, fines and other casual receipts are now paid into the Exchequer. They were formerly retained, and applied in aid of the Contingent Expenses. The amount of these receipts in 1862 was £6,238. 8s. The gross receipts for the rent or from the sale of Government lands at the Consular ports are also now credited to the Exchequer.

One third of the net charge on account of the service in China is repaid to the Exchequer from Indian revenues.

Besides the above there is "an estimate of the sum proposed to be voted in the year ending the 31st of March, 1865, to defray expenses on account of the Treasury Chests," made up of two items.—For freight of specie, in aid of the treasury chests abroad, £8,000; to make good a net loss on the transactions of the Treasury Chests, during the year 1862-3, £29,550. Total, £37,550. The net loss referred to arises, it is stated, from transactions for the supply of the Treasury Chest in China, viz.:—

Discount on Bills drawn upon Her Majesty's Treasury, or upon the Indian Treasury		£32,775
Loss on Consignments of Specie from this country, arising from the difference between the rate at which they were purchased in England and the Army par, or legal rate at which they were brought to credit in China		5,236
Loss incurred on Chinese Prize Money, brought to credit at 4s. 2d. the dollar, and repaid in England, for the distribution to the captors, at 4s. 6½d. the dollar		1,598
Interest on Money raised in 1860-1 for Commissariat purposes in Japan		31
		£39,640
Deduct,—"Captured Cash" credited to this Account ..		15
Net loss on the transactions of the Chest in China ..		39,625
Gain on the transactions at other stations ..	£11,804	
Loss on ditto	1,729	
Net gain at other stations		10,075
Net loss provided for in this estimate		29,550

Under the head of "Payments made by Her Majesty's Paymaster-General on account of special missions, outfits, &c., between the 1st of February, 1863, and 31st January, 1864," we find these entries:—M. Lecomte, Inspector of French Banks, from Shanghai to Japan, on board he *Renard*, in March and April, 1862, £6; M. Richon, Attaché to French Legation, from Shanghai to the Peiho, on board the *Hesper*, in May, 1862, £19. 19s.

*The Contingent Expenses are:—1. Wages for Public Servants, such as Porters, Coolies, Watchmen, Gaolers, Boatmen, Police. 2. Printing, Stationery, Postage, Messengers. 3. Rent of Ground for Consular Buildings, Repairs and Insurance. 4. Office Expenses. 5. Chapels and Chaplains. 6. Outfit to Consuls and Vice-Consuls. 7. Journeys on Public Service. 8. Allowance to St. Paul's College, Hong Kong, with a view to promoting the study of the Chinese Language. 9. Petty and Miscellaneous Expenses.

JAPAN.

The sum required for the salaries and contingent expenses connected with the Consular service in Japan is £18,311. 5s., against £15,196. 10s. for the year ending in this present March. The separate items are as follows:—

YEDO.—Envoy Extraordinary and Minister Plenipotentiary and Consul-General, £3,000; Secretary of Legation, £800; Interpreter and Japanese Secretary, £700; Assistant and Accountant, £472. 10s.; Assistant and Medical Officer, £500; Second Assistant, £350; Four Student Interpreters, at £200 a-year each, £800.

KANAGAWA.—Consul, £1,000; Vice-Consul, £500; Interpreter, £400; Second Assistant, £350; Assistant, £250.

NAGASAKI.—Consul, £1,000; Interpreter, £400; Second Assistant, £350; Third Assistant, £300.

HAKODADI.—Consul, £800; Interpreter, £500; Third Assistant, £300.

SUPERNUMERARY.—Interpreters, £300; on account of Extra Pay and Expenses of Legation Guard, £1,000; Grant towards Protestant Church at Nagasaki, £324. 15s.; Contingencies, £3,500; Attorney-General at Hong Kong, £100; Passages for Student Interpreters, at £157 each, £314.

There is an increase of £1,000 in the present year for the item "contingencies;" but that augmentation provides for the transfer of the fees and fines to the Exchequer.

To the account "Special Missions," &c., before mentioned, are placed the following:—Balance of expenses of entertaining the Japanese Ambassadors, £132. 7s. 5d.; Japanese Secretaries to the English and French Legations in Japan, on board the *Havoc*, £4. 4s.; the Japanese Embassy between Alexandria and Marseilles, on board the *Himalaya*, £254. 3s. 2d.

LABUAN.

The estimate for this dependency is £5,825, against £6,850 last year. The items are given thus:—Governor, £800; Treasurer and Police Magistrate, £500; Surgeon, £417; Chaplain, £350; Surveyor-General, £300; Harbour Master, £300; Gaoler, £175; Establishments of the foregoing Officers, £1,360; Contingent Expenses of Justice, Police, and Gaols, £1,432; Roads, Works, and Buildings, £1,525; Miscellaneous, £826; Loss by Exchange on the Bills drawn by the Governor upon the Paymaster-General between April, 1862, and September, 1863, £890; total, £8,375. Deduct Estimated Local Revenue and Balances in hand, £2,550:—5,825.

In the "Special Mission, &c.," estimate, Labuan makes its appearance twice:—Bishop of Labuan and Sir James Brooke, on board the *Leven*, in 1863, £12; Sir James Brooke, on board the *Coquette*, between Singapore and Sarawak, £9.

SIAM.

The estimate for salaries and contingent expenses connected with the Consulate established in Siam is £4.829, against £4,529 in the year ending this present March. This sum is composed of the following items:—Consul, £1,200; Interpreter, £500; First Assistant, £405; Second Assistant, £324; Two Student Interpreters, at £200 a-year each, £400; Medical Attendant, £400; Contingent Expenses, £1,200; Grant towards Protestant Church at Bankok, £400.

PARLIAMENTARY BLUE BOOK ON AFFAIRS IN CHINA.

A Blue-book of 199 pages has been published comprising a variety of subjects dating from September, 1862, to March, 1864. We give the list of contents, and beg to inform our readers that we have forwarded copies of the book to the following offices in China and Japan, and, on application, no doubt their friends will be allowed a perusal of the same:—*North China Herald*, Shanghai; *Friend of China*, Shanghai; *Recorder*, Shanghai; *Japan Herald*, Yokohama; *Commercial News*, Yokohama; *China Mail*, Hong Kong; *Daily Press*, Hong Kong.

Organisation of Chinese military service. Best course to pursue. Arrival of Major-General Brown at Peking. Major Gordon wishes to resign his command 162
Change in position of affairs at Soo-chow. Surrender of General Burgevine 163
Opinion of Her Majesty's Government respecting organisation of Chinese military service. Answer to despatch of October 13. 167
Operations before Soo-chow. Surrender of General Burgevine and his followers. Statements made by them of their treatment and proceedings while with the rebels. Behaviour of Chinese authorities towards Major Gordon 167
Meeting of Consuls to concert measures for maintenance of order at Shanghai 180
Capture of the *Firefly*. Proceedings of General Burgevine and his arrest 182
Report from Hong Kong relative to capture of Soo-chow and the treachery of the Imperialists 185
Fall of Soo-chow 185
Report respecting proceedings of Footai at Soo-chow 186
Interview between General Brown and the Footai; the latter's explanation of his conduct. Major Gordon's position. Meeting of foreign Consuls with regard to proceedings of the Footai .. 189
Report from Major-General Brown on fall of Soochow, and on subsequent events 193
Transmitting Order in Council revoking Orders in Council of August 30, 1862, and January 9, 1863 as to enlistment of British subjects in service of China 198

Literature.

Mexico, Ancient and Modern, by M. MICHEL CHEVALIER, Senator, and Member of the Institute, of France.—Messrs. Maxwell and Co., of Fleet-street, have certainly supplied the public with a couple of most opportune volumes, in putting forth a translation of M. Chevalier's work. The author had long been known as a writer on Mexico, for he was years since quoted in M'Culloch's "Geographical Dictionary" as the best authority on the country since the days of Humboldt; but the information there spoken of never, we believe, appeared in a collected form, and had to be sought for, by those interested in the subject, out of the various numbers of the *Journal des Débats* in which the letters originally appeared. Now that Mexico has become one of the chief topics of the day, M. Chevalier has brought his personal knowledge of the country and the people to aid in the production of a book which has the merit of being complete in itself. The work is divided into eight parts. The first two treat of the Aztec empire, and its conquest by Cortes; the third, of Mexico under the colonial rule of Spain; the fourth, of the war of emancipation; the fifth, of Mexico as an independent State; the sixth, of the resources and future of the country; the seventh, of the motives for a European intervention, or of an intervention by France alone, in the affairs of Mexico; the eighth and last, of the attempt to regenerate Mexico, viewed in connection with the present attitude of the Court of Rome towards modern civilisation. Most English readers have been made familiar with the first and second of the above divisions by Prescott's "Conquest of Mexico"—a delightful work, but too limited in its scope for the exigencies of the present crisis. Just at this juncture we want, as it were, a Handbook of Mexico, that shall tell us not only the history of the past, and bring it down to the present day, but also give us an insight into the capabilities and future prospects of that vast territory, furnished by one competent to judge both of the material resources of all kinds which it contains, and of the elements of progress to be found in the spirit of the people. This is the great merit of M. Chevalier's volumes. He lays the subject before us in its entirety; we rise from the perusal satisfied that we need no further reference. In this regard, the author does himself but scant justice in the Introduction he has prefixed to the English translation. Written at least a twelvemonth after the publication of the original, a feeling of astonishment is created as M. Chevalier enumerates the number of his predictions that have been fulfilled; and he does not extend the catalogue to the length he would have been justified in doing. The scientific expedition just commissioned to proceed to Mexico may fairly be claimed as the fruit of the suggestion made at p. 226, Vol. II.:—"A few years ago, when the expedition was organised that was to plant the flags of the two great Powers of Western Europe in the capital of the Celestial Empire, the great propriety of having science represented in it by a numerous and brilliant constellation was lost sight of. The useful work that would not fail to have been done by such a commission would have been a happy counterpoise to the burning of the Summer Palace. There was then neglected an excellent opportunity of augmenting our information, and probably of enriching our manufactures with new processes and agents.* Science, thus forgotten on the occasion of going to Peking, has a claim for reparation; and we have the chance of offering it now that we are going to Mexico. The Emperor Napoleon III. cannot be insensible to the glory of renewing in one of the richest and most curious regions of the Western World the exploration which the founder of his dynasty organised so admirably for one of the countries of the East."

The decided tone in which M. Chevalier expresses himself on the attitude of the Court of Rome in its antagonism to every attempt at progress in a liberal path will surprise many who fancy that plain speaking is utterly prohibited in France. "So long," he says, "as the policy of the Court of Rome shall not be completely changed in Europe, it is greatly to be feared that it will continue to favour the party of immobility in Spanish America, and especially in Mexico. So long as that party has such an auxiliary, it may be put to the rout on the battle-field—it may be hurled from power as often as it succeeds in climbing thither—but it will never be definitely vanquished. Irritated by the ever-reviving obstacles it will encounter, the Liberal party will continue to exhibit violence and ultraism. Good order will be impossible in the country, and anarchy will be perpetually raising its head. The French attempt at regeneration will be condemned to remediless miscarriage. So that we meet with the Roman Question again at Mexico, as difficult there as it is here." Despite this misgiving, which has been too unhappily verified, M. Chevalier has no doubt about the brilliant future that awaits Mexico the instant it is relieved from the wasting anarchy which has prostrated its energies for the last half century. The mineral wealth of the vast area still remaining to Mexico, despoiled, as it has been, of some of its richest provinces by the grasping encroachments of the United States, is not yet half explored. There is reason to believe that it still holds within its boundaries deposits of silver sufficient to restore that metal to its former relative abundance as compared with gold; while the agricultural products of the country present a diversity almost unknown in any other part of the globe, unless, indeed, we may except Japan in the Eastern and Natal in the African world; and even these last are deficient in that adaptability to the cultivation of cereals which is a remarkable characteristic of the Mexican table-land. To develop this now latent wealth, M. Chevalier recognises the necessity of a large immigration of industrious settlers, and he points to China as the quarter from which they might be most readily introduced with benefit to themselves and the country of their adoption. He observes:—

The Chinese in our day make their escape in every direction they see open, impelled as they are by the desire of flying from the arbitrary and tyrannical *régime* under which they groan in their own land, and attracted into countries where Western or Christian civilisation holds sway, by the relative mildness of its laws, and by the protection almost everywhere ensured there to the property and person of the industrious man. A civilising Government that desired to attract to Mexico a large quantity of this laborious population would succeed in it with very little effort. It would be sufficient, in fact, to make a display of justice towards them, and to guarantee them against the insults and hard usage wrongfully heaped on them by the Anglo-Saxon colonists of California and Australia. In both those countries the Chinese have been subjected to exactions and ill-treatment. Threats of expulsion are continually hanging over their heads, and yet they remain there in tolerable numbers. If the Chinese knew a region where they would be protected equally with the Whites there would be no need of going to any expense in looking for them; they would hasten thither of themselves in crowds. Few countries are situated so favourably as Mexico for becoming the goal of Chinese emigration. From their application to labour and their intelligence in commercial matters, they would be a valuable acquisition to the Mexican nation. Up to this day China has not been looked upon to the extent it ought to have been as an inexhaustible reservoir of population, whence might be drawn not only clever, sober, frugal, and indefatigable workers, but also traders of rare ability. Up to a certain epoch it was the fashion to apply to the inhospitable deserts of Scandinavia the pompous title of *officina gentium*. That appellation may, at a day not far off, belong to China, in the sense of a belief being permissible that the course of events will cause numerous and countless hordes to issue from thence, who will direct themselves to far distant countries. Thanks to the prompt and economical means of communication afforded by modern civilisation, large migrations are becoming easy. We have just seen that hundreds of thousands of persons were annually conveyed to the United States before they were desolated by civil war. It would not be more difficult to people Mexico with Chinese emigrants than the valley of the Missis-

* "I would not have it supposed that I am here forgetting the services rendered by a person well informed, and much to be commended for his zeal and courage, who accompanied the expedition to China. But what could one single person do? This sole representative of French science having fallen into the hands of the Chinese, his mission was from that cause barren of results. All danger of the kind would have been averted by a scientific commission of small number."

Digitized by Google

sippi, or the upper basin of the St. Lawrence, with the sons of Ireland or the cultivators of the banks of the Rhine or the Oder. It is admitted on all hands that an industrious population is the foundation of wealth. Nothing more is needed than that the Governments of those States whither it would be easy to bring Chinese, should bestow pains on such immigration, and be willing to encourage it. The reason alleged in California and Australia by the abettors of proscription against the Chinese is, that they are too clever as workmen, that they labour too perseveringly, that they are too much inclined to live on a little, and that thence they are injurious competitors to the Whites. But the defects with which the Chinese are reproached are qualities to the taste of impartial men, and are what should make them sought for in such lands as Mexico, where the people too often present contrary dispositions.

We can dismiss these volumes with the recommendation that they are worthy a man of M. Chevalier's reputation. Every page bears testimony to the ample and varied knowledge stored up in the writer's mind, which enables him to satisfy his reader on every topic he touches, without extending his observations to tediousness or curtailing them to provoking brevity. The translation has been executed, under the author's superintendence, by a gentleman long connected with the metropolitan press, whose reputation is a guarantee for its fidelity. Messrs. Maxwell, the publishers, have added much to the value of the book, by including in its contents a Map of Mexico, a thing wanting in the French original, though almost indispensable to a clear appreciation of the author's historical narrative and the deductions he desires to enforce.

The Reference Shakspeare, compiled by JOHN B. MARSH.—The Tercentenary Year abounds in all kinds of publications intended to do honour to our great bard. The book just mentioned does great credit to Mr. Heywood, the Manchester publisher. In all that concerns paper, and print, and the commodious size of the volume, it beats out of the field every one of its competitors. And for those who want to *read* Shakspeare, and to have a book really for reference and study, it possesses the precious singularity in these days of being without "illustrations." Mr. Marsh boasts that by four years' labour he has drawn up an index, containing a list of 372 subjects, illustrated by 6,504 separate passages, connected by a total of 11,000 references. The latter are printed marginally, and the reader is referred from one reference to the other till he meets with the passage he is in search of. The system will require some patience and practice for its ready use, but the advantage is that you gain in one portable volume text and concordance too. We trust Mr. Marsh is proceeding with his labours, and that in a future edition the scheme will be so enlarged as to be almost complete. It is easy to see that the plan is capable of great development, and well deserves it.—Mr. Cassell brings out an *Illustrated Shakspeare*, of which the most that can be said in its praise is that it is exceedingly cheap.

The publishing season again shows activity. As regards Oriental matters, we have two volumes from Professor Eastwick, entitled *Journal of a Diplomate's Three Years in Persia*, full of amusing pictures of the life and manners of that interesting nation.—Mr. Christopher Cooke's *Journey Due East* is a work in one volume, containing the journal of a five months' trip to Lower Egypt, Palestine, and Turkey, in the winter of 1862-63, returning by Athens and Rome to London. The embellishments consist of illustrations and a map.—A most important addition to English Political Biography is made by *The Diary of Mary Countess Cowper*, the wife of Lord Chancellor Cowper, and Lady of the Bedchamber to the Princess of Wales from 1714 to 1720. The book is a selection from papers in the possession of the family, and is of rare value, illustrating, as it does, a period in the early times of the House of Brunswick not hitherto so openly unfolded to the public eye.—Mr. Forster's *Sir John Eliot, a Biography*, is a life of the great statesman and patriot of the times of James and Charles the First. The author published a work on the same subject very many years ago. The present, however, is not a reproduction under altered forms of materials already accessible, but an entirely new contribution to the knowledge of the period. The volumes each conclude with a copious index, and there are two fine steel portraits.—In Fiction, *Sir Victor's Choice*, in three volumes, by Miss Annie Thomas, will achieve a great success. No one that begins to read will lay it down till the last line is reached.—*The Town of the Cascades* is a novel in two volumes by an author whose name carries us back to the days of our youth. Michael Banim is the survivor of the brothers who wrote the "Tales of the O'Hara Family," and all who retain—and who that has once read them does not?—a recollection of those stirring narratives, will welcome the reappearance of the name in the publisher's list. The new story is full of clever dramatic illustrations of Irish life and character, and is one of the few tales about drink and drunkards where the reformation of the sot is worked out with a healthy and wise-hearted sympathy, free from the improbable or the sentimentally mawkish.—*Peculiar; a Tale of the Great Transition*, by Epes Sargent, is an American novel, that will delight such as have Northern proclivities, for it is clever and vigorous. All the virtues are placed to the credit of the Northerns, while those born south of Mason's and Dixon's line enjoy a monopoly of meanness, vulgarity, and rascality.—Though writing on a subject foreign to our columns, we must signalise the appearance in type of Viscount Amberley, the eldest son of Earl Russell, an essay by whom has been reprinted from the *North British Review*, under the title of *A Few Words on Clerical Subscription in the Church of England*.—A copy has been forwarded to us of *The Psalter; with the Canticles and Hymns of the Church Pointed for Chanting*. This very cheap publication, only *eightpence*, will be very serviceable for churches abroad where the congregation may incline to adopt the custom alluded to. The pointing is excellently done by Mr. Bentley, the Head Master of Cheetham College, Manchester.

Charles Auchester and Miss Jewsbury's *Sorrows of Gentility* are the volumes last added to Messrs. Smith and Son's Select Library. The tales are so well known that we need do no more than record the agreeable fact that they are now to be had in the convenient and neat form of the set of publications known under the title just mentioned, with its superior paper and letterpress and excessively moderate price.

Of Serials, we have before us the Brothers Dalziels' *Arabian Nights* and *Vicar of Wakefield*. The spirit of the illustrations to the former induces us almost to withdraw our former expression of dislike to the cartoon-like style of the engravings. As to the latter, we must reiterate our objection to over-illustration. The cheapness of each of the above is wonderful; but if they are intended for slender means, why such a waste of ornament?—The artistical portion of Mr. Cassell's *Illustrated Pilgrim's Progress* is beyond all praise, and no wonder can be felt at the work's obtaining the immense sale that has rewarded the enterprising publisher. The principle that presided over the conception of the *Popular Educator*, issued from the same warehouse, is, we confess, beyond us. It is true you have something of everything in each part at a very low price; but, if price be the object, why compel the purchaser to buy everything at once? The man who wants a page of French need not surely have his pocket mulcted in a page of Greek at the same time.

We have received a copy of *Memoires sur La Chine*, par LE COMPTE D'ESCAYRAC DE LAUTURE, which shall be noticed in our next.

Naval and Military.

CAPTAIN SHERARD OSBORN has been appointed to the command of the *Royal Sovereign* cupola ship.

The subjoined is notified by authority as the amended scale of allowances to officers of her Majesty's ships on the East India station, who may qualify themselves to act as interpreters in oriental languages sanctioned by the India-office:—Class 1. For Hindostanee or Persian, moonshee allowance, 180 rupees; interpreter's allowance per mensem, 50 rupees. Class 2. For Arabic, moonshee allowance, 180 rupees; interpreter's allowance per mensem, 100 rupees. Class 3. For Hindostanee, Arabic, and Persian (all three languages), moonshee allowance, 180 rupees; interpreter's allowance per mensem, 200 rupees. In appointing interpreters preference will be given to class 3 over class 2, and to class 2 over class 1.

Colonel K. D. Mackenzie, C.B., late of the 92nd Highlanders, who has rendered admirable service on the Staff in the Crimea, India, and China, will succeed to the post of Deputy Adjutant-General in Ireland, vacant by the appointment of Colonel Haines to a Brigade.

Deputy Inspector-General of Hospitals C. A. Gordon, C.B., has published some remarks on sea transport for troops for India and China which cannot fail to add to his reputation as an excellent medical officer. He strongly advocates the establishment of a regular organised line of transports under naval agents, commanded by the senior officers on the station each ship to be commissioned for three or five years, and attached to victualling yards in India and China; the erection of a grand island sanatarium, a transport department in Egypt, a receiving vessel at Alexandria as at Hong-Kong, and other improvements on the present system which deserve the serious attention of the authorities, who must be desirous of mitigating the grave evils which at present exist, as Dr. Gordon points out.

A new reading of international law (says the *Army and Navy Gazette*) is about being given by our excellent consul, Colonel Neale, to the Japanese. He has laid down the doctrine of the eternal nature of treaties. The Japanese, under a a sort of duress, made a treaty with us which they find unpopular—they say so, and in such a matter we must take their words—threatening society with dissolution. They desire to repeal the treaty, as with due notice they have a right to do, as an independent nation. Colonel

Digitized by Google

Neale says he will not admit such a right, and warns them that, if they do not send in silk, he will direct the fleet to destroy their home trade!

Her Majesty's steam storeship Industry sailed on the 18th inst., from Woolwich, laden with victualling stores and iron buoys for moorings in the South Atlantic stations. She also took a few head of oxen from the south of France for experimental breeding purposes in the Isle of Ascension.

An enormous cylinder, weighing 30 tons 16 cwt. 1 qr. 26lb., intended for Her Majesty,s iron ship Minotaur, in the Victoria Docks, was received at Woolwich from Messrs. John Penn and Son, having been conveyed by a team of 30 horses.

Orders were received at Portsmouth from the Admiralty to defer the embarkation of troops and naval supernumeraries for China on board the screw troopship Adventure, and to send the ship out to the Quarantine anchorage at the Motherbank to wait further orders. A case of smallpox having occurred on board is the cause of these measures having been taken. This disease is just now very rife in Portsmouth and its suburbs, as it is in many other parts.

The screw steamship Princess Royal, 73, Capt. Jones, flag of Rear-Admiral G. St. Vincent King, C.B., left Plymouth Sound on the 19th inst. for the Cape of Good Hope Station.

By the removal of Sir George Lambert to the reserved list, Vice-Admiral Sir Michael Seymour, G.C.B., Commander-in-Chief at Portsmouth, has been advanced to the rank of Admiral, and hoisted his flag (blue) at the main as soon as he received official intimation of his promotion.

The freight ship Avon arrived at Spithead on the 12th inst. from Ceylon with the following officers and troops on board from various regiments:—Lieut. Macgregor, 50th Regiment, in military command; Lieut. Richmond, 50th Regiment; Assist.-Surg. Stewart, in medical charge; 63 invalids, 9 time-expired men, 5 women, and 3 children. Three men and six children have died since the embarkation of the troops at Ceylon on the 21st of November last.

By the latest advices from Nagasaki, we (*Army and Navy Gazette*) learn that Her Majesty's Ship Leopard was the only English man-of-war in harbour, and the Dutch corvette Medusa. There were a great number of merchant ships in harbour, but no cargoes for them; consequently, many were leaving in ballast for Shanghai, where freights were rising. We regret to learn that small-pox had broken out and had touched the shipping. Very many cases had made their appearance on board the Leopard; they were, however, immediately transferred to a temporary hospital on shore, and the utmost sanitary precautions taken. The large Dutch forces were expected daily to exact compensation for the attack on the Medusa in the inland sea last year. Again we hear complaints from officers who are so unfortunate as to be stationed at Nagasaki, in consequence of no regular mail touching there, as the steamer carrying the mail goes direct from Shanghai to Yokohama, and so returns, the result is that the officers and ships' companies of vessels lying in this harbour can only receive their letters, &c., when any of Her Majesty's ships are detached for service in this isolated part of the coast.

Monetary and Commercial.

The directors of the Agra and United Service Bank (Limited) have issued their report, in anticipation of the thirtieth annual meeting, convened for the 2nd proximo. We extract as follows:—

The directors have to submit to the shareholders the audited accounts or the year ended 31st December last, and to report that, after making ample provision for all bad and doubtful debts, the net profits of the bank for the year amount to £242,909. 12s. 6d. Out of this sum the directors have declared, free of income-tax, two half-yearly dividends at the rate of 10 per cent. per annum each, and have added to the last of these a bonus of £4 per share, thus making a return for the year of 18 per cent. on the paid-up capital of one million sterling. From the balance remaining the directors have refunded to reserve fund account the sum of £7,341. 2s. 4d. taken from it last year, and, in consideration of the greatly-extended business of the bank, have carried to credit a further sum of £25,000, thus raising that fund to £225,000. They have also passed the sum of £5,000 to superannuation fund, and £15,000 to building fund, carrying forward £10,568. 10s. 2d. to credit of profit and loss account for the current year. Since last annual meeting the directors have purchased desirable premises in Sydney, and have secured land at Shanghai, Kurrachee, and Madras, in view to the erection of suitable buildings for the branches of the bank at those ports.

A special meeting of the Singapore Gas Company is convened for the 4th of April, to authorise the directors to borrow £10,000, and to give preferential rights to 2,000 of the unissued shares.

A general meeting of the shareholders of the Chartered Bank of India, Australia and China is convened for the 13th of April.

At the General Court of Directors of the Governor and Company of the Bank of England, the Governor announced that the net profits for the half-year ending 29th February last amounted to £756,143, making the rest on that date £3,772,770. After providing for a dividend of 5½ per cent. the rest would be £3,008,738. A dividend was accordingly declared of 5½ per per cent., without deduction for income tax. As this dividend exceeded the last, it was necessary to adjourn the court to confirm the same by ballot. The return was not so favourable as anticipated. The public deposits show a decrease of £292,653, the total representing £8,570,711, and the private deposits an increase of £670,825, the aggregate standing at £13,105,800. The private securities exhibited an increase of £159,853, the total being £20,657,580. The reserve of notes presents an increase of £275,790, the amount standing at £8,013,960.

On the late introduction of New Companies the *Daily News* has the following:—

One of the great consequences of free trade is the general disposition to profit by the openings it affords. Almost every individual in the kingdom is actuated by a desire to acquire sufficient capital to "begin business." The wealthy find profitable no less than safe investments. With a similar purpose the possessor of smaller means throws all his efforts into the scale. When he is in possession of some savings, even the artisan submits insensibly to the attraction of commercial ventures; and by the accumulation into one mass of a number of insignificant deposits, a great part of the trade of this country is rendered lucrative and safe.

Amongst the causes which have led to the great recent increase in the number of joint-stock companies is the continued development of commerce. Special circumstances, such as the large amount of unemployed capital afloat since the outbreak of the American war, the strength of the bullion reserve of the Bank, in consequence of the conservative policy pursued by its Board, the large profits realised in most trades during the past year, have afforded great facilities for the introduction of new associations to the public, and have greatly encouraged their formation; but the chief motive has been the general extension of commerce and of trade.

It would be difficult to say whether all the new companies are really required, or whether sufficient field is in all cases open for their operations. The state of the money market for a long time past has admitted of the realisation of unusual profits by the banking associations and firms, and, in consequence, we have an array of fresh combinations which ground their own hopes on the prosperity of the older institutions. Certainly the extension of the banking system is advantageous. While it was formerly necessary for every merchant or trader, even for every individual, to keep sufficient specie or notes at hand to meet his wants, all can now dispense with both; and, by means of cheques, the internal financial system of the mercantile community is regulated with the utmost ease. There may, however, be danger in the too great extension of facilities to credit. By the payment of a commission on his account, it is possible for a trader to commit the transaction of his business to a bank; and as the profits of the bank are great in proportion to the extent of the entries upon the passbook, there is some reason to fear that in competing for business the new banks may overstep the bounds of prudence in their advances, and incur loss.

With regard to the Credit Associations—whose operation in this country is altogether of recent date—there is no doubt ample opening for their exertions. It is true that the banks and great financial firms previously transacted the business for which they now compete. Nevertheless, the profits they have in the course of a few short months realised show that there was a work for them to do, and point out how they will facilitate great undertakings, and scatter on every side the advantages and profits that were formerly absorbed by a few individuals.

The companies introduced to public notice since our last issue are the following:—

Bonelli's Electric Telegraph Company is founded on the successful working of Bonelli's system on a line of telegraphic communication between Manchester and Liverpool. The directors therefore propose to extend their operations throughout the United Kingdom, and it is consequently intended to issue new shares, and thus increase the capital from £25,000—its present experimental amount—to £250,000. This fresh issue is to comprise 22,500 shares of £10 each. An uniform rate of 6d. per ordinary message of twenty words will be charged, so that the boon of telegraphic inter-communication will be placed within reach of all classes.

The North Australian Company is formed with a capital of £200,000, in 20,000 shares of £10 each, of which the first issue is to be 10,000 shares, and it is not intended to call up more than £5 per share. The opening of the "Northern Territory" annexed to the province of South Australia furnishes the opportunity for the establishment of this company, the more particularly as the South Australian Government now offer for sale the first portion of land in this "Northern Territory." Besides the purchasing of land, and leasing or re-selling it, the operations of the company will embrace other useful features. They will transact agency business, receive money in this country on deposit or debenture, and invest it in the colony at increased rates of interest, make advances on mortgage of real estates, &c., &c.

The British Columbia and Vancouver Island Investment Company is introduced by the General Credit Company, and has a capital of £500,000, of which the first issue is to be £250,000, in 10,000 shares of £25 each. The company will raise money on its debentures at the rates current in this country, and lend it on mortgage at the rates current in British Columbia and Vancouver Island, where 12 to 16 per cent. per per annum is easily obtainable.

The London Commercial Hotel Company is to have a capital of £150,000, in 15,000 shares of £10 each. The object proposed is the establishing an hotel in London with which business premises shall be combined, for the special accommodation of commercial travellers and of business men generally. The directors have agreed to take a valuable site adjoining Wood-street, Cheapside, upon which they propose to erect a commodious hotel, combining every requirement, and also a spacious commercial hall, or subscription-room, for the transaction of business, where merchants, manufacturers, and others may assemble.

The Fore-street Warehouse Company has been formed, for carrying on the business of Messrs. Morrison, Dillon, and Co., and has been received with an extraordinary degree of favour.

The Avonside Engine Company is established, with a capital of £150,000, in 15,000 shares of £10 each. The directors have entered into an agreement for the purchase, on favourable terms, of the freehold and leasehold land, premises, machinery, and business of the well-known locomotive manufacturing firm of Slaughter, Gruning, and Co., of Bristol, which will be transferred to the company in full working order. An immediate return on the capital invested will thus be secured. Mr.

Digitized by Google

Slaughter, the late managing partner, has accepted a seat at the board as managing director.

The Cumberland Consolidated Lead and Copper Mining Company is to have a capital of £60, in 12,000 shares of £5 each. The object of the company is to work more extensively some very valuable mineral properties in Cumberland, the existing profits may be increased fivefold if greater facilities are provided. The amount to be paid for the leases, plant, &c., is £20,000, of which sum only £10,000 is to be paid in cash by instalments, the vendors taking the remainder in paid-up shares.

Messrs. Charles Cammell and Co.'s extensive Iron, Steel, and Armour-plate Works at Sheffield, known as the Cyclops Works, have been transferred, through Messrs. Chadwick, Adamson, and Co., to a joint-stock company, with a subscribed capital of £1,000,000, in shares of £100.

The Sabloniere Foreign Hotel Company has been announced, with a capital of £100,000, in shares of £20 each. The directors have made a provisional purchase of the present freehold of the Sabloniere Hotel, situated in Leicester-square, together with the lease, business, goodwill, and some freehold property adjoining, with the intention of reconstructing the establishment, and providing suitable accommodation for foreigners.

The Isle of Man Railway Company has been formed, for the construction of a railway from Douglass to Peel (passing through St. John's). The capital is to be £100,000 in shares of £10 each. The length will be about twelve miles, with a single line of rails.

A capital of £4,000,000, in 80,000 shares, one-half to comprise the first issue, and of which 20,000 have been already subscribed, is required for the conversion of the business of Messrs. Smith, Knight, and Co., contractors, into a joint-stock undertaking. The prospectus is introduced by the Mercantile Credit Association, in conjunction with the Contract Corporation, to which the present company is to act as an auxiliary, and also undertake the construction of railways and other public works. The business of the firm, with plant and existing contracts, including the Royal Sardinian Railway, is to be transferred.

The Messageries Impériales steamer *Said* left Marseilles on the 19th inst. with the mails, 51 passengers, 363 packages of merchandise, and £206,458 in specie for India and China, and 36 passengers, 1,293 packages, and specie value £90,720 for Alexandria.

The amount of bullion by the P. and O. Company's steamer *Baroda*, from Southampton, on the 20th inst., was:—In gold, to Alexandria, £12,000; to Mauritius, £30,000; to Madras, £3,860. In silver, to Singapore, £9,260; to Hong Kong, £101,420; to Foo-chow-Foo, £1,000; to Shanghai, £17,930. Total in gold, £45,860; in silver, 129,610.

ARTICLES OF IMPORT.

TEA.—Since our last report there has been a good demand in the open market. For export, also, the demand has been good for some kinds, especially for Greens. Sales of Twankays have been effected at unusual prices. There has been a strong demand for uncoloured Japans for export to America, and prices for these kinds show a rise of fully 1d. per lb. Low and dusty kinds of Congou have sold at about previous prices, chiefly at public sale, as also the broken-leaf kinds. Fair to good common continues in request at 1s. to 1s. 0½d. There has also been some demand for red-leaf kinds, from 1s. 1d. to 1s. 2d. per lb., the grades ranging from 1s. 3d. to 1s. 8d. remain very difficult of sale. Good Kaisow kinds from 1s. 10d. to 2s. have been inquired for, being rather scarce. Fine to finest Kaisows remain much as before. Finest Monings have become very scarce, and command fully previous prices. Oolongs have been in demand up to 1s. 2d. per lb. for export; the better kinds show no change. Souchongs have sold in small parcels at about previous prices. Flowery Pekoes are without change. Scented Capers show no alteration; business has been moderate. There has been a fair demand for Foo-chow kinds; Scented Orange Pekoes at previous prices; Canton kinds remain dull of sale. The supplies of Green teas have been moderate. For Young Hysons under 2s. per lb. there has been a good demand, at fully former rates. Some qualities, especially the finest grades of Ping-Suey Gunpowder, have not been so much in demand, and the very extreme rates obtainable a month back cannot now be realised. Hysons have been inquired for, for export. Canton-made Greens remain unchanged. The public sales have comprised 1,359 packages Indian tea, and 36,717 packages China tea, of which 21,650 packages found buyers, including 1,250 packages Indian tea, and 19,701 packages China tea, without reserve.

SUGAR.—The market has been dull, but sales have been at previous prices. At public auction 4,500 bags of Madras, chiefly jaggery, went at 33s. 6d. to 35s. 9d.; and low grey, at 37s. to 38s.

COFFEE.—This market has been firm and active, with good business, attended with an advance in plantation of 2s. to 3s. per cwt., and native, 1s. to 2s. Mocha has improved 2s. to 3s. per cwt. in value; 262 bales and half-bales sold at auction at 98s. 6d. to 100s. 6d. per cwt. for fine to very superior yellow long berry; 93s. 6d. middling to good, and 87s. to 88s. 6d. ordinary short berry.

COTTON.—A slow and declining market. For quotations, see under "Latest."

RICE.—The market has varied to some little extent, but prices are now much as at the last date. Not any business of interest doing in Java. Quotations 9s. 6d. to 19s.

CAMPHOR.—Sellers of China at £5. 10s., and Japan £5. 15s. per cwt., without any immediate demand at these prices. 100 tubs Japan at auction retired at £5. 15s. to £5. 17s. 6d.; and of 86 chests China (packages stained) half sold at £5. 2s. 6d. to £5. 5s.

CASSIA LIGNEA brings rather more money in retail sales, and 134 cases at auction mostly sold at 87s. to 89s. per cwt. for 3rd to 2nd pile. Buds: Steady, with limited business within our quotations of £14 to £16; 11 boxes at auction retired.

DRUGS.—Cubebs: In a little more demand, and rather dearer. Of 160 bags at auction three-fourths sold at 89s. to 96s. per cwt. for middling to fair; private sales also reported up to 97s. 6d. Dragon's Blood: Has sold irregularly, but mostly rather cheaper: 58 boxes at auction, mostly sold at £4. 15s. to £8. 7s. 6d. for middling to good lump. Galangal Root: Dull. Nothing doing. Rhubarb: Was quiet for some days subsequently to our last, a speculative demand then returned, and nearly 300 chests changed hands at very irregular prices, showing, however, a further average advance of 6d per lb. The market is now once more quiet.

GUMS.—Benjamin: Sumatra rather cheaper, and of 462 cases at auction, a small proportion only sold at £10. 2s. 6d. to £11. 12s. 6d. per cwt. for false packed 2nd quality: and £5. to £5. 17s. 6d. middling to fair 3rd: remainder, chiefly low 4th quality, retired. Nothing doing in Siam. Damer: Fine picked scarce, and wanted: other sorts neglected: of 345 cases at auction a few only sold at 34s. 6d. to 35s. per cwt. for middling sorts. Gamboge: Quiet; 16 cases at auction all retired.

GUTTA PERCHA.—Steady, and of 5 tons at auction, half sold at 2s. 1d. to 2s. 3d. per lb. for good to very good genuine. India Rubber: Very firm at the previous value, with a good deal of enquiry: 40 baskets Penang at auction retired; and of 523 packages Assam, a small portion sold at 8½d. to 8¾d. per lb. for middling.

HEMP.—The market remains firm, but without animation; 4,905 bales at auction all retired, and nothing of consequence done privately.

JAPAN WAX.—30 boxes (lump) bought in at 62s.

OILS.—Aniseed: Fair business accomplished privately, chiefly at the lower figure of 6s. 8d. 40 cases at auction, all retired. Cajaputa: Steady; 13 cases *via* Holland at auction, half sold at 2½d. per lb. for good. Cassia: Of 20 cases at auction, three-fourths sold at 9s. 3d. to 9s. 6d. per lb., and fair business done privately within these rates. Cinnamon: Quiet; 7 cases at auction, all retired. Mace and Nutmegs: Firm; 2 cases at auction sold at 2½d. per oz.; Nutmeg Paste very flat at 1d. per oz.; of 6 cases at auction, one only sold.

SAGO.—Firm, and the turn dearer; of 1,711 boxes at auction half sold at 24s. to 24s. 6d. per cwt. for good small, and 21s. 6d. to 22s. 6d. large and medium. Flour: Moderate transactions upon former terms; only 60 bags at auction, and those retired.

SPICES.—Cloves: Nothing doing in Penang; Zanzibar, ½d. per lb. dearer; of 308 bags at auction half sold at 3½d. to 3¾d. for ordinary dark to very good; good business also done privately upon corresponding terms. Ginger: Flat, and rather lower; and of 205 cases at auction half sold at 60s. to 65s. per cwt., ordinary small to middling wormy. Mace: Firm, especially good pale, but of 15 cases Penang at auction only one-fifth sold at 2s. 4d. to 2s. 6d. per lb. good palish, and 1s. 4d. good reddish. Nutmegs: Very flat, and 30 cases Penang at auction nearly all retired. Pepper (BLACK): In improved demand, and rather dearer; of 7,957 bags Singapore at auction half sold at 3¾d. to 3¾d. per lb.; 191 bags Penang retired; good business done privately at 3¾d. to 3¾d. Sumatra, and 3½d. Penang. White: Steady, but not active; of 481 bags Singapore at auction half sold at 5¾d. to 5¾d. per lb.; and of 914 bags Penang, one-fourth sold at 5¾d. to 5¾d. for fair.

TERRA JAPONICA.—Cutch, Pegue: Had advanced 1s. per cwt. with very active demand, but half the rise has been since lost; of 3,317 packages at auction, half sold at 27s. to 27s. 6d. for good Pegue: considerable quantities have changed hands privately. Gambier: 1s 3d. to 6d. per cwt. dearer, with moderate business on the spot, and large for arrival: only 561 bales at auction retired.

MISCELLANEOUS.—Blacklead: Flat; and of 501 barrels at auction, only one-fifth sold, at 5s. to 12s. 6d. per cwt. for very low to middling lump, and 10s. good dust. Galls: All kinds—Bussorah, China, and Japan—very scarce, and in urgent demand; no auctions, and very little done privately. We quote Japan and China 60s. to 90s. per cwt. Musk: Firm; a small arrival, 22 caddies, sold readily at auction at 25s. 6d. to 27s. 6d. per oz. for middling Tonquin, and 24s. to 25s. pickings. 7 tins

Digitized by Google

Grain nearly all sold at 50s. for good. Rattans: Continue very firm; and 1,000 bundles Calcutta at auction sold at 4s. 6d. to 5s. 1d. per 100. Sapanwood: In more demand, and fair business done at full prices. 12 tons Siam and 17 tons Manila at auction all retired. Mother-o'-Pearl Shells (Singapore and Manila): Both descriptions remain scarce and firm. Tortoise-shell: Of 7 cases Singapore at auction, three sold at 12s. to 22s. 6d. per lb., being quite the previous value. Turmeric: No China here, and nothing of any importance doing in Java. Vermilion: Scarce, and firm, with an upward tendency.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8. 10s. to £9; nail rod, £9. 10s. to £10; hoops, £11; sheets, single, £12; Staffordshire bars, £10. 10s.; rails, £8.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £110 per ton; yellow metal, 9¼d. to 9¾d. per lb.

TIN.—116s. for block; 117s. for bar. Tin plates, best charco C. 31s. per box.

LEAD, &c.—English Pig, £21. 12s. 6d. to £22; W.B. £22. 10s.; shot, patent, £24; sheet, £22; spelter, £22 to £22. 10s.; zinc, English sheet, £26. 10s.; quicksilver, £9 to £9. 5s.

The following is from the Circular of Messrs. French and Smith: The Iron Market shows signs of weakness. In Wales there is a disposition to yield a little in price. The Staffordshire masters are not so full of orders. Scotch pig fell to about 56s. cash, but has since rallied a little. Copper: A further fall was declared on the 9th instant; the market is now steadier. Tin: English has been very quiet. Straits has given way, and some large parcels have been sold as low as 109s. cash. The quotation to-day is 112s. cash, firm. Tin Plates steady in price, but inactive. Lead continues very firm, and in great demand. Spelter shows but little activity, but price continues steady. Quicksilver continues scarce.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

From BATAVIA.—At FALMOUTH: Frederika. At CHANNEL: Ceres.

From PENANG.—At LONDON: Nipisiquit, Rockliff, Teesdale, Edinburgh Castle. At FALMOUTH: Schlosser.

From BANGKOK.—For London: Bankok.

FREIGHTS AND CHARTERS.

There is still an abundance of East India shipping in our home ports, and outward freights continue low, in consequence. Good charters, however, are easily obtained for the homeward voyage. Tonnage is wanted for teak from Maulmain, and small vessels are still required for the China trade, which now employs a greatly increased amount of tonnage, in consequence of cotton being largely exported from Hong Kong and Shanghai instead of being, as formerly, an article of import.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 to £41, and £1. 17s. 6d. For Shanghai: £52, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26, and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Emigration Commissioners have given notice that they are prepared to receive tenders for two vessels to convey Chinese coolies from Canton to British Guiana, to be ready to receive them on board on Oct. 15 and Nov. 30 next respectively.

CASUALTIES.

The Alaric, Daniel, which arrived at Liverpool March 15, from Manila, had lost her rudder Feb. 22 by a sea.

HAMBURG, March 15.—The Ophelia, Tonjes, which arrived at Cuxhaven yesterday from Macao, reports having been fired at twice by a ship of war when off Borkum. The wind being strong, the Ophelia was enabled to reach Cuxhaven without any damage or further molestation.

The Willem Hendrik, from Newcastle to Batavia, which was spoken Jan. 25, 23 S., 26 W., had had figure head washed away, and cutwater shaken, &c., in the gale of Dec. 3.

The British Queen, which sailed from Glasgow March 15 for Batavia and Singapore, got ashore in Kilchattan Bay, six miles from Rothesay. A steam tug took her off, and she arrived in Gourock Bay the next day. Advices have since been received of her having sailed again, March 20, for her destination.

The Crusader (barq.), of Shields, Reid, which sailed from Shields, March 4, for Shanghai, put into Cowes, March 17, with damage to upper works, foreyard carried away, &c., having been in collision the previous day. She has been surveyed, and will discharge part of her cargo.

The Euphrates, which sailed from Liverpool, March 14, for Singapore put back March 17, not having sufficient dead weight on board.

LISBON, March 12.—The steel mast (not iron, as before stated) of the Wild Deer, Cobb, from Liverpool for Shanghai, which put in here Feb. 27th, cannot be properly repaired, and is being replaced by a wooden one.

Intelligence has been received here that the Florence Adelaide, from Liverpool to Singapore, was wrecked in the Caramatta passage Jan. 20, on a shoal not marked in the ship's charts; crew saved.

At ST. HELENA.—Jan. 30, Preusse, Weso, from Manila, and sailed for London; James Gibson, Constable, from Shanghai, and sailed for London; 31, Carn Tual, Hill, from Nagasaki, and sailed Feb. 2 for London; Feb. 2, Avalanche, from Singapore; 3, Cambridge, from Kanagawa, and sailed, 5, for London; Sarah, from Shanghai; 4, Thalaba, McChannin, from Ningpo, and sailed, 5, for Liverpool; Cornwallis, White, from Batavia, and sailed, 4, for Rotterdam; 5, Daisy, McCulloch, from Shanghai; Ranee, Wainwright, from Shanghai; Maori, Ashby, from Singapore; Magnus, Morin, from Macao, for Bremen; Teesdale, Topping, from Penang; 2, Maria Theresa, Visser, from Nagasaki, and sailed, 1, for Amsterdam; Scheveningen, Annokee, from Batavia, and sailed for Rotterdam; 3, Nederwaard, Tergast, from Padang, and sailed, 4, for Rotterdam; 6, Josephine, from China; Forfarshire, from Hong Kong for Liverpool.

At ASCENSION.—Feb. 12, General Michiels, Vissaer, from Banjoewangie for Rotterdam.

LAUNCHES FOR THE CHINA TRADE.

On the 12th inst., a fine iron barque of 500 tons register, to be commanded by Captain A. W. Tonge, and intended for the China trade, was launched from the building-yard of Messrs. W. Patterson and Sons, Bristol. This vessel has been built under contract to Mr. John M. Gladstone, of Liverpool, and combines every improvement that has of late years been introduced into shipping. She was named the Ladye Love. Her length is 153 feet, breadth 25 feet, and depth 17 feet; classes 12 years A 1 at Lloyd's, and 20 years in the Liverpool Book of Registry. On the 16th inst. a most successful launch was made from the yard of Mr. Councillor John Ransom, at Northam, of a barque of 480 tons, named the Lady Hulse, built for the China trade, under the superintendence of Mr. Jenkins. Her dimensions from stem to stern post are 145 feet, and width 29 feet 6 inches.

THE HONG KONG AND WHAMPOA DOCK COMPANY.

AN ASSOCIATION, called the "HONG KONG and WHAMPOA DOCK COMPANY," having purchased Messrs. J. C. Couper and Co.'s extensive DOCKS, with Engineer Factory and Foundry, at Whampoa, are prepared to execute all kinds of work with prompt despatch.

The Dock is built of Granite, and is 550 feet over all with 520 feet on the blocks, and a breadth of 80 feet at the entrance. It can be used as either one or two Docks, being fitted with two Caissons. It is also furnished with Steam Pumps.

Depth of Water at Spring Tides, 16½ to 17 feet.
Do. Neap do. 13½ to 15 "

Attached to the Docks is a Pair of Shears, fitted with two capstans and three winches, and capable of lifting fifty tons, with a depth of water under the Shears, alongside the Jetty, enough for any vessels at all times of Tides.

The Engine-house on the Establishment contains Lathes of all sizes, and capable of taking any sized Shaft; one Self-acting Planing Machine; Screwing Machine, with Taps and Dies complete, Large and Small Drilling Machines, Punching and Cutting Machines, Rolling Machines, powerful Steam Hammer (3 tons), &c., &c.

Also, one Wood Dock, capable of taking a Vessel of 240 feet on the keel, on a Draft of 14 feet at Spring Tides, and 11 at Neap Tides. This Dock is also fitted with a Caisson, and is pumped out by steam.

The above are the only Docks in Whampoa fitted with Caissons.

There are also Two Mud Docks, one capable of taking in Vessels of 164 feet on the keel, with a Draft of 12 feet 6 inches at Spring Tides, and 9 feet 6 inches at Neap Tides. The other, Vessels of 120 feet 6 inches at Spring Tides, and 7 feet 6 inches at Neap do.

The Blacksmith's Shop contains 1 Large Boilermaker's Furnace and 12 Smiths' Forges, fitted with Steam Blowers.

The Iron Foundry contains a Furnace capable of melting 5 tons, and Brass Furnace for melting half a ton.

Attached to the premises is a Circular Sawmill driven by Steam, capable of cutting logs or planks of any length.

The whole under the Superintendence of experienced European Foremen.

All Tools and Materials connected with Machinery kept always on hand.

Copper and Yellow Metal Sheathing, Felt, Pitch, Tar Oakum, Paints, Oils, &c., &c., supplied at market rates.

For Dock Charges, or further particulars, apply to Mr. D. LAPRAIK, Hong Kong; to G. N. MINTO, Manager, Whampoa; or to Messrs. JAMES MORRISON and Co., 1, Crown-court, Philpot-lane, London.

HOLLOWAY'S PILLS.—MERIT REWARDED.—This famous family medicine has withstood the test of time and the most unrelenting opposition. These Pills are a direct purifier of the blood and all the other fluids of the human body. During the winter and early spring no house or home should be without the means of arresting disease at its onset; such means are safely and surely presented in these excellent Pills, when they are taken according to their accompanying directions. Holloway's medicine removes dyspepsia, promotes digestion, and acts as a mild and effective aperient. These Pills are strongly recommended to those persons who are constitutionally weak, and whose nervous systems have been shattered by illnesses; on such they will confer indescribable comfort.

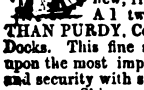
CHINA, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA and MAURITIUS—Overland, 20th.

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to 500 places, free no application.

G. W. WHEATLEY and Co. (late Wagnern), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W., and 8, Regent-street, S.W.



FOR HONG KONG direct, with immediate despatch, the magnificent, new, river-built, clipper ship DILKHOOSH, A 1 twelve years, 795 tons register, JONATHAN PURDY, Commander; loading in the East India Docks. This fine ship has just been built in the river upon the most improved principles, to combine strength and security with speed, and is expected to make a rapid passage. Shippers are requested to inspect her.

For Freight apply to GEORGE DUNCAN and Co., 2, East India-avenue, Leadenhall-street, E.C.

With immediate despatch.

DIRECT FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper ship SYDNEY EGGERS, classed A 1, 20 years, in the Liverpool Underwriters book; 870 tons register; H. W. CAMPBELL, Commander; loading in the East India Docks. This magnificent vessel built on the Clyde in 1859, made her last passage to Bombay in seventy-nine days, is noted for her great speed and sound delivery of cargo, and will be found an excellent opportunity to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

FOR HONG KONG and WHAMPOA, will be immediately despatched, the celebrated clipper ship PRINCE ALFRED, A1 twelve years, 663 tons register, W. ELLISON, Commander, loading in the West India Docks. Has splendid poop accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, London, E.C.

COLOMBO, CEYLON, direct, will have very quick despatch, the well-known, fast sailing regular trader AVON, A'1 for thirteen years, register 645 tons, WILLIAM RICHARDSON, Commander; loading in the West India Docks. This splendid vessel has a full poop, with most superior accommodations for cabin passengers.

For Passage apply to W. H. TINDALL, 4, Clement's-lane; and for Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill.

FOR COLOMBO, direct, the beautiful clipper ship SOUTHERN CROSS, A 1 ten years, 591 tons register, Commander, ———, loading in the West India Docks. This fine vessel is recommended to shippers of fine goods as a fast and safe conveyance; has a full Poop and excellent accommodation for cabin passengers.

For Freight or plans of her poop apply to the owners, STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR SHANGHAI Direct (to sail 25th April), the well-known clipper ship ANGLO-SAXON, A 1 13 years, 693 tons register; A. W. PLUMMER, Commander; lying in the London Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

NOTICE to SHIPPERS to HONG KONG and WHAMPOA.—The well-known clipper ship JUBILEE, A 1 14 years, 764 tons register, J. A. GRANT, Commander, will receive goods in the East India Docks all Friday next, the 1st of April.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the celebrated British clipper MARY MILDRED, 3 T. French Lloyd's, 460 tons register; C. J. FINE, Commander; lying in the London Docks. This beautiful vessel has superior accommodation for passengers, and sails very fast.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

FOR HONG KONG and WHAMPOA, direct, with quick despatch, the well-known British-built ship CAMBALU, A 1 13 years, 499 tons register, loading in the London Docks. This fine vessel has good accommodation for passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

Summary of News from the Far East.

JAPAN.

There is no later intelligence by this mail from Yokohama or Nagasaki.

CHINA.

TIENTSIN.

Dates are to the 20th of January. The weather since December has been extremely mild and pleasant. The Chinese seem to anticipate an early breaking up of the ice this year. The business done since the 20th of December has been decidedly better than at the same time last year, and if we take into consideration the disappearance of the rebels from the vicinity, we are justified in looking forward with some degree of confidence to a lucrative business during the ensuing spring season.

CHEFOO.

Dates are to the 9th of February. Business at this port is extremely dull, in consequence of the Chinese New Year. Prices quite nominal for every article, and no quotations can be given. The Custom-house has been closed for ten days.

SHANGHAI.

Dates are down to the morning of Feb. 21. We extract the following from the *Daily Shipping News*:—

"By recent advices from Quinsan we regret to learn that Major Gordon, yielding to the solicitations of the Futai, has determined again to take the field to assist the Imperialists in the siege of Chang-chow. We regret this step on Major Gordon's part, inasmuch as we fear it removes all probability of the Chinese Government yielding to Sir Frederick Bruce's remonstrance, and disavowing the breach of faith towards the rebel Wangs at Soochow. This result would only have been extorted from the fears of the Government lest they should lose the services of the foreign contingent; now that that fear is removed, the probability of their reprimanding their subordinate is, we fear, very remote. We are not aware what Major Gordon's motives may be for taking this step, but shall take occasion to remark further on the subject in the *North China Herald*. In the meantime, Major Gordon is anxious to remove an impression which he fears may have been given by an article that appeared in our paper on the 5th inst., that the time-expired men of H.M.'s 31st Regiment, who were given their discharge when that corps returned to England, were discharged at his request. We there said—

The discharge was in almost all cases granted with a view to supplying Major Gordon with a body guard.

Lest the responsibility of these men's shortcomings should be in any way supposed to rest on his shoulders, Major Gordon wishes it to be understood that he neither encouraged them to ask for their discharge nor ask that they might be allowed to leave. They were discharged at their own request, came to Quinsan and offered their services, which were accepted. We learn that the evil of rowdyism has spread even to Quinsan, where it has been found so vexatious that Major Gordon was lately issuing orders that no foreigner shall be admitted within the walls unless he be the bearer of a pass signed by himself.

The most valuable results may confidently be expected from the united action of the Consuls of the treaty powers. The minutes of each Consular meeting furnish us with discussions on subjects of general interest, which could not be satisfactorily treated of by any Consul acting in perfect independence of his colleagues. The Chinese authorities are thus led to understand that no purely selfish element enters into the claims made upon them; but that the rights demanded will, if granted, conduce to the general welfare of the foreign mercantile community, and will indirectly tend to the aggrandisement of the port, and to an increase in the importance of the local officials. At the last meeting, held on the 15th inst., the matters which came under consideration were of the greatest importance, and demanded perfect unanimity in the gentlemen who assembled to consult upon them. The subjects deliberated upon were—first, the cession to the municipal council of the right to exercise jurisdiction over unrepresented foreigners—secondly, the establishment of a court for the trial of Chinese suspected of having committed minor criminal offences within the settlements, and thirdly, the right of foreigners to purchase land at Soochow. With regard to the first of these subjects, the chairman announced that the native officials had granted to the Municipal Council the right of trying nationals of non-treaty powers who may bring themselves within the grasp of the law. This concession is a matter for congratulation, as the requirements of justice will thus be strictly enforced, while the possibility of Europeans being subjected to the inhuman tortures practised by the Chinese will be diminished. In order, however, to carry out this design in a satisfactory manner, it will be neces-

Digitized by Google

sary to secure the services of a properly qualified police magistrate. Such an officer should be possessed of sufficient legal knowledge to guide him in delicate legal cases, while at the same time he ought to possess considerable experience in dealing with criminals of the class likely to be brought before him. An incompetent or inexperienced magistrate would, to a certainty, involve the Municipal Council in an inextricable maze of judicial confusion, and render the important step now taken utterly worthless. We are, as yet, in the dark as to the arrangements contemplated by the Consuls when handing over this right of trial to the Municipal Council. We know not over how large a district surrounding Shanghai the jurisdiction thus granted may extend. The despatch from the Consuls to the Futai does not specify with any distinctness whether subjects of non-treaty powers arrested in the interior while in the act of committing outrages are to be transmitted to the foreign authorities. It simply provides that such men arrested for crime in Shanghai, or found travelling without passports in the country at a distance of more than one hundred li from a recognised port, are to be given up to the Municipal Council. Foreigners do not generally, so far as we can discover, travel much in the interior. It might, therefore, be as well to demand that all subjects, whether of treaty or of non-treaty powers, found either travelling without passports, or in the act of committing outrages, should be transmitted to Shanghai for trial and punishment. We notice that the Futai provides that the honourable Consuls should transmit to the Municipal Council the power (on behalf of the Chinese Government) of holding jurisdiction on such persons; supervision being at the same time maintained by the Consular body.

The following market report is from the *Shanghai Recorder*:—

Since the China New Year but little has been done in imports. Money has not yet begun to circulate freely enough amongst the natives, but it is expected that business will be fairly resumed during the course of the next week. One or two sales of piece goods are reported, but they are insignificant, and cannot be taken as a criterion of the market. For 6½ catty 8¼ lbs. Grey Shirtings, the prices obtained were from taels 4.0.0 to taels 4.0.5 per piece. Importers, generally, are sanguine of a good demand, and high prices ruling for all kinds of cotton fabrics ere long, and are not anxious to press sales. Woollen Goods are also likely to improve in value. Taels 16 per piece for a private chop of good assortment of S. S. Camlets have been offered and refused. Lastings are being held for taels 14.50, and Spanish Stripes are quoted taels 0.6.4 to taels 1.0.0 per yard, according to quality.

RICE.—As yet there is no inquiry for foreign rice, but the feeling entertained by both foreigners and natives in favour of a large business and higher rates next month is very strong.

COTTON.—Had a drooping tendency prior to the arrival of the 26th December mail from England, received on Thursday. Since then a reaction has set in, and an advance of taels 2 per picul on previous rates has been obtained. Sellers are, however, firm, even at the advance. Fair Up-River or Chin-kiang district staple is now worth taels 22 per picul, with an upward tendency. Best descriptions of Up-River and Hankow cotton are held for taels 23 to 25 per picul.

SILK.—But little business has been done in this market during the week, and prices remain without alteration. The settlements during the week do not amount to more than 60 bales, at prices previously ruling. Rates still continue so high as to offer no temptations to foreigners to buy at present.

OPIUM.—Has been in fair request. Malwa being scarce has advanced to taels 535 to taels 540 per picul, with a good inquiry. Patna is not in so much request, and may be quoted at taels 395 for new, and taels 410 for old per chest.

EXCHANGE.—Rates may be quoted 6s. 4d. for Bank Bill, and 6s. 4¼d. for first class private, with a tendency to further decline. On Hong Kong for three days sight 24 per cent, and 25 per cent. for fifteen days' sight drafts.

A meeting of the Municipal Council was held on the 12th of February; present—H. W. Dent, chairman; R. Brand; J. Cock, Treasurer; G. F. Heard; D. Reid; R. F. Gould, Secretary. The minutes of the preceding meeting were confirmed.

POLICE.—The Chairman stated that the preservation of order in the settlement during the celebration of the Chinese new year had been much facilitated by the co-operation of the military patrols, which had been readily furnished by Colonel Hough, Commanding H.B.M.'s Forces. The expediency of forming a small force of mounted police, for the purpose of patrolling the entire extent of the Hongque settlement, was discussed, and directions given that the superintendent should make an early report as to the feasibility of the project.

ENGINEER'S DEPARTMENT.—Two tenders for the survey of the English settlement were laid before the board, their final consideration being reserved until the next meeting.

GRANITE CHIPS.—The only tenders for the supply of this material, being higher than the price ordinarily paid, the advertisement was ordered to be continued.

DEFENCE CREEK BUND.—Mr. Oliver, on behalf of Mr. E. M. Smith, explained the advantages that would accrue to the public from the prolongation of the road along the line of the Defence Creek, from the western extremity of the Nankin-road to the Soochow Creek, and the board signified their approval of the measures proposed.

MISCELLANEOUS.—The following details of an attempted "squeeze" by certain Cantonese were afforded. A Chinaman named Way Sun petitioned unsuccessfully for 10 passes. On the 30th January, and on the 1st inst., a notification (A) was obtained from some Chinese who had been defrauded, and on the 3rd inst. 26 Chinese in house G 136, were arrested. It had been ascertained that in four days upwards of 143,000 cash had been collected. The prisoners had been sent into the city by order of H.B.M.'s Vice-Consul, where they still remain in custody.

CORRESPONDENCE.—From H.B.M.'s Consul, stating that his Excellency the Toutai had consented to increase the annual contribution paid in commutation of the wharfage dues chargeable to native traders from 4,000 to 8,000 dollars. From Mr. Loureiro, placing certain Chinese houses at the disposal of the Council rent free for the accommodation of a police detachment on the Broadway-road, and offering to fit up a stable if mounted men should be sent there. Secretary to thank Mr. Loureiro, and to inform him that his proposal should meet with due attention.

People from Soochow and other localities have resorted to this place. Among them are many who are in a state of great trepidation. Now it was announced that by the favour and authority of the high Chinese officials, and the Municipal Council in the English Concession, a board of watchmen had been established at G. 136.

The Municipal Council having established the board of watchmen, decided, after mature deliberation, that ten men with the watchmen's bamboo, gong, &c., should, without rest day or night, perambulate the streets within the concession for the purpose of keeping order; and that to meet the expenses of this board they should levy a monthly tax of Cash 300 on all two storied houses, 200 Cash on all one storied houses, and 400 Cash on all opium shops; this amount not to be increased or diminished.

Having been the recipients of your favour in the past, we are truly grateful. By continuing this in the future, trouble will be avoided. The above is no fiction.

Tung-chi, 2nd year, 12th moon, 15th day.

We have received a copy of the first annual report of the Shanghai Wharf Company, held at the offices of the agents on the 1st of February. The amount to credit of profit and loss, after deducting taels 745.74 for interest on loans, is taels 5,091.13, or equal to a little more than ten per cent. upon the original capital of taels 50,000.

We are glad to learn that Sir Frederick Bruce has not thought it desirable to listen to the appeal of the man Williams, who is now lying under sentence of death at the American Consulate, but who, after his trial by that court, claimed British protection. Mr. Burlingame has signified his assent to the sentence, and Williams will shortly be executed. This decision by Sir Frederick Bruce to ignore the claims of criminals who play fast and loose with their nationality, claiming to be British or American subjects as best suits their convenience, is a wise one. It will convince the Anglo-Saxon portion of the rowdy population that such subterfuges, at least, will not avail them.

By the *Nepaul* for Yokohama, we learn that Professor Risley embarks with all his *troupe*. The Professor's visit to Shanghai has not been attended with much benefit to his pocket, but the energy and labour he has bestowed in his efforts to cater for the public amusement will, we feel assured, stand him in good stead elsewhere. He has had so many difficulties to contend with, no Circus, no Theatre, bad weather at commencement, sickness, &c., &c., that we have been astonished at his perseverance.

The arrival of the *Fiery Cross* from London is thus reported:

Digitized by Google

—The fine clipper ship *Fiery Cross* has again arrived in China waters from London, having made the fastest passage on record to Shanghai. She embarked the pilot on the 91st day from her date of departure, and arrived outside the marks at Woosung early on the 93rd day. After leaving London she encountered a succession of heavy westerly gales which compelled her to seek shelter in Plymouth sound—where she was detained seven days before putting to sea. The gale having abated, and the weather becoming settled, she made an excellent run of 20 days to the equator, which she crossed in 28 W., having run into the N.E. trades in 3 North, and rounded the meridian of the Cape on the 32nd day in 48·50 South, and encountered fine weather running down the eastings — coming the eastern route through Pitt's passage. She spoke the *Maury*, from New York to Shanghai, on the 16th January, 96 days out, and the *Unrivalled* on the 18th January, from London to Shanghai, 112 days out. The *Fiery Cross* made the last voyage to Hong Kong in 85 days, and beat up against the monsoon to Shanghai in 11 days, completing the voyage round to this port in 96 sailing days. It is just eight months and six days since she left Foochow with the new teas, and arrived in the port of London before any of the other tea clippers which sailed same time. During the time she was in London she was fitted with patent reefing top-sails and top-gallant-sails, which are improvements on the old patent. Her masts and yards are of steel. The *Fiery Cross* may be considered one of the finest specimens of naval architecture at present in the port of Shanghai.

HANKOW.

The following letter has been published in a Shanghai paper on the question of Custom-house holidays :—

"I believe the Custom-house at your port closed on the 7th 8th, and 9th inst. for the New-year holidays. At Kiu-kiang, the Custom-house is closed at 3 p.m. on Saturday the 6th, and no business is transacted for three days ; can you give me any reason why the authorities here should close on the 5th (Friday) and continue so until Wednesday the 10th instant, taking five days, while only three are thought necessary in Shanghai and other ports ? I am induced to write on this subject, as new rules and regulations are being made every day which greatly retard the despatch of steamers. When the Custom-house was first opened here, liberal rules were made which are fast vanishing ; for instance, coals for steamers' use were examined at your own jetty, and such small affairs as wood for lighting fires, oil and tallow for engine-room use, and rice for the crew were all allowed to be shipped without a permit, or at least with only a requisition in the shape of a note from the purser. All this is changing, and by all appearances we shall soon be trammelled in such a way as will cause immense delay in despatching steamers. The matter of shipment of coals is of very considerable importance. On the arrival of the last steamer to my consignment I applied for a permit in the usual form and expected a Custom-house officer would be sent down to my wharf as usual to examine the boats, but I was informed that henceforth all coal boats must go to the Custom-house jetty to be examined. If this rule is adhered to, it will in the summer months, when the tide is strong, often cause half a day's delay in getting a steamer away, and at times simply postpone the departure indefinitely, for there are occasions when it is absolutely impossible to take large boats, such as are used here for coals, against tide and wind.

"In the matter of ship's stores, the trouble about such small matters is really absurd, applications in Chinese and English are now required for such things as 10 piculs rice, 2 piculs tallow for engine-room, or 25 piculs fire wood for lighting fires.

"Wishing to give publicity to these grievances, which are growing ones, I hope you may find room in your paper for this letter."

NINGPO.

The Anglo-Chinese contingent remains at Ningpo, whence a small detachment is frequently sent to scour the country within the thirty mile radius round the port. Colonel Cooke has also sent one hundred men into the interior to various stations on the principal creeks, to check the squeezing, or more properly piracy on a small scale, which has for some time been carried on by foreign and Chinese vagabonds. He is also likely, we learn, to send a small detachment into the Campo, to be used in case of need against the rowdies, who are again becoming troublesome in that quarter and are too numerous for the limited force of Ningpo police to control. A review of the whole force was held the last week in January in honour of Captain Dew, who, it will be remembered, founded the force After various evolutions had been gone through, the troops piled arms and indulged in races, jumping in sacks and a variety of other amusements, the favourite, apparently, being a sort of exaggerated blind man's buff. The men tied their neighbours' turbans over their eyes, and the whole set to work to chase the bugler, who gave an occasional clue to his whereabouts by a blast on his instrument. The English and American Consuls were present, and, as well as Captain Dew, expressed themselves highly gratified with the appearance of the men as they marched past, before returning to quarters, at the close of the day's proceedings. As the *Encounter* was leaving, the English flag was hoisted ever the Salt Gate and saluted from the walls with twenty-one guns, which the *Encounter* returned. A salute of seven guns was also fired in honour of Captain Dew.

The following appeal has been made to the generosity of the foreign community :—"The people of this district (King-hwa interior from Ningpo) are suffering for the want of food ; and if they do not get help, multitudes must starve to death next spring. The rebels left them a year ago, this winter, without food. Last summer, the little rice that was planted, was almost all destroyed by drought, so that now many are living on grass that they dig in the barren fields. They, even the rich, have no money—very few have cattle to plough the fields, or rice to last more than a month longer. The people are literally staring famine in the face, and know no source to which to look for help.

If to save human life is a charity, then I know at present of no more charitable use that could be made of a thousand or more dollars than to expend it for cattle to plough fields, and another thousand or more to be expended in purchasing rice to feed the famishing cultivators of the soil and their families. "Can anything be done ?"

FOOCHOW.

A banquet has been given to M. de Meritens, Commissioner of Customs at Foochow, on the occasion of his birthday. The toast of the evening was proposed by Mr. Wright, who introduced it with the following remarks :—

"It has seldom fallen to my lot to have a more pleasing duty to discharge than that which now devolves upon me. An old English proverb tells us that we should 'write injuries in dust, but benefits in marble ;' and it is, I assure you, at once a duty and a pleasure to remember and record the thousand acts of kindness, of genial good-fellowship, of kind and friendly sympathy, which it has been my good fortune to receive at the hands of the gentleman whose health I am about to propose. Gentlemen, I need scarcely say that I rise to ask you to drink the health of the Baron de Meritens, and I trust that you will forgive me when I say that I consider myself as peculiarly well qualified to propose this toast. For some time it was my good fortune—the gift of my good genius—to reside at the same port, to dwell in the same house as our illustrious guest ; and I can, therefore, speak with more certainty and knowledge than most of us as to the noble qualities of heart and head, the intellect at once subtle and profound, the heart at once generous and just, the disposition at once fiery and persevering, which render him so worthy a representative of that noblest and most chivalrous among modern nations, 'La belle France.' As marriage is the consummation of love, and ripe manhood the perfection of youth, so are thanks the flowers of gratitude, and I should be unworthy, indeed, did I not, on an occasion like this, publicly tender my sincerest thanks to the Baron de Meritens for having enabled me to realise, in this practical every day world, the idea which I had previously formed as to the character of a French gentleman ; the nobility, the courtesy, and the courage, the critical accuracy, the profound scholarship and the polished manner, which from prehistoric and almost fabulous times until now have gained for his compatriots the first place in war and love, in art and in science, in the annals of conquest, and the history of civilisation. The talents which have gained for him his present position would, in any other sphere, have gained him an even greater name—a more extended reputation. But it is always so in life. The brightest and most brilliant successes which a man achieves are poisoned or alloyed like that robe of agonies which Deianira wove for Hercules. But let us not regret that a more extended sphere has not been the arena of the Baron de Meritens. Let us rather rejoice that we have so fair and bright a model by which to shape our own way. We have so much to harden us in life, so stern is the struggle for existence.

Digitized by Google

so sadly do the morning dew drops and the early flowers fade and wither in the hot noon of life, that we are apt to forget the value of a bright example and to imagine those talents wasted or confined which are yet pointing out to us that the 'path of duty ever runs upward;' that, in the words of the greatest of modern poets, Tennyson, 'The path of duty is the way to glory.'

"From the career of the Baron de Meritens, we may learn that, even here in China, far removed as we may be from the fountain head of law and science, and civilisation, it is still wiser, safer, nobler far, to adopt the principle of right, rather than the excuse of expediency; and that if we wish to succeed, we must adhere to those eternal principles of right and truth, and justice, which exist everywhere alike, without growth, decay, or change—principles which it would be cowardly to compromise and unmanly to desert. Gentlemen, I am sure that you will all join with me in rejoicing rather than regretting, that we have among us so illustrious a compeer, so sound a scholar, and so perfect a gentleman as the Baron de Meritens—and in all sincerity and earnestness I propose his health, and wish him many happy returns of the day."

The toast was warmly drunk, and was briefly and appropriately acknowledged by M. de Meritens, who said he much regretted his limited acquaintance with the English language prevented him from expressing all he felt. He thanked Mr. Wright for the eulogistic terms in which he had proposed his health, and trusted that the friendship which had been formed at Foochow might continue, as it had hitherto been, one of the great pleasures and enjoyment of his life.

FOO-CHOW-FOO.

On the 27th January the Mandarins arrested some eight or ten men as having been engaged in the late riots at the missionary chapel. During that day the city was in great confusion and excitement; the shops in the principal streets were shut up twice during the day. In the evening, a large concourse of people assembled at the Prefect's Yamun and demanded the release of the prisoners, some of whom were asserted to be entirely innocent. The Prefect was intimidated, and they were released. It is believed that if a portion of the prisoners had been beheaded, according to rumour, that the mob, a large number of whom were secretly armed, would have tried to kill the officials in the city. It is well understood that a body of the gentry and the literati are banded together to resist the arrest and punishment of the guilty. The Viceroy takes a decided stand. On the 25th he took away the buttons of rank from the district magistrates, and it is reported that they will be immediately removed from their offices for their want of success in putting down the mob and settling the matter satisfactorily.

HONG KONG.

The English Mail of the 11th January arrived on the 25th Feb. The latest dates are down to the 26th. The *Evening Mail* notices the following items:—

The second of a series of musical concerts now being given here came off on the 15th Feb., and was highly successful.—The Criminal Sessions commence to-morrow.—A Subscription Cup was competed for by various gentlemen belonging to the Colony, most of them being members of the Volunteer Corps. The prize was won by Mr. Holmes, and the fact reflects credit upon the Volunteer Corps. The winner shot with one of the Volunteer Carbines; Mr. Kerr shot with a short Enfield Rifle. Mr. Holmes, it will be remembered, won the medal of the National Rifle Association, at Wong-nei chong last year. We hear that another Subscription Cup, value fifty guineas, will be shortly competed for by effective members of the Volunteer Corps.

The following is a statement of the Revenue and Expenditure:—

REVENUE.

		Amount.
Land revenue		$138,367.50
Rents, exclusive of lands		43,759.50
Licenses:—

FREDK. FORTH, Colonial Treasurer.

With reference to the Government Notification No. 124 of 29th November, 1862, and to Post-office Notification of 15th August, 1863, the public are hereby informed that on and after the 16th of February next the use of the Hong Kong postage stamps on correspondence posted at the General Post-office here will no longer be optional, but compulsory.

2. The fifth clause, therefore, in the above-mentioned Government Notification will be annulled from 16th prox., except as to the agencies of the Hong Kong General Post-office at Canton, Macao, Swatow, Amoy, Foo-chow, Shanghai, Ningpo, Nagasaki, and Yedo.

3. The postage stamps are of the following value:—

Two Cents	or One Penny.
Four Cents	Twopence.
Six Cents	Threepence.
Eight Cents	Fourpence.
Twelve Cents	Sixpence.
Eighteen Cents	Ninepence.
Twenty-four Cents	Twelvepence.
Thirty Cents	Fifteenpence.
Forty-eight Cents	Two Shillings.
Ninety-six Cents	Four Shillings.

Digitized by Google

4. As it will take time to make this regulation generally known, and it may consequently be expected that many letters will be posted insufficiently stamped, clause 7 of the Government Notification above referred to is also annulled, and for the future insufficiently stamped letters addressed to the United Kingdom will be forwarded, a fine of one shilling being charged in addition to the postage due upon all such letters.

The *China Mail* notices that the U.S.S. *Wyoming* still lies off Green Island; she has finished coaling and will start off on a cruise after the arrival of the English mail. A friend who has just been on board of her describes the *Wyoming* as well armed, with two eleven-inch Dalghren guns among her other ordnance. The crew are up to the full complement. The *Jamestown* is at Macao, we hear, having come down from Amoy to communicate with the *Wyoming*. We heard lately that the *Jamestown* had sent an armed boats-crew on board one of our coasting steamers at Amoy, as the latter, on entering the harbour, had occasion to back out again for a short distance, and the circumstance aroused the U.S. steamer's suspicions.

The Jury in the case of Diers v. Oxford and Co., after a short deliberation, returned a verdict for the plaintiff on the first count of the declaration, damages two thousand dollars. A verdict was entered for the defendants on the other counts of the declaration. The result will be that some question as to the costs is likely to arise on taxation; the Acting Chief Justice, foreseeing this, directed that the Bills should be sent to him for perusal before they were taxed.

The Oriental Hotels Company (Limited) are prepared to erect a first class hotel here, providing 2,000 shares are subscribed for in Hong Kong. Considering the very indifferent attention paid to the comforts of strangers at the Hong Kong Club, and the objectionable nature of such a residence on various grounds, we think that a good hotel would be an acquisition to this city. The Agra Bank are the company's bankers.

The Hong Kong Races came off on the 3rd February, and two following days, and were admitted by all who witnessed them to be the best ever seen in China. The Canton Cup, 100 guineas, for Arabs only, was won by Hadji, and the 99th (Lanarkshire) Cup, value 100 guineas, presented by the officers of the 99th Regt., for all horses, was won by Haddington, who was also the winner of the Barristers' Cup, of 100 guineas, for all horses. The Fakei Cup, value 700 dollars, presented by the American community of Canton and Hong Kong, for all horses, was won by Anecdote. The Challenge Cup, entrance $10 each, was borne off by North Pole, beating Haddington and Chieftain, who was again victorious over Haddington, in the race for the German Cup, value £200, presented by the German community. Haddington's mishaps were not yet ended, for he had to yield the Shanghai Cup, 100 guineas, presented by the Shanghai community, for all horses, to Chieftain. The Glenealy Cup, 100 guineas, for Arabs only, fell to Forrester; and the Foochow Cup, of 150 guineas, for all horses, English excepted, to Traveller, beating Pons Asinorum and Hadji.

We (says the *China Mail*) are not surprised to learn that the state of China is rather perplexing to diplomatists in Europe. It has always been our opinion that the Celestial Empire was not a subject upon which it was safe to dogmatise. English journalists and their China correspondents have not been at all successful in their attempts to represent the state of the empire. Even book-men have signally broken down in the same task; and the duty of clearly explaining the condition of the Chinese empire, both in its internal state and its foreign relations, is, we confidently assert, still unperformed. The Chinese are the most civilised people in Asia. Those who dispute this require to be argued with upon the meaning of the term civilisation; but supposing that it should be agreed to understand the word as meaning the art of living together in societies, there is every reason to hold up the Chinese as the most civilised people in the globe. People living in Hong Kong fancy that they know Chinamen tolerably well, and they are really not far wrong. At the same time, it is one thing to know the Chinese character as represented by individuals and to arrive at a just conclusion with regard to the past, present, and future progress of the empire itself. On that point it is necessary to speak with caution.

If we were to lay hold of the most prominent feature in the Chinese character, so far as their statements are concerned, we should say that skill in diplomacy is their leading qualification. From the very commencement of our acquaintance with the Chinese, we have known and acknowledged this; and our continued intimacy with the rulers of this wonderful empire has only strengthened the conviction originally formed with regard to their diplomatic abilities. At the same time it must be confessed that nine men out of ten insist upon remaining in wilful ignorance on the subject of China. And it will have to be admitted eventually that English diplomatists have not given the matter that consideration and care which it deserved. An empire containing over three hundred millions souls is of importance from its sheer bulk and weight in the world, and it is quite impossible to discuss its affairs in an off-hand manner. English statesmen, however, with their habitual flippancy, have repeatedly disposed of the subject, but never successfully. Such being the case, we naturally hesitate in offering a decided opinion; but we think it will be found that a policy of firmness is the only real mode of treating our celestial acquaintances.

The fleet business of which we spoke last week threatens to be more serious than was to be expected. From private information, we learn that Sir Frederick Bruce gave orders for the withdrawal of the flotilla, and we scarcely require to state that he only obeyed instructions in that respect. It will thus be seen that the English Government are closely mixed up with this miserable affair. As for Mr. Lay, he will come out of the affair better than we anticipated, seeing that he held instructions from Prince Kung, in the form of a letter dictated by himself while in England.

CANTON.

A correspondent of the *China Mail* writes:—"At Canton the throng and bustle attending the China New Year is at its height. Shopkeepers have been doing a large stroke of business in the sale of goods suitable for presents, much the same as is the case in England, and the city has swarmed with beggars, to whom coppers are always freely thown about this season. Executions have been more numerous than usual of late, scores of criminals having been taken to that small piece of ground which Yeh rendered so notorious. In the course of the past fortnight our correspondent saw thirteen men being carried in a basket, and heavily chained, to the execution ground; their cadaverous features and the clinking of their fetters made them pictures of misery. One of them who was better dressed than the others said he was a literary graduate who had been seized by mistake, and unjustly condemned. Another, who looked a thorough rascal, called out to those who stared at him and asked what what they saw to wonder at his being carried to death, informing them at the same time that he should return to the world and try his luck again. Our correspondent conversed with a common-sense Chinaman on the increase of crime in Canton, but got no satisfactory answer. He was told that, while petty crime is generally on the increase towards the end of the year, shop-breaking, highway robbery, and night attacks by gangs of men had lately become much more frequent than usual. He also said, with some meaning, that, in times gone by, the Chinese used to look upon those placed above them in authority as possessed of more than earthly power and influence, but that the advent to the country of foreigners and their doings during the past twenty years had broken the spell, by proving that the mandarins had little power and less patriotism. There was now, he added, no bond between rulers and ruled, and consequently no confidence. The Government, for example, had been for months past in pressing want of funds, but there had been no hearty response from the people; the trade guilds had been taxed, but, as a body of them had appealed, the tax was withdrawn, and now the 'screw' was being put upon different grades of wealthy dealers, who, to escape the levy, had gone into the country; so that business was dull.

SIAM.

BANGKOK.

The exports to Europe for 1863 have been as follows, including the cargo of the Bangkok, cleared for London on 16th January:—Benjamin, 79 piculs; cardamums, none; hides, 1,061; horns, 709; pepper, none; rice, 4,708 piculs; sapanwood, 1,995 piculs; sticlac, 1,447 piculs; sugar, none; teel seed, 5,377 piculs.

To CHINA.—Cardamums, 3,537 piculs; hides, 2,243; horns, 320 piculs; pepper, 20,237 piculs; rice, 1,411,147 piculs; sapanwood, 46,366 piculs; sticlac, 185 piculs; sugar, 39,063 piculs; teel seed, 12,142 piculs; paddy, 20,326 piculs.

To SINGAPORE, INDIA, and JAVA.—Benjamin, 22 piculs; cardamums, 17 piculs; hides, 1,537 piculs; horns, 505 piculs;

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is dividedinto decimal parts of ten.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FOWLER—On the 22nd March, at Elie, Fifeshire, the wife of Captain David Fowler, late of the steamer Thunder, of a daughter.

GIFFORD—On the 11th February, at Shameen, Canton, Mrs. George Gifford, of a daughter.

MARRIAGES.

DENNE—MENZIES.—On the 31st March, at the parish church, Hampstead, by the Rev. G. A. Herklots, M.A., Thomas Denne, Esq., of Camberwell-grove, to Mary, daughter of the late William Menzies, Esq., of Kuripan, Java. No cards.

LANCA—COSTA.—On the 2nd February, Eugenio L. Lanca, to Filomena Albina da Costa, daughter of the late Major A. Fideles da Costa.

DEATHS.

BUDGE—On the 17th Jan. last, at Yokohama, Japan, Captain William Budge, of ship Mary Shepherd, aged 45.

BEADSLEY—On the 17th February, on board H.M.S. Melville, Hong Kong, John Beadsley, A. B. of H.M.S. Coromandel.

DAVIES—On the 1st April, very suddenly, at Grove-hill, Glebe, Camberwell, Eliza, widow of the late Rev. J. Davies, of Colombo, Ceylon.

DAILY—On the 15th February, at the General Hospital, Hong Kong, William Daley, Private H.M. 99th Regiment, aged 36 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: Feb. 8, Mayflower and Fiery Cross. From Newport: Johana Maria. From Cardiff: 10, President Harbitz; 13, Welf; 15, St. Julian. From Newcastle: 10, Kirkland; 12, Energie. From Shields: 12, Esmeralda.

At HONG KONG.—From London: Feb. 19, Siloma. From Glasgow: 21, Lotus.

DEPARTURES.

From SHANGHAI.—For London: Feb. 6, Anne Archbell; 11, Stornaway; 16, M. M. Peter. For Liverpool: 19, Cornelia. For New York: 10, Lettice Catherina.

From FOOCHOW.—For New York: 9, Dorette.

From AMOY.—For New York: 5, Neuhof.

VESSELS LOADING.

At SHANGHAI.—For London: Spirit of the North, Stornaway, Samuel, and Thos. and Rebecca. For Liverpool: Polmaise, Fort William, Blackburn, Berdinka, Antelope, and Bentinck. For New York: Heversham and Lord Collingwood.

At FOOCHOW.—For London: Robert Henderson.

At HONG KONG.—For London: Corniston. For Liverpool: Patrician, Vanguard, Helena, J. L. Dimmock, Nancy Bryson, and Crest of the Wave.

THE AGRA BANK.

THE thirtieth annual meeting of this Bank was held at the offices in Cannon-street, on the 2nd inst., when the report, which we noticed in our last, was unanimously agreed on. The dividend on this occasion has been increased to £18 per cent. It is proposed to alter the name of the bank to the "Agra and London Bank," and it was announced that premises had been secured in a more central position—viz., at the corner of Lombard-street and Gracechurch-street. This has been found necessary owing to the large increase of the London business. The balance-sheet, &c., will be found in another column.

THE NEXT MAIL FROM CHINA.

We understand, from private telegrams, that the next incoming mail, with dates from Hong Kong to the 1st of March, had arrived at Suez.

THE ANGLO-CHINESE FLEET.

The gunboat *Peking* has arrived home from China. As before intimated, Captain SHERARD OSBORN, in conjunction with the Lords of the Admiralty, will negotiate the sale of these vessels, all of which may be expected home shortly.

MOVEMENT OF SPECIE.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton, on the 4th inst., was:—In gold, to Alexandria, £6,500; to Aden, £1,000; to Galle, £1,104; to Madras, £3,661; to Calcutta, £1,920. In silver, to Madras, £70,932; to Calcutta, £55,000; to Penang, £10,500; to Singapore, £10,500; to Hong Kong, £16,073; to Foo-chow-Foo, £400; to Shanghai, £11,375. Total, in gold, £14,185; in silver, £174,780.

THE KAGOSIMA INDIGNATION.

(THE TIMES.)

The gentlemen whose indignation was kindled to red heat by the news of the reprisals upon the Prince of Satsuma ought to be glad to learn that there was no foundation whatever for the terrible tragedy they imagined. They will be able now, not very usefully perhaps, to retract the scandals upon our common country with which they feasted the greedy appetites of our friends and well-wishers upon the Continent. No densely packed Japanese city, containing 180,000 inhabitants, has ever been burnt to the ground. No panic-stricken crowds stood jammed in the narrow streets while shot and shell ploughed chasms in the mass. No women and children were trodden to death. No merciless British seamen were wilfully encircling these wretched multitudes with a zone of fire. There is no stillness of death and black plain of embers where Kagosima once stood. The highly wrought pictures which interested the House of Commons, the ambitious flights of talk which excited the British public, the boldly sketched narrative which scandalized the French press—all represented nothing but the dreams of gentlemen whose impatient imagination scorns the vulgar fetters of evidence, and the fervid fictions of professed humanitarians, who never are so swift to sympathize and so prompt to condemn inhumanity as when some vague rumour seems to place their own countrymen in fault, or when the conduct of our own officers serving in distant parts is challenged or misrepresented.

Perhaps we shall be thought rather impertinent now in turning back to the dishes of a banquet long since enjoyed, in offering a bill for a luxury of sympathetic feeling long since indulged, in testing the genuineness of a burst of generous indignation long since spent. There are some, however, to whom all this fine sentiment did not seem so generous; for, while it kindled so brightly as to exhibit in the highest post of honour the eloquent and indignant denouncers of the imaginary wrong, it had the effect of showing off our officers in a most unenviable light. Japan is, no doubt, a long way off, but it cannot be pleasant, even when dwelling at Japan, to find oneself made the villain of a popular fiction. If the fable of the massacre at Kagosima had been told a generation since, it is very probable that the Minister of the day would hardly have been rescued by posthumous history from the odium of having ordered that massacre, and the officers upon the spot would certainly have remained all their lives under the imputation of having been the agents of his cruelties. But even Japan has become within echoing distance of the walls of Westminster. Colonel Neale and Mr. Consul Winchester and Admiral Kuper have already had time to read the harsh things that have been said and written of them in England, and they have had time not only to read but to reply. In a tone of astonishment as well as deprecation they claim to substitute a statement of facts for the unfair inferences and gratuitous assumptions which have been raised against them in England, and their protests have been printed in a small Parliamentary paper. Of course the matter is very much out of date. To go back upon these facts is almost like picking up the cartridge cases when the field-day is over; but as these officers wish to be set right in the face of the world the public must bear with us while we endeavour to help them to their object.

It turns out, then, that the "massacre of Kagosima" was an immense "mare's nest." The city of 180,000 inhabitants never existed except in the imagination of those who, without caring to inform themselves, undertook to tell their countrymen all about it. There was, indeed, and there is, a town of Kagosima, which in its most prosperous and populous state contained about one-fifth part of that number of people; and this town consists of a congregation of "huts and paper houses," under the paternal protection of the Prince of Satsuma. Among and around these huts and paper houses at the time of "the massacre" were the Prince of Satsuma's batteries, manned by 6,000 soldiers and mounting a goodly number of guns. At some distance stood the Prince of Satsuma's Palace. It will be remembered that Admiral Kuper had received orders, not, as was ingenuously suggested, to invite this Prince "to deliver up his father to be hanged," but to obtain an indemnity in money for the outrage committed upon an unoffending riding party of Europeans, and to exact a promise of condign punishment of the actual murderers of our countryman, Mr. Richardson. For this purpose he was to seize the Prince's ships, and, if that was not sufficient, to put further stress upon him by first threatening to destroy, and, if necessary, ultimately destroying, his palace. The Prince had heard of all this through his friends, and, knowing that the squadron was approaching, he resolved upon resistance. As a preliminary measure, Satsuma ordered all the people of Kagosima to retire from the town into the surrounding villages. Of course they obeyed, and, when Admiral Kuper with his ships rounded the point, the soldiers and the batteries, the huts and the paper houses, were all he found opposite to his guns. The Admiral, having made a peace proposition in vain, proceeded, according to his instructions, to take possession of the Prince of Satsuma's steamers. When this was done a horseman was despatched to the palace by the Japanese to announce the fact. Satsuma sent directions that the batteries should immediately open fire upon the squadron. The Japanese Prince had underrated the resources of British seamanship. The ships not only returned the fire with effect, but, according to Japanese testimony now published, made the batteries so unsafe that the soldiers in reserve could not be induced to go into them to take the place of those who were killed. The ships, therefore, not only fired *at* the batteries, but fired *into* the batteries. It is clear from the Japanese statement of the difficulty of getting the soldiers to go into the batteries that the town was a place of comparative safety, and that the ships, therefore, were not intentionally or frequently dropping their shot among the huts. Necessarily, however, while the steamers were at the same time firing and striving with the hurricane which had set in, the artillery practice was not quite so accurate as the gunners had been accustomed to make on board the *Excellent* in smooth water. Some of the shells, no doubt many of the shells, burst among the huts and paper houses. The empty town was burnt, and the Japanese account is that "the typhoon was the cause of the extent of the conflagration, and in consequence of there being no people in the town to put it out." The batteries were silenced, the Japanese steamers burnt, the palace of the Prince was fired, and, in the absence of the inhabitants, the huts and paper houses of the city were incidentally destroyed. The result was that Satsuma immediately made his submission and promised all that was required of him, and when, early in last December, the agents of the Prince came to Yokahama to pay the £25,000, and give written assurance of their master's promise to punish the actual murderers of Mr. Richardson, they were able to boast that the huts and paper houses of Kagosima had arisen again, and that important city bore very much the same appearance which it presented before the bombardment. The whole difficulty ended in mutual civilities between the people and the seamen as well as between the diplomatists and officers, and the Prince of Satsuma has confessed that the murder of Englishmen has been proved to him to be too expensive a luxury even for a first-class Daimio.

This authentic account of a necessary warlike operation varies very little from the impression which any candid mind might have received from the early news. It varies, indeed, very little from the view we took of the affair when the clamour was at the highest. Of course, we could not have guessed the fact that Satsuma had cleared the town of its inhabitants in preparation for the fight he was resolved on, but it was easy to suggest, as we did at the time suggest, that a rhetorical account of this transaction, containing no word of allusion to the tempest, which was obviously the chief agent in the conflagration, could not be fair either to our officers or to our national reputation for humanity in the public opinion of Europe. The Japanese account of the transaction is conclusive. They have been more candid than our home critics, and would seem to be less anxious to tarnish our fame for humanity than some of our own countrymen. Perhaps it may be said that the Japanese scarcely understand the meaning of civilised restraint during moments of active hostility, and, when they boast of how little they have suffered, rather propose to themselves to detract from the exploit of our squadron than to testify to our moderation. But, however this may be, their facts are decisive. Kagosima was an empty town, and was accidentally burnt down because there was a high wind blowing when it was partly set on fire, and because there was no one to put the fire out. As to the Satsuma Palace, it was purposely destroyed as a punishment for harbouring and defending the murderers of our countrymen. With these facts fairly put before them, we hope our French censors may recover the tone of their nerves, and return to the serene contemplation of their Algerian campaigns, while our American moralists may indulge their sympathies by observing the peaceful security of the women and children inhabiting Charleston. It would be too much, we fear, to ask of our own peace party at home to pause on future occasions for certain tidings, though it is, we submit, very hard that we and the reasonable portion of the press and public must continually incur the odium of defending "massacres" while only contradicting these gentlemen's fancies. We protest that it is not fair they should enjoy all the honour and glory of indignant virtue while their fictions live, and find certain amnesty in the shortness of the public memory when their stories are at last exposed.
